### THE CROWN LANDS.

The Land Revenues of the Crown in the United Kingdom have been collected on the public account since 1760, when George III. surrendered them in return for a fixed annual payment or Civil List. At the time of the surrender the gross revenues amounted to about £89,000, and In the year ended March 31, 1919, the total

Receipts by the Commissioners were £2,228,296, of which amount \$753,94s was derived from Crown Rents, and £44,026 from the Mines. The Expenditure was £367,56s, of which £13,264 represented the expenses of the Woods, Forests and Land Revenue, and £73,898 the Mines. The sum of £766,000 was paid to the Exchequer in 1918-1919, being a net sum from which no deductions have to be made for administration.

provisions of Section e (1) of the Civil List Act, 1910. MRS RACHAEL ADDIS, in recognition of the scholarship of her late husband. the Rev. W. E. Addis, and in consideration of her circumstances ...... £50 MADAME ALBANI GYE, in recognition of her distinction as an artiste, etc. ..... ### LIPE ASSURANCE.

THE list on the following two pages contains the names of all the more important British Life offices, of eight Colonial companies (marked C), and of three American effices (marked A), all of which transact business in this country.

CLARS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allosted to participating policy-holders (M), or whether the company has proprieturs by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are indicated by letters in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches.

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended as December, rgsp.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a studied indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring

parts of the risks.

EXPENSES.—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 35% of which about 5% is expended on commission and 75% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is

large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policyholder through reduced premium being equivalent to an immediate cash bonus.

INTEREMENT.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. Owing to the unprecedentedly high rate of incometax now leviable, a reduction in the net yield may be anticipated in nearly every case in the

immediate future.

VALUATIONS.—The last two columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate Various mortality tables are employed, those most usual being known as the  $\mathbf{H}^m$  and  $\mathbf{O}^m$ , and the corresponding Tables  $\mathbf{H}^m(s)$ and  $O^{m(3)}$  which exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the hability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The Om and Om (5) tables in conjunction are more stringent than the Om table alone, the Hm is more stringent than the American, and with every table the lower the rate of interest assumed the more stringent is the valuation.

### FIRE INSURANCE RATES.

Most large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £zeo insured sgainst fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity, 18. 6d.

Household goods therein, usually as.

Policies are issued by some companies embracing all risks incidental to private houses in one amount.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from as.

Stock and Utensils in trade, fixtures, and household furniture in such shops and ware-houses, from as.

Private Dwelling Houses, brick and timber built and tiled or slated, in no hazardous proximity, from ss. 6d.

Most fire insurance companies transact accident and miscellaneous business, and if a strong company he selected with a reputation for liberal dealing it will probably be found to the advantage of a householder that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. A number of fire offices are prepared to issue policies of an inclusive character for household purposes, combining in one contract pro-tection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, &c., and insurance against donarion, there, are, and insurance against questic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of 5s. per £zeo of the full value of the contents of the house. Fire insurance of the house itself is not included, house, in this attribute. The advantage of however, in this estimate. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

without participation in profits. If without participation, both sum assured and premiser remain unchanged. If with participation, a higher premium is charged, and bonuses m usually be applied either to increase sum assured or to reduce premium, if not discounted for cash. An alternative plan is available in some offices whereby future bonuses are anticipated and used to reduce premiums from the outset. This is called the "Discounted Bonus" or "Cost Price"

ANNUAL PREMIUMS FOR WHOLE LIFE system. If the bonuses actually declared exceed those anticipated, the difference is credited to the policyholder; if, however, the anticipated Life assurance may be effected either with an abonuses exceed those declared, the balance without participation in profits. If without participation, both sum assured and premium semains as a debt. Policies should only be remain unchanged. If with participation, a effected on this system in companies which the participation and bonuses which are point to good and consistant bonus records. can point to good and consistent bonus records, and whose valuation reserves are particularly strong.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday otherwise stated.

### AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £200.

The next table shows the annual premiums payable throughout life for assurance of £x00 at death with participation in profits. Premium rates alone are not sufficient for judging the An office relative attractions of life offices charging a high premium may give bigher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the rates are usually

high to commence with, but are greatly reduced after a few years Some reserve bonuses for the older classes of policyholders, and in these cases lower premiums than the average are usually charged. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation bonuses. especially in cases of endowment assurance.

<sup>•</sup> Eagle, Star & British Dominions—Lower rates are quoted for "Sceptre Abstances Section" | London Life—These rates are for "age not exceeding" that referred to, allowances being made for quarters of go, and are under the Society s (full participation) reversionary bonus plan | 5 dun Life—Ecquetions granted to total abstainers—Non-medic of business is also transacted a Abstances Rates are for nearest green when the second response and General—rates quoted are for nearest britanday.

ENDOWMENT ASSURANCES. Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realisation of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no

medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-earning capacity—see first page of Life Assurance section.

## ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100. WITH PROFITS.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death. The

<sup>•</sup> Ragle and British Dominions—Lower rates are quoted for "Sceptre Abstainers Section." † Loadon Life, see note to preceding table a Abstainers Rates. † Loadon Life—Reductions granted to total abstainers. B Matures on birthday of assured I shattnes organitiveness; of issue, "Wesleyan and General—rutes quoted are for "mearest." [Juithday.]

This Table shows amount of Annuity granted for every fixe paid. The age is calculated from the last birthday, but many offices quote intermediate rates for every half or quarter year. By some a proportionate amount is payable to day of death. Some Companies pay whole or part of stamp duty. See note as to rates on introductory page.

The Annuity is calculated as payable half-yearly. In some cases the quarterly rate is the same; in others it is a little less. Some offices grant special terms in case of impaired lives.

			URANCE AND ANNUITIES.

**(b)** 

Apart from the immediate protection thereby given, a life or endowment assurance policy, if offected in a first-class bonus-paying company, provides exceptional opportunity for the remu-nerative investment of savings. Policyholders can claim relief from assessment to this duty in respect of life assurance premiums not exceeding in amount one-sixth of their income, in most cases

The selection of the office best suited to requirements and likely to produce the heat results should be carefully made, but the study of any tables or suggestions is not sufficient to enable ersons without technical knowledge to gauge the respective merits of the various companies. There are many good offices, and in the most select class some are better adapted than others for particular purposes, and large sums may be saved or earned by intending proposers through obtaining reliable advice before a proposal is

made. Medical examinations are sometimes dispensed proposals, but policies with in the case of new proposals, but policies in these instances are usually subject to certain restrictive conditions of a temporary character. (k) Non-Medical Examination policies.

INQUIRIES .-- ()n receipt of an inquiry containing particulars of requirements (accompanied by 58.) addressed to "The Insurance Editor, rs. Warwick-lane, E.C. 4," advice will be given as to the system and policies hest adapted to the special requirements. Inquiries should state the age at and date of next birthday. The following are suggested as the policies most-likely to be required :-

,, first 5 years. (c) limited SO OF SS YESTS. without profits. (d) (e) Endowment, decreasing premium("net cost"). uniform ., for first 5 years. half

(a) Lye, uniform premium for whole life

half

without profits 11 Educational Policy. ,, to mature at age 55, 60 or 65 (combined with sickness and accident benefits up to age selected).

and the man description of the process of partial and
sand the man of the process of the partial and to India,
and the East (leaving London Fri. mbrining instead of
Thi. evening. There are at present every vestically a
merating mult to Paris, and afternoon to Paris and
Brussels. Packets may be posted in this usual manner,
but must have "By Air Hall" prominently marked in
top left-hand corner (preferably on special blue libble),
obtained presis from Head Post Offices or by writing to
Secretary, G.P.O., London, E.C. S. Fee: 3d. per ex.
extra, paid by postage stamps in top right-hand comet,
Express delivery is obtained by further stamps (et. per
packet), the word "Express" being written just below
"By Air Mail." (There is also a service at different rates
from Toulouse to Rabat, Morocot.)

#### MONEY AND POSTAL ORDERS.

The Chief Money Order Office is at Mahor Gardens, Holloway, N. 7.

ADVICE OF PAYMENT: 3d. for inland, \$14d. for foreign and colonial orders (to certain countries).

## Inland Ordinary Money Orders.

The poundage charged is, for sums not exceeding £3, \$d.; £10, \$d.; £20, \$d.; £30, \$d.; £30, \$d.; £30, \$d.; £30, \$d.; £30, \$d.; £40 (maximum), 1s. No order may contain a fractional part of 1d. No poundage is charged for M.O. in payment of Customs, Excise and Inland Revenue if the official "notice to pay" is produced, or of Savings Certificates. The rules and regulations are en the forms issued.

### Inland Telegraph Money Orders.

Money may be transmitted by Telegraph Money Order from any Money Order office which also despatches telegrams, and may be made payable at any Money Order office which also delivers telegrams.

Poundage at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of \$d., and cost of official Telegram of Advice. If the order is to be delivered at payer's address any charge for porterage must be prepaid.

#### Postal Orders.

Postal Orders.

British Postal Orders are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weak days. They are also issued and paid in almost all parts of the Empire; in Egypt, and at the British Agencies at Panama, China (p. 25, note\*), and Morocoo (p. 256, socet, except Rabat). They are paid (but not issued) at \$8\$ Canadian offices, and paid in Australia only when issued to soldiers. They are issued, with a counterfoil to be retained by the sender, for every \$6. up to \$50., and \$for \$35.; cost: \$6. to \$2. \$6... 1d.; \$6. to \$50., and \$for \$35.; cost: \$6... \$7. They must be presented for payment within 3 months from last day of the month of issue, or a fresh commission will be obarged. Adhesive British Postage Stampa (not perforated, Adhesive British Postage Stamps (not perforated, and not exceeding 8 in number) may (except for Canada) be affixed to the face of an order, to increase its value by 1, 2, 3 or 4 peace.

#### Ordinary Money Orders Abroad.

Orders payable in British Dominions, Colonies Protectorates, and Postal Apendia, or in Register France, Italy, Japan, Portugal, Riminiti, an most of their polonies, 54. every \$1 or fraction

<sup>&</sup>quot;The parcel post with the United States is carried on by means of two distinct services, namely, an official service (United States Post Office) and a semi-official service (Amesican Express Cosinary). Customs charges cannot be pressed by sender in the official services. A parcel downsied by the semi-official service many, without oxtra charge, be sent through New York in Bond for Customs cammination at any one of the "United States Ports of Entry," or Inhand Custom Houses. The ad-dressees must, however, make arrangements for the delivery after clearance. Such parcels must be plainly marked by the sender. In Dond 4: naming the Inland Port chosen; and the mass words must also be written in the sense handwriting on the Customs declaration and dispatch note. (Mails twice weekly.)

in British S. and S.W. Africa, Ls. Sd. each £1, \$2. each 4s, or fraction; in U.S.A., special rates; sliewhere, 4d. every £1. Idmits of amount, £30-£40.

## Telegraph Money Orders Abroad.

Only to some colonies and foreign countries, g.; so Canada and U.S.A. (also New Zealand and Union of South Africa, certain towns only), but not Australia. Poundage at same rate as for Ordinary Money Orders abroad, plus cost of official Telegram of Advice (at deferred rate if desired, in British Possessions only), plus supplementary fee of 6d. for foreign countries, for Cauada and Newfoundland 6d. ordinary, or 1s. deferred rate, for other British Possessions. 1s.

## TELEGRAMS.

### Inland.

Telegrams may be posted, or handed in at a telegraph office, or to a rural postman. Rate throughout British Isles, 18 words or less 1s., each further word  $\frac{1}{2}d$ ; the address is charged for; payment in stamps affixed to the form by the sender. Original, redirected, or reply tele-grams handed in on Sundays, Good Friday, or Christmas Day are charged 6d. extra. Replies may be prepaid up to 48 words; the voucher issued to addressee may be used, or its value refunded to sender, within 13 months. Receipt for charges 1d. Certified copy 3d., sometimes more. The charge includes delivery within three miles of the nearest telegraph office, or, if this be a head office, within the town postal limits—beyond that limit the charge is 6d. per mile, calculated from the free delivery limit, to be paid by sender. Telegram forms are issued gratia. Usual hours 9 a.m. to 7 p.m. Some Offices 8 a.m. to 8 p.m. (see below and p. 400). For Sunday and Holiday telegrams, see above, below, and p. 400.

LATE Fars —A telegram may usually be got through from an office which is open to one which may, perhaps, be closed for telegraphic business by payment of the following extra fees: i.e. for the telegraphist, is for the measurer, and 6t. an hour for the telegraphist if he has te wait for a reply. In the same way postmasters may scoept telegrams after the usual hours on payment of is for the postmaster, is for the telegraphist, and is for a measurer if it be necessary to call the telegraphist.

for a messenger if it be necessary to call the telegraphist Countyme, &c.—Plain language, is charged for according to the number of words : all other words or unintelligible combinations of letters are charged one word per letters. The following count one word:—(i) All names of towns and villages in U.K. (not of branch or sub-offices or districts in towns, unless in addition to street name); (e) all names of railway and easignment stations (not in towns) with public telegraph, (3) words ordinarily written as one or with hyphon, including "outline," or. (4) Names with prefix "St." Pe. "De la. "O." "Nac." but not hyphened suraness (3) each five figures: (6) each initial, except London Postal Districts (n. 389-Am.—P.—H.M.A. (in address), which are one word each group; (7) signs of punctuation, etc.

Nionr Thunnard Levrens in plain language, for delivery by first morning post, may be sent before midnight between towns whose Head Telegraph Offices are open always (see below), at in for 38 words or less, and id. per 8 words beyond 39.

and id. per 2 words beyond 38.

## SUNDAY AND HOLIDAY ARBANGEMENTS.

SUMBAY AND MOLIDAY ARRANGEMENTS.

On Sumbay throughout the U.S. no Farrel Fost (whether express or otherwise.) Money and Postal Grade. Assistage Bank, or Express Delivery (Service No. 1. p. 392) business is transacted. In London all but 25 post effices are closed. These open in the morning, 30 of them (including those on p. 365, but at 50 pring stein Paddington) also in evening (stamps, telegrams). About W stations, chiefly S. of the Thamea, send belegrams, mostly at train times (see also p. 363). There is no delivery of letters (scrapp of telephone express letters, as well as of express correspondence fully prepaid, as I found of express correspondence fully prepaid, as I found that the telephone express letters, as well as of express correspondence fully prepaid, as I found in Singley." There is no general collection till 36 p.m. to midnight; letters, eta, intended to go by provincial Sunday night mails, but not poeted in time for the last saturday collections, must be posted, with extra ½d stamp, in special boxes at one of 25 offices (before times varying from 4.25 to 5 p.m.) or at one of the 9 shiel railway termini (before 5 pm., or, at the appropriate terminus, as late as times between 2.25 and 3.25). Letters may be redistored at most of the 25 post offices up to 5 minutes before box close; or with la fee at the Sorting Carriage on the mail train at the appropriate terminus, as late as times towers. 25 and 3.25, including Carriage on the mail train at the appropriate terminus, at times varying between 25 and 3.25, outs. The stamps, telegrams, register up letters (Scotland 5-15 a.m.). Entire the ordinary state of the state o

## POSTAGE STAMP RECORDS.

In Paris on May so, man, the sum of \$9,500 francs (£3,650) was paid for a speciment of \$1.00 finding) Mauritius stamp of Mag sette, and £1.470 for a speciment of the set (vermilion) stamp of the same issue. The previous highest price was £1,400 for a set Mauritius stamp.

Agreement for lease not exceeding 35 years, same as actual lease.

\* Section 1g of the Revenue Act, 1911, provides that in cases where the consideration or any part of the consideration consists of any money, stock, or security (other than rest), the amount or value of which does not exceed \$200, and the instrument contains a certificate that the transaction does not form part of a larger transaction or of a series of transactions in respect of which the consideration other than rest exceeds figer duty shall be charged at half the rates set out under the heading "Conveyance or Transfer on sale of

any property," &c.

The Section, however, does not apply in any case where part of the consideration for any lease or tack consists of rent, and that rent exceeds £30 a year.

LEGACY AND SUCCESSION DUTIES :-- Also see " Estate Duty."

If the deceased died on or after the ast June, 1881, every pecuniary Legacy or Residue, or share of Residue, although not of the amount or value of £30, is chargeable with Duty by the 44 Viot. c. 12, 8. 42.—Except in the cases of small estates, see note to Estate Duty.

No succession duty is payable where the prin-cipal value of all the successions on the same death does not amount to £ 100 (15 & 17

Vict. c. gr., s. z8).
Rates of duties payable on legacies, annuities, and residues, and of Succession Duties where deceased died before 1st July, 1868, or where

Estate Duty, Finance Act, 1894, is payable.
To Husband or Wife or Children of the
Deceased, or their Descendants, or to
the Father or Mother or other Lineal Ancestor of the Deceased (see above)

Exceptions.—Estates not exceeding £15,000.— Legacies and successions of less than £1,000 Legacies and successions of less than £x,000 (£x,000 in the case of widow or child under the age of az of deceased), whatever may be value of whole estate.

To Brothers and Sisters of the Deceased,

or their Descendants .....£5 per cent. To Brothers and Sisters of the Father or Mother of the Deceased, or their Descendants .....

To Brothers and Sisters of the Grandfather or Grandmother of the Deceased, or their Descendants

To any Person in any other degree of collateral Consanguinity, or to a Stranger in Blood to the Deceased

Where deceased died on or after 1 July, 1888, and Probate or Estate Duty is not payable, Succession Duties for the relationships above are at

rates of 11/4, 41/2,61/2,71/2, and 111/2 respectively. The Husband or Wife is chargeable with Estate Duty and Legacy and Succession Duty; and the Husband or Wife of a relation is chargeable at the rate at which the relation would be charged.

Penalties.—Persons paying or receiving any Legacy, Residue, or Share of Residue liable to Duty, without taking or signing the proper Receipt for the same; persons not giving notice of a succession, or not delivering an account, are subject to certain Penalties.

LETTERS OF ALLOTMENT AND OF RENUNCIATION. Less than  $\pounds g$ , zd.;  $\pounds g$  and upwards, 6d.

Life Insurance.—Allowance of duty may be chilmed on the amount of premiums paid for insurance of self or wife in app Companies legally carrying on business in the United Kingdom, if not exceeding one-sixth of the net personal income; but the amount allowable in respect of any preinium for secur-ing a capital sum on death not to exceed 7 per cent. of the extual sum satured, nor in respect of any premium for securing any other benefits, more than £100 in all.

RESIDENTS ABROAD. -- No exemption or other relief is given to persons not residing in the United Kingdom. Exceptions: British subjects, present or former servants of the Crown, widows whose late husbands were in the service of the Crown, missionaries, servants of native States under British protection, residents in the Channel Islands or the Isle of Man, and persons, previously resident in the United Kingdom, residing abroad for the sake of their health or the health of a member of their family.

DOMINION INCOME TAX .- Relief is granted under certain conditions in the case of a taxpayer who has paid, or is liable to pay, United Kingdom Income Tax on any part of his income, and who proves that he has paid Dominion Income Tax for the same year in respect of the same part of his income.

SCHOLARSHIPS.—Income from a scholarship held by a person receiving full-time instruction at a university, college, school, or other educational establishment is exempted from Income Tax (including Super-Tax).

STANDARD RATES OF INCOME TAX .- The Income Tax year is from April 6 to the following April 5. The following were the standard ing April 5. The following were rates for the years mentioned:--

#### POST OFFICE TELEPHONES.

\_\_\_\_\_\_

Lendon Telephone Area. - The office of the Controller of the London Telephone Service is at 144A Queen Victoria St., E.C. 4; Tel. City 2000.

The Raice are under revision and may be altered. On Nov. 30, 1929, they were: Annual Subscription for an unismited number of calls (unlimited or for an unusual number of calls (unlimited of fat rate), £80; £17 for second and subsequent connextons for same subscriber, premises more than 8 miles from exchange charge £1 15s. every additional furlong (ase yards). Extension lines connecting parts of same premises, from £1 10s.; connecting separate premises, from £4 10s. (special rate for measured services), with supphers of £1 wheat it is necessarily off a new surcharge of £1 where it is necessary to fit a new awitchboard.

Message Rate, within the County of London, as annual subscription and for each call to a subscriber on an exchange within the County of London 1d. (outside the County 3d.). For con-nexion to an exchange outside the County of London the annual subscription is £4, and for each call to a subscriber on the same exchange id. (to a subscriber on another exchange within the London Telephone area \$2.). A minimum amount is payable annually in advance on account of calle (both inside and outside the County of London) of £1 10s.

Ionon) of £, 10a.

Transfeatle Felegrams, etc.—Private subscribers may use their lines for trunk messages, or for sending telegrams, on paying a deposit to cover the credit given; also for receiving telegrams addressed to their exchange and number; and letters arriving at G.P.O., London, early Sunday Morning can be delivered on Sunday by telephone to subscribers (2d. every 30-words, exclusive of pestage). Call Office Res, for subscribers or others, 2d. each 3 (night, 4) misutes. The public may dictate telegrams from means call offices by paying dictate telegrams from many call offices by paying usual fee besides telegram charges.

New Subscribers.-A surcharge of £4 (in addition to the above rates) is made for each new subscriber, and also where existing lines are taken over by other parties.

Outside London Telephone Area.—Tariff rates on application to the District Manager.

Telephone Trunk Lines .- These connect Exchanges in different towns. Rates in day-time:-4d. for every 25 miles up to 100; 8d. for every further 40 miles. Special rates are charged over submarine lines. 8 minutes are allowed; on their expiry the option of another 8 minutes is given. At Call Offices, double fee should be previously deposited; or the line may be engaged outright for the maximum of 8 minutes. The charge for a 8 minutes conversation during the night period from 7 p.m. to 7 a.m. is the same as for a 3 minutes conversation during the day. During the night period also a 8 minutes conversation may be had for half the day for when that amounts to 1.4 december 1. the day fee when that amounts to le. 4d. or more. When the day fee is ls. the night fee is \$d.

### STOCK EXCHANGE COMMISSIONS.

COMMISSIONS for buying and selling stocks and shares have risen since xor4. The new rates and shares have risen since 1924. The new rates are three-sixteenths per cent. for Consols and Annuities, and one-quarter per cent. for all other Government Stocks. Railway stocks are charged at the rate of res. per cent, on the actual money. For bargains involving sums up actual money. For bargains involving sums up to fixe the minimum charge is res, and those above fixe the minimum is fix. These are stock Exchange charges. For stock in the register of the Post Office Savings Bank, the brokerage varies from 9d. for amounts up to fix to se. 3d. per fixe of stock. For Stock Exchange transactions there are also stamping fees as well as those charged by companies for registering transfers. Television Compatibility of the Compatibility of th

WHEN a birth tames place, getteral information of it must be given to the Registray and the register signed in his presence, by one sof the following persons—a. The father or mother of the child. If they fail, a. The occupier of the house in which the birth happened; z. A person present at the birth; or, a. The person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. One of them must, within as days of the birth, give to the Registrar by word of mouth the information needed to enable him to register, and must sign the register in his presence. If they fail to do this without reasonable cause, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above ... BIRTHS. ... their failure, one of the other persons above named must give personal information and sign the register within the same period. If at the end of 4s days no one has given information and signed the register, the Registrar may write to any one of the above-mentioned persons, requir-ing him or her to come to him for that purpose, at a stated time and place. Any person who falls to comply with this requisition will become liable to a penalty of forty shillings. Not only will lis-bility to a penalty be avoided, but the registra-tion of a birth will be free when it takes place within 42 days (but in Scotland the period is at days), unless either of the persons above named sends to the Registrar a written request to come and register at his or her residence or at the house where the child was born, when the Registrar on so attending may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the Superintendent Registrar, and on payment of fees, amounting to five shillings, to him and the Registrar. After twelve months a birth can be registered only on the Registrar-General's express extherity and on payment of further fees authority, and on payment of further fees, amounting to ten shillings. In Scotland, after the lapse of three months, it can only be registered on the authority of the Sheriff of the County. No birth occurring in England and Wales can be registered after the lapse of seven Wales can be registered after the lapse of seven years from the date thereof. The only legal proof of age and place of birth is afforded by the civil registers, which the law now requires to be made as above described. In districts where the Notification of Births Act, 1907, has been adopted by the local authority, notice of every birth must (subject to a penalty in case of default) be given by the father, or person in attendance on the mother, to the district medical officer of health. The notice must be sent by post within 38 hours of the birth, and is to be in addition to and not in substitution for the in addition to, and not in substitution for the notices above mentioned.

#### BRITISH NATIONALITY.

The following is an abstract of the British Nationality and Status of Aliens Act, 1914, which consolidated and amended the potmon law and the status law previously entaiting on the subject of British Nationality and Naturalisation :—

BRITISH NATIONALITY .- The following are British subjects :-

Every person born, of whatever perentage, within His Majesty's Dominions and allegiance.

2. Every person born out of Bis Majesty's Dominions whose father was born within Bis Majesty's Dominions, and had not, at the time of the child's birth, lost the Estital nationality

so acquired. As to the shildren of naturalised British subjects, see below at (4).

g. Every person born dut of His Majesty's Dominions, Ag'ere Join, 1, 1913, Whese Jather's Juster was been within His Majesty's Dominions, provided that the grandfather was it the time of the father's birth, a British subject.

a. Every person born on board a British ship. g." Hvery person to whom a Cartificate of Naturalization under the Naturalization Act, 1890, or the British Nationality and Buths of Alleis Act, 1914, or of Re-Admission 16 British Nationality has been granted, of who has ac-quired British nationality by special Act of Parliament or by conquest or superation.

The wives (whatever their nationality of origin) of British subjects, asve in sertain cases where the man changes his nationality after

marriage.

7. The children of naturalised British subjects born out of His Majesty's Dominious, previded that they comply with one of the following

(a) in the case of a child born before January zat, żers.

(i) if a Certificate of Naturalization has been granted to his father or his mother (being a widow) before January 2, see, and he has become resident with such father or mother (being a widow) in the United Kingdom before that date while under age, or

(ii) if a Corbificate of Naturalization is granted to his insher or his mether (being a widow) after January 1, 1992, and his muine is included therein.

(b) in the case of a child born ofter January 1,

1915, (i) if before his birth a Certificate of Naturally sation had been granted to his father of his mother, or

(ii) If a Certificate of Naturalisation is granted to his father or his mother (being a widow) after January 1, 1945, and his name is included therein.

Loss or Bairiss Nationality.—A heistsh subject loses his British nationality:—

(d) if by any voluntary or formal act he be-comes naturalized in a foreign country;

(b) if, in certain cases, he makes a disclaration of alienage. These cases are:—

(i) where a person is a British subject by reason of birth in His Majesty's Dominions and allegiance of on board a British ship and is also by birth or iscomes during minority a subject of any foreign State, (ii) where a person is a British subject, but was born out of His Majesty's Dominions,

and

(iii) where a Convention has been made between this country and any foreign State, to the effect that any subject of that State who has been netwalled sid Extitid ambject may divert himself. that states :

(c) if during his minority his father has British nationality in arroundable which involve his acquisition by the child of a new authorality;

. See " Acquisition of British Manlah

- (d) in the case of a woman, if the marries on allen;
  - (M. B. A woman who was originally a British subject and loses British nationality by marriage with an alien does not regain British nationality on the death of hus-band or the dissolution of her marriage.

if in such a case she desires to resume British nationality she must apply for & Certificate of Naturalization.)

(e) in the case of a person to whom a Certifi-cate of Maturalization is granted after January s, 1995, if the Secretary of State revokes the Certificate;

(f) if the territory of which he is an inhabitant is severed from the Crown; of., e.g., the cases of the inhabitants of Hanover and Heligoland.

ACQUISITION OF BRITISH NATIONALITY .-- AB my acquire British nationality :--

(a) by special Act of Parliament; (b) by the conquest, annexation, or cession of the territory of which he is an inhabitant :

(c) in the case of a woman, by marriage with a British subject, and

(d) by naturalization.

Naturalisation .- All Certificates of Naturalation granted in the United Kingdon between May 13, 1898, and December 21, 1914, were granted in accordance with the provisions of the Naturalization Act, 1890. And this Act did not secure that a Certificate granted in any part of the Empire should be valid throughout the Empire.

Under the British Nationality and Status of Allens Act, 1924, every person to whom a Certifi-cate of Naturalization is granted in accordance with its provisions after Jan. s, 1915, is a British subject, not only in that part of the British Empire where the Certificate is granted, but also in the United Kingdom and is any Dominion which has adopted the Act, and in any other British Possession.

Persons naturalized prior to January 1, 1915 may, after that date, apply for a fresh Certificate of Naturalization under the new conditions.

In order to be eligible for the grant of such a Certificate in the United Kingdom, an alien

(a) during the eight years preceding his appli-cation have resided for not less than five years in His Majesty's Dominions (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) or have been for not less than five years in the service of the Crown;

(b) be of good character and have an adequate knowledge of the English language; and

(e) intend to reside in His Majesty's Dominions or to enter or continue in the service of the Crown.

Crows.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalisation may be obtained from a application to the Home office, Whitehall, Londen, 6. W.

The free payable to the Home Office is respect to the grant of a Certificate of Naturalisation is fixed by the Government of the day, and is at present £3, of which £2 is payable on submission of the application and the remainder on the grant of the Certificate. The £2 payable on

submission of the application is not returnable, whether or not a Partificate is granted.

N.B -- In the case of a woman who was a British subject previously to her marriage to an ution, and whose husband has died or whose marriage has been dissolved, the above requirements, both as to residence and as to fee, are relaxed.

DIATUS OF ALTENS -- Property may be held by an alien in the same manner as by a naturalborn British subject, but the title to such property does not confer any right on an alten to hold real property out of the United Kingdom, or qualify him for any franchise.

Aliens are not entitled to be tried by a jury de mediciate linguæ, but are triable in the same manner as if they were natural-born

subjects.

UNDESTRABLE ALIENS.—An undestrable alien—e.g., one who is without means, or who is a lunatic, or an idiot, or who has been guilty in another country of an extraditable offence—may be prevented landing in the United Kingdom. An alien may also be expelled from this country if he prove to be "undesirable" within the meaning of the Aliens Act, segs. His Majesty may by Order in Council impose further restrictions on alieus (see Alieus Restriction Act, 1914 as extended and amended sore)

#### BUSINESS NAMES REGISTRATION.

REGISTRATION OF BUSINESS NAMES ACT, 1916. This Act received the Royal Assent on as Dec., 1916. Section 1 requires registration, irrespective of nationality, by

(a) Every firm in the United Kingdom carrying on business under a business name entirely different from the names of the partners, or one which contains any addition to the surnames of the partners other than their Christian names or the initials thereof;

(b) Every individual in the United Kingdom carrying on business under a business name entirely different from the name of the individual, or one which contains any addition to his surname other than his Christian names or the initials thereof;

(c) Every individual or firm who, or a member of which, has changed his name, except in the case of a woman in consequence of marriage

The exception in (c) is inserted in order to exempt from registration a married woman trading in her married surname. A married woman trading in her maiden surname is required to register under Section 1 (b).

Section a requires registration by a firm, individual, or corporation carrying on business wholly or mainly as nominee or trustee for other persons, or acting as general agent for a foreign firm.

Provisor to these sections make registration unnecessary (x) where the addition to the surname indicates succession to a former owner; (a) where an "s" is added to the surname is a come where the partners bear the same surname; and (3) where the business is carried on by an official appointed by any court.

## Addresses of Registrars.

England and Walss-28. Russell Square, W.C. z. Soutland-Exchequer Chambers, Parlicment

Square, Edinburgh. Irsiand—Coloraine House, Dublin. Forms of application for registration can b obtained at these addresses. The fee for regis

tration is gr., which is paid by affixing a ger stamp (to be obtained at a pest office) to the form of application

Section 28 states that any individual or firm required to register by the Act must show, a de catalogues, trade circulara, show cards, and

business letters,

(a) in the case of an individual, his present Christian name or the initials thereof and present surname, any former Christian name or surname, his nationality if not British, and, if his nationality is not his nationality of origin, his nationality of origin; and

(b) in the case of a firm, the present Christian name or the initials thereof and present surnames, any former Christian names and surnames, and the nationality if not British, and, if the nationality is not the nationality of origin, the nationality of origin of all the partners in the firm, or in the case of a corpora-tion being a partner, the corporate name.

In order to keep the Register up to date Sec-

tion 6 requires that any change that may occur in the particulars registered shall be notified to the Registrar within 14 days of the occurrence of such change. The Board of Trade have power, however, to extend the period in which the notification should be made.

Section 23 provides that if any registered individual or firm ceases to carry on business, the individual (or if he is dead his personal representative) or the remaining partners, must notify the Registrar of such cessation within three months.

After an application for registration, or a notification of change has been registered, a certificate is issued, which by Section as must be exhibited in a conspicuous position at the principal place of business.

The forms registered are filed, and can be inspected, or certified copies thereof can be obtained, on payment of the prescribed fees The fees payable under the Act are-

(a) on registration, 5s.;
(b) on statement of change, as 6d.;

(c) for inspection of a registered form, 6d.;
(d) for certificate of registration other than

the first, as.;
(e) for a certified copy of a registered form, 6d for a folio of 78 words.

The Act imposes severe penalties for failure to comply with its provisions, and puts defaulters under serious disabilities as regards enforcing their rights under any contracts made during the default.

Among other matters in the Interpretation Clause (Section as) the following are impor-

tant :-

"Business" includes profession.

Reference to a change of name does not apply in the case of a British-born subject if the change was made before the attainment of the

A "foreign firm" is one whose principal place of business is situated outside His Majesty's Dominions.

#### CERTIFICATES

## OF BIRTHS, MARRIAGES, OR DEATHS.

England and Wales.—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to as, 7d, via, 14, 107 search, st. 6d. for the certificate, and sd.

for the sump affixed thereto. They can slimbe obtained from the registration officiar having the legal causedy of the registrate neel contribuing the eatry of which a cortificate is neguticed. Certificates of marriages in churches of the Church of England can also be obtained from the incumbent of the church in which the marriage took blees. marriage took place.

marriage took place.
Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament: Friendly Societies Act, 28st, Birth or Death, 22; Factory and Workshop Act, 29st, and for purposes of Elementary Education, Birth, 6d.; Savings Banks Act, 28st, Birth, Death, or Marriage, 2c.; National Insurance Acts, 28st and 28st Birth, 6d., Marriage, 22; Industrial Assurance Companies Act, 28st, and Trade Unions Amendment Act, 28st, death of child under 2e years of age, 2c., but only from the local Ravisters.

under 20 years of age, 14., but only from whe some Registers.

Scottish Registers of Births, Marriague, and Deaths.—Parish registers were instituted for these in 1851, but until the Registeration of Births, &c. (Scotland), Act, 1854, they were not properly kept in many cases. Extended may, however, be obtained from them on payment of as. 2d. for each entry, but to be valid evidence it must be shown that the registers from which the entries are taken were regularly kept. Lists of the old parish registers may be consulted in the offices of the Registers-General. sulted in the offices of the Registrar-General H.M. General Register House, Edinburgh, or of local Registrara. These old registers are in the charge of the Registrar-General, and since stage local registers have been transmitted to him at stated periods. Registers up to the and of ages are now in his possession. There is a general index to the registers which may be searched on payment of ss. A search of the index of a particular parish is ss. A fee of ses. is payable for a search of all the Scottish registers, and se. is payable for a search of a particular parish. An extract of an entry may be obtained an payment of se. zd. The office of the Registrar-General is open on weekdays between to a.m. and 4 p.m.

## COPYRIGHT.

Preliminary.-The law of copyright is contained in the Copyright Act, wass, which repeals all the earlier acts. It should be stated that no registration of copyright at Stationers' Hall is now necessary; copyright arises from mere

authorship.

Copyright defined.—"Copyright" means the copyright coproduce or reproduce the work or sols right to produce or reproduce the work or any substantial part thereof in any material form whatsoever; to perform a drama or deliver a lecture in public; if the work is unpublished, to publish it or in any substantial part. It includes the right to produce, publish, etc., translations; to dramatise a novel, or turn a drama into a novel; to make any record or film by means of which the work may be mechanically performed or delivered

For the purposes of the Act, publication means the issue of copies of the Act, publication means the issue of copies of the work to the public; and does not include the public performance of a drama, or delivery of a lecture, or exhibition of an artistle work, or the construction of an architectural work of art. The issue of a photo or engraving of a work of soulpidre is usu'a publication of such work.

– The author of a work Who come the copyright.—The author of a work in the first owner of the copyright; but furthe

is of a minister and to plate in made for valuable the parties by whose the work to work the copyright. It is not a server of the copyright of a server of the copyright. It is not a server of the copyright. The right set from the copyright. The right set from the copyright. The right set from the copyright of the copyright. The right set from the copyright of the work of the from the copyright of the work of the copyright of the work of the copyright of the work of the copyright of the work of the copyright. The right set of the copyright of th

Expeds else may reproduce the work of certain terms, which are prescribed in S. 2 of the Act. Execute prevision is made (by S. 25) for the duration of copyright in the case of joint authorship. In the case of a work published for or under the control of his Majesty, or any Government engartment, copyright vests in the Crown, and endures for as years from date of publication. In the case of a photograph copyright subsiste for a years from the making of the negative for a years from the making of the owns the copyright.

He who owns the negative prime face owns the copyright.

Assignment of Copyright.—The owner of a copyright may sessing it either wholly or partially, and either generally or subject to territorial imitations for all or any part of the period during which it subsists. Such an assignment must be in writing signed by the owner. But this is authled to the provise that no assignment pickin by a nather who is part owner (otherwise that by will) operates to give the assignee any rights begond the expiration of ay years after the author's death. The remaining rights then vest in the legal personal representative, not-writhstanding any agreement to the contrary. In its provise, however, does not apply to collective works, i.e., an encyclopedia.

Deferries of Books to certain Libraries.—A copy of every book must be sent by the publisher at his own expense to the British Yuseum within a mouth of publication. The publisher may also be required, by demand made in writing

also be required, by demand made in writing within twelve mouths, to send copies of any book he publishes to such of the following libraries: the Bodielan, Oxford, the University Thomass of the following Libraries at Cambridge and Dublin, and that of the Faculty of Advocates at Edinburgh. With

Libraries at Cambridge and Dublin, and that of the Faculty of Advocates at Edinburgh. With cartain exceptions cupies of all books must also be sent (if required) to the National Library of Walce.

Postawnous Works.—If an author dies before publication of his work (i.e., in the case of a drame, performance, and in the case of a fecture delivery, in public, copyright exists until publication and for a torn of so years thereafter. The owner of an author's manuscript, where much ownership has been acquired under the will, grined fisis owns the copyright. If the permet who owns able copyright of a deceased subhor returned to work which work, which is consequently withheld from the public, the Prity Control may order him to grant licenses on certain terms.

International Copyright.—The Act, may by Order in Council he applied to works published in a foreign country, or to works whose nuthers were subjects of any of the countries to which

the order related. Go Generally speaking, such an order, unless government concedes similar privileges to Britis subjects.

Infringement.—Anyone who does anything the

Infringement.—Anyone who does anything the sole right to do which is conferred on the owner of a copyright is an infringer. The following (f) Any fair dealing with a work by way of criticism, 'private study, or newspaper sum-(i) Any last desiring with a work by way or criticism, jerivate study, or newspaper sum-mary; (ii) where an author of an artistic work does not own copyright, his own use of media, stetches, etc.; (iii) making drawings or photo-graphs of (s) a work of sculpture or artistic crattensnellip, if permanently situated in a public place or building, or (e) of an architec-tural work of art; (iv) the publication of passages from works in achool books (sulfact to certain from works in school books (subject to certain limitations); (v) the publication of a lecture in a newspaper, unless the author has taken the proper steps to make it known that the lecture is copyright. Cupyright is intringed by anyone who (a) sells or lets for hire or by way of trade exposes for sale or hire; (b) distributes for the purposes of trade, (c) exhibits in public by way of trade; or (d) imports any work which to his knowledge infringes copyright. To permit a theatre to be used, knowingly and without consent, for the performance of a copyright drama is also an infringement, unless the person so permitting it was not aware and had no reasonable ground to suspect that the performance would be an infringement.

Remedies for infringement - The owner of a copyright may bring a suit for damages for and/or obtain an injunction to restrain infringement. If a defendant to such proceedings can show that he was not aware of and had no reasonable ground to suspect that there was any copyright, he will not have to pay damages. Proceedings must be commenced within three years next after the infringement. Articles which infringe copyright are the property of the owner of the copyright, and he may sue to recover them The Act also imposes penalties recoverable in a Court of Summary Jurisdiction on persons who sell or deal in infringing articles (see a. 31)

Importation of infringing comes.—An author may take stope in accordance with the Act to prevent infringing copies of his work being imported from abroad; and the Commissioners of Customs may make regulations as to the forfeiture and detention of such infringing copies.

#### DAYS OF GRACE

Bills of Exchange or Promissory Notes, payable at any time after date, have three days of grace allowed, thus, a bill dated z Jan. at two months' date is not due until March 4. There is, however, no such extension in the case of bills drawn at sight, or on demand, and those must be paid on presentation. In the United King-dom, bills falling due on Sunday are payable the previous Saturday, and in England and Wales and in Ireland bills falling due on Good Friday or Christmas I'ay are similarly payable on the previous day Bills falling due on Bank Holidaya are payable the day after.

#### PRATES.

In England and Waise.-Whom a death takes place, personal information of it must be given to the Registers, and the register signed in his prosence, by one of the fellowing persons:—z. A relative of the deceased present at the death,

or in attendance during the last filmes. If they fall, is flowe other relative, at the deceased in default of any relatives, y. A necon present at the death; or, the occupier of the house is which the death happened. If all the above-named fall, 4. An, immate of the house, or, the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. One of them must, within five days of the death, give to the Registrar by word of mouth the information needed, and must sign the register; or must within the same time send him written notice of the death, accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased during his last illness. The written notice will be useless without a legal medical certificate. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. If relatives present or in at-tendance fall without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named Isluire, one of the other persons above manner must give personal information and sign the register in their stead. It is important that every death should be registered and a certificate of registry be obtained from the Registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. Failure to obtain this certificate need not, however, delay the funeral, as it is the duty of the clergyman, if the certificate is not produced to him at the burial, to notify the Registrar thereof within seven days. If at the end of fourteen days one of the persons above mentioned has not attended to the registration, the Registrar may, written application, require any one of them to come to him and do so at a stated time and place. Any person falling to attend on this application will be liable to a penalty of forty shillings. Whenever the deceased has been attended during his last illness by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the Registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shiftlings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless on request it is effected at an informant's house, or at the house where the death happened, when a fee of one shilling will be payable to the Registrar. After twelve months a death can be registered only on the

Registra-feneral's express authority, and on payment of fees amounting to ten shiftings. In Soutand, the rules of registration are similar, but (1) the death must be registered within 8 days: (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, etc. (Scotland) Act, 1884, within 7 days; (3) the informant of a death receives from the Registrar s certificate that the death has been registered This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comto the keeper of the cemetery.

ply is under penalty in all cases.

CORONERS' INQUESTS.—Sudden deaths are suppush by the law to demand inquiry, and Corners inquests are held in cases of violent and unnatural deaths, such as the case of a parson stain or drowned, or dying suddenly, and

of any person dring in prison. Coroner to not obtained into the houses of persons for the introduce of holding inquests, but are sent for the introduce of holding inquests, but are sent for the person of holding inquests but are sent for the person of holding inquests but are sent for the sent of the dust of the body remains, the same situation as when the death occurred. Inquests are not to be held do sunday. Then the Coroner receives due pottice of a violent death, ossualty, or missafwanture, he issues his warrant or precept to summon a jury to appear at a perticular time and place for the purpose of instituting the inquiry, when, how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "probe of legals homises" and the number is immaterial provided twelve alrest. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person summoned as a winess is bound to attend, or renders himself liable to be fined in any sum not exceeding ess. liable to be fined in any sum not exceeding eas, the fine for defaulting jurymen being La. In Scotland there is no Coroler. In ordinary

TAU.

In Scotland there is no Coroller. In civilinary cases of sudden death a private inquiry is held by the Procurator Fiscal (a Crown official who is the Public Prosecutor in criminal cases in every County, see p. 350). The result of such inquiry is reported to the Lord Advocate. In the case of a death occuring in the course of an industrial employment, and in every case in which the Lord Advocate may so order, a public enquiry is held before the Sheeff and a surheld before the Sheriff and a jury.

#### DIVORCE.

Preliminary.—Matrimonial suits may be conveniently divided into three classes, vis. (a) those in which a declaration against marriage is sought; (a) those in which the marriage is sought to be upheld; and (a) those in which the marriage being admitted, partial or complete divorce is sought.

(1) Nullity of Marriage.—Marriage is void ab initio if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no coment, or if one of the parties was insane; but it is only voidable if one of the parties was under the age of consent (14 in the case of males and zs in the case of females). Inability to consummate a marriage may also be a ground for avoiding it. In such a case a

be a ground for avoiding it. In such a case a decree of nullity may be obtained.

(a) Restriction of Conjugal Rights.—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights, although two years have not elapsed, at once constitutes desertion (as to the significance of which see paragraph (6) in/rs); and such desertion; whether committed before or after the decree of restitution, is a cround for granting to the wife a

committed before or after the decree of resistantian, is a ground for granting to the wife a decree of dissolution of marriage.

(3) Judicial Separation and Divores.—The third class of suit mentioned in paragraph (3) supra includes the suit for judicial separation (which does not dissolve a marriage), and the suit for divorce proper (which, if stockettle dissolves the marriage contract altogethis and like suit for divorce proper (which, if stockettle leaves the parties at liberty to marriage and). Either spouse may petition for judicial separation on the ground of adultery, or studies. tion on the ground of adultery, or studies, of descriton without came for two years upwards. In such a polition a husband up claim damages from the correspondent

ores of judicial separation is often made the send of a position for divers. A positioner o has committed adultery which has not bee dioned diame, obtain a judicial separation A decrea of restitution of conjugal rights less there has been condensation. The last to a bething the property of crualty or settled does not, however, debat him from a rape of indicial separation on the ground of pliery milipse his conduct has conduced to the

calling.

Ziborot.—Where partial or complete divorce is country, nellef can only be obtained apout proof of car can, offences which fall under two heads, which; (1) those which are offences under recipionistical law, a.g., cruelty, additory, and unmaterial offences; (a) those which are offences by letate, e.g., incestuous adultery, bigamy with adultery, rape, and desertion.

If a hushand seeks divore, it is sufficient for life to prove the wife's adultery, in which case its hay obtain damages from the adulterer. If a wife seeks divorce it is not sufficient that she prove heart of the sufficient for cruelty. But a wife can obtain divores if the husband has been guilty merely of incestious adultery, or bigamy with adultery, or of rapis or certain other orminal offences. "Grielly," is conduct of such a character as to have caused damage to life, timb, or health (hodily or mental), or as to give rise to a reasonable apprehension of such danger, it is cruelty to will under the sufficient of the sufferer (energity) the reak the spirit of the sufferer (energity) the which and a course of equator calculated to break the spirit of the sufferer (generally the wife), continued until health ireaks down or likely to break down under the strain, is also a ground for relief. To prove a charge of adultery ground for resist. In prove a charge of adultery the evidence of the wife or husband must be correbotated either by a witness or at least by strong autromading circumstances, especially where a respondent has made admissions. Even if the co-respondent has confessed, the Court will have to be actisfied that there is no ground this autralian.

If a wife gives hirth to a child of which her husband could not possibly be the father, that is

namend doug and planting as the interest that is against proof of adultery.

It is described in the legal sense if one party to a marriage, without the consent or against the will of the other, withinly without cause or reasonable access makes the other live apart for

the will of the other, withinly without cause or reasonable accuse makes the other live apart for two years or more. Formerly the only remedy for desertion was a suit for the restitation of outlingal rights; but now desertion without cause may enable the deserted apouse to obtain a dispress of judicial separation. If coupled with adultary, it enables a wife to obtain a divorce.

When the deeres will be rejused.—A decree must be rajused, even if the suit is undefended, if the allegations in the polition for divorce are not, proved. There is no such thing in the livure Court as judgment by default. Other ahoulte bars to relief are (i) condivance at the adultary of the respondent; (ii) collusion, as which the initiation of the suit is procured by agreement or harpain (but this does not prevent a final suit being brought free from collesion); (iii) condensation, i.e. complete forgiveness which restone the setting yet. There are also certain discretionary bars, as, e.g. where the politioner has been guilty or unemonable delay, or has hear judicy of such willist inglete or mis-conduct as-has conduced to the activery.

Integraphies by King's Freeder,—At any time

Suring the progress of a suit for dissolution or mality of marriage, and before the decree state is made absolute, the King's Prootor may intervene to show cause against making a

decree shoulute.

Decree Absolute.-Every decree of dissolution or nullity is in the first instance a decree view. and is not made absolute until the expiration of and is not made absorbed until the expression of its calcular morths. The marriage substituted in the decree is made absolute. After that date either spouse may marry again; but a man may not marry the siter of his divorced wife whilst the divorced wife is alive. 'A divorced with the divorced wife is alive.' wife may call herself by her late husband's name. Persons who have been divorced may re-marry.

Children .- When a suit has been commenced, the children should not be removed from the num in whose custody they are de farto. Until a suit for judicial separation, nulfity, or dissolution of marriage has been dismissed, the Court may make orders for the custody, mainspouse may make applications for access to the children.

dimen.

Atmeny.— A wife may in any cause file a petition for alimony (i.e., means of support) pending suit, provided prime facte evidence of the mariage is adduced. The right to alimony on tinues until there is a decision against the wife in the court of first instance. The amount may he agreed between the parties, otherwise onefifth of the joint incomes is generally allowed. An order for permanent alimony may be obtained by a wife who has obtained a final decree of judicial separation.

Protection Orders. A deserted wife may apply to a court of petty sessions or to the Divorce Division for an order to protect any money which has come to her after such desertion against her husband and his creditors. Disobedience to the order renders a party retaining

the property liable to restore it and to pay twice the value thereof.

Costs.—Where a suit is about to be set down for hearing, the wife, if she has not sufficient separate estate, may obtain payment from har husband of a sum sufficient to cover her costs to date, and where a decree has been obtained against her for judicial separation on the ground of adultery, she may tdefend herself at his expense should he afterwards bring a suit for dissolution of marriage. If a suit be decided against a wife who has separate estate, she may be consistenced in costs. A co-respondent may be ordered to pay the whole or any part of the costs of the proceedings.

## SEPARATION BY AGREEMENT.

Husband and wife may agree, with or without consideration, to separate and live apars, but the agreement, to be valid, must be followed by an immediate separation. Although usually made by immediate separation. Although usually made by deed, a mere orel agreement is binding. If made, however, with a view to facilitating divorce proceedings it is void. A write is not bound by a sign ration agreement if she was forced to make it hy threats of violence. A clause which binds the bushand to give up the custody of the children will be anisored, unless the Court is of opinion that it is not for their broadt. The agreement that it is not for their broadt. timelly contains mutual covenants not to sue for the restitution of conjugal rights—a covenant by the husband not to molest the wife, and a covenant by the wife or her trustee to indemnity the hishand against debts contracted by her during the separation. The remody for a breach of the agreement is specific performance.

## SUMMARY JURISDICTION.

When a husband has been guilty of sessuit or has deserted his wife, or has been guilty of per-sistent crueity, or of wilful neglect to maintain her or her infant ohldren, and by such crueity or neglect has caused her to leave him, or where he is an habitual drunkard, the wife may obtain relief from a Court of Summary Jurisdiction. Relief may also be obtained by a husband whose wife is an habitual drunkard. The Court may wife is an habitual drunkard. Ine wours may declare that the applicant is no longer bound to cohabit with the other spouse. Where a wife is the applicant, the legal custody of children under sixteen may be given to her, and the husband may be ordered to pay a weekly hum not exceeding £a. Where the husband applies, the custody of all the children of the marriage may be given to him, and the wife may be constant a him, and the wife may be constant a him, and the wife may be constant a him, and the wife may be constant. may be given to him, and the wife may be com-mitted to an inebriates home. If the wife has been guilty of adultery, no order will be made on her application unless there was condonation; and if, having obtained an order, she commits adultery, the order may be discharged. An order may be altered, varied or discharged at any time on cause being shown. All applications for relief must be made within six months of the ground of complaint.

## DIVORCE STATISTICS.

## Rnoland and Wales.

DIVORCE FOR THE POOR

England and Wales.—A special departish the High Coast of Justice for the activities not person. In litigation, including was established in sers. The official was the department in London Presented Of (Poor Person).

Under the procedure of this department. Solicitor and Counsel are provided for a liftenat who is not possessed of the means to employ legal assistance.

Although no fees are payable for the help given by the department, the applicants much lad the solicitor's out-of-pocket expenses, and those incidental to witnesses—a point which has been criticised by the adherents of divorce has been criticised by the adherents of divorce law reform. However, if witnesses are not brought from a long distance, the whole proceedings need not cost more than give, and are in home cases be completed for less, compared with from gips to give heccestizated by the mermal procedure. Before a case is taken my, the applicant has to eatisfy the department that he or she is really poor—not pussessed of mixes than gip, exclusive of wearing appared and trade teels. If this condition is insilized, and if he has reasonable grounds for brighted and if than £gs, exclusive of wearing apparel and trade teels. If this condition is fulfilled, and if he has reasonable grounds for bringing or defending a suit in the Divorce Court, he may apply to the Court for leave to do to. An application for leave is submitted to and is reported on by counsel and solicitor, who give their services voluntarily. If the report is favourable the Court may give the necessary leave, and thereupon another solicitor and counsel are assigned to the poor person to an include the court of the court of the poor person to an include the court of the poor person to an other solicitor and counsel are assigned to the poor person to an other of the poor person to an other poor the party. Counsel acting for him supercharge him no fee, while the solicitor assigned to him generally gets nothing but his out-of-poorter expenses. Where, however, property if value is recovered for such litigant, the solicitor may (under the rules) get his usual const. Numbers of persons take advantage of this procedure in ferma payperis. This explains the very large number of cases in the Divorce Court. Solicad.—In every town there are sefficients of the Foor, and in the Court of fleesing there are Counsel for the Foor, all of whom act or such that a procedure of the poor, all of whom act or such that a procedure of the poor, all of whom act or such that a procedure of the poor, all of whom act or such that a procedure of the poor, all of whom act or such that a procedure of the poor and interesting the procedure of the poor and interesting the procedure of the poor of th

are Counsel for the Poor, all of whom act gratuitously. Any class of litigation may be undertaken for poor persons, but the operation of the "Poor's Boll" is chiefly important in of the "Poor's Moll" is chieffy important in matrimonial and bastardy cases. Legal services are rendered free of charge, and no Court determent payable. In cases of divorce application must be made to the Court of Session. In cases of separation simply, application may be made to the Sheriff Court. The means that preclude to the Sheriff Court. The means that precludes the service of the servic a person from the benefit of the Poor's Roll are not fixed, and each application deponds on its own circumstances. The Poor's Roll was esta-blished in 2424.

## ILLEGITIMACY,

England and Walet.—A man may be entermoused to petty assume on, the application
of the mother of a backerd child, or by the
Gugrdians of the floor where the child becomes
chargeable to the Union or Parish; and the
Justieus, on his being proved to be the feather
of the child, may make an order requiring legito pay for its malubetance and charation is
sum not associate as a week. By the the
which came into force at Just. 1, age, the
putative father may be ordered to pay me. a

week, instead of gs. as hitherto. The mother has the custody of her hesterd childs in. No person is required as father of an illustimate child, to give information concerning the birth of such child, and the register is for-bidden to enter in the register the name of any person as father of the child unless at the joint significant cases in the register. The person is in the register, together with the matter. A domestic servant found to be enceinte may be personptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be enceinte renders the employer liable to an action.

Scotland.—The mother of an illegitimate child may obtain a decree of affiliation and aliment against the father. The process may be raised either in the Court of Session or the Sheriff Court, but issually is in the Sheriff Court. The father pays half of the inlying expenses, the father pays hair of the inlying expenses, the amount usually decreed being £a st. The rate of aliment varies, but in pays it was settled by a decision of the Court of Session that £11 14th. Per annum was a proper amount. The mother has the easted of the child until the age of 7 if a male and as if a female. An illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the makents at the time of the concention of the

ents at the time of the conception of the hild. Buch legitimation is recognised by Intermational Law so far as the laws of particular countries allow it. It is valid in England except that such a child cannot succeed to real estate in England on intestacy. After the marriage of the parents such a child may be registered as legitimate by warrant of the Sheriff.

#### IMPECTIOUS DISEASES.

PRECAUTIONS NECESSARY TO BE OBSERVED. By the Public Health Act, 1875 (as amended by the Public Health Act, 1907), it is provided that any person who—(z) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against apreading the said disorder in any street, public place, shap, inn, or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor, or driver thereof that he is so suffering; or, (a) Being in charge of any person so suffering, so exposes such sufferer, or causes or permits such sufferer to be so exposed; or, (3) Gives, lends, sells, transmits, or exposed, without previous disinfection, any bedding, clothing, rage, or other things which have been exposed to infection from any such disorder, shall be liable to a penalty of £, A person suffering from such disorder who enters a ublic conveyance is liable to a fine of 40s.; and if he so enters without notifying to the owner or driver that he is so suffering, shall be ordered by the Court to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance in respect of the disinfection of the conveyance Every owner or driver of a public conveyance must provide for the disinfection of such conveyance after it has conveyed any person suffering from dangerous infection; but he cannot be required to convey any person a cuffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. Ho person has been suffering from any danger-

ous infectious disorder without having the same disinfected to the satisfaction of a medical distinction of a medical practitioner, as testified by a certificate signed by him—penalty not exceeding £20, or imprisonment with or without hard labour, not exceeding one month. By the Public Health Act, 1907, the Local Government Board (1.e. the Ministry) of Health, since the passage of the Ministry of Health Act, 1919 has power to declare of Health Act, 1919 has power to declare that this Act shall be in force in any specified district. Under this Act, a person suffering from an infection of the control of from an infectious disease must not engage in any trade unless he can do so without spread-ing the disease; nor may he take any book from a public or circulating library, or allow any such book to be returned after it has been exposed to infection. Clothes exposed to infection must not be sent to a public laundry unless they have been disinfected. A child who has been suffering from an infectious disease must not attend school without a medical certificate. Dairymen must notify infectious diseases existing among their servants, and the owner or driver of a public vehicle which has conveyed an infectious person must notify the same to the district medical officer. No wake may be held over the body of a person who died of an infectious disease Where the Infectious Disease (Prevention) Act, 1890, is in force, where any suitable hospital is provided, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation, or is lodged in a room occupied by more than one family, or cannot be effectually isolated, may, on a certificate signed by a medical practitioner, and with the consent of the hospital, be removed by order of any justice to such hos-pital Similar provisions apply to the Metropolis. The occupier of a house in which there has been infectious disease within six weeks before he ceases to occupy it, must have the premises dis-infected and inform the owner of the disease. Where it appears to any District Council that any house is in such a condition that the health of any person is affected or endangered thereby, or that whitewashing, &c., would tend to pre-vent or check infectious disease, they may give notice in writing to the owner or occupier of such house to whitewash, &c , the same

#### NOTIFICATION OF INFECTIOUS DISEASES

By the Infectious Disease (Notification) Extension Act, 1899, the provisions of the Infectious Disease (Notification) Act of 1889 were extended to the whole of England and Wales on the January z, 1899. Every case of infectious disease, as defined by the Act, is to be notified to the Medical Ufficer of Health of the district in which it occurs. The notice may be by letter or even verbal, and must be given by the head of the family, or by the nearest relatives present in the building or in attendance on the patient, or any other person in attendance, or by the occupier of the building. In addition to this, the medical man in attendance is required to send a certifi-cate to the Medical Officer of Health. Failure to send the notice or certificate renders the defaulter liable to 40s. fine. No payment is made for the notices required to be given by persons in the house, but the medical man gets as 6d. for every case in his private practice and zs. for every case in a public institution of which he is officer. The diseases to which the Act applies are

small-pox, cholera, diphtheria, membranous

croup, erysipeles, acaristins or searlet fever, and the following fevers: typhus, typhoid, entaric, relapsing, continued, or puerperal. Plague must also be notified, in consequence of an Order issued in ages. The local authority may order that the Act shall apply to any infectious dis-case other than those just mentioned, but such an order must be approved by the Local Govertease other than those just mentioned, but such an order must be approved by the Local Government Board. In some districts the following have been declared infectious: measles, tuthein or German measles, whooping cough, chickenpoi, mumps, and yellow fever. In the case of London the provisions of the Public Health (London) Act, 18g., are similar to those now extended to the rest of the country.

## MARRIAGES.

## BY BANNS OR LICENCE.

BANNS OF MARRIAGE. - "Banns" formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety, and exclude clandestine marriages. The Marriage Act, as Geo. II. c. 23, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony, after the Mecond Lesson. The law is now chiefly contained in the Marriage Act, 4 Geo. IV. c. 26, which repealed most of the laws then in force (see also 6 & 7 Will. IV. c. 85, and t Vict c. 25). Where the parties reside in different parishes, the banns must be published in both, the minister giving his certinoate of the same to be handed to the minister of the parish where the marriage exclude clandestine marriages. The Marria giving his certanoace of the same to be handed to the minister of the parish where the marriage takes place. The law provides specially for the case where one of the parisher sesses in Scotland, the publication being then in the parish church. In like manner in Scotland the publication takes place in the parish church, in whatever church the parties are married. It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage, because it would still stand as an irregular marriage carried out by consent before witnesses (see sub-tit., "Marriages in Scotland," post). The names by which the parties are known are suffi-cient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage may be null and void (Midgeley v. Wood, 4 Sw. & Tr. 25). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may license a Chapel of Ease for the celebration of marriages; but where a disthe celebration of marriages; but where a dis-trict has been assigned to a chapel, and it becomes a vicarage, or "ecclesiastical parish," the option ceases, and the banns must be pro-claimed and marriage celebrated therein, and not in the "mother church" or that of the

civil parish.

If three months be permitted to clapse, the hans become useless, and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score parents is obtained, and it is usually on the score of instifficiency of age that banns are "forbidden." By the Act 5 & 7 Will. IV. c. Eg, a marriage may be performed in church on the superintendent, registrar's certificate without banns, aroyled that the incumbant's consent is obtained. One

of the parties must be resident within the Bestevastical parish of the church in which the marriage is to take place.

Harriage is to take place.

Harriage is those are of two kinds—(2) the Common of Didhary Licence granted by the Archibishops and Bishops, through their Surrogates for marriage is any church or chape duly licensed for marriage; (a) the Special Licence granted by the Archibishop of Canterbury for marriage as any time or in any place on good reason being shown (see p. ag). The Act of sing is severe on the clergy, making it a felloy for any clergyman to marry the parties in the sheaked of banna or licence; and every Reightner er other person who knowingly unduly oblemnism a marriage were cutended, and they are now from marriage were extended, and they are now from a marriage were extended, and they are now from a marriage were extended, and they are now from a marriage were extended, and they are now from a marriage were extended, and they are now from a marriage were extended, and they are now from a marriage were extended, and they are now from a marriage were extended.

8 a.m. to p.m.
The minister should be careful that there are two or more witnesses present, and that two witnesses attest the entries in the register books,

which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may, under Section 56 of this Act, refuse to marry a divorced person whose marriage has been dissolved for his or her adultery, but must allow another dergyman of

suntery, but must allow another oregyman of the diocese to perform the service.

Marriage with a deceased wife's sirer—inoluding a sister of half blood—was legalised in 1929.

No clergyman, however, can be compelled to solemnize such a marriage, but he can allow his church to be used for the purpose by another induction.

A marriage certificate is nothing more than a copy of the entry in the church register; and the customary fee is as, 6d., and a stamp duty of 2d. customary fee is as. &d., and a stamp duty of &d.
Searches in the register-books may be made on
payment of small fees, viz., zz. for a single year,
and &d. additional for every other year. There
are small fees, regulated by ourtom, on the cartificate given of banns in one parish for marriage is
another. Marriage less are not uniform, and if
excessive there is power with the Diocesan Chancellor to moderate them. With those who are is
a position to afford it, it is usual to pay a guines
to the clergyman, and zz. to the clerk; and the
usual fees are paid although a stranger-clargyman
is invited to perform the service. be invited to perform the service.

#### MARRIAGE LICENCES

MARRIAGE LICENORS can be obtained in London by application at the Faculty Office, at the Vicar-ALARKLASE LIVERIORS can be obtained in London by application at the Faculty Office, as the Vicar-General's Office, and at the Blabop of London's Registry, all within the old area known as Doctors' Commons, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrans, but licences obtained at the Bishops' Registrans, but licences obtained at the Bishops' Begistrans, but licences obtained at the Bishops' Begistrans, but licences obtained at the Bishop's Diocean Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office, 2 Reightrider Street, Doctors' Commons, E.C., are available for London and all Registral distributions of Office, 3 Creed Lane, Ludgate Hill, H.C. (hours in both offices se to 4; Saturdays se to 3), are available for London and stil Registed and Wales, except the Province of York. No instructions, either verbal or in writing, can be received, except from one of the personal instructions of one of the parties shout to be married, and the licence is delivered to the party upon payments of fees amounting to thirty shillings, in addition to the cost of stamp, see, ed. No previous notice is required and the Hernes is seculable as soon as is required and the literar-is seculable as seen as it is issued. The cost of Homeas through a cierical surrogate in the country varies, according to the discose, from £1 sgs. to £2 sac. 62. By the 4th George IV. c. 76, It is enacted, in order to avoid fraud and collusion in obtaining Homeas for marriage, that before any such Homeas for marriage, that before any such Homeas for marriage, that there is no legal impediment to the intended marriage; and also that one of such parties half had his or her usual blace of abode for the space of fitteen days immediate of the space of fitteen days and the space of fitteen days are spaced as the space of fitteen days and the space of fitteen days are spaced as the space of fitteen days are spaced as the space of fitteen days are spaced as the space of fitteen days are spaced as the space of fitteen days are spaced as the spaced of fitteen days are spaced as the spaced of fitteen days are spaced as the spaced of fitteen days are spaced as the spaced of fitteen days are spaced as the spaced of fitteen days are spaced as the spaced of fitteen days are spaced as the spaced of fitteen days are spaced as the spaced of fitteen days are spaced as the spaced of fitteen days are place of abode for the space of fitteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized.

It may be added that in the country, there may generally be found a parochial clergyman who is also a surrough the force whom the abuve mentioned.

also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to procure the licence from the Bishop's registry, the surrogate delivering the same personally to

the applicant.

#### SPRCIAL MARRIAGE LICENCES.

SPECIAL LICENCES are granted by the Archblanop of Canterbury, under special circum-stances, for marriage at any place with or with-out previous residence in the district, or at any time, &c.; but the reasons assigned must meet with his Grace's approval. Application must be made to The Faculty Office, as Knightrider Street, Dectors' Commons, E.C. z (fel., 6634 Central). Fees for licence stamp, &c., Las.

#### BEFORE A REGISTRAR AND IN NON-CONFORMIST BUILDINGS.

Marriages can take place in a District Register Office or in a Nonconformist building registered for marriages, (1) by Certificate, (2) by Licence Notice of such marriages must be given personally to the Superintendent Registrar, a Registrar of Births and Deaths, a Registrar of Marriages, or the deputy of such officer. A marriage at a register office takes place in the presence of the Registrar of Marriages and the Superintendent Registrar; a marriage at a registered building takes place in the presence of the Registrar of Marriages, unless it is had under the provisions of the Harriage Act, 1898, respecting which see below. In each case the presence of at least two witnesses is necessary.

#### NOTICE OF MARRIAGE BY CERTIFICATE

If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It

may then be given by either party.

If the parties reside in different registration districts, notice must be given by each to a registration officer in the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before the notice can be given.

#### NOTICE OF MARRIAGE BY LICENCE.

One notice only is necessary, whether the par-tice live in the same or in different registration districts, and either party may give the notice. If both live in the same district, one of them thus have lived there for fifteen days before

notice can be given.

If they live in different districts, and both have fulfilled the necessary residential quali-fication, notice may be given in efther district. If one only has fulfilled the qualification, the notice must be given in the district in which the residence has been fulfilled, and the other party must be resident in England or Wales when the notice is given.

The notice contains particulars as to name ages, residence, length of residence, and the building in which the marriage is to take place. It also contains a declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law, has been duly given. A person making a false declaration renders himself or herself liable to prosecution for periury.

#### ISSUE OF CERTIFICATE (WITHOUT LICENCE) FOR MARRIAGE

After the lapse of twenty-one clear days from the date of the entry of the notice in the noticebook, the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three calendar months from the date of the entry of the notice.

#### ISSUE OF CERTIFICATE AND LICENCE FOR MAR-RIAGE.

After the lapse of one week-day (not Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three calendar months from the date of entry of the notice

### DOCUMENTS TO BE PRODUCED AT THE MARRIAGE.

(1) Marriage by Certificate:

a If both parties live in the same dis-trict .—The certificate of the Superintendent Registrar of that district.

d If they live in different districts :- A certificate from the Superintendent Registrar of each district

(a) Marriage by Licence :- The certificate and licence of the Superintendent Registrar of the district in which the notice is given.

#### PLACE OF MARRIAGE.

The marriage must generally take place at a building within the district of residence of one of the parties, but there are exceptions, as follows:

a. Section 14 of 19 de so Vict. cap. 112, provides that, if the usual place of worship of either of the parties is outside the district of his or her residence, the marriage may take place in such usual place of worship, provided that it is not more than two miles distant from the boundary of the district in which the notice is given

b The Act 3 and 4 Vict cap 7s, provides that, if there is not within the district of residence of either party a registered building within which marriages are solemntzed according to the rites 

27 T.L.R. 416).

## MARRIAGE CEREMONY.

The marriage must be solemnised between the hours of \$ a.m. and 2 p.m. with open doors. Each of the parties must declare as follows:—
"I do solemnly declare that I know not of any lawful impediment why I. A. B., may not be joined in matrimony to C. D."; and each of the parties must say to the other, "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." A wedding-ring may be, and is generally, used at a marriage at a register office.

## MARRIAGE ACT, 1898.

The presence of a Registrar of Marriages is not necessary at marriages at Nonconformist not necessary at marriages at reoncomportunity registered buildings which have adopted the provisions of this Act. The Act (which does not apply to Scotland or Ireland, or to marriages according to the usages of the Jews or of the Society of Friends) provides for the appointment of the third of the transfer of the Apparant Bussally the of an "authorised person" (a person, usually the minister or an official of the building certified by the trustees or governing body as having been duly authorised for the purpose) who must be present at and must register the marriage. If the presence of a Registrar is required at a marriage at a building at which the provisions of the Act have been adopted, the fact must be stated when notice of the marriage is given, and the consent of the minister or trustees to the Registrar's attendance must be obtained.

The parties must at some time during the

ceremony make the following declarations "I do solemnly declare that I know not of any

lawful impediment why I, A. B., may not be joined in matrimony to C. D."

Also each of the parties must say to the other :-"I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]";

or, in lieu thereof: "I. A. B., do take thee, C. D., to be my wedded

wife for husband!

Rules and Regulations relating to this Act were published in October, 1909. (See Statutory Rules and Orders, 1909, No. 1338.)

#### NAVAL MARRIAGES ACT, 1908.

This Act, which came into force on January 1, 1909, was framed with the object of relieving sailors of the Royal Navy of the difficulties under which they laboured as regards fulfilling the necessary residential qualification for the purpose of marriage.

It provides that any officer, seaman, or marine horne on the books of one of His Majesty's ships who wishes to marry may, if the marriage is to take place at a register office or a Nonconformist registered building, give notice to his command-ing officer, who, after the lapse of twenty-one clear days, can issue a certificate for the marriage The other party must give notice in the usual way to a registration officer in the district in which she resides.

If the marriage is to take place at a church of the Church of England, the chaplain or con-manding officer must publish the banns on board the ship on three successive Sundays; he can then issue a certificate of publication of banus. The banus must also be published in the church in which the marriage is to take place.
No marriage by licence can take place under

this Act.

## MISCELLANEOUS INFORMATION RESPECTING MARRIAGES.

Parties should be married in the name in which they are generally known.

A marriage may take place at a registered building before a Registrar without religious ceremony if the consent of the trustees is

If parties who have been married at a registe office desire to go through a religious caremony at a church, they may do so on production to the incumbent of a certificate of the register office marriage, but this ceremony is not recorded as a marriage in the register books.

A divorced person desiring to marry again in a register office or registered building must give notice to the Superintendent Registrar, to whom a copy of the divorce decree must be produced.

In Wales, and in places where the Welsh tongue is used, the declaration and contracting words may be said in Welsh; as provided by Section 33 of the Marriages and Registration Act. 1837.

If both parties are Jews, they must give notice to a registration officer in the usual way, and may marry according to their usages in a synagogue or private dwelling-house at any hour; the marriage must be registered by the secretary of the synagogue of which the man is

If both parties are members of the Society of Friends (Quakers), or if, not being in member-ship, they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to a ance with its usages, they must give notice to a registration officer, and may be marrised in a Friends' meeting-house; the marrisage must be registered by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a Registrar of Marrisages is not necessary at such marriages of Jews or members of the Society of Friends.

Marriage with a deceased wife's sister was rendered legal by the Deceased Wife's Sister Act, 1997. The marriage of a woman with her deceased husband's brother is still illegal, and the Act forbids the marriage of a man with the sister of his secored wife during the wife's Righme.

## Warriage in England or Wales when one party lives in Scotland or

Hoties for a marriage by a Superintendent Registrar's cartificate in a register office or registered heijding may be given in the usual way by the party resident in England. As register Stotland, the party there, after a residence of fitteen days, should apply to the session cight to publish benns: as regards Iraiand, the party there, after a residence of seven days, must give notice to the District Registrar of Marriage. Notice cannot be given for south marriages to take place by the licence of the Superintendent Registrar.

Marriage of such parties may take place the publication of heans, or by Ecclesiastical Hossie.

#### MARRIAGES OF BRITISH SUBJECTS ABROAD.

Act passed June sy, see, came into force Jan. s, see, Order in Council dated Nov. so, see, whereby previous Orders are repealed and regulations for smarriages under the Act are laid

British subjects may contract a valid marriage in a forsign country provided they conform to the previsions of the Forsign Marriages Act, also. One of the parties to the marriage only need be a British subject.

where a marriage according to the local law of a faceign country is valid by English law, then, before the marriage is celemnized in that country under the Act, the marriage effect as defined by the Act must be satisfied— (a) That both the parties are British subjects;

(b) If only one of the parties is a British subject, that the other is not a subject or citizen of the country; or.
 (c) If only one of the parties is a British subject.

If only one or the parties is a recommend-icot and the others a subject or office of the country, that sufficient facilities do not axist dor the solumnization of the macrings in the foreign country in accord-ance with the law of that country; or,

(d) If the man is a British subject and the woman a subject or cluses of the country, that no objection will be taken by the authorities of the country to the solemulzation of the marriage under the Act.

In the case of any marriage under the Act, where the woman is a British subject and the man a foreigner, the marriage officer must be

(e) That the marriage will be recognized by the law of the country to which the

the law of the country to which the furginger belongs; or.

(h) That some other marriage ceremony in addition to that under this Art has taken place, or is shout to take place, howeven the parties, and that such other ceremony is recognized by the law of the country to which the foreigner belongs; or.

(c) That the leave of the Secretary of State has been obtained. The marriage must be selemnized by or before a marriage officer as defined by the above-samed Act.

It is necessary for one of the parties to the intending marriage to sign a motion chaling the name, streams, profession, condition, and resi-dence of each of the parties, and whether such

of the parties is or is not a minor, and to give the notice to the marriage officer within whose district both of the parties have had their residence not less than one week then next preceding, and the notice must state that they have so resided.

readed.

If the parties reside in different districts, such notice must be given to the marriage officer of the district before whom the intended mover us the queriet before whom the intended marriage is to be solemnized, by the party who has resided for a period of not less than one week within the district of such marriage officer. If one of the parties resides (a) in the United Kingdom, or (b) in a Colony or India (a) notice must be given in like manner.

must be given in like manner as if the party so resident were about to be married in that part of the United Kingdom in which he or she or the United Eingdoin in which he or she resides, and in England or Ireland must be given to the superintendent registrar or registrars, and in Sectiand must be given by proclamation of banus, and (b) such notice must be given by the party dwelling in such Colony or in India as may be provided by any law of that Colony or of the Governor-General of India in Council, or in like manner as if the party were about to be married in that place

If the non-resident party has dwelt in the district of a marriage officer in a foreign country notice must be given by that party in like manner as if the marriage were to be selemnized by or before such marriage officer, or if the place in a foreign country at which the non-resident party has dwelt is not within the district of a marriage officer the notice may be given to any person authorised by the Secretary of State to receive such notices. Where neither party has resided for a period of not less than one week within the district of the marriage officer before whom the intended marriage is to be solemnized. and (a) the marriage cannot copyeniently be solemnized at the place where either of the parties has had his or her usual place of abode, or (b) the permission of the Secretary of State has been obtained notice must be given by each of the parties in the place where he or she has had his or her usual place of abode for a period of not less than one week immediately preceding the giving of such notice in the prescribed manner, and a certificate of the giving of such notice obtained

If the Secretary of State is satisfied that for some good reason the party has not been able to give the required notice and that the marriage is not claudestine and that adequate notice has been given he may permit the marriage to be solemnized.

Before the marriage is solemnized each of the parties must make on oath

(a) That he or she believes that there is no

impediment

(b) that both the parties have had their usual place of residence in the district of the consular marriage officer for three weeks tramediately preceding, or if they have not both resided there during three weeks then that one of them has so resided, and that one of them has so reason, and stating the place where the party who has not so resided has within three months im-mediately preciding had for three consecu-tive weaks his or her usual place of abode, and the notice that has been given in that hand me in matther water has resident place, or, if neither party has resided there, stating the place or places where each party has within three months imme-diately preceding had for three weeks his or her usual place of abode, and the notices that have been given in those places.

After the expiration of xa days after the notice of an intended marriage has been entered, then if no lawful impediment to the marriage is shown, and the marriage has not been forbidden in manner provided by the Act, the marriage may be solemnized. A consular officer holding a warrant for a district can only solemnize a marriage at his own official house. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district; two or more witnesses are required to be present.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of August 18, 1892, and are payable to His Majesty's Government.

the presence of a Marriage Officer and registered by him

For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing outside the consular district in which the marriage is to take place.......

For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same

Marriages may be solemnized 8 a.m. to 3 p.m. No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necesary to render the marriage valid. If the coremonial be that of the Church of England, it can only be performed by a clergyman of that Church.

Marriages solemuized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of His Majest's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country

An Englishwoman married to a foreigner follows the nationality of her husband

In Germany and Switzerland marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prolibited A marriage which would not be valid in

A marriage which would not be valid in Rugland would be equally invalid if solemnized in an embassy, legation, or consulate abroad. For instance, marriages within the prohibited degrees of comanguinity or affinity would not be valid

A marriage between Christians in India may be proved in England by an India Office certificate (Braid v. Braid, 1999, sg. T.L. R. 645).

Marriages may also be solumnized under the "Foreign Marriages Act, sigs," before the commissioning officer of any of His Majesty's ships on a foreign station provided he be of such rank

and of such vessel as is for the time being authorised for that purpose by Admiralty instructions.

MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW.

ACT OF seef. — Under the Marriage with Poverpower Act, seef, any British subject desiring to be married in a foreign country to a foreigner according to the law of the country may, after giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any persons may enter an objection to a certificate, the validity which will be decided by the Eggistrar-General.

A marriage by repute which is valid by the law of the domicile in a foreign country will be recognised as valid by the English courts (re Green Noyes v. Pitkin, 1909, 25 T.L.E. 222).

MARRIAGES IN SCOTLAND.

According to the law of Scotland marriage is a contract which is completed by the mutual consent of parties. No formalities are required and no consent of parents or guardians is necessary. It can be contracted by a male over 22 years of age and a female over 12. Marriages may be "regular" or "irregular."

A regular marriage is one which is celebrated by a Minister of religion after due notice by the publication of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must have resided in Scotland for at least sq days before the ceremony. Public proclamation is made by (a) banns or (b) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. In the case of one of the parties residing in England or Ireland a certificate of the proclamation of hanns in the parish church of both parties. In the case of such a sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed as. 6d. A certificate of preclamation of banns is only valid for three months

Under the Marriage Notices (Scotland) Act 1976 a notice pointed up in a completions of accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns. Exhibition is made for seven consecutive days. Objection may be made within other seven days. If no objections are ledged the Registrar issues a certificate: fee, 10. Such certificate of publication in only valid for three months. Under the Naval Marriages Act sees hauns may be published on board one of His Majesty's slips where an officer, seaman or Marrise on the ship's books withes to contrart a marriage in Scotland. A declaration under the Marriage Notices (Scotland) Act already referred to may also be filled up and the officer commanding the slip may grant a certificate.

Irreputor Harriages are survivale of modes of marriage which were general throughout Barrope in medievel times, Scotland having disregarded

the decrees of the Council of Trent invalidating irregular marriages; Scotland following the auciant Canop law. These marriages may be continued in three ways: (a) by exchange of consent before two witnesses (called in legal imagings are seven de present(); (a) by promise; of marriage followed by intercourse on the faith of the promise (called marriage by prunies, newer, can only be proved by the writing or the oath of the naity when action is brought; (a) by constant living together as husband and wile (called marriage by keelf and repute), i.e., the general regulate of the neighbourhood supported by constant conduct. Marriage by the first mode is only valid if one of the parties has heen resident in Scotland for as days before the contract is in Scotland for as days before the contract is entered into. (This is the result of legislation and not part of the common law of Suctiand.)
"Greats Green" marriages were abulished in 1856 by the Act so and so Victoria, Chap. 66.
Marriages thus contracted may be registered if the parties appear before the Sheriff with their with resulting and matthin for parties after the second within the second matthin the second ma witnesses and petition for registration within three months. On the Sheriff granting warrant the Registrar registers the marriage for a fee of gs. ad. The other two forms of marriage before gr. ad. The other two forms of marriage before they are held to be valid must be declared by a decree in the Court of Session.

Marriage with a foreigner may be solemnized

starriage with a foreigner may be solumized regularly if one of the parties has a residential qualification and provided that if one party has resided in Sociated for at days and the minister agrees to dispense with the proclamation of bains in the case of the foreigner. Marriage of a Scottish person with a foreigner, or marriage of two foreigners, may be contracted irregularly if one or other of the parties has resided in

Scotland for az days.

#### PAWNEROXERS' REGULATIONS.

For the Tick ET on goods pledged for not or less On goods pledged for more than res. 14 days to be charged as half a month

On pledges exceeding out, for every half crown or part of half a crown, per month FORFEITURE. -Piedges for res. and under must be redcomed within twelve calcular months and seven days from the date of pledging. After that

they become the property of the nawshroker.
Pledges above zer, if not redeamed within twelve calendar months and seven days from the day of pledging, may be sold by auction by the

impost the account of the sale in the pawnbroker's surplus produced by the sale. Should there be a deficit, the pawner, or the person producing the ticists, is liable to pay the deficiency. Any deficit on sale of one pledge may be set off by the pawnbroker against surplus on another.

If any pledge is destroyed or damaged by fire, the pawnbroker will be bound to pay the value of the stakes after dedicting the amount of the lown

the piedge after deducting the amount of the loan and profit—i.e., the loan and profit and sy per

cent, on the amount of the loan.

If any ticket is lost, mislaid, or stolen, the swner should at once apply to the pawnbroker for a form of declaration to be made before a magistrate, or the pawnbroker will be bound to deliver the piedge to any person who produces the ticket to him and claims to redeem the same.

When the loan is 5s. or under, the charge on form of declaration is one halfpenny; when the

loan is above 3s., one penny.

BPBOTAL CONTRACTS —A pawnbroker may make a special contract with a pawner in respect of a pledge on which the pawnbroker makes a loan of

above 400., provided always that— (a.) The pawnbroker at the time of the pawning shall deliver to the pawner a special contract pawn-ticket, signed by the pawnbroker. (a.) The duplicate of the special contract pawn-

ticket shall be signed by the pawner.

The pawnbroker may also charge:—For ticket, profit per calendar month, for storage of the pledge, and payment to inspect account of sale, such sums and rates as may be agreed upon at the time of making the contract.

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month as one month

The charge for storage of the pledge will be per calendar month, or any part of a mouth, in addition to the charges shove mentioned

Pledges may be pawned under special contract for a period of not less than three months

In all other respects piedges under special con-tract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale, and loss of ticket, as are set forth above in the case of ordinary pletiges for more than see.

#### RECEIPTS.

RECRIPTS should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c., received.

#### RENT RESTRICTION

AND OTHER MODIFICATIONS OF THE LAW OF LANDLORD AND TENANT

(1) Prebininary —The Increase of Rent and Mortgage Interest (Restrictions) Act, 1920, very materially affects the relationship of landlord and tenant. As regards dwelling hopses, it is to remain in force until June 24, 1921, and as regards business premises, until June 24, 1921. It came into force on July 2, 1980. To remove vertain prevalent misconceptions, let it be stated at once that this Act does not prevent the sale of houses, or affect (1.) any house which was not let on August 2, 1982, and has not since that date here let, but as soon as such a house is let then the Act begins to apply to ft; (it.) any

pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after eale the pawner may impose the account of thesale in the pawner on a fugure 1, 1914; (iff.) any house which was being creeted on, or has been erected study, impose the caseount of one penny, and receive any said) it affects every house below a certain surplus produced by the sale. Should there be said) it affects every house below a certain runtal in the country. Speaking generally, it deficts, is liable to pay the deficiency. Any deficit impossible for parties, even how, to contract out of the Act.

(a) Meaning of "Dwelling House."—This means a house or part of a house let as a separate dwelling where the standard rest or rateable value does not exceed in London, £705; in Scotland, £90; elsewhere, £76; but it does not include a house bond fide let at a rent which includes board, attendance, or use of furniture, Part of the house may be let for business pur-

(3) "Standard Rent "-This means the rent on August 3, 1914; or, if the house was then unlet, the rent at which last let before then; or if after that date, the rout at which it was

first let.

(4) Restriction on increase of rent .- If rent has been increased since March as, 1950, or in there-after increased, then if the increase exceeds what is allowed by the Act, the excess cannot be recovered, in spite of an agreement to the

contrary (5) Permitted Increases.-If a landlord since August 4, 2020, has improved or made structural alterations (not including decorations or repairs), the may add 6 per cent. of the cost to the rent if the expense was incurred before July a, 1980, and 8 per cent if after that date. He may also add any increased rates, and (generally) is percent, of the net rent. He may also, if responsible for the whole of the repairs, add as per cent. to the rent, or, if responsible only for part of the repairs, such amount as a county court judge shall think reasonable. Provision is also made for preventing a landlord putting extra burdens on the tenant. Before making any increase in rent, four weeks' notice must be given to the

(6) Restriction on Right to Possession .- A landlord cannot obtain possession whether by notice. judgment, or otherwise, unless (a) the tenant is in arrear with his rent or has broken some covenant; or (b) the tenant or some one living with him has been guilty of nuisance or waste or (c) the tenant has given notice to quit as result of which the landlord has sold the premises or taken other steps which would be prejudiced if he did not have possession; or (d) the landlord wants possession for himself, and the court is satisfied that reasonable alternative accommodation suitable in all respects is tive accommodation suitable in all respects is available. In all these cases (a) to (2) posses sion may be obtained, if the Court considers it. Alternative accommodation need not, however, be provided if (i) the tenant held the dwelling house as an employee of the landlord for dwelling-house is required by the landlord for the occupation of a person engaged in agricultural work; or (iii) the landlord gave up occupation to join the colours; or (iv.) the landlord became landlord accounted to the considerable time ago, and greater hardship would be caused by returning an order for possession than be transfer. ago, and greater naruship would be caused by refusing an order for possession than by grapting it. There are certain other cases in which possession may possibly be obtained—the riggin of the Act being to some extent mitigated for the benefit of discharged soldiers (see s. g (2)).

(9) Previoled Houses.—If a furnished house is let at a rent which will yield to the landlord as per cent, in excess of the normal profit, such spirits may be declared irrecoverable. "Mormal profit where he was the profit which might reasonably have been expected from a similar letting on August 2, 1924. To let any furnished dwelling, house of part of it at an excessive rent is made an offence punishable by fine on summary conviction.

(6) Business Premises. — The Act generally applies to business premises; but in the case of such premises, instead of the increase of 1g per cent. referred to in paragraph (2) supra 35 per

cent. is to be allowed.

(e) Conditions of Statutory Tenuncy. — The tenant, who is emitted to remain in possession by virtue of this Act, becomes a statutory tenant. As such he must observe and is emittled to the benefit of all the terms and conditions of the original contract of tenancy in so far as they are applicable. Thus, he can only give up possession on giving proper notice, or, if no notice was required, then not less than three months notice.

(12) Prohibition of Premiums.—It is not illegal for a tenant to demand and receive from his landlord, nor is it illegal for a landlord to give his tenant, a premium for giving up possession of a house, but it is illegal for a tenant to ask or receive a premium from any other person.

reserve a premium from any other person.

(zz) Procedurs.—All claims, etc., arising under the Act should be dealt with in the County. Ocurt. If proceedings are taken in the High Court, the plaintiff can recover no costs.

(zz) Procer to concert a House into several.

(23) Power to convert a House into several Tenements.—By the Housing and Town Planning Act, 1988, a. 27, where, owing to changes in the character of a neighbourhood, a house cannot be lot as a whole, but could be let in separate tenements, the local authority or any person interested may apply to the County Court for an order allowing such conversion, not withstanding any restrictive covenant in any lease. The County Court may make an order upon such terms as shall appear to be just.

(13) Restriction on Demultion of Houses.—By the Housing (Additional Powers) Act, 1919, 2. 6, no person may without the written consent of the local authority demolish, or use otherwise than as a dwelling house, any house which is or can be made reasonably fit for use as a dwelling house. An appeal from the refusal of the local authority to allow such demolition lies to the Minister of Health. Penalties are imposed for

infringement of this section.

#### STREETS AND POOTPATES.

STREETS AND FOOTPATHS.—The scavenging of sections and the cleaning of footways and pavements is generally undertaken by the sanitary authorities. It is unlawful to place or leave on any footway any funditure, goods, were so merchandise, or any cask, tub, basket, pall, &c.; or to place over any footway any blind, shade, covering, awaing, or other projection less than eight feet in height from the ground; or to place any goods, wares, merchandise, matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway; or to roll any cask, tub, hoop, or wheel upon any footway, except for the purpose of crossing the footway; or to throw or lay down any materials in any street, or that or sakes any ourput, rug, or mat in any street after the hour of sight in the morning.

VACCINATION.

The parent of every child born in England must within six months after the birth of the must within ax months after the mirn of the child, or the person having custody of a child must within ax months after receiving it, have the child vaccinated by a registered private medical practitioner or by the Public Vaccinator for the district. If the vaccination is performed by a private medical practitioner a certificate in the form prescribed by the Vaccination Order, 1898, of successful vaccination must be sent to the Registrar of Births within seven days. The Public Vaccinator is required on the request of the parent or guardian of a child to visit the home of the child and vaccinate it free of charge with glycerinated calf lymph or with such other lymph as may be issued by the Local Government Board at the option of the parent. If a child is not vaccinated within a months of its birth, the Public Vaccinator is required to give as hours' notice to the parent and to visit the home of the child and offer to vaccinate it. No parent or other person will be liable to any penalty under the Vaccination Acts if within four months from the hirth he makes a statutory declaration before a commissioner for oaths or one justice of the peace that he conscientiously believes that vaccination would be prejudicial to the health of the child, and within seven days thereafter delivers the statutory declaration (which requires no stamp) to the Vaccination Officer for the district. A conscientious objector can thus escape all penalties, but a person who does not obtain a certificate, or make the declaration, will still be liable to penalties for not having a child vaccinated, and by the Vaccination Act, 1898, by the Local Government Board, the due vaccination of every child not exempted is secured by a very complete system of registra-tion, and in future the Vaccination Officers will be able to undertake prosecutions without directions from Boards of Guardians, and the Boards will have no power to prevent such prosecutions (See also Vaccination Order, 1997.)

#### WITT.T.R

REASONS FOR MAKING & WILL. Every man having a wife and family should make his will. However small his eatate, it is an imperative duty in most cases, and is asfer in every case, to pretect the interest of the survivors by a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious to provide. Thus a widow may find that the estate, a life policy perhaps, is not all thers, but has to be shared with a distant cousin of her husband's Negligence, or unreasoning dislike to making a will, becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled "as it is called "a.g., the income being paid to his widow for her life, or until remarriage, and on her death or remarriage the capital being divided among his children equally. The tying-up or postponing the enjoyment of income or capital requires the skill of a practical lawyer. Assuming that a lawyer is not employed, a person having resolved to make a

will must not regard it as a light matter, to be got rid of in a few minutes, like writing a letter, but one demanding the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of another meaning than the one intended. The lawyers have a maxim that the unforeseen (i.e., the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases are entirely out of place. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing musy be expressed in plain language. If in writing the will a mistake be made, ft is better to rewrite the wholes. Between the will a recouted, that is, signed by the situater in swamer of two witnesses, as atteration may be visued by striking through the words with a "pen, but opposite to such afteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of sny bind whatever must be made after the will is executed. If the testator afterwards whese to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly srecuted and attested in the same manner as the original will. A will should be uriften in this and very legibly on a single sheet of paper. Although, of oourse, forms of wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, sitter for themselves or others:—

TESTATOR OR TESTATRIX.—The person who makes the will is the testator, or if the will maker be a woman, the testatrix.

ESTATE. By this word is to be understood peoperty of all kinds, both real and personal Real property includes titles and advowsors, as well as freehold land and houses; while personal property includes debts due, arrears of rents, money, lessehold property, house farmiture, goods, assurance policies, stock in public companies, and the like.

RESIDUARY LEGATERS —It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

To Epoin a Will.—A form in which a will may be commenced is.—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

TO END a WILL.—After disposing of the property, the will may be ended as follows:—"And I hereby appoint the said —— sole (or joint) excepto(s) of this my Will, and I revoke all former wills and codicils Dated this —— day of ——, sp..."

EXECUTION OF A WILL—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or hasbend has been left a legacy, should not be an

stiesting witness. Their sitestation would be good, but they would forfelt the legacy. It is better that a person named as executor should not be a witness. Husband and wife may hold he witnessee, provided neither is a legates. It a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

ATTESTING EXECUTION.—Opposite to or beneath the testator's signature should be written the attestation clause. The following form of

attestation will be found sufficient :--

Signed by the testator [or testatrix, as the case may bel, in the presence of us, both present at the same time who in his (or her) presence and in the presence of each other have hereunts est

our names as witnesses.
William Jones, of Vine Cottage, Silver Street,
Reading, Tailor. Henry Morgan, of North Street,

Reading, Esq.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too til to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who therrupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be him the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If hy inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an andawit by one of the attesting witnesses before the will can be admitted to Probate.

CODICIL.—When any change is required to be made in the disposition of property assisted in the will, the change should be embodied in a codicil. A codicil should begin —"This is a codicil to the will of me. Thomas Smith, of Vine Cottage, Silver Street. Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows.—"I appoint John Jones, of number twenty-one, London Birrest, Ipswick, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legate. Thus a child or wife to whom the whole or a portion of the existe is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary; but it is desirable, here as elsewhere, to avoid ambiguity or vaguasses. APPOINTMENT OF TRUSTERS.—The form of appointment of executors will also serve when the estate is left in ears of trustees, except that the persons should be designated "executors and trustees." The Public Trustee may be appointed expansion or trustee of a will. See Public Trusterms, post.

TROOTS OF THE WHLL.—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees: "I give and devise all my estate and effects, real and personal, of which I may die possessed or en-titled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of sz years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of an years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so would have taken it invited in the death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her life [or during her widowhood], and after her death [or second marriage, which first taken the control of the property of the same for all or now. happens upon trust in equal shares for all or any my children or child "&c. as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

TESTAMENTARY CAPACITY.-A minor cannot make a will. A married woman (married since January z, z863) may dispose by will of any real or personal property as her separate property as if she were a *feme sole* (Married Women's Property Act, zees, s. z (z)). As to the powers of a woman rearried before that date it is advisable to consult a solicitor.

REVOCATION .- A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise de-stroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will : so that after marriage the old will should be re-acknowledged, or a new one made.

LAPSED LEGACIES.—If a legatee die in the life-time of the testator, the legacy or share of resi-due lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY.-When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die pos-sessed of or entitled to, unto my wife Mary Smith, absolutely."

To Children under Age.—When estates are left wholly or in part to children under the age of az years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. apply the annual income for their maintenance, apply the annual income for their may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors or some near relative, guardians of children under age. By the Guardianship of Infants Act, rage, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

ALL PROPERTY TO BE INVESTED .- Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

The stringency of the law as to the due execution of wills is only relaxed in favour of sailors and soldiers while on service. The law of wills is mostly contained in the Wills Act,

DUTIES OF EXECUTORS.—After the death of the testator, the duties of the executor may be stated briefly as follows:—The first duty of the execu-tors, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists or schedules of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. Under the Finance Act, reg, duties are charged on all property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode, or to a solicitor, and prove the will; to collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. By the Land Transfer Act, 1897, all the testator's real estate becomes vested in the executors, who hold the same as trustees for the per-sons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

ADMINISTRATORS.—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

#### WHERE TO FIND A PROVED WILL

To find a will proved before ast January, 1838; the date on which the Court of Probate Act, 1827 (so & as Viot. c., 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is proas conserved request. Falling talls, the will is pro-bably to be found in the registry of the district in which it was proved. The wills proved prior to 1852 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1828 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or in the registry of the district in which the testator lived. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and any will read on payment of a search fee of one shilling. In the latter case, the original will, proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about June or July of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which, with a shilling stamp im-pressed thereon, can be produced and read in any court of law. The District Registres established by the Act of 1857 are the following :-

#### SAFE CUSTODY OF WILLS.

There is a depository for the safe custody of the Wills of living persons at Somerset House. Since 1857 this depository has been provided by the State under sect. 91 of the Act so & 21 Vic. c. 77; but the provision has been almost a dead-letter. A will may be denosited the state of letter. A will may be deposited through the Registrar of a District Registry, who will transmit the will to London in a registered letter on receiving a fee of zee, for the deposit, of se. 6d. for entering a minute thereof, and se. for filing the affidavit which is required. A will once deposited will not be given up to anybody, but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity, and destroys his will in the presence of the Registrat. (See also Public Truster, post.)

#### PROBATE OF WILLS. ORFAINING PROBATE OR AUMINISTRATION WITHOUT THE AID OF A SOLIDITOR.

The entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 44.
The applicant should bring the registrar's certificate of the death of the deceased, or an official cartificate of burial, and the will, if there be one, and full details of the property and debts of the

If there be no will or no executor be appointed, for the executor will not act, two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, or the husband is the applicant, when one surety only will

be required. The scale of probate duty as at present in force will be found in detail under "Estate Duty.

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Where the deceased resided within the district of one of the "District Probate Registries (q.v.) application may be made at that registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices in the suburbs and many principal towns throughout

where the deceased has left no will, and the whole personal estate does not exceed £100, and the widow resides at more than three miles from

any Probate Registry, application may be made to the Registrar of the County Court. Scotland. —"Confirmation" is the Scottish equivalent of Probate. That is obtained in the Sheriff Court of the County in which the deceased was domiciled at the date of his death or where he had no fixed domicile for died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (x) in the case of intestacy or (a) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must be given up. If the deceased had personal property in Eng-tand or Ireland it is shown in the inventory, and then the confirmation is produced in the prin-cipal Court of Probate in England or Ireland. It is then sealed in such Courts and has the effect of probate or letters of administration in England or Ireland. In estates under £500 confirmation is obtained at reduced fees.

#### SCOTS LAW OF WILLS.

The only formalities required by the Law of Scotland as regards due execution of a will are for purposes of authentication. A will must be

in writing (shoeps that a person may leave a lagacy verbally if the amount of that legacy does not stosed see Soats (AT & Bd. Bd. Stating). A will may be either (1) holograph, i.e., writing by the testator himself, in which case no withestes are hecessary; (a) reited, which means that it is signed in presence of two witnesses. It is hot necessary that these witnesses should sign in presence of one shother, or even that they necessary that these withesses should sign in presence of one another, or evan that they should see the testator signing so long as the testator estator in the catator soknowledges his signature to the witnesses. If the testator cannot write, his will may be authenticated by a notary and two vitnesses. A parish minister may act as a hotary for the purpose of subscribing a will in his own parish. Wills are registered for execution purposes in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register Rouse, Edinburgh, for preservation. The original deed may be inspected in the General Register House on payment of a small fee. A certified official copy may be obtained from either register official copy may be obtained from either register on payment of stamp duties and writing fees.

#### TRUST FUNDS AND INVESTMENTS.

The Act of 1892 enacts that Trustees may invest in any Parliamentary Stocks of Government Securities of the United Kingdom: on real or heritable Securities in Great Britain or Ireland: in Bank of England Stock: Bank of Ireland Stock: India 3% per cent. and 3 per cent. Stocks; any Stock hereafter issued by aithority of Parliament charged on revenues of India: any Securities having interest guaranteed by Parliament: Metropolitan Board of Works or London County Council Stocks: Debenture Stock created by Metropolitan Police District Receiver: Debenture, Rent-charge, Guaranteed or Preference Stocks of any railway in Great Britain or Ireland that has paid not less than 3 per cent. per annum on Ordinary Stock for each of the 29 years preceding date of investment; any railway or canal Stock in Great Britain or Ireland leased for see years or more at a fixed rental to any railway specified above: Indian Railway Debenture Stocks of companies with interest paid or guaranteed by Indian Council: "B" Annuities, Eastern Bengal, East Indian, and Scinde, Punjab, and Delhi Railway, "C" and "D" Annuities of the East Indian Railway, and any like annuities of any other railway hereafter created; any Indian railway with fixed or minimum dividend paid or guaranteed by Indian Council: any Debenture, Guaranteed or Preference Stocks of any incorporated or chartered Water Company in Great Britain or Ireland that has paid not less than g per cent per annum on Ordinary Stock for each of the 12 years preceding date of stoom for each of the is years preceding date of investment: any Corporation Stock of any borough having so,ose inhabitants: any County Codneil Stock authorised by Act of Parliament or Provisional Order: any Water Stocks issued by incorporated Commissioners levying comby incorporated Commissioners so, so, so, pulsory fates over areas containing so, soe inhabitants, such rates not having exceeded Se inhabitants, such rates around for so years; and per cent, of authorised amount for 10 years : and in any Securities authorised by order of the High in any securities authorised by order of the High Courts of Justice of England or Ireland. Provided Stocks redeemable within 15 years are not pur-chased at a premium over the redemption price, or at more than 15 per cent. premium over such redemption price if redeemable after 15 years. The Rule of the Supreme Court, 1282, autho-rises investment in:—Debeniure, Preference,

Guaranteet, or Rent-Sharge Stocks of railways in Great Britain or Ireland having for ten years next before the date of investment paid a dividend on Ordinary Stock or Shares, and in like Stocks if guaranteed by Railway Companies of the same description and in Nominal Deben-tures or Nominal Debenture Stock under the tared or Nominal Debenture Stock under the Local Loans Act, 1875, or under the lale of Man Loans Act, 1880, provided such Stocks are not liable to redemption within fifteen years from the date of investment.

The Trusts Amendment Act, 2884 (Scotland only), excludes Irish real or heritable Securities or Stocks, and British Railway contingent Preference and Waterworks Stocks; admits all Railway Debenture Stocks and Guaranteed Stocks of railways that have paid Ordinary Dividends for the past ten years, and all Municipal Loans, and East India Stocks, and registered Colonial Stocks if approved by Court of Session.

The Colonial Stock Act, 1900, permits Trustees, both English and Scottish, to invest in certain Colonial Stocks registered in the United King-dom which the Treasury publishes a list of in the London and Edinburgh Gasettes, but subject to the clause as to Redeemable Stocks in the Trustee Act, 1803.

#### THE PUBLIC TRUSTEE.

This is a Government Office (opened in 1908) by means of which the State acts as Executor and as Trustee under a Will, or as Trustee under a Settlement, whether new or old, and in other capacities of a like nature. The public demand for the services of the Public Trustee sontinues unabated. The value of the trusts accepted up to

March 31, 1980, was £154,011,803.
The facts of any trust, new or old, in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal in-terview. Upon his assenting to act, his appointment is effected in the same simple way as in that of a private trustee, or he can be appointed by an Order of the Court. He can act solely or jointly with others.

In the case of a Will about to be made, all that the testator need say is, "I appoint the Public Trustee executor and trustee of this my Will"; or the appointment may be a joint one with friends or relations. In the case of a Will already made, the appointment of the Public Trustee can be effected by means of a codicil. Executors who have obtained probate can

transfer their duties to him under an Order of

the Court. He can also act as Administrator with, or without, the Will annexed.

The Public Trustee being a permanent trustee, the expense of fresh appointments is saved. His integrity is guaranteed by the State, while the public demand for his services should ensure a valuable experience and skill in the execution of his office; and a wide knowledge in the work of investment

The Public Trustee is not, as such, limited in his powers of investment to trustee securities, but, like a private trustee, he is bound by such powers of investment as may be given him in the Will or trust instrument under which he acta.

The progress of the Department may doubtless be ascribed to the wide public need for such an office; secondly, to the State guarantee which accompanies the remedy provided; and thirdly, to the endeavour which is made to keep the administration upon personal lines. The Public Trustee makes a point of giving the personal attention of himself or of his senior officials to the personal details of any trust. The statutory rules require that strict secrecy shall be observed in respect of all matters dealt with in the Department. Accounts of every trust, in simple form, are furnished to the beneficiaries as required.

The Public Trustee Act provides that the fees to be charged shall be arranged from time to time so as to produce an annual amount sufficient to discharge the salaries and other expenses of the Department. A profit is not intended. Owing to the increase in general administrative expenses, and to the shrinkage of the capital values and the net income upon which the fees are assessed, it has been necessary to revise the are assessed, it has been necessary to revise she scale prevailing since spis. An important Committee of Investigation, presided over by Sir George Murray, G.C.B., was appointed by the Lord Chancellor in April, 259, to inquire into the organisation of the Office and any alteration which might be required in the scale of fees.

An interview with the Public Trustee or with any of his senior officers can be arranged at any time by letter or telephone.

A pamphlet giving full particulars and details of the new fees can be obtained free of cost upon application to the Office of the Public Trustee, Kingsway, W.C. z (tel., Holborn s,400), or at any Post Office.

A branch office has been opened in Northern Assurance Buildings, Albert Square, Manchester. (For list of Officers, see p. see.)

THE HEAD MASTERS' CONFERENCE (Secy., W. A. Buikeley-Evans.C.B.E., M.A., 12 King's Bench Walk, Temple, E.C. 4.).—The object of the Conference is the discussion of educational questions which affect such schools as are in close connexion with the Universities of Oxford and Cambridge. The annual meetings are, as a rule, held in December, alternately (a) at some school represented on the Conference, (b) at London or some University town. In considering applications for admission to the Conference, the committee has regard to the scheme or other instrument under which the school is administered and the numbers in the school. As a general rule, there should be see boys at least in any school represented at the Conference, and about ten resident undergraduates at the Universities who have gone direct from the school, but regard is also paid to the proportion of under-

graduates to the total number of boys in the school

ASSOCIATION OF UNIVERSITY TRACHERS (Founded 1883, Incorporated 1910). Teachers holding a degree conferred by a University of Great Britain or Ireland or Overseas Dominions, and of some foreign countries, are eligible for membership, amounting to 2,787.

President, Miss Gray; Secretary, Mrs. B.
Brough, 208 Victoria Street, S.W. 2.

THE ASSOCIATION OF HEAD MISTRESSES.—He mistresses of Public Secondary Schools with at least so pupils are eligible for membership. Members are marked of in the lists on pages 305 to 328. A Conference is held annually in June.

President (1919-1921), Miss Major, M.A., King
Edward's High School, Birmingham. Secretary, Miss R. Young, 92 Victoria Street, Westminster, S.W. z.

# 434 Entestates' Gstates, England & Wales and Freland.

# I .- PERSONAL PROPERTY, INCLUDING LEASEHOLDS. The person entitled to administer is shown in brackets.

. In each instance it is supposed there are no measur relations than those named.

By the Intestates Estates Act, see, the widow of a man dying in England, Wales, or Ireland intestate and without issue is entitled to the whole estate both real and personal if under £500 in value; if over that amount she takes £500 out of the real and personal estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act. His representatives take in the proportions following:—

Half to widow. Half to the Crown. [Widow.] If the Intestate die, leaving One-third to widow, two-thirds to children in One-third to widow, two-thirds to enliteren in equal shares. In case of deceased children who have left issue, such issue take amongst them their deceased parent's share. [Widow.] Half to widow. Half to father. [Widow.] Half to widow. Half to mother. [Widow.] Half to widow. Half equally amongst brothers and sisters, whether of the whole or half blood; if a deceased brother or sister has left issue anob lesits take amongst than their Widow and child of children ...... Widow and father..... Widow and mother, no father ...... Widow, brothers or sisters ... ..... issue, such issue take amongst them their deceased parent's share [Widow.] Half to widow. One-fourth to mother. One-fourth to nephews and nieces per stirpes Widow, mother, nephews or nieces ...... All to husband. [Husband] All to father. [Father] All equally. [Mother.] Husband, with or without children ........ All to mother. [Mother.] Amongst children in equal shares, the grandchildren taking amongst them their deceased parent's share. (Any number of children not exceeding three.) Children, and grandchildren by deceased children Amongst brothers or sisters in equal shares, the children of deceased brothers or sisters taking Brother or sister, and nephews or nieces...... amongst them their deceased parent's share. Brother or sister.] All to brother or sister. [Brother or sister.]
All to brother or sister. [Brother or sister.] Brother or sister, and uncles or aunts . . . . . Grandfather, no nearer relation .... ... Father's father, and mother's mother ... All to grandfather. [Grandfather.] Equally to both. [Either or both.] All to grandmother [Grandmother.] (Equally per capita. [To either or any number Grandmother, uncles, and aunts ..... Great-grandfather, uncles, and aunts not exceeding three ] All equally. [To either or any number not Uncles and aunts .. .... . .. .. .... exceeding three. ] Uncle, and deceased uncle's child .... All to uncle. [Uncle.] Uncle by mother's side, and deceased uncle or aunt's child. All to uncle [Uncle.] Aunts, nephew, and niece ..... All equally. [Either not exceeding three.] { Equally per capita. [Any number not exceeding three.] Equally per capita [Any number not exceeding three.]

Note A.—Taking per capita is taking by head individually. Taking per stirges is taking by descent or representation. Thus, if A. die leaving three brothers or sisters, and no nearer kin, they each take an equal part of his personal estate in his or her own right, i.e., per capita. If there are also children of a deceased brother or sister they share in the estate by taking amongst them the share which their deceased parent would have taken had he or she survived, i.e., per stirpes. Note B.—By English Law, brothers and sisters of the half blood share equally with the whole blood.

Nephew by brother, and nephew by half-sister ...

#### II.-REAL PROPERTY.

(N.B.-Leaseholds are Personal Property.)

Table of Descent of Real Property in England & Wales and Ireland on death or an intestate. No livegitimate child is capable of inheriting real estate. Custom of Gaucking (descent toyell sons alike) still exists in Kent, and custom of Borough English (descent toyoungest son) in divers shelent horoughe. The Dower (viz., widow's thirds) of widows married since args) is in the majority of cases barred. In each instance it is supposed there are no nearer relations than these named.

If Intestate the, leaving Real Property would descend to—

and nephews and nieces by deceased sister	All to eldest nephew, son of deceased brother.
NOTE A By the Land Transfer	r Act, 1807, the real estate of a deceased person devolves to the ased, and probate and letters of administration may be grapted hough there is no personal estate. The ultimate ownership of provisions, which are for the convenience of administration. As ration of real estate, they are substantially the same as in the unit shall, in granting letters of administration, have ragent to interested in the real estate, and the heir-at-law, if not one of titled to the grant with the next of the contract.
personal representative of the dece	ased, and probate and letters of administration may be granted
real estate is not affected by these	provisions, which are for the convenience of administration. As
to the persons entitled to administ	ration of real estate, they are substantially the same as in the
the rights and interests of persons	interested in the real estate, and the heir-at-law, if not one of
the next-of-kin, shall be equally en	titled to the grant with the next-of-kin.

# Intestates' Estates, Scotland.

#### I.-MOVABLES.

#### In each instance it is supposed there are no nearer relations than these named.

By the Intestate Husband's Estate (Scotland) Act, rerr, the widow of a man dying intestate and without issue is entitled to the whole estate both heritable and movable if under does in value; if over that amount she takes does out of the heritable and movable estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act.

If the Intestate die, leaving	His representatives take in the proportions following:-
Widow only	Half to widow, half to next of kin, or if none, then to the Crown.
Widow and child or children	One-third to widow. Remaining two-thirds to child or among children equally.
Widow and children and issue of predeceasing children	One-third to widow, one-third to living children equally, remaining third amongst living children per capita* and issue of deceased children per stripes.*
Widow and father	Half to widow, half to father.
Widow and mother, no father	Half to widow, one-half to mother. (Half to widow, half equally amongst brothers and sisters
Widow, brothers or sisters	whether of the whole or half blood consanguinean. If a deceased brother or sister has left issue, such issue take amongst them their deceased parent's share.
Widow, mother, nephews or nieces	Half to widow, one-half to mother.
Husband, with or without children	Half to husband, half to wife s next of kin.
Father and mother	Whole to father
Father, mother, brothers and	Half to father; half to brothers and sisters equally.
Father and mother and their	
grandchildren	(One-half to father, one-half equally amongst brothers and
Father, brothers and sisters	sisters.
Mother, brothers and sisters	Mother one-half, brothers and sisters one-half equally.
Mother, but no other kin	Whole to mother.
Child, children or grandchildren by deceased children	Amongst children in equal shares, the grandchildren by de- ceased children taking amongst them their deceased parent's share.
Brothers or sisters and nephews or nieces	Amongst brothers or sisters in equal shares, the children of deceased brothers or sisters taking amongst them their deceased parent's share.
Brother or sister and grandfather	All to brother or sister.
Brother or sister and uncles or	All to brother or sister.
Grandfather, no nearer relation	All to grandfather.
Father's father and mother's mother	All to father's father.
Grandmother, uncles and aunts	All to uncle and aunts, if paternal.
Great-grandfather, uncles and	All to uncles and aunts, if paternal; if not, then to paternal great-grandfather.
Uncles and aunts	All equally.
Uncle and deceased uncle's child	All to uncle.
Uncle by mother's side, and de- ceased uncle or aunt's child	Child of deceased paternal uncle or aunt takes to exclusion of maternal uncle.
Aunts, nephew and niece	Nephew and niece.
Cousins	Equally per capita.*
Nephew by brother, and nephew by half-sister	All to nephew by brother.
Note A.—Illegitimate children d	o not succeed to their father or mother as heirs in intestacy.

NOTE A.—Illegitimate children do not succeed to their father or mother as heirs in intestacy.

NOTE B.—In Scotland, a lease on intestacy and in the absence of any destination descends to the heir-at-law.

NOTE C.—When a person dies intestate leaving heritable estate as well as movables, the heir to the heritage, if he is also one of the next-of-kin, is not entitled to any of the movables if he takes the heritage. He may, however, "collate" the heritage, i.e., share it with the other next-of-kin and thus get an equal share of the mixed estate.

\* Per Capita means by the head; per stirpes means inheriting through a parent deceased. Movables taken per capita divide into as many shares as there are children. Where representatives of a deceased parent take per stirpes they take equally amongst them the share that would have fallen to the deceased had he or she survived.

#### II.—HERITAGE.

Table of Succession to heritable property in Scotland on Intestacy and in the sheence of any destination in the property writs, other than "to heirs and successors."

In such instance it is supposed there are no neaver relations than these named

THE RESERVE OF THE PARTY

#### SOLICITORS CHARGES.

These are now usually regulated in convsyanding and nen-contentious business by the Solicitors Remuneration Act, 1281, and the Scale thereunder—we say "usually" because that Act allows an option to a solicitor of declining to adopt it. In practice, most solicitors (although some old-established firms are found to prefer the old system) are willing to adopt the Scale, and especially on mortgages and sales. Looking first at the old system, we find that an Act of x43 made solicitors' charges on convey-ancing liable to taxation by a public official; and in x870 a further Act enabled the taxing officer to have regard to "skill, labour, and responsibility as well as to mere length of documents. The Act of 1881 enabled the high legal authorities, with the consent of certain representative solicitors, to frame a Scale, and this has been done. It chiefly relates to sales, purchases, and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase or mortgage money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent.; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is a per cent. It should be noted that if the solicitor negotiates the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to. All charges are now subject to an increase of 33 1/2 per cent.
Scotland.—Solicitors' fees for Conveyancing

and General business are regulated by a joint table approved by the different societies of Law Agents (Solicitors). Fees for litigation are regulated by the Court of Session. The tables of fees are published in The "Parliament House Book" and in "The Scottish Law Directory, When a solicitor sues for payment of a pro-fessional account it is remitted to the Auditor of

the Court for taxation of his charges

#### MEDICAL FEES.

Patients are charged according to their supposed incomes, the income being indicated by the rental of the houses in which they reside. following are the charges usually made by general practitioners :-

GENERAL		(b) II £a,coo t		
PRACTITIONERS	Les to Les	£25 to £50	Lisoto Liso	case of

Mileage beyond two miles from Home	250.	150.	zge.	centage

Special visits--(.e., of which due notice has not in given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in in consultation he is en-

titled to the minimum fee.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if he send for the doctor, the charge is

the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to

the number of visits required.

Medical bills are commonly rendered once or twice a year.

#### ACCOUNTANTS' CHARGES.

For preparing balance-sheet, investigating accounts, &c., principal's time, exclusively so employed, per day of seven hours, £2 ss. to

£5 58. Chief clerk's time, 208. 6d. to £2 228. 6d.

Other clerks' time, per day of seven hours, 78. 6d. to 168.

These charges to include stationery, except the forms used.

#### ARCHITECTS.

Fees on New Works .- For taking the Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement, or otherwise, preparing drawings and specifications for the purpose of estimates, obtaining tenders, advising on tenders and in preparation of contract, selecting and instructing of consultants, furnishing to the Contractor one copy of the drawings and specification and one copy of the drawings and specincation and such other details as are necessary for the proper carrying out of the works, general supervision as above defined, issuing certificates for payment, and passing and certifying accounts, a percentage on the total cost of all executed works as follows:

(a) If the contract or order exceeds £2,000

the percentage is to be 6 per cent.

(b) If the contract or order does not exceed £ a,000 the percentage is to be 10 per cent. in the case of works costing £x00 graduated to 6 per cent. in the case of works costing £x,000 as the special character of such works may render appropriate.

Alterations and Additions .- A percentage not exceeding twice the amount due for new works

of the same cost.

Pittings, Decorations, do.—In works in which designs for fittings, appointments, decorations, or complex detail or construction are main features, special fees may be charged according to the circumstances, and also for designs for furniture.

Omitted Works.—In addition to the centage on the total cost of executed works, the Architect is to be paid in respect of all works included in the tender or order, but not executed, two-thirds of the charge which would have been

due upon them had they been carried out.

Partial Service.—If the project or part of it
be abandoned, or if the services of the Architect
case or are dispensed with before a contract is entered into or order given, the charges in respect of the works abandoned or for which the Architect was employed (as the case may be) are as follows :-

(a) For making approximate estimate of cost by subic measurement, or otherwise, one-fourth of the percentage on the estimated cost of such

works.

(b) For making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the percentage on the estimated cost of such works

Instalments.—On a contract being entered into or order given for the works the Architect shall be entitled to an instalment of two-thirds of the charge calculated on the total amount of the contract or order, and no part of such payment shall be reclaimable from the Architect in the event of the subsequent abandonment of the works. The remainder of the Architect's remuneration shall be payable by instalments from time to time as the work proceeds.

Work Executed with Old Materials, &c.—In

all cases where work is executed wholly or in part with old materials, or where material, labour or carriage is provided by the Client, the percentage rhall be calculated as if the works had been executed throughout by a Contractor,

and with new material.

Services Not Included in Percentage.-The foregoing percentages do not cover the following services, for which, and for any other services not covered by any payment herein provided for, additional charges may be made in accordance with the amount of work involved :—

Advising as to the selection and suitability of Negotiations relating to the site or building. Surveying the site or building and taking levels, and making surveys, measurements, and

plans of existing buildings.

The preparation of further sketch designs necessitated by a material alteration in, or addition to the Client's instructions, or altering the working drawings and specification in consequence thereof prior to the commencement of the works. Altering drawings, or preparing new drawings, and other services involved in consequence of variations or additions desired by the Client after the commencement of the works. Making extra drawings for the Client's or Contractors' use, and making drawings for and negotiations with ground landlords, adjoining owners, public authorities, or others, and making applications for licenses and consents.

Making arrangements in respect of party walls and rights of light and other easements, reservations or restrictions. Services in connection with litigation or arbitration. Services consequent upon or resulting from the death or bankruptcy of Contractors or the failure or neglect of Contractors from any cause whatever to carry out the works in accordance with the contract or order or consequent upon the fraud or negligence of the Clerk of Works. Services in connection with firs, flood, or tempest during the execution of the works, and services in con-

nection with the planning of grounds or gardens Housing Schemes and Laying Out Retates.— The fees are those approved by the Ministry of Health, the Board of Agriculture and Fisheries, and the Souttish Board of Health.

Approval of Lessee's Plans.—For approving plans submitted by a lessee and for inspecting the work during its progress so far as may be necessary to ensure the conditions being ful-filled, and certifying for lesse when required, the charge is as follows :-

For each £200 or part of £200 of the total cost up to £300, 2% per cent. (minimum fee,

£3 38.).
For each £100 or part of £100 from £500 to

£5,000, 1% per cent.
For each £100 or part of £100 above £5,000,

z guinea per cent.
Litigation and Arbitration.—For qualitying to give evidence, settling proofs, conferences with Solicitors and Counsel, attendances in Court or before Arbitrators or other tribunals, and for other services in connection with litigation and arbitration the charges are based upon the time occupied and the professional standing of the

Architect.

Land Surveying and Levelling .- For surveying and making a plan of a town, village, street or road, estate or grounds, or any part thereof, for taking levels, setting out streets or roads, and for other services in connection with land not otherwise specifically provided for, the charges are by time in accordance with Clause az.

Sanitary Surveys .- For inspecting, reporting and advising on the sanitary condition of premises, the charge is by time in accordance with Clause az, the minimum fee being £3 32., in addition to the cost of assistance and ap-

Expenses.—The above-mentioned fees are, in all cases, exclusive of the cost of copies of documents, lithography, travelling and hotel ex-penses, and all other disbursements, which are to be charged in addition.

#### QUANTITY SURVEYORS.

A fee of all per cent. upon the amount of the lowest tender received for the contemplated building, or upon its estimated cost should the work be abandoned before tenders are received, is charged by Quantity Surveyors for preparing Bills of Quantities.

FOR MEASURING AND ADJUSTING VARIATIONS the fees are a½ per cent. on the amount of additions, and x½ per cent. on the amount of omissions brought into account.

FOR SERVICES IN CONNEXION WITH LITTGA-TION OR ARBITRATION, a charge per day (dependent upon the Surveyor's professional position) is made.

The above charges are exclusive of the cost of printing, lithography, and fair copies of accounts, and in all cases travelling and other out-of-pocket expenses are payable in addition to the fees.

#### CONSULTING ENGINEERS.

On Constructional Work the payment is usually an agreed fee or a commission (which includes the necessary drawings, etc.) of g per cent. on the cost of the works where the contract exceeds £3,000 and 7½ to se per cent. where the amount does not exceed £3,000.

For quantities and Accounts (the services which in architectural work would not be covered by the Architect's fee but would be

Quantity Surveyor's work) the usual charge is 1/2 to a per cent, where the amount exceeds 

AUCTIONEERS, SURVEYORS AND ESTATE

AGENTS.

1. Sales by Austion.

Preshold, Leasthold, and Copyhold Properties, including the preparation of particulars, and saying as to reserved:—On the first \$300, \$\$ per cent.; on the next \$4,470, 21% per cent. In addition to the above charges:—On amounts peld-by the purchaser for Chattele, Fixtures, Fittings, Trade Stocks, and other Mondie Effects, Timber, and Tenant-right under the conditions of sale, in addition to the purchase-money of the property:—Specials. the property:—g per cent. on £300, and 31/2 per cent. on residue, to include inventory and taluation.

Sale before Auction

After issue of advertisements, the same scale as by auction

Non-Sale.

Charge equivalent to one-fourth of the com-mission which would have been earned on a sale up to £5,000 calculated on the reserve price, to include valuation for reserves; on larger amounts by arrangement.

Sale after Auction.

In the event of the property being sold within three months after the auction, the charges for non-sale would merge into the ordinary com-

mission then payable.
Furniture, Trade Stocks, and Chattels. sent on the amount realised, evaluaive of pre-

paration of catalogues.

Plant and Muchinery .- s per cent. on the amount realised, exclusive of preparation of catalógues

Live and Dead Farming Stock (except Horses and Pedigree Cattle).—1/2 per cent. on live stock, and 5 per cent. on dead stock, on the amount realised.

Horses and Pedigres Cattle .- 5 per cent. on

the amount realised.

On Lots referred to in the last four paragraphs, reserved or bought in by or on behalf of the wender.—One half the commission on sale, calculated on the amount of reserve or buying-in price.

2. Private Treaty Sales.

Freshold and Copyloid Estates and Houses, and Ground Leases.—On the first fees, per cent; on the next fee, et per cent; on the residue, 24 per cent; and a commission, in addition, on the amount paid for Ostetel, Entures, Fittings, Furniture, Trade Stocks, and other Mountle Myest, Timber, and Tenant-right, of per cent up to fees, and ether the seedue, to include inventory and valuation.

#### 3. Purchases.

Freshold, Copyshold, or Lanschold Property.— One-half of the scale for sale by private treaty, calculated upon the amount of the purchase-mency, but including inspection, advising as to value, and negociating of bidding. If no purchase-is effected, the issual scale for valuation should be charged: one guines per such to first £1,000; half is guines on heavy £1,000; and a quarter of a guines per cent, beyond on the value of the manner. Mistenyrice. Law property. Minimum fee, &u ge.

4. Lettings.

Business Promises, Unfurnished Houses, Philip, dia, or on Disposing of all Leases (other than Ground Leases) by assignment or etherwise,.... If the annual value he give of less give onto one year's rent, where the term is for one year or less, and 94 per cent. on one year's rent where the term is for more than one year's rent where the term is for more than one year. If the annual value he over gives the above seale shall apply to the first gives and on the excess rental over that amount, where the term is for three years or less. a ter event, on one year's rent. three years or less, 4 per cent. on the year's rent; where the term is for more than three years, 7% per cent. on one year's rent; in the ease of repairing leases the commission is so per cent, on one year's rent. Upon the premium or consideration (in all cases), g per cent. up to £2,000, and s'/2 per cent. on the residue; and the commission on any sum obtained for fixtures, furniture, or effects of any kind, of g per cent. up to £500, and s1/2 per cent. on the residue. In the case of a progressive rent the commission is based on the average rent receivable. When a property, which an agent has been instructed to let or sell, is let by him, and the tenant afterwards purchases, the commission for selling, less the commission already paid on the letting, will then become payable. For negotiating the Renting of Unfurnished

Houses or Flats, excluding Survey or Valuation.

Half the commission payable for a letting. On Letting Furnished Houses or Flats in Town on Leaving Furnament prouses or Flats in Town or Country, or Shooting, including Collection of Hent.—5 per cent. on the first year's rental, and 2% per cent. for the remainder of the term. For negotiating the Renting of Furnished Houses or Flats, excluding Survey or Valuation.

—Half the commission payable for a letting.

For Making or Checking Inventories of Furniture and Effects.—A minimum fee of two guineas per day, exclusive of expenses

On Letting Land on Building Lease.—One year's ground rent on first £50; three quarters ditto on next £50; half ditto on next £900; quarter ditto on residue.

g. Collections or Receiverships.

se per cent. upon gross rental of weekly property; g per cent. upon gross rental of other property or tithes; 7% per cent. upon the gross rental for the management and collection of rents on agricultural estates; and to g per cent. on ground rents, according to the amount of the rents and the number of collections.

6. Laying Out or Development of Estates. For Road Construction, 5 per cent. upon the outlay, exclusive of expenses

STANDARD GOLD contains twenty-two twentyfourths (carate) of fine gold and two twentyfourths of alloy; fineness, 916 66, or az carats. Twenty troy pounds of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, worth £3 xpx to/d., and one ounce of pure gold, on the same basis, £4.2. 11/d. During rose, the market price of gold has been above these figures

STANDARD SILVER formerly consisted of thirtyseven-fortieths of fine silver and three-fortieths of alloy; fineness, 935. Silver for coinage, by an Amending Act (10 Geo. V. ch. 3), consists of Amending Act (so Geo. V. ch. 3), consists of one-half silver, one-half alloy; or in millesimal fineness, see. One troy pound of silver is coined into 66 shillings. [Another Standard, called the "New Sterling" or Britannia, of the fineness race. se dwt. (988-33), is practically obsolete. It is occasionally used, however, for high-class plate ]

On account of the high price of precious metals, the melting of British gold and silver coin is prohibited, as well as their export.

†BRONZE is an alloy of copper 95 parts, tin 4 parts, and zinc r part.
The "REMEDY" is the amount of variation

permitted in fineness and in weight of coins when first issued from the Mint.

TOKENS .-- No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £20

LIGHT GOLD.—Any person to whom it is ten-dered may break, cut, or deface any gold coin below the least current weight; but under the provisions of the Coinage Act, 1891, and an Order in Council of 16 March, 1892, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

BANK OF ENGLAND NOTES are issued for sums of £5, £10, £20, £30; also for £100, £200, £300, and £1,000.

TREASURY NOTES of the value of £1 and 108. are issued, and are legal tender to any amount.

BANK POST BILLS can be obtained at the Bank of England for amounts of £so and over at seven days sight. They are issued for the full sum named thereon, without allowance for discount. No charge is made for bills so drawn they may be obtained at the Chief Office of the Bank

of England in London, or at any of the branches. LEGAL TENDER OF MONEY.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England). No one can be compelled to give change Gold, if above the least current weight, and Treasury notes are Gold, if above the legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling.

BRITISH COINAGE STATISTICS .- During 1919 the number of coins struck at the Royal Mint was 223,402,552, of which 227,742,552 were Imperial and 4,660,000 Colonial.

THE PRICE OF SILVER, 1910-1980.—The Average Yearly Price of Silver per standard Troy Ounce in the London Market thering the last ten years wen as follows:—1910, 1844; 1911, 1844; 1911, 1844; 1911, 1844; 1911, 1844; 1911, 1844; 1911, 1844; 1911, 1844; 1911, 1844; 1911, 1844; 1911, 1844; 1911, 1844; 1911, 1844; 1911, 1844; 1

In the United States the price of aliver is quoted in cents per troy ounce size. In order to convert an English quotation into cents per ounce Size, first express the pance as a whole number and decimal fraction and then multiply by a tray; to express a United States price on the English system, multiply the cents by e-agin

#### OURRENCY OF THE BRITISH EMPIRE ABROAD.

Imperial Sterling Coins are the sole legal metallic currency in :-

Union of South Africa and South Africa GENERALLY.

FALKLAND ISLANDS.

FUL

GIBRALTAR NEW ZEALAND. ST. HELENA.

Special Coins are current in addition to the Imperial series in :-

AUSTRALIAN COMMONWEALTH. - Special florins, shillings, sixpences, and three-pences in silver, and pence and half-pence in bronze, of the same weights and composition as Imperial coins of these denominations, but of special designs.

BRITISH GUIANA.-A special groat or fourpence.

GUERNSEY .- Eight doubles (= r penny), 4, z, and z double.

JAMAICA.-Nickel-bronze pence, halfpence, and farthings.

JERSEY. - Special pence, halfpence, and farthings.

MALTA—One-third of a farthing.
NIGERIA, NORTH AND SOUTH.—Sliver and
also "mixed metal," zs., zs., zs., and zd.
(ne penny, one halfpenny, and one-tenth penny (nickel-bronze)

UGANDA	Same a	East Afric	a.		

Variable with the price of silver—(Oct 27, 2000) gap pence per standard ounce.
 The only gold coin in general use in Egypt is the British sovereign, which is current at 572 plastical.

## MONEYS OF FOREIGN MATIONS.

The currency systems of many nations are dislocated as a consequence of the war. In many cases silver coins are reduced in fineness; in others coins in low value metals are substituted.

• Values thus marked are subject to fluctuation.

British weights and measures.

The Weights and Measures Act of 126, super-seding all previous laws, enacts the legal measures for the United Kingdom, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Depart-ment of the Board of Trade

ment of the Board of Trade.

The Yard and the Pound are the only two independent standards for weights and measures. The Gallon, the capacity standard, wet or dry, is based upon the Pound. The Act of 1876 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the tem-perature of 60° Fahrenheit, with the barometer at so inches.

Apotheoaries' Weight. For the use of Apothecaries and for selling drags retail.

Measures of Weight.

ao grains ...... = z scruple (9z).
3 scruples .... = z drachm (3z).
8 drachms..... = z Apothecaries' ounce (oz. A poth.).

Measures of Capacity.

60 minims (min.) = 1 fluid drachm (f. dr.).

8 fluid drachms = 1 fluid ounce (fl. oz.)

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 graina. The Apothecaries' drachm is not the same as the Avoirdupois dram, and is spelt differently. A fluid ounce of distilled water at a temperature of 6s° Fahrenheit is equal in weight to the Avoirdupois ounce (437's grains). A fluid drachm (54'69's grains) is equal in weight to Two Avoirdupois drams.

Approximate Equivalents are as follows :r sovereign = a drams; r half-crown = 3% drams; r florin = 3 drams; r shilling = x% drams; r 3d. piece = % dram; r "table-spoon" =  $\frac{1}{2}$  fluid oz.; z "dessert-spoon" =  $\frac{1}{2}$  fluid oz.; z "tea-spoon" =  $\frac{1}{2}$  fluid oz.

Avoirdupois Weight. (a) For minute weighments-

rece grains (gr.) ... = 1 pound (lb.). 7000 grail—

 $z \in drams(dr.)... = z ounce(oz.).$ 

26 ounces ...... = 1 pound. 28 pounds ..... = 1 quarter (of a owt.). The quarter is halved into stones.

(c) Wholesale-

z cental ...... = zeo lbs. 4 quarters ..... = z hundredweight(cwt.) so hundredweight = r ton (s,240 lb.).

as hundredweight = x ton (a, ago lb.).

Miscellaneous Weight.—Ballant (pig = 56 lb.);

beef (barrel = aco lb.); blacklead (cask = xr½
cwt.); butter (barrel = 4 firkins = sa4 lb.); coal
(sack = sa4 lb., ton = ro sacks, bushel = 80 lb.,
chaldron = 36 bushels); cocos (bag = xxs lb.);
coffee (bag = x40 lb. to x68 lb., bale of Mochasag lb. to s80 lb., barrel = xxs lb. to x68 lb., tierce
= 5 cwt. to 7 cwt.); cotton (bale, U.S.A. = 400 lb.
to stable. Expert=errol bt o xable. India-see lb. = 5 owt. to 7 owt.); cotton (bale, U.S.A. = 400 lb. to 400 lb., Rgypt=900 lb. to 740 lb., India=500 lb. to 600 lb.); glass (seam = 24 stones of 3 lb. = 200 lb.); glass (seam = 24 stones of 3 lb. = 200 lb.); glass (seam = 24 stones of 3 lb. = 200 lb.); plops over to 2 owt.); lead (a fodder, Loudon and Hull = 29½ owt., Derby = 28½ cwt., Newcastle = 25½ owt.); peoper (bag of black=326 lb., of white = 268 lb.); pork (barrel = 228 lb.); potatoes (200 lb.); raisins (barrel = 212 lb.); salt-petre (bag = 268 lb.); raisins (barrel = 212 lb.); salt-petre (bag = 268 lb.); raisins (barrel = 22 lb.); salt-petre (bag = 268 lb.); solt soap(barrel or pack = 256 lb.); arisins (bag = 212 lb.); salt-petre (bag = 22 lb.); solt soap(barrel = 22 lb.); sugar (bag = 212 lb.); to 12 lb.); salt-petre (bag = 212 lb.); salt-petre The Smithfield stone (for dead meat) is \$ 1b. only.

to z6 cwt., tierce = 7 cwt. to 9 cwt.) tar (harrel = 36% gallons); tea (chest = 34 lb.); tobacco (hogshead = zs cwt. to z8 cwt.); turpentine (barrel = as4 lb. to see lb.); wool (sack = 364 lb.).

Trey Weight.

For gold and silver. The ounce, divided decimally, and not into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce, = 480 Avoirdupois grains in weight. There is no Troy pound.

Jewellers' Weight.

The metric carat of soo millegrammes is the legal standard of weight for precious stones and pearls.

Measures of Capacity. (a) Retail and Liquid-

4 gills .... = 1 pint. 2 pints . . = 1 quart. = z gallon.

4 quarts .
(b) Wholesale—

8 gallons .. . . = z bushel. a bushels . . ı quarter. A measure of a gallons is called a peck.

A chaldron is 36 bushels = 4% quarters.

Wheat, Corn, and Flour Wheat and other cereals are commonly sold by

weight, the bushel being thus reckoned Wheat, English, 60 lb Foreign, 62 lb.

Barley, English, 50 lb. French, 531/2 lb.

Mediterranean, 50 lb.
Oats, English, 39 lb. Foreign, 38 and 40 lb.
Rye and Maize, 60 lb. Buckwheat, 52 lb. A sack of flour = a80 lb. : U.S. barrel of flour

is ze6 lb.; a peck of flour = z gallons = z4 lb. 100 lb. wheat produces 70 lb. flour.

zoo lb. flour produces zgo lb. bread. A quartern loaf = 4 lb.

A barrel of oats = 14 stone.

A bag of rice = x68 lb., of sago xxz lb. A bag of biscuits = ros lb.

A last of grain = 80 bushels.

Note.—A Quarter is a heaped measure of 8 bushels. A bushel of English wheat is reckoned as 60 lb. weight, and a Quarter as 480 lb.

Hay and Straw
Truss of Straw, 36 lb. Truss of Old Hay, 36 lb.
Truss of New Hay (to September 1st), 60 lb. Load of hay or straw = 36 trusses.

Ton of hay = 36 trusses.

An acre of grass should yield z to z tons of hay.

Liquid Measure.

Size of Barrels. Gals. Firkin or Quarter Barrel. ..... Kilderkin, Rundlet, or 1/2 Barrel 18 = 9 x a ...... 36 = 9 × Barrel Hogshead (1½ barrels) .... 54 = 9 × 6 Puncheon (a barrels) .... 72 = 9 × 8 Butt of Ale (3 barrels) .... 108 = 9 × 18

An Anker = 10 gallons; a Tierce = 42 gallons; a Pipe of Port or Masdew = 115 gals.; Teneriffe a r pe or rore or masses = risgais; Tenerific = roe gals; Marsala = 93 gals.; Madeira and Cape = 92 gals.; Sherry and Tent = ros gals.; Butt of Lisbon and Bucellas = rry gals.; Aum of Hock and Rhenish = 30 gals.; Hogshead of Brandy, 60 gals. Claret; 46; Port. 57; Sherry, 54; Madeira, 46 gallons; Puncheon of Brandy or Rum - ros gals. Rum = 120 gals.

Botile Measure.

The customary glass hottle of wine or spirits should contain one-sixth of a gallon = a6% fluid ounces

In the drug trade two large bottles are used :-Corbyn... =4s fluid oz (quart). Winchester quart =8s ,, (% gall (% gallon).

148,812

31348

#### Water.

The British Ton is the weight of a cubic British Metre of pure water at the temperature of melting ice, very nearly. At present, the following relations hold good:—

Cubic inch ..... ...... = sgs'458 grains. in.) = ro lb. (distilled). Gailon (277'274 cub. in.) = 6a'3az lb. Cubic foot = 35'943 cubic ft. (sa4 gals.) = x ton.

Water for Ships: Tun, szo gals., Butt zzo, Puncheon 72, Barrel 36, Kilderkin 18 gals.

Cisterns: A cistern 4 feet by 21/2 and 3 deep will hold brimful x86'963 gallons, weighing x6 cwt. a grs. ax 6 lb. in addition to its own weight.

#### Measures of Length.

(a) Trade and Manufacturezs inches (in.) = z foot (ft.). 3 feet = x yard (yd.).

Any of the above units may be used singly, and as a prime unit, to be divided fractionally or decimally, as required, to any necessary extent.

(b) Travellers' Measure-

sso yards = z furlong. 8 furlongs = z mile.

z miles = z league (seldom used).

(c) Surveyors' Measurezoo links = z chain (ss yards).

to chains = 1 furlong. 8 furlongs = z mile.

A Pole of 51/2 yards is a quarter of a chain A Cricket Pitch is one chain between the

stumps A Lawn Tennis Court is 78 × 36 feet (double) and 78 × 27 feet (single).

A Croquet Lawn is 175 × 140 feet (full size) or a similar multiple of 5 X 4 feet.

#### Birmınghanı Gauge

The Weights and Measures Act of 1878 made standards on and after Nov. z, 2024, certain new The equivalent of an inch divisions of an inch 18 15/0 B.G. The numbers proceed by units down to 1/0 B.G., which = 0.3964 inch, and from 1 B.G. 1 -332 inch) by units to 52 B.G. ('cocos inch).

#### Square or Surface Measure.

(a) Trade and Manufacture-144 square inches = 1 square foot.

o square feet = z square yard.

(b) Travellers' Measure

Square miles and fractions or decimals are sufficient for all practical purposes.

(c) Surveyors' Measure-

Either in links and square chains when :--10 square chains = 1 acre. 640 acres = 1 square mile.

Note.-The Anglo-Saxon acre's-length is the furlong, and the acre's-breadth the chain.

Or, for legal and civil purposes :-

301/4 square yards = 1 square rod or perch. 40 rods = 1 rood. 4 roods = 1 acre.

Surveys being usually made with the chain of zeo links, the only difficulty presented by the above table lies in the reduction of the balances of rods into square yards.

## Bailway Gauges . . .

In Great Britain = 4 ft. 8% in.

Ireland = 5 ft. 3 in. U.S.A. = 4 ft. 8% in.

The 4 ft. 8½ in. gauge is also used in Canada, France, Germany, Netherlands, Belgium, Denmark, Austria, Hungsty, Italy, Switzerland Sweden and European Turkey.

" Australia :--

N.S.W. = 3 ft. 6 in. and 4 ft. 8½ in. Victoria and South Australia = 5 ft. 2 in. Queensland and Western Australia = 3 ft. 6 in. New Zealand = 3 ft. 6 in.

Japan = 3 ft. 6 in.

" Russia = 5 ft. o in. " Spain and Portugal = 5 ft. 6 in.

,, Asia Minor = 4tt. 8½ in. and 31t. 3½ in. A single track of 4 ft. 8½ in. gauge requires 12 ft. of roadway; a double track requires ag ft. of roadway.

#### Circular Measure.

60 seconds (") = x minute ('). 60 minutes = 1 degree (°).

30 degrees = 1 sign

is signs = i circumference.

Diameter of circle × 3°246 = circumference, Diameter squared × 7854 = area of circle. Diameter squared × 3°446 = surface of aphere. Diameter cubed × 3°456 = solidity of sphere.

One degree of circumference × 57'3 = radius Diameter of cylinder × 3 1416; product by length or height, gives the surface.

Diameter squared × 7854; product by length

or height, gives solid content.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 25 yards = 2 chain. This relationship is of great importance in the laying out of railway curves, in range-finding, &c., since the relationship between diameters in multiples of 7 yards, and circumferences in chains, holds good for circles of any size.

#### Electrical Measures.

It is customary to express electrical measurements in terms of the centimetre, the gramme, and the second (C.G.S. units), and the value of the units has been fixed by international agreement. The principal units are as follow:

As a unit of resistance, the international Ohm, which is based upon the ohm equal to ros units of resistance of the C.G.S. system of electromagnetic units, and is represented by the resistance offered to an unvarying electric current by a column of mercury at the temperature of melting ice, 14'4521 grammes in mass, of a constant cross-sectional area, and of a length of ro63 centimetres.

As a unit of current, the international Ampère, which is one-tenth of the unit of current of the C.S. system of electro-magnetic units and which is represented sufficiently well for practical use by the unvarying current which, when passed through a solution of intrate of silver in water, in accordance with a certain specification, deposits silver at the rate of electric of a gramme per second.

As a unit of electro-motive force, the international Volt, which is the E.M.F. that, steadily applied to it conductor whose resistance is one international ohm, will produce a current of one international ampère, and which is represented. sufficiently well for practical use by \$182 of the E.M.R. between the poles or electrodes of the voltaic cell known as Clark's cell at a temperature of \$20°C., and prepared in the manner described in a certain specification.

As a unit of quantity, the international Cottlomb, which is the quantity of electricity transferred by a current of one international

ampère in one second.

As a unit of capacity, the international Farad, which is the capacity of a conductor charged to a potential of one international volt by one international coulomb of electricity. The unit generally used in practice is one-millionth part

of this, or the microfarad.

As the unit of work, the Joule, which is reunits of work in the C.G.S. system, and which is represented sufficiently well for practical use by the energy expended in one second by an inter-national ampère in an international ohm In practice the watt-hour is usually employed. It represents the work done by such a current in an

nour, and equals 3,500 joules.

As the unit of power, the Watt, which is ror units of power in the C.G.S. system, and which is represented sufficiently well for practical use by the work done at the rate of one joule per second. 256 watts = r horse-power, and the value of a Board of Trade unit (B.O.T.U.) is 1,000 watt-hours, or 3,600,000 joules, or 11/2 horse-power

hours.

As the unit of induction, the Henry, which is the induction in the circuit when the E.M.F. induced in this circuit is one international volt. while the inducing current varies at the rate of one international ampère per second.

number of cubic feet in one ton divide 35 943 by the specific gravity.

#### Weight of Cubic Foot and Cubic Yard.

A cubic foot of fresh water = 63½ lb. salt water 63½ lb. Timber—ash 49 lb.; beech 43 db; birch 49 lb.; cork 12 lb.; elm 36 lb.; pine 4x lb.; oak 59 lb. A cubic foot of clay weighs ras lb.;

of loose earth of b.

A cubic yard of anthracite coal, solid, weights 2,750 lb; bitteminous 2,031 lb.; cannel 2,400 lb.

A cubic yard of doal stacked in usual way = 2,260 lb. A cubic yard of compressed hay = asg lb.; of hay in stack, 225 lb.; of compressed straw, 245 lb.; of straw in stack, 90 lb.; of grain, so bushels.

#### Yarn Measures.

Cotton and Spun Silk Count .-Thread = : \* yards. Lea or Skein, 4kn. = 100 yards. Hank, hk. = 7 Skeins, or Leas = 840 yards. Spindle, spdl. = 18 Hanks.

Counts = the number of Hanks in z lb.

Bundle Hanks, either of 5 lb. or so lb. Reels of cotton vary from 30 to 1,760 yards they must be marked correctly

Bundles of Cotton are chiefly made up for export.

Worsted Count.—Wrap, So yards; Hank = 56e yards = 7 Wraps; Counts or Numbers are the number of hanks in a lb.

Linen Count, -The Hank or Les is 200 yards, and the number of these in 1 lb. is the count of the yarn. A Spindle is 48 hanks; a Bundle is see hanks.
West of England Count.—The Hank is 320 yards,

and the number of hanks in z lb. is the count of the yarn.

#### Temperature Measures.

Variations of temperature are measured by thermometers, which are graduated on three different systems, viz. :-

The Fahrenheit thermometer.

The Centigrade, or Celsius thermometer. The Réaumur thermometer.

In the Fahrenhest thermometer the distance In the reasons point of water the distance from the freezing point of water to the boiling point is divided into zee degrees. The freezing point is marked zee, and the boiling point zee.

In the Centifyrade thermometer the freezing point is marked e, and the boiling point zee.

In the Recumer thermometer the freezing

point is marked o', and the boiling point so'.

To convert Centigrade degrees to Fahrenheit,

multiply by and add 32°.
To convert Réaumur degrees to Fahrenheit,

multiply by and add 3s°.
For example:—

20° Centigrade = 20 × ; + 32=68° Fahrenheit. no Réaumur = so × 1 + 3s = 77° Fahrenheit.
To convert Fahrenheit degrees to Centigrade, subtract 32° and multiply by §.

To convert Fahrenheit degrees to Réaumur,

subtract 3so and multiply by 1.

For example :-

68° Fahrenheit = \$ (68 - 32) = 26° Centigrade.
7° Fahrenheit = \$ (77 - 32) = 26° Réaumur.
To convert Centigrade degrees to Réaumur

degrees, multiply by i To convert Réaumur degrees to Centigrade degrees, multiply by 4.

For example .

 $30^{\circ}$  Centigrade =  $30 \times \frac{1}{4} = 16^{\circ}$  Réaumur  $30^{\circ}$  Réaumur =  $30 \times \frac{1}{4} = 35^{\circ}$  Centigrade.

#### Time Measures.

Measurements of time are based on the time taken by the earth to revolve round its axis; by the moon to revolve round the earth; and by the earth to revolve round the sun. motions are not exactly commensurable with one another, it has been necessary to adopt average or mean intervals of time for ordinary use.

Of these the first is the Day, which com-mences at midnight and is divided into a4 hours

of 60 minutes, each of 60 seconds.

The hours are counted from midnight up to saat noon, and again from noon up to ze at midnight.

For the Astronomical Day see p. 90.
With the Jews and Muhammadans the day begins, not at midnight, but at sunset on the previous day, and the hours between sunset and midnight belong to the succeeding day in the Jewish and Muhammadan calendars.

The Week is a period of 7 days.

The Month in the ordinary calendar is approxiand December have each at days.

April, June, September, and November have

each 30 days.

February has s8 days, except in leap year.

when it has s9 days.

The Jess and Muhammadans use the lunar month, based on the length of time that the moon takes to revolve round the earth. The mouth commences, not at true new moon, but at sunset of the day when the new moon is first seen after sunset. The length of the lunar month varies; so the Jewish and Muhammadan months have sometimes 20 and sometimes 20 days.

The Muhammadan year always consists of twelve lunar months, and is sometimes 354 and

sometimes ass days in length.

The Year is the length of time that the earth takes to complete one revolution round the sun, takes to complete one revolution round the sun, which is 565 agas mean days. The ordinary year is taken as 365 days, and every fourth year, called Leap Year, has 365 days. Every year the date of which is divisible by 4, without remainder, is leap year. But the last year of each century that is not divisible by 400 without remainder is not a leap year. For example, the years 1800 and 1900 had only 365 days.

Old and New Style.—Various expedients have been adopted from time to time to reconcile the period known as the year (363 days) with the period of time occupied by the earth in its journey round the sun (365 mass days). Julius Cesar inserted an extra day every fourth year, but four Julian years thus consisted of z.46z days. an error in see years of z. zz days. Certain days, an error in ago years of gras days. Certain expedients were adopted in the reign of Augustus, but towards the close of the 16th century there was a difference of ze days between the civil and astronomical years, and in z58 Pope Gregory ordained that Oct. 25th should be called Oct. 25th; and that only every fourth (instead of every) end-century year should be a leap year. This change was adopted by Italy, France, Spain, and Portugal in 1362; by Prussia, the German Roman Catholic States, Switzerland, Holland, and Flanders on Jan. 1, 1582, Poland 1586, Hungary 1587, the German and Netherland Protestant States and Denmark 1700, Sweden (gradually) by the omission of eleven leap days, 1700-1740, the British Dominions (which included the then North American Colonies) in 1752, by the omission of eleven days (Sept. 8 being reckoned as Sept. 14). This "Western" Calendar was selected by January 1882 Chips in case Bulgarie adopted by Japan in 1872, China in 1912, Bulgaria in 1915, Soviet Russia in 1917, and by Yugo-Slavia and Rumania in 1919. It is anticipated that Greece will also adopt it. The difference between the Old and New Styles since 1900 is 13 days (12 days after 1700, 12 days after 1800 and 13 days after zooo).

New Year's Day.—The Civil year in the British Dominions (exclusive of Scotland) commenced with March 25, "Lady Day" or "The Feast of the Annuciation," until 2752. But on and from 1752 the civil year has commenced with Jan. 1. The Old Style reckoning is still maintained to come artes the the British Transmission and create in the British Transmission and contains and contains and contains a still maintained to The Old Style reckoning is still maintained to some extent by the British Treasury, and certain dividends are payable at the Bank of England on the Old Style Quarter Days; while the "Financial Year" is still reckoned as commencing on "Old Lady Day," April 5. Scotland in 1869 changed New Year's Day from Mar. 25 to Jan. 1. On the Continent, Jan. 1 was adopted as the first day of the year by Venice in 1828, Germany in 1828. Spain Portugal and the Royman Catholice. in 1544, Spain, Portugal and the Roman Catholic Notherlands in 1556, Prussia, Denmark and Sweden in 1559, France 1564, Lorraine 1579, Protestant Notherlands 1583, Russia 1793, Tuncian 2754.

#### Time and Watch on Board Ship.

TIME.—Time is kept by means of a bell, which is struck every half hour. In the morning; bell sounds at sago a.m., and every half hour the number increases until 8 bells at 4 a.m.; then x bell again at 4.30 a.m. to 8 hells at 8 a.m.; x bell at 8.30 a.m. and 8 bells at noon. In the afternoon x bell sounds at at noon. In the determinant recipion is the stage at a noon, after which is the First Dog Watch (r bell 4.30, a bells 5.0, 3 bells 5.0, a bells 6.0) and the Second Dog Watch (r bell 6.30, a bells 7.0, a bells 7.0, and thence r bell at 8.30 to 8 bells at midnight.

WATCH.- For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the Starboard (right side, looking forward) and the Port (left). The day commences at noon, and is thus divided .-

Afternoon Watch .. .. noon to 4 p.m. First Dog ,, Second Dog ,, . 4 p m. to 6 p.m. .. ... 8 p.m. to midnight. \*\* ... midnight to 4 a.m. Middle •• 4 a.m. to 8 a.m. Morning Forencon

This makes seven WATCHES, which enables the crew to keep them alternately, as the Watch which is on duty in the forenoon one day has the fternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having Dog Watches, which are made by dividing the hours between 4 p.m. and 8 p.m. into two Watches.

For TIME AT SEA sec p. 95.

In Scotland, and at certain places in England and Wales at which the Cran Messures Act, 1908, has been put into operation, fresh herrings must be sold by the Cran, containing 37½ imperial perial gallons, or Quarter Cran of 3½ imperial gallons. In the Isle of Man and in Ireland herrings are sold by the Maze, which contains s long hundreds of 126 each. On the East Coast of England, at places where the above-mentioned Act is not in force, they are sold by the Last, which contains 13,800 fish. They are counted by the Warp, which is 4 fish. 33 Warps = 1 Iong Hundred, 13s; 10 Hundred = 1 Thousand, 1,380, 10 Thousand = 1 Last, 13,800. Cured herrings are to include the capacity of which, in Sociland, must always be a6% imperial gallons, or in half-barrels of x3'; gallons. Herring barrels on thalf-barrels must be of corresponding capacity in England and Wales if they are presented for the magismu and wases it they are presented for the Government Brand at any place at which the Herring Fishery (Branding) Act, 1913, is in force. A Quantet of fish (Newfoundland, dc.) is see ib.; a barrel of anchories = 30 lh.; a "box of fish" is about 90 lb.

#### Geographical Measures.

The North and South Poles are two points at the opposite extremities of that diameter of the earth round which it revolves. The Equator is a great circle, equally distant from the North and South Poles. For geographical purposes, the surface of the earth is divided by circles, called the circles of Latitude and Longitude. The circles of Latitude are small circles parallel to the Equator. The circles of Languitude are great circles perpendicular to the Equator, and passing through the North and South Poles. These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered The North and South Poles are two points at These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered in autical miles in one hour. The Nautical

from the Equator to the North and South Poles. Degrees of Longitude are numbered from the primary circle of Longitude, or Meridian, which passes through the astronomical observatory of Greenwich (England).

A Geographical Mile is the length of one minute of Latitude. If the earth was a sphere, every minute of Latitude would be of the same length; but, as it is a spheroid, the length of a minute increases from 6.045 feet at the Equator to 6.085 feet at the Equator to 6.085 feet at the Equator to 6.085 feet at the Equator to 6.085 feet at the Equator of the geographical mile is 6.065 feet. length of the geographical mile is 6,076 feet. The Nautical Mile is (strictly speaking) the length of a minute of the meridian, and is thus identical with the geographical mile. In practice, however, it is taken as the Admiralty Kunt of 6,080 feet, divided into 10 calles, which are assumed to be 100 fathoms, or 600 feet. The Polar diameter of the Earth 187,899 English

miles. The mean equatorial diameter is 7,926 miles. The circumference at the Equator is 24,902 miles.

Nautical Measures.

6 feet = r fathom.

roo fathoms = r cable length. 15 feet, or 5 yards, is called a chain; and 1,000 fathoms make a nautical mile, or knot, in practical navigation.

#### Ship Measurement.

The Ton-measurement of cargo was originally the space occupied by 4 hogsheads (= a Tun) of wine = 50 cubic feet. It is now 40 cubic feet, which is approximately the bulk of 4 quarters, or a short ton, of wheat.

The Ton-register, the unit of capacity of a ship, was originally the space occupied by a Last of xo Quarters of wheat = xoo cubic feet. cubic space is the Ton-register used by all maritime nations, 100 English cubic feet.

Gross tonnage is the sum in cubic feet of al! the various enclosed spaces of a vessel, divided by zec. Net tonnage is the gross tonnage less certain

deductions on account of crew spaces, engine room, water ballast, and other spaces not used for passengers or cargo. Dead-weight tonnage, or carrying capacity, is

the number of tons (of 2,240 lb.) of cargo that a vessel is capable of carrying when charged to the

load water line (q.v.).

Displacement tonnage is the number of tons of sea water displaced by a vessel when charged to

the load water line (q v).

Load water-line is the line that would be made round the shell of a vessel when loaded as deep

as the minimum freeboard regulations permit.

Draught is the distance in feet from the lowest part of the bottom of a vessel to the actual water line at which the vessel is floating. Thus the load-water-line marks the greatest, or loaded, draught of a vessel. A vessel without any cargo in her hold or passengers or their luggage aboard is said to be "light ship." or "light," or "in ballast

Free Board is the distance from the main or upper deck to the load-water-line of a vessel. As a general rule the minimum free board provides an amount of reserve huorancy that will keep a vessel affeat with two compartments holed.

## Speed of Ships.

The Knot is a measure of speed of ships; the

Mile = 6,000 feet (the Statute Mile being 5,200 feet and the Geographical Mile 6,006 feet). The following table shows the equivalents of 1 to 42 knots in land (statute) miles:—

Knots.	Miles.	Knota.	Miles.	Knots.	Miles.
2	1'4515	25	17'8787	29	33.3039

#### METRIC WEIGHTS AND MEASURES.

Tables for the conversion of British and Metric Weights and Measures will be found on page 454, headed: "Double Conversion Tables for Weights and Measures.

In addition to the Imperial standard weights and measures, the use of the French or Metric system of weights and measures was made per-missive in the United Kingdom in 1807. In the Metric system, the standard of length

is the Metre, the standard of weight is the Kilogram, and the standard of capacity is the Litre. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

For the sake of comparison, the equivalent value of the nearest British measure is given.

#### z .- MEASURES OF LENGTH.

```
zo millimetres = z centimetre = 0.3937079 inch.
       (mm.)
zo centimetres = z decimetre = o'328084 foot.

7	**	,, (auty)	=	: 22f. 6d.	

#### THE UNITED STATES.

The weights and measures are those of the United Kingdom, with the following differences:—
Weight.—In the short ton of a coo ib, the Cental of a coo ib, these the place of the Cwt. in the long ton. There are Two tons, therefore,

the one of s.zeo lb., the other of s.ceo lb.

Capacity.—For grain, the old bushel of s.zeo 4s cubic inches; its gallon = s688 cubic inches
This is commonly called the Winchester bushel, though really of the slightly different fondon standard.

Pi C

For liquids, the old wine-gallon of agr cubic inches, five-sixths of the Imperial gallon and = \$5,32,28 grains of water It is divided into 8 pints = 7,385,7 grains of water = 266 Imperial ounces. In medicine the pint is divided into 6 fined ounces. s6 fluid ounces = 455 6 grains of water, and the ounce into 8 fluid drachms of 60 minims.

#### BRITISH DEPENDENCIES.

Ohannel Islands. The weights and measures in use in the Channel Islands are those of the United Kingdom, the cental of 100 lb. being used as well as the cut, of 112 lb. The Old Island Measures are as follows :-

Vergée (Normandy Jersey. Guernsev. rood) ...... = '44 acre '4 acre. Bushel ..... = 8'9 gallons 5'8 gallons. Pound ...... = 7,562 grains 7,623 grains. Cwt. ......(204 lb.) = 222'3 lb. (200 lb.)= (roo lh.)=

ied <b>e</b>		=	zz z66 inches.
anna		=	arass yards.
ibbra	= za oncia	=	4886 Troy gr.
otdo		=	1'745 lb.

British India. Ungul ..... = '75 inch. Guz, usually 33 inches; also the yard.

Chittak ..... = 2 oz av. Seer, x6 chittak, or 80 tolas ...... = x 204 lb.

Maund, 40 seers ..... = 82 287 lb. (Madras)..... = s4.68 lb. Seer (Liquid) ..... = 1.760 pints. Candy " ..... = 500 lb.

Visham = 3 lb.; Dangali ..... = 3 pints. 

..... 100 catties = 133 lb.

Rept.
The Metric System of Weights and Measures and the foot and pound and their multiples, are legal in Reypt, The foot and pound are rarely used and the Metric System is little known except in the large towns.

The Weights and Measures in common use, with their English equivalents, are as follows:—

Length-Dira Baladi (used for piece goods)= 29 83 inches Dira Mamari, or Pic (used by

architects) ..... .= 29'53 inches Qasaba(used for agricultural land) = xx 65 feet Area-

z Qirat ......=209'3 sq. yards z Feddân (=24 qirats) .....= z'e38 acres Capacity—

...... 454 bushel z Ardeb (=zs kėlas) .....= 5'444 bushels

1	Weight-	4	, ,	·	7	<u>`</u>	oo lb.	
x	UEG	• • •			********	=	2'75 10.	
Ŷ	Quntar (-	-	m	fal:te		=	po'og ib.	

A Quater of anginned cotton = 315 lb., of ginned cotton = 700 lb.; an Ardeb of wheat = ginned cotton = 700 lb.; an Arabb of wheat = 120 kilogrammes, of beans = 125 kilogrammes, of maize = 140 kilogrammes, of whole leatils = 127 kilogrammes, of split leatils = 127 kilogrammes, of split leatils = 127 kilogrammes. A bate of steam-pressed cotton = 775 Quature; of hydraulically-pressed = 85 Quature; 3 bales of steam-pressed cotton = 1 ton 8g lb.; an arabb of cotton-seed = 190 rotis = 167 lb., 85 arbbb of cotton-seed = 190 rotis = 167 lb., 85 arbbb of cotton-seed = 190 rotis = 167 lb., 85 arbbb of cotton-seed = 190 rotis = 167 lb. seed = r ton.

#### South Africa.

Money, Weights, and Measures.-The coins and the standard weights and measures are British, the standard weights and measures are British, but the following old Dutch measures are still used —Liquid Measure: Leaguer=about rs8 imperial gallons; half aum = rs/2 imperial gallons; capacity: Muid = 3 bushels. The general surface measure is Morgen, equal to xrst4000 acres; x,000 Cape lineal feet are equal to x,032 British imperial feet. The short ton of s,000 lb is used. Recently a provide for the second part of the short ton of s,000 lb is used. a Bill was introduced to provide for the standardisation of the metric system for weights and measures, with the optional use of imperial standards, except in the case of chemists, who are compelled to use the metric system.

#### FOREIGN WEIGHTS AND MEASURES.

The Metric System has been ladopted by the whole of Europe (except the United Kingdom and Russia) and is permissive in all countries.

#### China.

Tuel weight	==	1'33 UZ.

# Equibalent Inbestments.

# A TABLE SHOWING THE PROFITS UPON INVESTMENTS IN THE FUNDS OR IN STOCKS AND SHARES AT THE UNDERMENTIONED PRICES.

Examples:—Be ascertain the yield of Consels at a price of £73 rgs. cd. look in the column headed self. Pr. Cs. for 73%, and it will be seen that the yield (column headed Return Per Cent.) is £3 7s. red. Similarly, shares paying a fixed dividend of 6 per cent., if purchased at £98, will yield £6.ss. gd. per cent.

Example z.—What is the present value of a Lease having 37 years to run of the net annual value of £200, interest being reckoned at 4 per cent.? Answer:—19 14 years purchase, or £5.914

from the above table an annuity certain for 17 years, interest at 5 per cent., is worth 11 sy years' purchase. The present payment required would therefore be \$2,107 approximately.

Fixaging a -A man, aged 54, in the receipt of a pension or annulty of £100 a year net, wishes to commute that for a present payment, interest being reckned at 5 per cent. How much will be receive? Asswer.—Looking at the Table of Expectation of Life (9 s.), it will be seen that the expectation for age 54 is about 27 years; and

		'											1	

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year, less £1, must be taken. Thus, for £1 at ½ per cent for 25 years, take 26 years, £36 ors, and deduct £2-£35 ors.

REPAYMENT OF PUBLIC LOANS

LARGE sums of money are every year advanced to County or District Councils and other public bodies, for improvements, building of workhouses, schools, harbours, bridges, &c., to be repaid in a given number of years, including interest. The following scheme of tables for the repayments of Loans was compiled under the Local Government Act, 1848, and examined by the actuary of the National Debt Office. It gives the sums needed

as the annual amount of principal combined with interest required for the liquidation of a debt of £x00, at the stated percentage, in xo, so, 30, 40, and 50 years :--

Years	3 per	Cŧ	34 1	er Ct	9 4 1	4 per Ct			per	Ot.	5 per Ct.		
20 20 30 40 50	6 8, 11 14 6 14 5 8 4 6 3 17	55	£ 7 5 4 4	8. d 0 5 8 9 13 7 5 3	5	6 7 15 1	7 2 8 0	6	E 12 23 19 2	7. 9 9 9 8 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2	£ 20 20 20 20 20 20 20 20 20 20 20 20 20	8.00	

If the loan be for £1,000, each annual instal-ment as shown above must be multiplied by ro: if for £2,000, then by so, and so on.

**Thituary**, Nov. 1, 1919—Oct. 31, 1920.

THE TURF IN 1980.					

(At the close of the Newmarket Second October Meeting).

THE five classic races of last year were won by five different horses as follows:—

Two Thousand Guineas, Tetratema; One Thousand Guineas, Cinna; The Derby, Spion Kop; The Oaks, Charlebelle; St. Leger, Caligula.

Tetratema, the best's year-old of 1919, proved to be a non-stayer. This was conclusively proved in the Derby, the fastest on record. Spion Kop after winning the chief classic at Epsom, was sent over to France for the Grand Prix, and the race was won by his stable companion, Comrade. In the St. Leger Spion Kop gave an unaccountable display, finishing last but one. Caliguis, the winner, though a son of Tetrarch, inherits staying power through his dam, Snoot, who has the Musket blood.

Record prices were paid for bloodstock at the Doncaster sales. Lord Glanely purchased the yearling colt by the Tetrarch—Blue Tit—for the world's record price of 14,500 guineas. This was bred at the Sledmere Stud, and the thirteen yearlings from this stud realised 4,650 guineas, an average of 4,303 guineas each. The huge total of 296,000 guineas was realised by the four days sales.

Trotting.—Fastest m., in America, z min. 54; secs., by Uhlan, 1913. Fastest pacing m., z min. 55 secs., Dan Patch, at St. Paul, U.S.A., Sept. 8, 1906.

Feathers—Johnny Kilbane.
Weiter—Jack Britton
Middle—Mike O'Dowd.
Light: Essay—Georgee Carpentier.
Heavy—Jack Dempsey.

## 'W CRICKET EN 1920.

MIDDLESEX won the County Championship for the third time. Previous victories were in 1878 and 1903. Last year's success was gained by a sensational fitted to their match with Surrey at Warner, the Middlesex winning by 55 runs P. F. Warner, the Middlesex captain, had a great personal triumph on his retirement from the game

# 🕆 The British Empire.

### AREA AND POPULATION.

· Continental Distribution.	English Square Miles.	Estimated Population
In Europe	121,512	45,878,500
In Asia	2,187,550	323,158,000
In Africa	4,652,900	60,000,000
In North America	3,893,020	7,458,000
In ('entral America	8,600	50,000
In the West Indies	12,300	1,730,000
In South America	97,800	314,000
In Australasia	3,300,000	6,800,000
Total	14,272,782	445,388,500

GEOGRAPHICAL DISTRIBUTION.-The British Empire occupies over one-quarter of the known surface of the globe, and its population exceeds one-quarter of the estimated number of the human rare. The total area is distributed almost equally over the Northern and Southern Hemispheres, but more than two-thirds lie in the Eastern and less than one-third in the Western Remisphere The distribution of the surface over the Northern and Southern Hemispheres causes a complete alternation of the seasons. one half of the Empire enjoying summer while the other half is under winter conditions. In spite, however, of the uneven distribution east and west, daylight and darkness are almost equally divided, on account of the position of Australasia near the limit of east and west.

ETHNOLOGY.-By far the greater portion of the Empire lies within the temperate zones and is suitable for white settlement, the tropical areas being Southern India, West, East and Central Africa, parts of the West Indies, British Guiana and Honduras, Northern Australia, Borneo, and the various settlements in the Malay Peninsula. The estimated white population of the Empire in 1911 was 60,000,000, mainly British and Irish, but partly French, Dutch, and Spanish. remaining 370,000,000 include 31 51,000,000 of the native races of India and Ceylon, 40,000,000 black races, 6,000,000 Arabs, 6,000,000 Malays, 7,000,000 (filiese, and 7,000,000 Polynesians, with various other elements, including 100,000

"Red Indians" in Canada.
RELIGIONS.—Of the total population over are,eco,coo are Hindus, 100,000,000 Muhammadans, So,000,000 Christians (67,000,00- Protestants, 73,000,000 Catholies), 12,000,000 Buddhists, 12,000,000 Animists, 4,000,000 Sikhs, Jains and Parsees, 720,000 Jews, and the remainder Polytheists and Idol worshippers.

CONSTITUTION AND GOVERNMENT.-There is no fundamental law upon which the Const.tution of the Empire rests, but there are three main principles underlying its administration, viz., self-government, self-support, and self-defence. The government, self-support, and self-defence. The first of these principles has been applied for many years, and is fully developed in the case of Canada, Newfoundland, Americka, New Zealand. and the Union of South Africa. "The second half the ordinary powers of a sovereign assembly;

principle is equally developed, almost every unit being financially self-supporting, and few requiring aid from the Imperial Government. The third principle is of modern growth, and may be said to be the outcome of the Imperial Conference (post).

SELF-GOVERNMENT .- (1) The United Kingdom. -The Constitution recognises certain great principles, including the fair administration of justice, the prohibition of taxation without the consent of the people, and a limited monarchy, the power of the monarch being, in effect, wielded by a Ministry supported by a majority of the House of Commons, the members of which House are elected on a wide franchise, exercised by electors of both sexes. The component parts of the British Government are the King; the Legislature (House of Lords and House of Commons); the Executive Ministry, appointed by the Sovereign and responsible to Parliament; and

the Judicature. (See also p. 487).
(a) The Indian Empire.—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India, who is assisted by a Council whose members are appointed by the Secretary of State. In certain matters the actions of the Secretary of State and Council are not valid unless sanctioned by Parliament. The Governor-General of India in Council (the Council. in this case, being the Council of the Governor-General) acts for executive purposes very much on the lines of the governing body of a Crown colony.

(3) Imperial Dominions.—All British dominions are subject (except as regards taxation) to the legislation of the British Parliament, but no Act of Parliament affects a dominion un'ess that dominion is specially mentioned. If the legis-lature of a dominion enacts a law which is repugnant to an Imperial law affecting the dominion, it is to the extent to which it is repugnant absolutely void. Dominion legislatures may be controlled by the refusal of the Governor's assent to any measure passed; by reservation of a measure for the consideration of the Crown, and refusal of the Crown's assent; by a suspensory clause and the refusal of the Royal assent. Subject to such control the parliament of a self-governing dominion exercises within its borders

are governed :-

(a) Those having responsible government. The executive is entrusted to political chiefs who are responsible, not merely or mainly to the Crown, but to the elected legislature. The Dominions thus governed are Canada, New-foundland, Australia, New Zealand, and the Union of South Africa.

(b) Where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the Governor representing the Crown. In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, Mauritius,

and Malta.

(c) Where there is government by a Governor acting with an executive and a legislative council, the councils being nominated by the Crown or a Governor representing the Crown. Dominions so governed include Ceylon, Falkland Islands, Fiji, Gambia, St Vincent, Sierra Leone, Straits Settle-

ments, Trinidad.
(d) Wherein both legislative and executive powers are vested in the Governor alone. In this class are Gibraltar, Labuan, and St Helena, where power is also reserved to the Crown to legislate by Order in Council. In South Africa, Bechuanaland, Basutoland, and Zululand are governed in substantially the same way, but no

power is reserved to the Crown.

(e) Protectorates. The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the King-Emperor. The protectorates of the British Empire include Egypt, British East Africa, Som-a lland, Nyasaland, Uganda, Swaziland, and Nigeria

(f) Spheres of Influence A sphere of influence may be described as an area wherein other Powers undertake not to attempt to acquire influence or territory by treaty or annexation; such British spheres exist in the Persian Gulf and in Arabia. In addition to the Spheres of Influence are

(g) Mandatory Spheres, where the responsibility for securing good government and a reasonable development of natural resources is confided to an already established government by man-date from the League of Nations. Such British spheres are parts of the former German Colonies in West Africa, and the former Turkish govern-

ments of Palestine and Mesopotamia.

SELF-SUPPORT.—With but few exceptions the Imperial Dominions are self-supporting, revenue being raised locally to meet the expenditure. Occasional grants are made by the Imperial Government to meet exceptional expenditure, or in aid of administration in the earlier stages of development. Certain capital expenses are also undertaken from time to time by the Central Authority, e.g., the Nigerian purchase, the Uganda Railway, &c. No taxes are imposed on the subjects of a Dominion or Colony by the Imperial Government, as such subjects are not directly represented in the Imperial House of Commons; this principle, "No taxation without representation," was the mainspring of the revolt in the North American Colonies at the close of the eighteenth century. Since that disastrous attempt to impose taxes without the consent of the taxpayers, the principle, which has for many years been accepted in great Britain, has become an accepted maxim of British Gyerseas administration.

The Imperial Dominions may be divided into the flow of the Dominions, generally, four classes, according to the way in which they provide for the defence of their immediate area, but the general strategical defence of the Empire is undertaken by the Imperial Government. Questions affecting the general strategical defence of the Empire are considered and determined by the Imperial Defence Com-mittee, which co-ordinates the work of the sea and land forces of the Empire. In the War of 1914-1918 all the Dominions provided Armies or Contingents, which fought in every area and bore a full share of the sacrifices by which victory was achieved.

THE IMPERIAL CONFERENCE.-The origin of the Imperial Conference may be traced to the presence in London (in 1887) of the Premiers of the various self-governing Dominions, representing their countries at the celebrations of the Jubilee of Queen Victoria. Similar gatherings took place in 2807, 1908, 1909 and 1919, and in 1909 the title of "Colonia" Conference was changed to Imperial Conference. At the earlier meetings the Colonial Secretary presided, but with the change of title additional importance was given to the assembly by the assumption of the Presidency by the Prime Minister of the United Kingdom. In spry and 1918 the Conference was called the Imperial War Conference and was held under the Chairmanship of the Secretary of State for the Colonies. The constitution of the Conference is as follows:— President, The Prime Minister of the United Kingdom; Chauman (in the absence of the President), The Secretary of State for the Colonies : Members, The Prime Munisters and other Ministers of Canada, Australia, N. w Zealand, Union of South Africa, and Newfoundland, the Secretary of State for India and other representatives of India; Secretary, Sir H. C. M. Lambert K.C.M.G., C.B.: Assistant do., C. T. Davis, C.M.G.; E. J. Harding, C.M.G.

THE LEGISLATURE .- The Parliament of the United Kingdom is the supreme legislative authority of the Empire. This Parliament has, with the consent of the King-Emperor, delegated its legislative authority to other parisments constituted by itself, while retaining a general ampervision of Imperial affairs through the medium of the Colonial Office. The Secretary of State for the Colonies is a Cabinet Minister, his active participation in the government of the Imperial Dominions varying with the measure of self-government accorded to them. Parliament also exercises a control over Indian affairs through a Secretary of State. (See also "Self-Government" and "Imperial Conference,"

ante.) THE JUDICATURE. - The Sunreme Judicial Authority of the Empire is the Judicial Cominittee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Committee (see p. 267) consists of such members of the Privy Council as have held or are helding high judicial office, provision being made for the inclusion of representatives of India and the self-governing Domin-India and the Itominions have each a judicial system, with judges appointed by the Crown. The Supreme-Judicial Authority for the United Kingdom is the House of Lords.

EDUCATION.—Educational systems, on a mose or less uniform plan, are developed throughout the Empire under the control of the respective

governments. Universities and University Colleges have been established and degrees are reopherred. Trader the will of Ceell Rhodes scholarships were founded at various colleges of Oxford University. These Rhodes Scholarships are tenable for three years, are of the annual value of £300, and are open to scholars of each Province of Canada, of each State of Australia, of New Zeeland, Newfoundland, Natal, Cape of Geed Hope (a), Jamaica, and Bermuda. Each State of the U.S.A. has a similar nomination, and ag scholarships, each of £350, were formerly in the nomination of the German Emperor, but this provision has since been reacined by an Act of Parliament. Organising Secretary, Rhodes Scholarship Trust, Sir George Parkin, K.O.M.G., Ll.D.

FINANCE.—Complete financial autonomy is enjoyed, in fact, by all British Dominions, and customs tariffs are in most cases the principal source of revenue. Until the close of the War of 1924-1928 the tariff of the United Kingdom was imposed without distinction on foreign and Imperial merchandise, but recent legislation foreshadows a general change of fiscal policy. The tariffs of the self-governing Dominions are generally lower for merchandise of British origin than for importations from foreign countries. There is no Imperial Debt, but certain obligations of Grown Colonies and Protectorates are met in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need. In the Ciyil Service Estimates for 1920-32 the following "Grants in Aid of Local Revenues" were included:—Weitheinvei, £7,900 (an increase of £3,900 over 1928-19); Somaliland, £20,000; including £80,000 for the investigation of oil deposits (increase of £20,000); 38. Hetero, £2,800 (decrease of £4,800), Uganda, an instalment of annuities in repayment of advances under the Ballway Act, £319,123; and Cuprus,

£50,000. PRODUCTION.—In 1913 the wheat crop of the world was about 452,200,000 quarters, of which \$3,750,000 quarters were produced in the British Empire. India, Canada, Australia, the United Kingdom, and Egypt are the principal wheatproducing units, and Mesopotamia (with irrigation) has great potentialities. Barley, oats and maize, and tea, coffee and rubber are largely cultivated. Cane sugar is produced in India (for local consumption), West Indies, Australasia, Natal, and Mauritius, and beet sugar in Canada and elsewhere. Australia and New Zealand are the greatest wool-producing countries of the world, and the output of coal in the United Kingdom exceeds that of every country except the U.S.A. Cotton is extensively grown in India (4,827,000 bales of 400 lb. in 1916-17), Egypt (632,000 bales), and its cultivation is increasing elsewhere—West Africa (11,900 bales in 1917), East Africa (20 700 bales), Sudan (23,000 bales), and West Indies (3,000 bales). Iron ore is found in many of the Dominions, and pig iron is largely produced; tin is produced mainly within the Empire (particularly in the Malay peninsula), while more than half the world's supply of gold is drawn from South and South-West Africa and Australasis; it is produced also in Borneo, British Rast Africa, British Guians, Canada, Ceylon, India, Malay States, Sarawak, Sudan, and West Africa. Precious stones are found in various parts of the Empire, South mel. supply. of diamonds, and India of rubies and emeralds.
Petroleum is produced in India (8,900,000 barrels)
of 45 gallous in 1997), Trinidad (1,600,000 barrels),
Egypt (1,000,000 barrels), and Canada (200,000
barrels) and there are vast resources available at Mosul (Mesopotamia) and in the neighbourhood of the Persian Gulf.

EXTERNAL TRADE. — The Imports of all Nations were valued in 1924 at \$2,500,000,000 to \$2,500,000,000 to \$2,500,000,000,000 the difference in the totals being made up by the value of services rendered in transport and insurance. The value of the earnings of British Mercantile Shipping in carrying merchandise exchanged by the various nations is stated to amount to \$250,000,000,000 (reven higher, for the year 1926, Before the War the value was generally reckoned at about \$250,000,000. The total trade of the British Empire in 1929 was valued at \$4,300,000,000 (Imports \$2,400,000,000; Exports \$2,500,000,000, India (\$257,000,000,000 The United Kingdom (Imports \$2,500,000,000), India (\$257,000,000,000). New Zealand (\$2449,000,000), Australia (\$200,000,000), New Zealand (\$250,000,000), South Africa (\$258,000,000,000) are the principal trading units of the Empire.

SHIPPING.—On June 30, x9x5, there were xx,353 vessels (over xoo tons) flying the British flag, of which total 9, 385 were registered in the United Kingdom and 2,068 in other parts of the Empire. These figures include x0,218 steam vessels of x0,830,928 tons (U.K., 8,675 vessels of x9,235,705 tons; Dominions, x,543 vessels of x3,255,213 tons) and x,232 sailing vessels of x37,487 tons. In the War of x94-x928 there were lost through enemy action 2,774 merchant vessels of 39,359,528 gross tonnsee, of this total x,277 (x35,000 tons) were British, 236 (60,545 tons) French, 230 (x4x,355 tons) Italian, 29 (x0,x75 tons) Japaness, and 80 (24x,321 tons) U.S.A. In x932-x938 merchant vessels (over x00 tons) of xx,274,000 gross tons were launched by Allied countries and others not at war with them, the British tonnage so launched being 3,703,000 gross tons. On Sept. 30, x90x, the gross tonnage of steamships under construction in all the shipyards of the world was 7,555,000 tons, of which 3,73x,000 were building in British and x,77x,000 in American shipyards. On June 30, x90x, the gross tonnage of steamships under construction fall steamships under all flags fitted for oif fuel was x50x, with a gross tonnage of x955,750 tons, an increase of x15 ships (80x,650 gross tons) over x038-x9; in addition many ships were built (or under construction) with oil engines as the propelling power.

Towns.—Capital, London (England). Population (xpxx), 4,522,963 (with suburbs, 7,252,963). At the Census of xpxx there were in the British Empire 3 cities with over x,000,000 fuer b. xp2, and 82 others with over x00,000 (see p. xp2), and 82 others with over x00,000 inhabitants. Uf these 94 cities 50 were in the United Kingdom (England 4x, Wales 3, Scotland 4, Ireland 3), 39 India, 4 Canada, 4 Australia, 2 Egypt, and x-each in New Zealand, Smith Africa, Ceylon, Engag Kong, and the Straite Settlements.

Religion and Languages.

The inhabitants of the United Kingdom are almost entirely Christians, and mainly Protestants, the exceptions being 5 million Roman Catholics (principally in Ireland), 250,000 Jews, and a small number of non-Christian immigrants. In England the Church of England (with an Episcopal form of Government), and in Scotland the Church of Scotland (with a Presbyterian form of Government), are the "Established Religions." The Church was disestablished in Ireland in 1860, and in Wales in 1920. There has been no religious census since 1851, but many of the religious bodies publish estimates of membership. The language of the people is English, with a large proportion of Welshspeaking people in Wales, many of whom are bi-lingual. Attempts have been made, under Sinn Fein auspices, to revive the Gaelic language in Ireland. Gaelic is still spoken in the Highlands and Islands of Scotland.

The total of Emigrants from 290-9 includes only those of Eritish and Irish nationality. The total number of Emigrants of all nationalities to places out of Emigrants of all nationalities to places out of Emigrants from sing. 292-929 is 19,282-929, 292-929. British and Irish and Emigrants of Security and Emigrants. From 1875-1986, the total number of emigrants from the United Kington; and 1995-1986, the total number of emigrants from the United Kington;

### CENSUS POPULATION OF THE BRITISH ISLES

Previous to zoor there existed no official return of the population of either England or Scotland; nor was it till res; that statesmen had anything more than surmise to guide them respecting Ireiand, and the census then taken of that country was far from correct The estimate formed of the English population at various periods, calculated from the numbers of baptereds, tisms, burials, and marriages, was in the years-

1570... ..4,160,221 1670 ... 5,773,646 1700 .. 6,045,008 1600 . . 4,811,718 1630 . 5,600,517 1750 ....6,517,035

The first general Census of the United Kingdom was taken in 1801, and since the time named there has been a fresh numbering every ten years, with the following results:

z8ozz6,345,646	1861ag,321,a68
x81118,509,116	187131,845,379
182121,272,187	x88z35,241,483
183124,392,485	189136.104,975
<b>284127</b> ,036,450	1901 41,976,827
184187,724.046	EGET 45,370,530†

\*\* The population of the United Kingdom a month before the outbreak of the War of 1914-1918 was officially estimated at 46,089,249. The number of persons to the square mile was in 1911 England and Wales, 618 o; Scotland, 156 5; Ireland, 135 6.

POPULATION ENUMERATED AT EACH DECENNIAL CENSUS IN ENGLAND AND WALES AND SCOTLAND, 1801-1911, IRELAND, 1821-1911, AND ISLANDS IN THE BRITISH SEAS, 1851-1911.+

### CENTRAL GOVERNMENT

THE BRITISH CONSTITUTION.—The British Constitution is mainly inwritten and customary, but its development is marked by certain outstanding and fundamental laws, of which the principal are and inflamental laws, of which the principal and fafety, the Habous Corpus Act (1679), the Act of Settlement (1701), the Act of Union with Scotland (1707), the Act of Union with Ireland (1800), and the Parliament Act (1911) The first secured annual parliaments and the equal administration of justice; the second established the liberty of the person; the third provided for the Protestant succession to the throne; the fourth and fifth created the United Kingdom, and the last enabled the Commons to pass certain Acts without the adherence of the other Chamber. The constituent parts of the British Con-stitution may be thus briefly described:

1. The Sovereign —The throne is hereditary in the English house of Windsor with mixed succession the sons of the Sovereign and their descendants having precedence of daughters, but daughters and their descendants preference over lateral lines. The Monarchy is constitu-tional and limited. The King has a right to The King has a right to veto Bills passed by both Houses of Parhament, but in practice his veto is almost obsolete. "The King can do no wrong" is a maxim of the Constitution, and consequently no action for civil wrong will lie against the Crown tion of right, however, will generally enable an minied subject to obtain redress, while, if in the administration of an Act of Parliament a Government department exceeds its rights, a declaration of right may be obtained in an action against the Attorney-General.

2 The Legislature -Parliament consists of two Hon-es, the Lords and the Commons

(a) The House of Lords consists of peers. A peer may hold his seat by (1) hereditary right, (2) creation by the King, (3) official position or election. English bishops (24), Irish peers (28) elected for life, and Scottish peers (16) elected for duration of Parliament, also sit in the House of Lords.

The powers of the House of Lords were much restricted by the Parliament Act, zgxz if a Money Bill is not passed unamended by the House of Lords within a month of its being sent up, it becomes law upon the Royal assent being signified A Public Bill other than a Money Bill will become law without the consent of the Lords if it is passed by the Commons, and sent up to the Lord-, in three successive sessions, provided two years elapse between the date of the second reading in the Commons in the first session and the date when it is passed by that body in the third session. Passing a Bill with amendments by the House of Lords is equivalent to rejection, unless the Commons approve the Any Bill by which the maximum amendments duration of Parliament is increased is excepted from this Act Members of the House of Lords are unpaid

(b) The House of Commons. - This body consists of 707 members, elected by the registered male and female electors in county, borough, and university constituencies. Roughly speaking, about one-third of the population are electors. The maximum duration of Parliament is five Members of the House of Commons receive annual salaries of £400.

(2) The Executive.-The Crown (the King in Council) ' makes peace and war, issues charters,

increases the peerage, is the fountain of honour, of office, and of justice." The Cabinet, under the presidency of the Prime Minister. consists of Ministers, drawn from the ranks of the party in power and appointed by the Sovereign on the advice of the Prime Minister; Ministers progre salvice of the ring amounts (see page ser). The Cabinet has no corporate existence. are severally responsible to Parliament for their actions, and the Cabinet as a whole is responsible to Parliament for its joint and several administration Ministers hold their office during the Sovereign's pleasure: they may be dismissed at any moment.

The Judicature. - (a) England and Wales. The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament. Two Courts of Appeal hear appeals from the High Court, the ultimate Court of Appeal from all the courts in the United Kingdom being the House of Lords. Civil cases arising in London and Middlesex are tried at the High Court in London, but civil cases ansing in the country are tried on circuit by judges of the King's Bench (Assizes). The Chancery division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, e.g., the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court ; those arising out of London are dealt with in the County Courts

With regard to criminal law it is a general principle that, except for certain minor offences, every person charged is entitled to be tried by a jury. Courts of criminal jurisdiction in Eng-land are '(x) The judges of the High Court sitting at Assizes for the trial of cases out of London; and at the Central Criminal Court ("The Old Bailey," see p 555) for the trial of cases arising in and around London. (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman who is unpaid. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions. (3) Courts of Petty Sessions, consisting of at least two justices of the peace or a stipendary magistrate. (4) The Court of Criminal Appeal has power to hear appeals

against convictions and sentences.

(b) Scotland.-Scots civil law is administered by the Court of Session, which is a court of law and equity. The High Court of Justiciary is the supreme criminal court in Scotland. consists of all the judges, and as a rule it is confined to the trial of serious cases. The Sheriff of the county (see p. 530) exercises functions which correspond to those of the English County Court Judges a d the Channen of Quarter Sessions. Burgh magistrates and justices of the peace have jurisdiction in petty cases.

(c) Ireland.—The higher courts in Ireland are to resumm.—Ine higher courts in Ireland are very similar to the English courts, but the County Court Judges are also the Chairmen of Quarter Sessions, and there are Resident (stipendiary) Magistrates (see p. 539) who have jurisdiction in petty cases.

### LOCAL GOVERNMENT.

Local Government is carried out under the central control of the Ministry of Health (which superseded the various Local Government Boards in 1989). The subjects which local bodies administer are, inter alia the poor law; the laws relating to public health; the maintenance of the police; the control of the sale of intoxicating inquors; the provision to elementary and other schools. The ruling principle has been to entrust special interests to those specially interested. In England and Wales there are elective Councils for each County (under Chairmen), for each City and County Borough (under Lord Mayors or Mayors), and for Urban and Rural Districts (under Chairmen), every parish being thus included. Scotland has elective County Councils under a Convener, Burgh Councils under a Lord Provost or Provost, and the Parish Conneils with Chairmen. Ireland has a more elaborate system of local government than Great Britain with popularly elected Councils for Counties, Boroughs, and Rural Districts, the municipalities having Lord Mayors or Mayors,

### POLICE.

The authorized strength of the Police force on Sept. 29, 1926, was 55,657 in England and Wales, 5,953 in Scotland, and 10,887 in Ireland. The Police of England and Wales are administered by the Home Office, those of Scotland by the Scottish Office, and those of Ireland by the Irish Secretary's Office. The LONDON POLICE. consists of the City Police and of the Mctro-politan Police. The City Police district comprises an area of 675 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (see p. 273). Although the area is comparatively small, the rateable value is enormous, and there are 10,657 night residents. The Force comprises a Assistant Commissioner, 3 Superintendents, 6 Chief Inspectors, 25 Inspectors, 17 Sub-Inspectors, 103 Sergeants, and 1,006 Constables; also zz Constables on private service duty. The cost of the maintenance of the City Police in 1919-1920 was £370,302 (in 1891 the cost was £120,460)
The Metropolitan Police district embraces an

area of 447,656 statute acres, with a popula-tion of about seven millions. There are within this area fourteen Police Courts, viz., Bow Street, Clerkenwell, North London, Lambeth, Mariborough Street, Marylebone, Old Street, Thames, Tower Bridge, Westminster, West London, Tower Bridge, Westminster, West London, Greenwich and Woolwich, South Western, and West Ham (see p. 274). The Force on Oct. 76, 2220, consisted of 40 Superintendents, 689 Inrgeo, consisted of 40 Superintendents, 58; Inspectors, 3,071 Sergeants, and 17,809 Constables, making a total of ax,609, with 30x horses. The strength of the Metropolitan Special Constabulary Reserve and its Auxiliary Force on Sept. 30, 1950, was 12,663. The cost of the maintenance of the Metropolitan Police in 2019-1920 was £6,445,511 (the fines at Metropolitan Police Courts reduced the gross amount by £88,499). On March 31, 1920, there were 20,288 Police pensioners, of whom two were over 34 years of age.

sioners, of whom 530 were over 75 years of age. .

The Royal Navy (see pp 275 9) is recruited by voluntary enlistment, and is administered by the "Commissioners for executing the office of Lord High Admiral of the United Kingdom.

The Army (see pp. 280 4) is recruited by voluntary enlistment in normal times, but was raised to the requirements of the War by the Military Service Act of 1916. It is administered by the Army Council (similar in membership to the Board of Admiralty).

The Royal Air Force (see pp 285-6) is recruited by voluntary enlistment, and is administered by the Air Ministry.

### EDUCATION.

### I .- ELEMENTARY.

Statutes require parents in England and Wales to cause their children to receive efficient elementary instruction or to attend school from 5 to 14 years of age; in Scotland, to provide efficient education up to 15 years; in Ireland, to cause their children to attend school from 6 to 14 years.

In order to give effect to these requirements Local Authorities are empowered to make free provision for school accommodation, attendance of pupils and teaching-staffs, whilst the State supplies nearly one-half of the maintenance funds conditionally upon receipt of satisfactory reports from government inspectors appointed by the Board of Education for England and Wales, by the Committee of Council on Ednortion for Scotland, and by the Commissioners for National Education in-Ireland. In rero attendance was not enforced in sy per cent. of the Urban Districts and Towns, and in as yet cent. of the

Rural Districts. It may be remarked—(i.) that there is no definition of, "school" in the Acts; (ii.) that efficiency of instruction given is, so, tested except in publicly-managed achools; (iii.) that Local Authority schools increase in number though still fewer than voluntary (non-provided) schools. The latter are maintained by the Authorities whilst the responsibility for the buildings remains with the foundation-managers. Of such schools there are about 33,000 in all including some designed for particular purposes, e.g., Higher Elementary and Central for older pupils, special for "defectives" and the like.

Teachers number 200,000, women preponderating. Except in Scotland there is a considerable proportion of teachers who are not fully qualified. The war has lessened the number of male teachers which was already diminishing. State grants for pensions on a more liberal scale than formerly are now offered under the Superannustion Act of 1918, by which it is hoped to render

the profession more attractive.

Twenty per cent. of the population are of the pupilage School life is over in the great majority of cases after about seven years of schooling, the minority proceeding to some other kind of dayschool. Recent legislation requires Local Authorities in England, Wales and Scotland to make schemes for consideration by the Board of Education to provide suitable practical instruction, to give advanced instruction to those pupils who stay beyond 14, and to improve the facilities towards preparing pupils for higher education and the teaching profession: also nursery-schools for children under five.

Elementary school education includes teaching in practical natters—needlework, drawing, gardening, handicrafts, cookery, etc.—and the sections upon health, medical attendance, physical training, evening play centres, home study, future employment, etc., show that the schools are valuable agencies in child-welfare generally.

### II,-EDUCATION BEYOND ELEMENTARY.

The Education Act, 1918, has in view powers for compulsory, and therefore free, education of a continuative kind in part-time day schools up to 16 and ultimately 18 years, and implies free secondary education of some type hereafter.

Secondary

The aims, methods, and instructions are in marked contrast to the comparative simplicity of those in Elementary Education. In all the four countries it is now felt that although technical instruction was the first branch to be promoted by statute, undifferentiated 4-year secondary (intermediate) courses should be gone through before pupils proceed to specialisation for industrial, commercial, etc., employments

(i.) England.—The number of Secondary schools deemed efficient by the Board is 1,073, containing 42,000 pupils, of whom about one-fourth come up from elementary schools with "free places," others with scholaships. Nine-tenths of these schools receive State grants, and nearly one-third are controlled by Local Authorities. Fees are charged to most of the pupils. Most secondary schools are over full. Of these "efficient "schools about apper cent. Féoriev boarders (about 27,000) in varying proportions and drawn in many cases from distant areas." Most of them are endowed or under trusts, and their trust incomes and property ferm a considerable asset in secondary school finance. The Authorities aim

at securing graduate Teachers as far as possible. As in Elementary schools, there is a shortage of fully-qualified teachers; but the recent Act. for providing Pensions for School Teachers may be expected to make the posts more attractive.

(ii.) Wales.—The system is much the same as in England, through the schools are under earlier statutory provisions, and are colled "Intermediate" in many cases. The number of efficient schools was (in 1924) rass, and of pupils, 22,000, girls preponderating Three per cent. of the schools do not receive government grants, and 8x per cent were provided by the Local Authorities. In Wales there is a Central Welsh Board,

(iii.) Scotland: Intermediate and Secondary Schools—Three kinds of courses are provided: "Higher Grade and Intermediate with post-Intermediate." The former are taken in 196 schools by 33,000 pupils, and the latter in 56 schools by 20,000 pupils. All are under the same Commissioners and Local Authorities as are the

Elementary schools

(iv.) Ireland — Intermediate Education is under a Special Board who have recently gained fresh statutory powers and a State grant analogous to those in force elsewhere in the United Kingdom. Up to 1917 their operations were chiefly examinational, though grants for inspection results had already been authorised and are made. Their report (1917) contains reference to schools in so far as their pupils (11,000) were presented for examination. It seems that 346 schools were affected, with some 12,000 pupils. There are also "Commissioners of Education in Ireland," whose powers are confined to certain endowed schools (800 pupils) mostly in Ulster.

Technical.

Technical Education in England and Wales is provided in Evening and similar schools (mostly controlled by Local Authorities), 3,r43 in number, and attended by 417,148 students on whom State grants are paid, and of whom about one-half are under 17 years of age. The average attendance of a student is about 50 hours per annum. There are also Teachers' Courses (24), Tutorial Classes (120), Technical Institution Courses (24), with 1,169 grant-carning students, Day Technical Classes (127), held in 38 Institutions, with 97,265 students on whom State grants are paid; and also 151 Schools of Art, and 49 Art Classes.

Art, and 49 Art Classes.

In Scotland Technical Education is provided in like manner, but in Ireland by a Department of Agriculture and Technical Instruction.

Training.

Training is provided by the State for Elementary School Teachers, of whom go per cent. have been trained in Colleges having nearly 13,000 places. Slight progress has been made lately towards providing for the Training of Teachers for Secondary Schools, a small annual State grant being made for the pulpose

Universities

There are 18 Universities in the United Kingdom, of which 10 are in England, 4 in Scotland, 1 in Wales, and 3 in Ireland (see pp. 301 5); and 4 independent University Colleges. Most of these Universities and University Colleges receive State grants in respect of technical and professional work under the Board of Education Regulations. The Acts of 1918 employer Local Authorities to give aid to University work. There are 30,000 full-time students at these. Universities and Colleges.

FINANCE. The Revenue and Exponditure of the United Ingdom for the six years ended March 22, 1984, Stated as follows:

Year.	Revenue.	Expenditure.
2914-15	£379,334,000	£x,138,654,000

## THE INCOME TAX. ... : 12

Under the Finance dot of uses a radical alteration has been made in the method of granting relief in the Income Tax in favour of carned income as compared with investment income, and is the method of graduating the burden of the tax according to the size of a taxpayer's income and his family responsibilities. The previously existing exemptions, abatements, and reliefs are replaced by the various reliefs set out below. In introducing the new system, the Act employs two terms not previously mind in connection with the Income Tax, viz., \*\*\* assessable income" and "taxable income.

"Assessable Income" means, in the case of "earned" income, the amount of such income as computed for Income Tax purposes, after deducting the amount of the "earned" income allowance mentioned below, and in the case of other income, the actual amount of such income

as computed for Income Tax purposes.

"Taxable Income" means that part of the "assessable income" upon which Income Tax is actually charged, that is, the "assessable moome" less the various deductions referred to below.

Deduction in arriving at Assessable Income. Earned Income Allowance.—The differentiation in favour of "earned" income is made, not as heretofore by reducing the rate of tax chargeable upon such income as compared with investment income, but by deducting one-tenth of the "earned" income in order to arrive at the assessable income. The deduction is given irrespective of the amount of the total income, but must not exceed £200 for any one individual The "asse-sable income" of a taxpayer is, therefore, his total income, as computed for Income Tax purposes, after making the appropriate deduction in respect of any "earned" income.

Total Exemption -- Exemption from tax may be claimed where the total assessable income does not exceed £135, or, in the case of an individual whose wife is living with limi, £225. Where the income is wholly earned, these limits are equivalent to £150 and £350 respectively.

See above

Deductions from Assessable Income in order to urrive at Taxable Income -Where the taxpayer is not totally exempt, the following deductions may be claimed from the total assessable meome in order to arrive at the "taxable income." The deductions may be claimed irrespective of the amount of the taxpayer's total income

Personal allowance may be claimed of £135, in the case of an individual whose wife is

living with him, £225.
Wife's Earned Income.—When a taxpayer's total income includes any earned income of his wife, the personal allowance of £225 is increased by a sum equal to nine-tenths of the amount of such carned income, subject to a maximum additional allowance of £45.

Deduction for a Widower's (or Widow's) House-

kerper taking Charge of Children .- A deduction of £45 may be claimed, under certain conditions, by a widower who has living with him a female relative for the purpose of having the charge and care of any child or adopted child of his in respect of whom the deduction for children (see below) is given or by a widow who has a female relative resident with her for the like purpose.

If the widower or widow proves that he or she has no such female relative who is able or willing to take such charge, the same deduction may be

claimed in respect of some other female person employed for that purpose

Deduction in respect of Widowed Mather, tentaining Charge of Children.—A deduction of may be claimed, under certain conditions, by an Unimerrical Person who has living with his wand maintains at his own expense either his mother (being a widow or living apart from her husband) or some other female relative, for the purpose of having the charge and care of any brother or sister of his in respect of whom the deduction for children or adopted children (see below) is given.

Deduction for Children.-A deducti n may be claimed in respect of each child, step-child, or adopted child under the age of 16 years, or who, if over that age, is receiving full-time instruction at any university, college, school, or other educational establishment. The deduction allowable is £35 in respect of one ohild, and £37 in respect of each additional child for whom the relief is duc.

No deduction is, however, allowed in respect of any child or adopted child who is entitled in his or her own right to an income which, after excluding any income to which the child is entitled as the holder of a scholarship, bursary, or other similar educational endowment, exceeds £40 a year.

Deduction in respect of Dependent Relatives .-A deduction of  $\mathcal{L}_{ag}$  may be claimed in respect of (a) any person whom the taxpayer maintains at his own expense, and who is a relative of his or of his wife, and incapacitated by old age or infirmity from maintaining himself or herself, or (b) his or his wife's widowed mother, whether incapacitated or not, or (c) a daughter who is resident with the taxpayer, and upon whose services he is compelled to depend, by reason of old age or infirmity.

The deduction under (a) or (b) is conditional, however, upon the income of the dependent relative not exceeding £50 a year. The deduction applies in the case of a female taxpayer, with the substitution of "husband" for "wife" above.

Rates of Tax chargeable on the "Taxable Income.—The following provisions as to the rates of tax chargeable on the taxable income (i.e., that part of the income on which tax is actually charged) apply, whatever the total amount of the moone. The first £ssp of the taxable income is chargeable at half the standard rate of tax, i.e., for the year ending April 5, 1921, at 3s. in the £. The remainder of the taxable income is chargeable at the standard rate of tax, i.e , at 6s. in the £.

Relief in respect of Life Assurance Premiums. -Where allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax arrived at under the preceding paragraph, and calculated at following rates:—3s. In the  $\mathcal{L}$  on the amount of the premium paid on policies taken out since June 3s, rgs, irrespective of the claimant's total income; and on policies taken out before June sa, sps, a deduction of ye. in the £ is allowed on the premiums paid by a claimant whose income does not exceed £x,000, of 4s. 6d. in the £ where his income exceeds £x,000 and does not exceed £2,000 and of 6s in the £ where his facous

### THE DEBT OF THE UNITED KINGDOM.

The National Debt was raised almost entirely for foreign wars. There was a trifling sum of £664,563 until the "Glorious Revolution" of 1665, which added hearly £16,000,000 to the Debt. Under added hearly £16,000,000 to the Debt. Under Queen Anne the campaigns of the Duke of Mariburough added nearly £38,000,000, part of which was paid off in the time of George I. In the reign of George II. about £87,000,000 were added, but the first twelve years of George III. saw £10,000,000 of this paid off. The american War added £121,000,000, making the total nearly (250,000,000, which was reduced considerably until 2793, when the repayments ceased owing to the outbreak of the French Revolutionary War. In twenty-three years, £60x,500,343 were added to the debt for the purposes of the war, the following amounts being raised :-

Year. Year Year Year. 56
1793... 4,877,946
180x ...27,305,272
1794... 6,998,389

Note.— When the yield of wheat per acre differed from the average for the 30 years 1890-1919 by less han one-tenth of a bushel, the year has been noted as "Average." When the difference was between o's and o's bushel, the year has been noted as "Singhtly above (or below) Average", when between o's and r's bushels, as "Decidedly above Average or "Deficent", when between x's and z's bushels, as "Good" or "Bad"; when between z's and z's bushels, as "Very good" or "Very bad", and when above 3's bushels, as "Extremely good or "Extremely bad."

### Production per Acre

The production per acre of cereal crops, roots and hay in the year of the outbreak of the War, and 1919, is shown in the following table.

Crop	England and Wales	Scotland	Ireland
Wheat Bahls. Barley ,, Oats ,, Peas ,, Peas ,, Petatoes Tourips and Swedes Mangolds ,, Hay ,,	32 34 28 7 32 52 29 0 39 61 35 6 30 49 25 0 23 0 26 7 6 4 5 9 12 9 11 4 18 36 26 9	42'31 38'5 38'04 35'2 40'18'38'2 38'45'39 4 24'27'18'0 7'07'5'4 14'66'16'8 81'84'17'0	44 99 41 8 50 48 48 7 44 97 31 32 5 91 4 7 16 01 16 4

#### Fisheries.

The quantities and values of the fish landed in the United Kingdom (excluding shellfish and river salmon) were as under in 1914 and 1919. In 1914 shellfish to the value of £401,812 were landed, and in 1919 the value was £691,667. The values of the 1919 catch are still inflated as compared with pre-war figures, but the average value per ton has declined as compared with 1918. The United Kingdom quantities have increased, being practically level with 1914 and nearly double 1918. The quantities for Scotland are still below 1914, but those for England and Wales are slightly above, while those for Ireland have materially improved.

#### Forestry.

In rors the estimated area of the forests and plantations (land planted with trees within the preceding to years) in the United Kingdom was 3,098,000 acres, of which 1,730,000 acres were in England, 188,000 acres in Wales, 880,000 acres in Scotland, and 300,000 acres in Ireland. Grants for the development of forestry are made by the Freasury, under the advice of the "Development Commissioners" appointed in 1910. Before the War of 1914-18 the United Kingdom imported annually about 10,000 con tons of timber, valued at about £27,000,000, Of this total, over 85 per cent. consisted of light pine and fir from Russia, Sweden, Norway and Canada. There are in the United Kingdom over 10,000,000 acres of waste land, and about 12,000,000 acres of mountain and heath land, used for light grazing. It is estimated that less than one-third of this total of as,oco,oco acres, if put under trees which can be grown in the country, would supply 95 per cent. of the total requirements, leaving only 5 per cent. (timber which cannot be grown in the British Islands) to be imported from abroad.

## MINERAL PRODUCTION OF THE UNITED KINGDOM.

The quantity and value of the principal materate won in the following table. The total value (at the mines and quarries) of all minerals won in 1924 was £141,163,032 and in 1928 the value had increased to £327,79,792, with a greatly diminished output. The total number of persons employed

in rars at the 2,075 mines in work was r,000,000, of whom 807,000 (males) were employed underground, and zzo,84z males and zz,96z females above ground. In the 4,36a quarries, 43,222 persons were permanently employed; of these, 27,27; (84 females) worked fuside the quarries and z5,296 (548 females) outside the quarries.

Coal Exports of the U.K.

The United States is the only country to show an increase over the pre-War figures. After dropping from 527 million tons in 393 to 466 million and 482 million tons in the following years, the production rose to 535 million tons in 3948. In 3929 (owing to the great strike) the production of the U.S.A. fell to 494 million tons. In 1932 the coal production of the United Kingdom showed an increase over that of 398 of 3930 the production was 63,703,000 tons (1,285,500 persons employed), 58,266,000 tons (1,285,500 persons employed), 58,266,000 tons (1,290,300) and 59,457,000 (1,207,800), a total of 279,736,000 tons for the nine months to Sept. 30, 2920.

The value of coal, coke, and patent fuel exported in various years is shown below. Coal bunkered by ships in the foreign and coastwise

bunkered by ships in the foreign and coastwise trade (ar.ozr.550 tons in 1913 and 13.0zr.24z tons in 1919) and Admiralty shipments of coal (34.500.000 tons in 1918) are not included in these figures. Before the War of 1914-1918 the value of the coal consumed by the ships of the Royal Navy was about £2.500.000 annually. (ii) has taken the place of coal in most of the recently built ships.

## Truncome in the first of

The production and importation of iron ore are as shown below. Values are not shown, as that of Iron ore produced in the United Kingdom is taken at the place of production, while the value of imported one is enhanced by transport and handling to the port of entry. The value of the iron ore produced in the United Kingdom in 1918 is stated at £7,106,656; that of the imported ore at £13,441,225, of which 4,272,905 tons (£8,30,411) came from Spain.

Year.	Tons Produced.	Tons Imported.
1905 1914 1915 1916 1917	14,590,703 14,867,582 14,325,012 13,494,658 14,845,734 14,613,032	7,344,786 5,704,748 6,197,155 6,933,767 6,189,655 6,581,728

Pig Iron.

The quantity of ore smelted and pig non made is shown below. In 1905 the quantity of coal used in the manufacture of pig non was 19,255,555 tons; in 1918 the quantity was 2,616,840 tons of coal and 11,286,680 tons of coke. In 1905 there were 345 blast furnaces at work, and in 1918 they numbered 318.

Otner Countries	338,000,000

The classes of wool grown are divided into three groups, viz., merino wool for clothing, and low wool (mainly used for carpets, rugs, etc.). The approximate proportion of these classes is 2,074,000,000 lb. merino, 2,022,000,000 lb. c,022,000,000 lb. posterio, and y00,000,000 lb. low wool.

. . .. 2,799,000,000

Total (1915) .....

The British Empire produced 63 per cent. of all merine wool grown, 40 per cent. of all crossbred, and a per cent. of carpetwools, 40 per cent. of the last-named being produced by Russia.

Taxtiles Industries of W.K.

The ection and woollen industries of Great
Britain are centred on the coalisidis; the lineaindustry is centred mainly at Belfast and
Dundee. Leicester, Nottingham and Derby are
the chief seats of the hossery mannfactures,
and Nottingham, Derby and Klimarnock of the
lace industry. The cotton industry depends
entirely upon imports, and consumed over
750,000,000 lb. of imported cotton in 1918; the
woollen industry consumed about 350,000,000 lb.
of wool, of which about one-third was produced
in the United Kingdom; the linen industry consumed about 80,000,000 lb of flax, of which
almost one-half was bome grown. The total
value of the textiles produced in 1919 is given
in the Trade Returns of the United Kingdom
at £50,173,178 for cottons, £33,90,2090 for
cotton yarn, £6.308,031 for jute yarn and manufactures, £85,240.476 for woollens and worsteds,
£3.398,024 for silks, and

## U.K. Cotton Imports, 1913-1919

The total imports of raw cotton in range amounted to rangas, 867 centals of roo lb., of which r4,536,289 centals were from Foreign Countries, and 5,046,578 centals from British Dominions.

Yeru	From U S (z,ooo lb.)	From Egypt (r,ooo lb )	From India (1,090 lb)	From Peru, (x,000 lb)

#### Other Industries.

The Metal Industries are next in importance to textiles. Engineering and metal-working centres are, generally speaking, in the neighbourhood of the coalfields, particularly on the N. K. coast at Barrow-in-Furness, and at Sheffield, London, Crewe, Swindon, Derby, Southampton, Birmingham and Coventry in England; on the Clyde in Scotland, and in Belfast, Ireland. The Leather Industry is important at Bristol, Leleaster, Notthampton, and Nottingham; Earthen and China Ware in "the Pottery District" on the South Staffordshire coalfield, where there are supplies also of coarse clav and inorstone, the "China Clay" (kaolin) being brought from Cornwall or imported from abroad; Paper-making (which also absorbs China Clay), Printing, and Brewing are also of general importance, and Distillary is a considerable industry in Scotland and Ireland.

#### Trade Union Membership.

At the end of 1918 the 1,220 Bitish trade unions had a membership of 6,624,000 as compared with 5,547,000 at the end of 1973, an increase of 19 per cent. The women membership increased by a third and stood at about 1,250,000, and the membership of agricultural labourers was more than doubled. The recently-formed unions include 200,000 teachers in elementary and 200,000 teachers in elementary and 200,000 teachers in elementary and 200,000 teachers in elementary and 200,000 teachers in the List of Societies, pp. 342-6.

#### TRADE OF THE UNITED KINGDOM (MERCHANDISE ONLY).

In statistics of Trade, the term General Trade refers to the whole volume of Imports (including such as are temporarily detained and afterwards exported), and to the whole volume of Exports. The term SPECIAL TRADE includes only Imports for consumption in the country receiving them, and Exports of home produce or manufacture. In the first of the following tables the General Trade is shown for a period of twenty years and the Special Trade for a similar period, showing the 'apparent" halance of Imports over Exports. Subsequent tables show the various quantities and values of the merchandise exchanged during the year 1939.

The balance of Imports over Exports is not the true balance on account of the system of valuation in official returns, the Imports being taken at their CIF value (which includes the Cost of the merchandise and the charges for Insurance and Preight), whereas the Exports are taken at their FOB (free on board) value, which includes only the Cost of the merchandise delivered on the exporting ship. Such Exports have an added value by the time they resolt their destination, having become loaded en route with Insurance and Freight. They leave the country with an FOB value and arrive at their destination with an acquired ('IF value.

#### COMMUNICATIONS.

The total mileage of public roads in the United Kingdom is approximately 340,000 miles, of which 130,000 are in England and Wales, 25,000 in Scotland, and 60,000 in Ireland. The annual bost of maintenance is about £25,000,00

The maintenance and repair of bridges and main roads is within the jurisdiction of the County Authorities in each Division of the United Kingdom, other roads being maintained by Borough, Urban, Rural, and Parish Councils. The increase of motor traction and the consequent use of highways by other than county or district residents has led to a movement in favour of the nationalisation of the highways. A Development Fund (for which a sum of £1,000,000 was allocated in 1919-20) was formed in 1910 for the creation and improvement of highways, and for the improvement of rural transport (the sum of £8,250,000 was allocated to the Road Improvement Fund in 1919-20). Under the Act of 2010 the functions and duties of the Road Board were transferred to the Ministry of Transport, which now controls all matters previously dealt with by the Road Board.

Railways.

On Dec. 31, 1918, there were 23,709 miles of railway open for traffic in the United Kingdom, with a total mileage (owing to double, treble, and quadruple tracks) of close on gs,ooo miles The mileage operated by the various Companies is as under .-

Canals.	

There are 4,673 miles of canals and canalized rivers in the United Kingdom (England and Wales, 3,64x miles; I eland, 848 miles; Scotland, 184 miles; Scotland, 184 miles), no additions to the mileage having been made for several years. In 1905 the inland waterways carried 43.161.027 tons of merchandise, the revenue being £2,680,7ro and expenditure £1,891,2x2. Of the total mileage 1,363 miles were owned or controlled by railway companies (the longest systems being the Shropshire Union, see miles; Grand Juuction, 389 miles; Birmingham, 389 miles; and Leeds and Liverpool, 459 miles). The total paid-up capital of all the canals was £47,550,763. The existing system is at its greatest, development, in the middland country of England; and in Lanca-

shire and Yorkshire. A Royal Commission, appointed in 1906, reported, in 1909, in favour of a development scheme under an Inland Waterway Board, to improve the existing system. Their principal proposal was the formation of four main routes (from a centre in South Staffordshire) to the Thames (London), the Mersey (Liverpool), the Humber (Hull), and the Severn (Gloucester), the proposed routes to accommodate barges up to zoo tons. On Jan. z, zoz8, there were r,sos miles of inland waterways in England and Wales, and 304 miles in Ireland, under the Canal Control Committee, appointed by the Government on March 1, 1917; there were also 1,025 miles controlled by the Railway Executive committee. The Manchester Ship Canal, opened in 1894, has a total length of 36 miles, and connects Manchester with the Mersey port of Liverpool; in 1913 the tonnage carried through the canal was 5,780,161 tons, and in roug the tonnage was 3,589,043 tons.

#### Tramways.

The total mileage of tramways and light railways open in the United Kingdom on Dec. 31. 1914, was 2.702. The total receipts were £15,787,877, the working expenses £10.159.595,

• Includes 314,912,000 Passengers holding Workman's

Tickets.

† Previous to zers these figures were exclusive of Renta, Tolls, Navigation, Steamboats, &c.

† Includes the amenint estimated to be receivable by the companion and the amening agreement with the Gevernment.

#### Mercantile Shipping.

'On June 30, 1930, the Mercantile Marine of the United Kingdom consisted of 3,123 steamers (18,116,623 tons) and 448 sailing vessels (18,230,424 tons). It raid there were 35,652 seamen employed in British sailing and steam vessels (exclusive of vessels employed on rivers and inland navigation, but inclusive of fishing vessels); of this total, 213,640 were British, 21,3966 foreigners, and 51,616 were Lascars and Asiatics. Germans (5,000), Swedes (3,600), Norwegians (2,250), and Russians (3,000) were the most numerous of the foreign nationalities.

#### Shipping (Entered and Cleared)

The not tonnage of all vessels with cargoes and in ballast engaged in the coasting trade of the United Kingdom in 1917 was 21,544,378 net tons for arrivals and 22,267,585 net tons for departures.

#### Posts, Telegraphs and Telephones.

The carrage and custody of the mails has been maintained by the State "from time immemorial." The telegraphs were transferred to the State on Feb. 5, 2870; the telephones on Jan r. 2012. The submarine telegraph cables connecting the British Isles with the various Dominions and Foreign Countries are maintained and worked by private companies. In 1939 a Trans-Atlantic Aerial Post was inangurated by the successful flight of an aeroplane from St. John s, Newfoundland, to Clifden, Ireland; and by the voyage of H.M. Airship R 34 from Scotland to New York, and from New York to England

In the year ending March 31, 1915, 3,409,000,000 letters (74 per head of the population) were delivered in the United Kingdom, in addition to 880,000,000 loost-cards. and 1,321,000,000 half-penny packets. There were (March 31, 1926) 3,264,82s miles of telegraph and telephone wire (264,480 telegraph, 2,843,254 telephone, and 157,088 spare wire), with 14,185 telegraph offices. In 1914-15 81,798,000 miand and 14,180,000 foreign telegrams were transmitted. On March 31, 1916, there were vere x.051 trunk telephone exchanges, with 363,945 miles of wire, the number of calls being 40,302,719, there were also 262,735 telephones in London, and 133,856 elsewhere in the U.K., the effective London calls numbering 249 millions, and the others 527 millions.

The number of telephones per zoo of population in the U.K., U.S.A., and certain other countries (1919), is shown below:—

U.S.A	13.6	U.K	8.0
Sweden	6.4	France	I.O
Norway (1917)	4'4	Italy (1917)	0.3
Germany (1014)	2'3		

Wireless Telegraphy — In 1909-2910 the wireless telegraphy stations on the coasts of the United Kingdom were acquired by the Government, except the long-distance stations at Poldhu (Cornwall) and Cliden (County Galvern), which are maintained (and worked under licence), by the Marconi Company.

<sup>\*</sup> Exclusive of vessels employed by the Government during the War.

## THE KINGDOM OF ENGLANDER TRACE

Position and Extent.—The Kingdom of England cooppies the southern portion of the island of Gludester; and a lines between 25 4 and 15 27 20 N. latitude (from the mouth of the England is bounded on the north by the summit of the Chavior Hills, which form a natural boundary with the Kingdom of Scotland; on the south by the English Channel; on the east by the Straits of Dover (Fas de Calais) and the North Sea; and on the west by the Atlantic Ocean (which washes the Cornish coast), the Principality of Wales and the Irish Sea. The total area of the kingdom is 50,82 square miles, the population numbering 34,047,659 at the Leuaus of 251 consults.

Relief.—There is a natural orographic division of England into the hilly districts of the north, west and south-west, and the undulating downs and low-lying plains of the east and south east. In the extre ne north the Cheviot Hills run from east to west and divide England from Scotland, culminating in the Cheviot, 2.676 feet above mean sea level. Divided from the Cheviots by the Type Gap is the Pennine Chain, running N. by W. to S by E., with their highest point in Cross Fell, 2,330 feet above mean sea level. West of the Pennines are the Cumbrian Moun tains, which contain in Scafell Pake (3,210 feet) the highest land in England, and east of the Pennines are the Yorkshire Moors, their highest point being Urra Moor (1,480 feet) South of the Pennines there are heights above 2,000 feet in the Peak of Derbyshire (highest point a, 688 feet), and in Dartmore (high Wilhass, 2,039 feet). In the western county of Shropshire are the isolated Wrekin (1,332 feet), Long Mynd (1,574 feet), and Brown Uee (1,805 feet); in Herefordshire the Black Mountain reaches 2,320 feet, in Worcestershire the Malvern Hills reach 1,395 feet, in western Monmouthshire are the Sugar Loaf (1,955 feet) and Colty (1,905 feet), and the Cotteswold (or Cotswold) Hills of Glou-

cestershire contain Cleave Cloud (x, 124 feet).

Hydrography —The Thames is the longest and most important river of England, with a total length of are miles from its source in the Cotteswold Hills to its outflow into the North Sea. The lower river is navigable by ocean-going steamers to London Bridge, and small craft reach Lechisde, ace miles from the mouth. The Thames is tidal to Teddington (so miles from its mouth), and its upper stream is connected with the Severn by a canal at Lechiade; the Wilts and Bucks canal enters at Abingdon, and the Wye canal at Reading. The principal tributaries are the Cherwell, Lee, Kennet, Wey, Mole and Medway. The Thames forms county boundaries almost throughout its course, and on its banks are situated the capital of the British Empire; Windsor Castle, the home of the Sovereign; Eton College, the first of the public schools; and Oxford, the oldest university in the kingdom. The Severy is the longest river in Great British, rising in the north-eastern slopes of Plinlimmon (Wales) and entering England in Shropshire, with a total length of as miles from its source to its outflow into the British Channel, where it receives on the left the British Ayon, and on the right is the west.

wickshirs) Avon. The Severy is tidal below Gloncoster, and a high bove or tidal wave wome-times reverses the flow as high as Towkedday, (13½ miles above Gloncoster). The security of the greater part of the river is very picturesque and beautiful, and the Severn is a noted salison river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester trout. "Navigation is assisted by the Groscesser and Berkeley Ship Canal (ref., miles), which admits vessels of 350 tons to Gloucester, other canals connecting with the Thames, Trent, Beel and Mersey. The Severn Tannel, which carries the Great Western Railway under the river, 14 miles below the Sharpness Bridge, was begun in 1873 and completed in 1886 (at a cost of £2,000,000) after many difficulties from flooding, at 1986 in length is unusual is miles fee variet in length. The tunnel is 4 miles 624 yards in length (of which 21/2 miles are under the river). Of the remaining English rivers those flowing into the North Sea are the Tyne, Wear, Tees, Ouse and Trent from the Pennine Range, the Great Ouse (ree miles) from the Central Plain, and the Orwell and Stour from the hills of East Anglia. Flowing into the English Channel are the Summer Ouse from the Weald, the Itchen from the Wiltishire and Hampshire Hills, and the Assa Tring. Dart, Tamar and Exe from the Devonian Hills: and flowing into the Irish Sea are the Mersey, Ribble and Eden from the western slopes of the Pennines and the Derwent from the Cumbrian Mountains. The English Lakes are noteworth; rather from their picturesque scenery and poetic associations than from their size. These lie mainly in Cumberland, but partly in Westmorland and Lancashire, the largest being Windermere (to miles long), Ulleswater and Derwentwater.

Islands.—The Scilly Islands form part of the county of Cornwall, and are distant smilles from Land's End. The group consists of about 400 islands, with a total area of about 4,000 acres, only St. Mary's, Tresco, St. Martin's, St. Agnes, and Bryher being inhabited, the total population in spir being 2,000. The capital is High Town, in St. Mary's. The climate of the Scilly Islands is unusually mild, and vegetation is hundrant, semi-tropical plants flourishing in the open. The Isle of Wight forms an administrative county and is separated from Hampshire by the Solent and Spithead. The total area is 142 84, miles, with a population in 121 of 38.186. The climate is mild and healthy, and many watering places have grown-up during the last century. The capital is Newport, at the head of the estuary of the Medina, Cowes (at the morth) being the chief port other centres are Ryde, Sandown, Shanklin, Ventor Preshwaten, Varmonth, Totland Bay and Bembridge.

Chmatt.—The south-westerly winds from the Atlantic Ocean penetrate to the heart of the country, affecting the temperature of the greater part of the kingdom, and only the coastal regions of the east have a modified continental cituiate. The mean annual temperature is about 90 Fehrenheit, varying from 30 in the Soilly Islands to 48 at the mouth of the Tweed, and generally the west of England is mild and wet in whiter and cool and less wet in summer, while the east is cool and dry in winter and spring and liet and less dry in summer and automn, the wattest region being the Lake district of Cumberland.

Presistoric Mas.—A skeleton found at feeling Mas. A skeleton found at feeling Mas. near Northfleet, Kent (in 1856), has been ascribed to a man of Central Asian race of the Early Stone Age, and stone implements of the remote Eolithic, Palsolithic and Neolithic periods are abundantly found throughout Eugland. The Neolithic period is held to have merged into the Bronse Age about see to assess a consistency for the Neolithic period is held to have merged into the Bronse Age about see to assess a satisfaction in reed, and now preserved as a national monument). Stonehenge (se miles N. of Salisbury, Wiltshire) consists of two circles of menhirs (the largest monolith being 25% feet in height), only 26 remaining in position in the outer circle, while two of the five triple sets are still in position in the inner circle. The use for which the temple or monument was erected is the subject of many conjectures.

The Celtic Invasion.—In the latter part of the Bronze Age the Goidels, a people of Celtic race, and in the Iron Age another Celtic race of Brythons, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest.—Julius Cæsar raided Britain in 35 B.C. and 55 B.C., and in 43 A.D. the conquest of the country was undertaken by the Boman Emperor Claudius, who sent Aulus Plautius with a well-equipped army of 40,000 men, and himself visited Colchester (Camulodunum) and Londinium. The British leader from 48-51 A.D. was Caractaous (strictly Caratacus), who was finally captured and sent to Rome. By 70 A.D. the conquest of South Britain was completed, a great revolt under Boadicea (strictly Boudicea), Queen of the Iceni (Norfolk), being crushed in 67 A.D. In and built a continuous rampart, known as Hadrian's Wall, from Wallsend to Bowness (Tyne to Solway), remains of which are still traceable. The Romans administered Britain as a Province under a Governor, with a well defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St. Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. A well preserved Roman town of about 100 acres was first un-covered in the 18th century at Silchester (Calleva Atrebatum), re miles south of Reading, and since resp the whole site has been investigated. Four main groups of roads radiated from London, and a fifth (the Fosse) ran obliquely from Ermine Street (at Lincoln), through Leleester, Ciren-cester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as Watling Street) nat through Verulamium (St. Albana) to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. Christianity reached the Roman Province of Britain from Gaul in the and sentury (or possibly earlier), the Bishops of Londinium, Eborsoum (York), and Lindum (Lincoln) attending the Council of Arles in 24. The Bousan garrison of Britain was much harrassed in the 4th century by Saxon strates. who invaded the eastern counties from the Wash

EARLY INHABITARISM. 3. (in Registrated, where about 330 A.B. incurretons in its Man.—A skeleton found at Galley the north of Irish (Scoti) and Picta became most to a man of Central Asian race of the carry of the Registration of the lithic, Palsonithic and Roolithic reading in the North of the Registration of the Bronse Age about sees to and a date between these years has not of the North of the Scotian of the Registration was returned in the Registration of the

tants, whose language and customs re-emerged.

Auglo-Saxons and Normans.—The Celtic
Britons appear to have called in the Saxons to prices appear to have called in the saxons to resist the radio of the Picts and Scots, and eventually the English (Angles, Saxons and Jutes) drove the Britons into the mountain fastnesses of the West (Straticiyde, Wales and Cornwall), the name of Welch (old English Wastles = Foreign) being given to the islanders by the investor the continent. by the invaders from the continent. The area thus conquered was divided into several king-doms, of which the chief were Northumbria doms, of which the chief were Northumbria (Bernicia and Deira), Mercia (Middle Angles), and Wessex. The heathen Angli (whose gods Ti, Woden, Thunor and Frigg are commemorated in "Tuesday, Wednesday, Thursday and Friday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbiahoprics at Canterbury and York, and the whole of England appears to have been converted by the end of the 7th century. In the 8th century Offs. King the 7th century. In the 8th century Offs, King of Mercia, is stated to have built a wall and rampart, afterwards known as Offa's Dike, from the mouth of the Dee to the Severn Estuary, as a protection against the Welch. The greatest of the English kingdoms was Wessex, with its capital at Winchester, and the greatest of the Wessex kings was Alfred the Great (872-901), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 18th cen-tury the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resist the invaders, and England paid tribute (Danegett) for many years, and was ruled by Danish Kings from rere to rots, when Edward the Confessor was recalled from exile. In 1066 Harold (son-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England, but after defeating a Northum-brian revolt under his brother Tostig (aided by an invading army of Harold Hadraada of Norway) at Stamford Bridge in Yorkshire (Sept. ag), he was himself defeated at the Battle of Hastings (or Sautlache) on Oct. 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy. Since the Norman Conquest all attempts to invade England have been defeated.

#### ENGLISH COUNTIES.

For Administrative purposes England is divided into so Administrative Counties (under the Local Government Act of 1885). The boundaries of these Administrative Counties differ in many cases from those of the older Geographical Counties, while the areas of the pa County Boroughs areated under the Act of 1885 are accluded from the County Areas, and the population of the Recounties is separately summerized. The area, nepulation and their differer of the Administrative Counties are shown overtext.

#### THE PRINCIPAL ENGLISH CITIES.

#### LONDON.

14.1

13.203

Lowbox, the distitution of England and of the British Empire, and the greatest city in the world, is situated on both banks of the Eiver Thames, as miles from its outlow into the North See. The various areas of Loudon, with the population of each (according to the Census of sprz), are shown below.

.,,	Acreage.	Population.
Area	1911	7922.
County of London	74,816	4,5at,685
City of London	675	19,657
London Police Districts	443,424	7,251,358
Proposed "London Health		

Area, "...... 3,045, zao 0.207,484 The City of London (see pp. 543-4) administers London within its ancient boundaries, where the Saxon Port Reeve became Baffiff in 1066, Mayor in 1292, and Lord Mayor in 1354. The City is the financial and business centre of London, and includes the head offices of the London, and includes the head offices of the principal English banks, insurance companies, and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall, the Norman Tower and the 14th century Guildhall, to the massive spendour of St. Paul's, and the architectural beauty of Wren's spires (Bow Church, St. Bride's, St. Dunstan's in the East, etc.), for which (and for other City build-

ings) see pp. 552-559.
The City of Westminster, which is bounded by the City of London on the east, by Chelsea and Kensington on the west, by Paddington, St. Marylebone and Holborn on the north, and by the Thames and Chelsea on the south, was formed into a borough by the London Government Act of 1800, and was created a city by Royal Charter of Oct. 19, 1900, the Council con-sisting of a Mayor, 10 Aldermen and 60 Coun-Extending from the eastern end of the Strand to Kensington Gardens, and from Oxfordstreet to the Thames, it includes within its boundaries a large number of the finest buildings in London. The Abbey and the Roman Catholic Cathedral, the Houses of Parliament and the Law Courts, Buckingham Palace and St. James's, and the principal Government offices, Clubs and Theatres are situated in Westminster, which also includes the fashionable residential districts of Mayfair and Belgravia, the chief buildings being described on pp. 552-562. Westminster is the richest of the London areas, the rateable value of property being £7,087,331 in 1920, the product of each 1d. in the £ being £28,291.

Metropolitan Boroughs.—Under the London

Government Act of x800 the administrative functions of the various vestries in the Metropolitan districts surrounding the City of London were transferred to as Metropolitan Boroughs (see p. 542), of which one became afterwards the City of Westminster. The area covered by these horoughs extends northwards to include Stoke Newington; southwards to Wandsworth and Lewisham, eastwards to Woolwich, and west-

wards to Hammersmith

London County Council .- For County purposes the affairs of London are administered by the Lon-

don County Council (see pp. 547-550), which was created by the Local Government Act of 1888. Miscellaneous Authorities.—The Poor Law is administered in the Metropolitem ware by the Metropolitan Assisms Beard (see p. 550), and by 32 Bodrits of Guardisis; for Police purposes

the administration is invested in the City Corpo-ration as to the City Poster they are add in the Home Office as to the Metropolitus Poster (see h. 1971). The authority for the wisply of water is the Metropolitus Voter Bostol (see h. 1911), while the River Thumbé le administrated as to its tidal portion by the Port of London Authority (see h. 1915) and above Teddington by the Theories Conservance (see h. 1914) the Metro the Thames Conservancy (see p. sea), the light-house and pilotage authority being Trinify House (see p. sea). The bridges (see p. sea) are main-tained in the City of London by the Bridge House Estates Committee of the Coporation of the City, and in the remaining area by the London Count Council. The lighting of London is carried out by private enterprise, and in some cases by the Borough Councils, while locomotion is provided by the London County Council as the Tramway authority, and by private enterprise as to underground or other railways and motor vehicles.

147

#### LIVERPOOL

LIVERPOOL (Lancashire), on the right bank of the river Mersey, 3 miles from the Atlantic and sex miles N.W. of London, is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic trade. The municipal area is 24,202 acres (which includes 2,833 acres in the bed of the river Mersey) (about 23 square miles, excluding the bed of the river), with a population at the consus of rors of 746,421 (estimated at 781,948 in 1980). The total net register tonnage of vessels on which dues were paid during 1919 was 13,676,731 tons, while the value of the seaborne trade of the port was stated at £686,943,966 for 1918, and £835,849,867 for 1919. The drocks, on both sides \$33,849,867 for rgs. The docks, on both sides of the river, have a linear quayage of about 3 miles, and the Gladstone dock will accommodate the largest vessels affect. The dock authority is the Mersey Dock and Harbour Board. The chief import is cotton, those next in importance being grain, provisions, sugar, fruit, oil, timber and tobacco.

The principal buildings are St. George's Hail erected 1838-1854, from the designs of Harvey Lonsdale Elmes, at a cost of £300,000, and regarded as the finest modern example of classical architecture; the Town Hall, erected 1754 from the designs of Wood; the Cathedral in course of erection from the designs of Bodley and Gilbert Scott), which will be the largest ecclesissical building in England; the Walker Fine Art Gallery; the University; the Royal Infranary; the Municipal Offices; and the Custom House.

Liverpool was incorporated as a borough early in the 13th century and was created a city in 1880. The Corporation consists of a Lord Mayor and a City Council which comprises 37 Aldermen and zze Councillors. The City returns zz mem-bers to Parliament. The name is believed to be derived from Norse words meaning the "Pool" of the Slopes.

Principal City Officers.

Lord Mayor (1920-1921). Rt. Hot. E. Eussell-Taylor. Recorder, Edward G. Hemmerde, K.C. (1909).

Recorder, Edward G. Hemmerde, K.C. (1909).

Feddid Office of Realth, E.W. Hope, c.R.E. (2012).

MANCHESTER.

White the country of the country of the world's cotton trace, is also miles, it, we follow the country of the c in zge

Manchester is the distributing centre of the cotton spinning and weaving of Lancashire for the whole world, and of butter and foodstuffs the whole world, and of butter and foodstuffs for the most densely populated part of England. It also contains large engineering and machinery works and factories of hats, clothing, indiarubber goods, chemicals, etc. The city is connected with the Mersey by the Manchester Ship Candi (opened in 1894), which has a total length of 32½ miles, a depth of 35 feet, and a minimum width at the bottom of 120 feet. The value of the seaborne trade of the port is stated at £107,083,725 for 1218, and at £146.890,745 for 1219, the net tonnage of ships entered and cleared in 1277 being about 2,000,000 tous.

The principal buildings are the Town Hall, erected in 1277 from the designs of Alfred

erected in 1877 from the designs of Alfred Waterhouse, R.A.; the Royal Exchange (1869); the Free Trade Hall, erected from the designs the Free Trade Hall, erected from the designs of Watters, in 286, on the site of the "Peterloo Massacres" (Aug. 16, 2829) in St. Peter's Fields; the Art Gallery; the Whitworth Institute; the ryth century Chetham Library; the Rylands Library (1899), which includes the Althorp collection; the University (Owens College); and the 18th century Cathedral (formerly the parish church). Manchester is one of the principal centres of political, literary and scientific advancement, and the Galety Theatre (Miss Horniman) and the Hallé Concerts have miscal Horniman) and the Halle Concerts have placed the city in the forefront of dramatic and musical development. The Manchester Guardian newspaper exercises a widespread influence throughout the English-speaking world.

The town received a charter of incorporation

in 1838 and was created a city in 1853. Lord Mayor presides over a Corporation of 35 Alderman and reg Councillors. Manchester returns 10 members to Parliament. The Celtic

name of the city was Mancunium.

## Principal City Officers.

Lord Mayor (reso-rest), Rt. Hon. William Kay. Recorder, Arthur Jacob Ashton, K.C. (1914). Stipendiary Magietrate, Edgar Brierley (1902). Town Glerk, Thomas Hudson (1920). Clerk of the Peace, Francis Ogden (1890).

#### BIRMINGHAM.

BIRMINGHAM (Warwickshire), the chief centre of the hardware trade of the world, is 213 miles N.W. of London. The municipal area is 43,600 acres (about 68 square miles), with a population at the census of sour of \$40,000 (estimated at

900,ece in 1920).
The chief industries are brass working, jewellery and precious metals, iron, machinery, small arms and ammunition, railway rolling stock, glass making, electro plating, cycles and chemicals.

The principal buildings are the Town Hall

The principal buildings are the Town Hall, built in 1833-1850 on the lines of the Temple of Jupiter Stator at Rome, with a large hall (where the triemnal musical feetival is held); the centre of the heavy steel and milest indee, is council House and Corporation Art Gallery and shinted in the extreme south. Tortamin Museum (1878); the University (Aston Webb,

SAINTO MAILS See the Western Mibrary; the 13th century content of the Council of St. Martin Ordenit 1893); the Council of St. Martin Ordenit 1893); the Council of St. Martin Ordenit 1893); the Council of St. Martin Ordenit 1893; the Accident of St. Martin Ordenit 1893; and was created as a borough in 1893, and was created as a borough in 1893, and was created as clay, it is governed by a Lord Mayor and City of Council of 30 Aldernier and 30 Council of 30 Aldern origin of the name is obscure, as Bromwycham, "the home on the bill by the heath," is disputed.
The city was a Saxon town, and William sie
Bermingham was Lord of the Manor in the early part of the rath century.

Principal City Officers.

Lord Mayor (1920-21), Rt. Hon. W. A. Cadhury, Recorder, Sir Ryland Dent Adkins, E. O., M. P. (1920). Stipendiary Magistrate, The Bt. Hon. Lord

Ilkeston (1910). Town Clerk, F. H. C. Wiltshire (1913). Clerk of the Peace, Joseph James (1905). Coroner, Issac Bradley (1897).

#### LEEDS.

LEEDS (Yorkshire, West Riding) is favourably situated in the coal and iron districts of England, x85 miles N.N.W. of London, and is the centre of the woollen industry. The city has also the largest share of the leather trade of the United Kingdom, in addition to large flax, canvas and rope works, and factories of thread, linen, glass and earthenware, with metal casting, machinery and machine tools, steam engines, and other engineering works. Leeds is connected with the Mersey in the west by the Leeds and Liverpool Canal, with the Humber in the east by the Aire and Calder Navigation, and is an important railway centre.

The municipal area is a8,000 acres (nearly 44 square miles), the population at the census of rorr being 445,350 (estimated at 480,350 in 2020). The principal buildings are the Town Hali

(1852), the Royal Exchange (1872), the Philosophical Hall, the Art Gallery, the University and the Leeds Institute of Science, Art and Literature (1865). The Parish Church (St. Peter's) was rebuilt in 1840; the 17th century St. John's Church has a fine interior with a famous Renaissance screen; the 17th century Mill Hill Chapel was rebuilt in 1849.

Leeds was made a county borough in 1888, and was created a city in 1893. The Lord Mayor presides over a corporation of 17 Aldermen and gr Councillors. The city returns 6 members to Parliament. The earliest forms of the name are Loids or Ledes, the origin of which is obscure.

#### Principal City Officers.

tary borough in 1832, a county borough in 1838, and a city in 1907. The Corporation consists of and a city in 1907. The Corporation consists of a Lord Mayor, at Aldermen and 63 Councillors. Bradford returns 4 members to Parliament.

#### Principal City Officers.

Lord Mayor (1920-1921), Rt. Hn. Lt. Col. A. Gadie. Recorder, Thomas Rowland Drake Wright (1905 Stipendiary Magistrate, Beaumont Morice (1914). Town Clerk, N. L. Fleming (1910).

#### KINGSTON-UPON-HULL.

HULL (officially "Kingston-upon-Hull") is situated in the East Riding of Yorkshire, at the junction of the Hull with the Humber, as miles from the North Sea and 181 miles N. of London. The municipal area is 9,359 acres (about 13 square miles), with a population of 278,024 at the census

of rorr (estimated at 201,327 in 1920).

Hull is the principal seaport for shipping the manufactures of Yorkshire and Lancashire to Northern Europe, and among its principal imports are grain from Russia and America and timber from Scandinavia, in addition to iron, fish, butter (from Denmark and Siberia), and fruit. The net tonnage of the shipping entered and cleared in zors was upwards of 3,000,000 tons, the value of the seaborne trade of the port being stated as £90,308,722 for zor8 and as

being stated as £50,305,782 for reas and as £145,023,215 for resp.

The chief buildings, in addition to the Docks, are the Parish Church (Holy Trinity), 272 feet in length (the largest parish church in England), the Guildhall (1925), Exchange (1866), Chamber of Commerce, Court Exchange (1866), Chamber of Commerce, Court Exchange (1864), Chamber of Commerce, Court Exchange (1864), Wilberforce's House and Trinity House (1864), Wilberforce's House and Trinity House trent are at 1 color of France int. the vistance

The name of Wyske-spon-Half was changed to Kingston-spea-Hall by Edward I. in the 19th contain. The town was inedeporated in 1956 and made a county horough in 1888. The Corporation consists of a Lord Mayor, 25 Aldermen and 48 Councillors. Hull returns 4 members to Parliament.

Principal City Officers.

High Steward, Rt. Hon. T. R. Ferens, P.C. Hung geroors, Rt. Redi. 1. R. Ferons, Fig. Lord Mayor (agas-st.), Rt. Hon. T. B. Atkinson. Recorder, Henry Thomas Kemp, R.C. (1927). Sherif, John William Locking. Town Clork, H. A. Learoyd, M.A. Coroner, Col. Alfred Thorney.

#### NEWCASTLE-UPON-TYNE.

NEWGASTLE-UPON-TYNE (Northumberland), on the north bank of the Tyne estuary, 8 miles from the North Sea and are miles N. of London, has an area of 8,4gs acres (13 square miles) and a population of 278,107 at the census of 1911

(estimated at 300,000 in 1980).

The city is conveniently placed on the estuary, in the neighbourhood of the Northumberland and Durham coalfields. Its exports include coal, chemicals, pig iron, iron and steel manufactures and machinery; the chief imports being wheat and grain, fruits, fron, fron ore and steel, petroleum, sulphur ore, timber and wood, and potatoes. The net toniage of ships entered in 1919 was 3,913,23s tous, and of those cleared was 5,043,375 tons. The chief industries are shipbuilding, metal works and machinery, chemicals, glass, brick, tile and earthenware,

and rope making.

The principal buildings are the (xth century) in New Castle, of which the walls, keep and chapel are well preserved, the Cathedral (St. Nicholas), St. Andrew's Church (xth century), St. Captre Learners NICTO 188), St. ABGIEWS CHUICH (XIM COMMENT), St. John's (ath century), St. George Jesmond, the Roman Catholic Cathedral of Hexham and Newcastle, the Corporation Buildings, Guildhall (1958), Moot Hall (1870), Exchange (1866), Central Newsroom and Art Gallery (1838), Wood Memorial Hall (1870) and the Custom House. The city is connected with the south bank of the Tyne hy four bridges, of which the old High Level Bridge (1840) was designed by Robert Stephenson and carries the railway and roadway; the new High Level Bridge (1906) carries the railway only.

The pre-Norman borough of Monkohester was re-named Newcastle in the 11th century when the castle was erected as a defence against the Soots. In zeo it was made a county borough, and in zeo was made a county borough and in zeo was made a county borough and in zeo was includes a Lord-Mayor (1906), 19 Aldermen and 37 Councillors. Newcastle-upon-Tyne returns 4 members to Parliament.

Principal City Officers.

Lord Mayor (1920-1921), Rt. Hon. Thomas William Rowe

Recorder, Liewellyn Arthur Atherley Jones, K.C., M.P. (1906). Sherif, Ruthony Oates. Town Clerk and Clerk of the Peace, Arthur Maule Oliver (1907).

H.N.W. of Loudon. The manfeight kren la and the state of t

the Atlantic by canals and is an important rall-way centre. The principal industries are cotton, silk and merino hoslery, lace, bleaching, dyeleg and spinning, tanning, engineering and cycle works, brewing, and the manufacture of tobacco,

The chief buildings are the rath contary Nottingham Castle (restored in 1878, and now the City Museum and Gallery of Art), St. Mary's, St. Peter's, and St. Nicholas's Charones, the Roman Catholic Cathedral (Pugin, 1844-4), the Guildhall and Sessions Court (1857), Shirre Hall, Albert Hall, Exchange, University College, Hospital and Eye Infirmary.

Successfulam or Notingeham (the "town of the Caves") possesses a Charter of Henry II., and was created a city in 1897. The Coponation comprises a Mayor, 16 Aldermen and 48 Count cillors. The city returns 4 members to Parliament.

Principal City Officers.

Mayor (1920-1921), Herbert Bowles. Recorder (vacant, 1920). Sheriff, John Henry Freckingham. Town Clerk and Clerk of the Peace, William John Board (1908).

City Coroner, Charles Lambert Rothera.

#### THE COUNTY PALATINE OF DURHAM.

THE COUNTY PALATINE OF DURHAM.

It is uncertain when "Palatine" privileges were first exercised in the County of Durham, as no formal creation of the Palatinate by charter or deed appears to have ever been sade. From the founding of the See of Lindistarne, out of which the bishopric and palatinate of Burham arose, the Bishops received large grants of lands, with extensive immunities; and Guthred, king of Northumbria, and Affred the Great appear to have confirmed the grant to the See of the whole of the land between the rivers Tyne and Wear. There inno evidence of the exercise of palatine privileges by the Bishops prior to the Norman Conquest, but it is probable that these were acquired in the reign of the Conqueror, sant they were exercised by the Freistes until resumed by She Crown in sigd. Falatine counties are andestood to have been erected for the defence of neighbouring single-doma against the Welsh and Scots, and were in reality self-contiased kingdoms in alliacance with their creatior. The sancient customs of the County Falatine of Burham are in some measure retained, the administrative architecture.

## THE PRINCIPALITY OF WALES.

PHYSICAL GEOGRAPHY.

Position and Extent. - The Principality of Wales occupies the extreme west of the central southern portion of the island of Great Britain, southern portion of the island of Great Estain, with a total area of 7,465 sq. miles, and a population (1212) of 1,774.5c. It is bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheskire, Salop, Hereford and Monmouth, and on the W. by St. George's Channel. The greatest length from N. to S. (Point of Air to Barry Island) is 136 miles, and the greatest breath from W. to E. (St. David's Head to the English border) is E. (St. David's Head to the English border) is ge miles.

Separated from the mainland of Wales by the Menai Straits is the Welch island-county of Anglesey or Mon (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826, and by the tubular railway bridge (1,100 ft. long) of the L. & N. W. Railway, built by Stephenson in 1850. Holyhead harbour, on holy 1810 (N.W. of Anglesey), provides accommodation for a fast steam packet service to Kingstown and

a fast steam packet service to kingstown and Dublin (70 miles).

Relief.—Wales is generally mountainous, the chief systems being those of North Wales (Snowdon 3,872 ft., Carnedd Llywelyn 3,484 ft., Carnedd Dafydd 3,426 ft.); Berwyn (Aran-fawddy 3,970 ft.); Powys (Plinlimmon 3,463 ft., Drygan Fawr 3,123 ft., Radnor 3,753 ft.); and the Black Mountain, Brecknock Beacons and Black Forest Carnethes Veneze (France Beacons and Black Forest Carnethes Veneze (France Beacons ranges (Carmarthen Van 2,632 ft., Brecon Beacon 2,86s ft., Pen-y-gaver fawr 2,660 ft.).

Hydrography.—The principal river of those rising in Wales is the Severn (see England), which flows from the slopes of Plinlimmon to the English border, dividing Montgomeryshire on its The Wye (130 miles) also rises in the slopes of Plinlimmon, and flows between Radnor and Brecon on its course to England. The Usk (56 miles) flows into the Bristol Channel, through Monmouthshire. The Dee (70 miles) rises in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Ponteysyllte branch of the Shropshire carries the Fontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the Dee is the navigable portion, z4 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The Towy (68 miles), Teif (50 miles), Taf (40 miles), Dovey (50 miles), Taf (50 miles), and Conway (54 miles), the last named broad and navigable, are wholly Welch rivers.

The largest natural lake in Wales is Balo (Llyn Tardd) in Marconsthables a miles long and shout

Tegid) in Merionethshire, 4 miles long and about r mile wide; Lake Vyrsay is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Elan and

Claerwen valleys.

#### EARLY HISTORY.

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the Goidels (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic Brythens followed in the ensuing Iron Age. The Reman conquest of South Britain and Wales was for some time successfully opposed by Carados (Caratácus), King of the Silures, a tribe inhabiting the present bouncies of Glamorgan, Brecon, Badnor and Monmonth. In A.B. 76 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Uak and Cage, went, and from Chester to Conway (and thence to Carmarthen and Neath). Christianity was intro duced (during the Roman occupation) in the 4th century, and the faith thus established was preserved (after the willidrawal of the Roman garrison) by native effort, and was carried to the northernmost corners of the British Liles by missionaries to the Hebrides and to the Orkneys and Shetlands.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Caltie Goidels and Brythons into the mountain factnesses of Wales, and into Stratholyde (Cumber-land and S.W. Scotland) and Cornwall, giving them the name of Wasies, or Welch (-Worsign). The West Saxons' victory of Deorham (577) isolated the Wasies of Wales from those of Cornwall, while the battle of Chester (612) similarly cut off communication with the Wasies of Strathclyde. In the 5th century the boundaries of the Welch were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dyke). In the eth century Rhodri Mawr united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of Gwynedd (N.), Powys (Mid.) and Dehenbarth (A.) were divided among his three sons—Angrawd, Mervyn and Cadell—the son of the last-named being nowel Dda, who codified the laws of the country, while Lewelyn ap Seissyllt (husband of the heiress of Gwynedd) again united the provinces and reigned as Prince from 2025-202

The Norman Conquest.—After the Norman conquest of England William L. created Palatine conquest of England William L created Falstine counties along the Welch frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and erected fortresses from the Wys to Milford Haven. Henry I. Introduced Flemish settlers into South Wales, but after his death the Welch rose under the header. after his death the Welch rose under the leadership of Grifith ap Rhys and routed the Norman-Flemish forces at the fords of the Teifi (Cardigan) in 1256. From the early years of the 13th century the house Gwynedd, in the north, gained an ascendency over the whole of Wales, and Llewelyn ap Iorwerth was in constant stri'e and Liewelyn ap lorwerts was in constant serve with England for recognition as an independent sovereign; but Liewelyn, the son of lorwerth, was killed in rade during hostilities between the Welch and English, and his brother David, was captured and executed by the English in sets, On Feb. 7, 1301, Edward of Carnarvon, son of Edward I., was created Prince of Wales, a title thenceforward borne by the heir apparent to the throne of England.

The Welch are a distinct nationality, with a language and literature of their own, and the national bardie feetival (Elséeddfod), institutes by Prince Rhys ap Oriffith in 1205, is winnight maintained. These Stateddfodfors (seasting) They part of the Genedic (assembly), which is believed to dute Pron the time of Prividing, a riting artistic in an age many contaries before the Christian in an age many contaries before the Christian en

#### CARDIFF.

CARDIFF (Glamorgan) at the mouth of the river Taff (Caer Taff), the port of the South Wales coal fields, has a municipal area of 8,095 acres, and a population at the census of xpx of x8s,28c (estimated at xe4,436 in x9sc). The net tonnage of ships entered at the port in xpx was 5,599,000 tons, and of those cleared 6,163,000 tons, the value of the seaborne trade being £30,081,000 in xpx8. The prosperity of the city is largely due to the opening of the Docks in x839, and to their continuous development since that date. The chief exports are coal, coke, patent fuel, iron, and iron and steel manufactures, and there is a large ship repairing industry.

The principal buildings are Cardiff Castle, built in the rith entury, the National Museum of Wales, Public Library, the University College of South Wales and Monmouthahire, the Registry of the University of Wales, Technical College, City Hall and Law Courts, and Glamorgan County Hall. The city returns 3 members to Parliament.

City Officer.

Lord Mayor (1220-21) Rt. Hon. James Taylor.

Stipendiary Magistrate. Sir T. W. Lewis.

Becordes, W. Hemelyn-Williams, R.O.

Town Clerk & Clerk of the Peac. Cooli G. Brown.

#### SWANSEA.

SWANSEA (Glamorgan), at the mouth of the River Tawe, is the chief centre of the copper, timplate and spelter industry of the United Kingdom, and contains the largest tube works in the country. The trade of the port also includes coal and patent fuel; the net tonnage of ships entered in zong being 2,253,750 tons, and of those cleared 2,253,605 tons. The municipal area is 24,193 acres, with a population at the census of zor of 124,673 (estimated at 159,000 in 1920).

The principal buildings are the Norman castle (re-built in 2320), the Royal Institution of South Wales, founded in 1823 (containing Museum and Library), and the 17th century Grammar School, founded by Hugh Gore. Swanses was chartered by King John, and incorporated as a borough by Henry III. The borough returns a members to Parliament.

City Officers.

Mayor (spin-nz), Percy Mulymoux.

Recorder, Sir E. Mariar Samson, E. E. H. B. Treen Clork, H. Lang-Coath.

## THE KINGDOM OF SCOTLAND.

Position and Extent.—The Kingdom of Scot-land eccupies the northern portion of the main island of Great Britain and includes the Inner and Outer-Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between 60° gs' go" and gs' go" N. latitude and between 1° gs' go" and 6° xs' W. longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest lengths of the mainland (Cape Wrath to the Mull of Calloway) is sys miles, and the greatest breadth (Buchan Nees to Applecross) is 154 miles. The total area of the Kingdom is 21,520 square miles (land and water), with a population (at the

course of spri) of 4,765,904.
Relief.—There are three natural orographic divisions of Scotland. The Southern Uplands have their highest points in Merrick (s.,764 feet), Riums of Keilis (s.,668 feet), and Cairnsmuir of Carsphairn (s.,552 feet), in Keirkeudbright; Hartfell (s.,652 feet) in Dunfries; and Whitecoomb (s.,652 feet), in Peebles. The Central Lovalands include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal scaport. The heather-elad Northern Highlands extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the Great Glen; they contain, in the central Grampian Hills, Ben Nevis (4,406 feet), the highest point in the British laies, and Ben Muich Dhui (4,556 feet). The Chevich Hills form a natural bemadary between Scotland and England, their highest point being Chevict Hill (s,566 feet).

histest point being Cheviot Hill (a,676 feet).

Hydrography.—The principal river of Scotland is the Clyds (res miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland. The Clyds is formed by the junction of Daer and Portrail water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque Falls of Clyde, the largest falls in the British Isles, Bonnington Linu (30 feet), Corra Linu (84 feet), Damdaff Linu (85 feet), orra Linu (84 feet), all cocurring within a stretch of a miles, above and below Lanark. The Tweed (36 miles) forms a boundary between Scotland and England at Berwick, and has important woollen industries ("Tweeds") in its valley. The Tay, noted for its salmon, and the longest river in Scotland (27 miles), flows into the Rorth Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the Tay Bridge (a miles), a noted salmon river, flows through severy of unequalied

\*\* Least's Rad to John o' Groats.— The customary measurement of the Island of Groat Rritain is from the site of John o' Groat's house, near Buncanity Head, Caithness (at the N.E. exteenity of the island) to Lanft's Rad, Gernwall (at the S.W. extremity), a total distance of spr indice is a straight line and (approximately) see by road. But the site of the house of Jehn do Groot (with its # deors and extagonal table, to solve the question of preoadence between John and his y brethers) is about a spile 4.W. of Demanately Head, while Dunnet Head (sing in Caithness) ground further S. Rinn Duncanshy. John de Groot is Polisyed to have globalined permission to soit is in Gelikhness (Four the Heathness).

beauty to the North Sea at Aberdeen. The Spey (ree miles), the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The Forth 65 miles), navigable to Surling, is spanned by the Forth Bridge, constructed 1852 at a cost of £3.000,000, with a length of \$3.000,000, with a length of \$3.000 to the principal hydrographic feature of the Kingdom, both on the mainland and in many of the Islands. The largest in the Kingdom and in Clear British is Lock Lorenzal.

The locks are the principal hydrographie feature of the Kingdom, both on the mainland and it many of the Islands. The largest in the Kingdom and in Great Britain is Lock Lomond (a4 miles long), with Locks Awe, Tay, Ransoch and Ericht in the Grampian valleys; Lock Ness (a4 miles long and 800 feet deep), with Locks Shin (so miles) and Marce in the northern Highlands.

Orkney.—About 6 miles N. of the Caithness coast, separated from the mainland by the Pentland Firth, is the island county of Orkney, a group of go islands and islets ("holms" and "akerries"), of which one-third are inhabited. The total area of the group is 373% square miles, with a population (1921) of as, \$66. Kirkwall, in Pomona (or mainland), the largest sland of the group, is the capital of the county. Many of the Orkney (and Shetland) Islands contain brooks (Pictish towers) and other Pictish and Scandinavian remains. Scapa Flow, between Pomona and Hoy, was the war station of the Grand Fleet from 1914—9 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1929).

Shetland.—About so miles N. of Orkney (with the detached Fair Isle at sg miles N.) is the island county of Shetland, a group of about soo islands and islets, of which sg are inhabited. The total area of the group is sgs square miles, with a population (xgrz) of 27,922. Lerwick, in Mainland (the largest and principal island), is the capital of the county. Fair File, the southernmost of the group, is famous for hand-knitted hosiery, and Unst for the finest of the Shetland woollen work, for which the county is famous. Muchle Frugga, about z mile N. of Unst, is the most northerly of the group and of the British Isles (60° 51' 30" N. lat.). Western Islands.—Off the W. coast, at varying distances, and extending from Sutherland to

Western Islands. Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over goo islands and islets, of which ros are inhabited. The total area of these Western Islands is a,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. The Inner Hebrides include the island of Skye (643 square miles—capital, Portree, famous as the refuge of Prince Charlie after his defeat at Cullöden, Invernessahire, in 1946, which contains the Cullities (Sgurran-Basschdich, 3,43 feet), Ital Hille (Ben Caillich, 2,403 feet), and many other picturesque mountains; Mull (367 square miles),

<sup>•</sup> The Habridas.—Until the closing years of the right century. "The Habridse" included other Scottish islands in the Firth of Civile, the peninguia of Kintyre (Arryllahre), the Isle of Man, and the Griski late of Arryllahre, the erigin of the mains is stated to be the Greek Eboudes, lettingue as Hoberte by Pikry, and corrupted to its present form. The Norvegien masses Sudrayer (Southern Islands) who late includes a masse that unriver in the Angelone Mahoprio of Southern Islands who Angelone Mahoprio of Southern Angelone in the Company of the

containing Ben More (5,782 500), Ben (a,834 feet), Jurd (a,834 feet), and Ben Creach (a,834 feet), Jurd (rice square miles), with a chain of hills colminating in the Bape of Jura, Beinnean-Oir (a,834 feet), and Beim Chaplais (a,437 feet); Isby (a33 square miles), and many smaller islands. The Outer Hebrides, separated from the mainland by the Minch, include Lewis-with-Harris (770 square miles), celebrated for its homespun "Tweeds," North Uist, South Uist, Barra and other islands. Thirteen miles W. of Sternoway (the largest town of Lewis and of the Hebrides) are the "Drudicial" remains of Callernish, a well-preserved series of monolithic circles, cruciform in general arrangement, but generally regarded as a heathen monument of the remote Stone Age.

as a neather mountains to discretize Stotic against a metalement of Scottand is influenced by the much indented coast line and (like that of South Britain) by the Gulf Stream Dr.ft, which emerges from the Gulf of Mexico as a strong current about 30 miles in width, with a speed of about 4 miles per hour; the stream gradually loses its velocity and becomes shallower and cooler, until at about 35° N. lat, (off Cape Hatteras) it comes to be a distinct stream and its surface waters are carried across the Atlantic by the prevailing westerly winds. The climate is more bracing and less treacherous than that of England, the average duration of sunshine on the east coast being greater than on the east coast of England, while the south-western section is no wetter or more relaxing than the corresponding section of England. The mean winter temperature is in the neighbourhood of 35°, and that of summer about 35° Fahrenheit.

#### EARLY HISTORY.

Prehistoric Man.—North Britain appears to have been invaded in Palaeolithic times by a succession of races, who died out or were exterminated by other immigrants. The earliest race of which there is any record is that since known as the Piots, believed to be of non-Aryan origin, and stated to have been named Pioti by the Romans on oscount of the tribal habit of painting the body. The Picts seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. Picts' Houses are most frequent in the northern counties of Caithness and Butherland and in the Orkney Islands, and it is generally believed that the Picts were driven northwards by later Celtic immigrants. Celtic Goids's and Brythoms arrived from Belgic Gaul during the latter part of the Bronse Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the Roman Invasion of Britain.

The Roman Invasion .— In A.D. So Julius Agricola extended the Roman conquests in Britain by advancing intolCaledoma as far as the "Grampian" Hills, but after a victory at Movie Grampian" Hills, but after a victory at Movie Grampian "Hills, but after a victory at Movie recalled, ada no further advance was made for about 60 years, when the Roman frontier was carried to the intimus between the Forth and Clysic and marked by the Waff of Pies, towards which ran military reads from the Chevitor. The Roman motion of market from the Chevitor. The Roman compaction of Southern Utledonia was not so effective as that of South Britain, and before the charge of the mount centry the motiving front of Roman Britain fad iversity to motiving front of Roman Britain fad iversity the motiving of the mount of Roman Britain fad iversity the

The Scott During the later years of the Roman occupation discipation was continually harassed by Figtish tribes porth of the Wall, aided by Scots (the Gaelia tribe then dominant in Ireland). and when the garrison was withdrawn these Picts and Scots were the principal enemies of the Celtic Brythons, who are believed to lawye called in the Saxons to protect them from the invasions of their neighbours. A relie of the struggle between Pict and Brython is skill to be seen in the Catroil, or Picts' Work Dyke, of Roxburgh (from Torwoodle, near Galashiels, to Peel Fell in the Cheviots). Christianity was introduced into Southern Caledonia about 380 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the Ficts and Scots, the Brythonic Waelisc (Welch) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the Lothians. The Waeliso were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (613), and towards the close of the oth century the Scots under Kenneth Macalpins became the dominant power in Caledonia. In, the reign of Malcolm I. (943-954) the Brythons or Waelisc (Welch) of Strathclyde were brought into subjection, the lowland kingdom of the English (Lothian) being conquered by Malcolm II. (2005-2034). From the close of the 12th century until the middle of the 16th there were constant wars between Scotland and England, the outwars between Soliand and English, the outstanding figures in the struggle being Williams Wallace, who defeated the English at Stirling Bridge (1297), and Robert Bruce, who won the victory of Hannockburn (1334.) James IV. and many of his nobles fell at the disastrous battle of Plodden (1513), and in 1603 James VI., the Stuart King of Scotland and the heir to the Tudor line of England this mother, Mary "Queen of Scots was the great-granddaughter of Henry VII. was the great-grandual girler of Henry VIL), succeeded Queen Elizabeth on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII. and II., the crown devolved upon William III. (grandson of Charles I.), and Mary (daughter of James VII. and II.) and, their issue failing, upon Anne (second daughter of James VII. and II.). Anne's children dall yours and the and IL). Anne's children died young, and the throne devolved upon George I. (great-grand-son of James VI. and I.). In 1859 Graham of Claverhouse "roused the Highlands" on behalf of James VII. and II., but died after a military of James VII. and II., but died after a minurary success at Killiecrankle. In 1975, armed risings, led to the indecisive battle of Sherriffmuir, byt, the movement died down until 1945, when the "Young Pretender" defeated the Royalist twops under Sir John Cope at Preston Paus and advanced to Darby in England (1946). From Derby, the adherents of "James VIII. and III." (the tatle claimed for his father by the Young Pretender), fell back on the defensive, and the Laschiffs movement was finally crushed by the Jacobite movement was finally crushed by the Royalist troops under the Duke of Cumberland at Oulloden (April 16, 2746).

The Hebrides did not become part of the

The Hebridse did not become part of the Kingdom of Scothard until rate, when they wind coded to Alexander III, by Magnus of Bornagi. Orkney and Shetland fell to the Scotlan flower as a pledge-fer the unpaid viewey of Margaret of Penmark, wife of James III, in healt this Debish, americally being Journally apling buildings.

In Scotland the principal local court is the Sheriff Court. The Sheriff is the chief judge, but the judge who usually sits is the Sheriff Sutt the judge who usually sits is the Sheriff Sourt is both civil and criminal. In civil questions the jurisdiction is practically unlimited, winstever be the money value of the cause. On the oriminal side the Court has cognizance of all serious crime, but the power of punishment is limited to fine and imprisonment; it does not extend to penal servitude.

The Shoriff Clark is the Clerk of the Shoriff Court, and hirds of a Registrar in The Frequence

infini correspond nearly to those a the English Courts.

DE-Fiscal is peculiarly a Scotlish all prospections are in Spotland cal in the ! riff Court

The Address of the Secretary of the Sherif Sal Mate Association is County Buildings, Falkiri

## THE KINGDOM OF IRELAND.

Position and Extent.-Ireland lies in the Position and Ratent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scothand by the North Channel and from Wales by the Brish San and St. George's Channel. The land area of the island is paggs sq. miles and its geographical position between gs as and and go as N. Institude and from go sg' to zeo go' W. longitude. The greatest length of the island, from N.E. to Sw. (Torr Head to Mizon Head), is yea miles, and the greatest breadth, from K. to. W. (Dundrum Bay to Armach Head), is zeo miles.

Bay to Armagh Head), is 174 miles.

The population at the census of 1911 was 4,390,229, a decrease of 68,336 since the preceding census of 2922.

census of secs.

Retief.—The island is occupied for the greater part of its area by the Central Plain, with an elevation of so to 350 ft. above mean see level, with isolated mountain ranges near the coast line. The principal mountains, with their highest points, are the Sperrin Mountains (Sawel highest points, are the Sperrin Mountains (Sawel a.a.e ft.) of County Tyrone in the North; the Mountains of Mourne (Slieve Donard 2,796 ft.) of County Down, and the Wicklow Mountains (Lugmaquilla 3,099 ft.) in the North-East; the Derrycesof Mountains (Errigal 2,466 ft.) of County Donesal in the North-West; the Counter Donesal in the Wickley Donesal in the North-West; the Counter Donesal in the Wickley Donesal in the North-West; the Counter Donesal in the Wickley Do County Donegal in the North-West ; the Connemara Mountains (Twelve Pins s,605 ft.) of County Galway in the West; Macgillicuddy's County Gaiway in the west; magnitudays resist (Garantuchill 3,444 ft., the highest point in Ireland) in the South-West; and the Galtee Mountains (3,528 ft.) of County Tipperary, and the Knockneaddown (a,559 ft.) and Comeragh Mountains (a,479 ft.) of County Waterford in the

Hydrography.-The principal river of Ireland (and the longest in the British Isles) is the Shannon (age miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The Slancy flows into Wexford Har-bour, the Lifey to Dublin Bay, the Boyne to Drogheda, the Lee to Cork Harbour, the Blackrenter to Youghal Bay, and the Suir, Nore, and Barrow to Waterford Harbour.

As in Scotland, the principal hydrographic feature is the Loughs, of which Lough Neagh Teature is the Loughs, of which Lough Needs, (age square miles) in the north-east, is the largest in Ireland and the British Isles, others being the Shannon Chain of Allen, Boderg, Forbes, Ree, and Derg, and the Erne Chain of Gourns, Oughter, Louer Erne and Erne, in the central plain; Metvin, Gill, Gare, and Coun in the north; and Corrib and Mask (joined by a hidden channel) in the south. In County Kerry, to the east of Masgillicuddy's Reeks, are the Ismous Lakes of Edilarner.

Climate. - The climate of Ireland is more equable than that of Great Britain, and the rainfall is more evenly distributed. The varia-tion in mean temperature is only about 3° Fahren-heit, the summer extremes being 50° in the N. and de in the 8.

#### HISTORICAL SKETCH.

Principle Men.—Although little is known concerning the earliest inhabitants of Treland, there are many teness of neoffchig man throughout the laked, white the use of bronze implements appears to inve become known about the indiffer of the systremany s.c. In the litter Bronze Age

a Celtic race of Goides appear to have invaded the island, and in the early Iron Age Brythess from South Britain are believed to have effected settlements in the south-best, while Piets from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the Scoti, who eventually established themselves in the north of the neighbouring island.

Legendary History. — According to Irish legends, the island was settled by a Milesian race, who came from Scythia by way of Spain, and established the Kingdom of Tura, about see B.C. The supremacy of the Ardri (high king) soe B.C. The supremacy of the Artir (high king) of Tara was soknowledged by eight lesser kingdoms (Munster, Connaught, Aliech, Oriel, Ulidia, Meath, Leinster, and Ossory) ruled by descendants of the eight sons of Miled. The basait columns on the coast of Antrim, eight miles from Portrush, known as the 'dirat's Caussessy, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Artirm with Scotland (Staffe) connect Antrim with Scotland (Staffa).

Christianity.-Christianity appears to have been known to many of the people of Ireland before the 4th century A.D., although it did not become general until the advent of St. Patrick. St. Patrick was born in Britain shout 199, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of ss. In 439 he was consecrated Bishop at Autorre and landed in Wicklow to establish and organise the Christian religion throughout the island.

The Northmen.—The Roman conquest of Britain was not extended to Ireland and little is known of the history of the country until the invasions of Northmen (Norwegians and Danes) towards the close of the 8th century A.B. The Norwegians were distinguished as Findgaill (White Strangers) and the Danes as Dubgaill (Black Strangers), names which survive in "Fin-gall," "MacDougall" and MacDowell," while the name of the island itself is held to be derived from the Scandinavian Ira-land (Land of the Irish), the Provinces of Ulster, Leinster and Munster being survivals of the Norse Ulaidstadr, Laugin-stadr and Munan-stadr. The out-standing events in the encounters with the Northmen are the Battle of Tara (980), at which the Hy Neill king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Amiath Cuaran; and the Battle of Clontarf (2024) by which the Scandinavian power was completely broken. After Clontarf

power was completely bloken. After Clontary the supreme power was disputed by the O'Brians of Munster, the O'Neilis of Ulster, and the O'Connors of Connaught, with varying fortunes. The Anglo-Norman Invasion.—In 1112 Dermod MacMurrough (Diarmait MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Enady o'Connor (the angle, in his struggle with Enady o'Connor (the angle, in, high king, of Ireland), and visited Henry II., the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his England and Dermod sallined the services of Eschard de Clark, the Royman Earl of Reinbroke, afterwards happy as Strong-tone. Strong-tone in the service of the service of Machaded at Waterfield (Aug. 32, 1729) with see England and in the Propagators.

settled, after marriage with Decision's daughter.
In 1772 (Oct. 16) Mehry 72, historif Bindell in Ireland, with a force larger than Stronghow's, and obtained housage from the Irela kings, but anglo-Norman rule underwest many finetuations in the secasoding centuries, being confined in the early 19th century within the Bagishi "Pale" of see aquare miles. In the reign of Benry VII. English rule was greatly extended, and the administration of Irela affairs was angicious by Rahart Poussian. Lord Denuty of Ireland, who Robert Poyntag, Lord Deputy of Ireland, who summoned the Partiament of Dropheda (Dec. 1444), at which were enacted the Statutes of Dropheda, afterwards known as Poyntag's Law, making the legislature of Iroland subordinate to and dependent on that of England. A later parliament conferred on Henry VIII, the title of king of Ireland, and in Elizabeth's reign the conquest of the island was completed. In the time of James I. an apparently trivial incident, the introduction of the potato (réss), profoundly influenced the future of the nation, as it required little labour to cultivate, and "Raleighs fatal gift" soon became so much the main food of gitt" soon recome so much the main rood or the Irish that a potato famine caused simest universal starvation. In the same reign also many of the leading families of the north-eastern counties fied the country after participation in an abortive rebellion, and their lands were distilluted amount. Employed and distributed amongst English and Scottish colonists, adherents of the Reformed Church, the number of Protestant settlers constantly increasing in succeeding years in spite of racial and religious estrangements with the Roman Catholic Colta Cromwell's campaign in Ireland (1649-1650) was carried on with ruthless cruelty and universal military success, terminating in the subjugation of the kingdom and the legisla-tive union with England, but further estrange ment was caused between the Roman Catholics and the Protestant Colonists. At the Revolution of sees the Protestants adhered to the cause of William and Mary, and William III. defeated the Roman Catholic adherents of James II at in 1920.

the Bettle of the Bojne (July 1, 1890) and at the Buttle of Rugherian (July 18, 1891). The Jacobite risings of 1715 and 1715 to 1715 are no adherents in Ireland, but various insurrectious took piace ireiand, but various insurrections sook punce in the sith century, calminating in the re-bellion of 1785, after the suppression of which the Act of Union (Jan. 1, 1802) combined the Irish and British hepsislatures. Catholic Emanci-pation was enacted by the Parissmant of the United Kingdom in 1809, and extensive relief works were carried out to mitigate the severities of famine from sagrasay. In stag the popula-tion reached its highest point (8, agg, e5:) of whom the vast majority were dependent for food on

the success of the potato crop.

Home Rule.—The demand for a separate Parliament for Ireland was first advanced at Westminster by an Irish party under the leadership of Isaac Butt (born 1813, died 1879), who was succeeded by Charles Stewart Purnell (born 1846, died 1891) by whose efforts the necessity of granting a measure of Home Rule to Ireland was impressed upon one of the great political parties of Great Britain. After many failures to pass a Bill through both Houses of Parliament a Home Rule Bill was eventually placed on the Statute Book in 1914, with a suspensory clause for the duration of the War. In the later states of the War, however, the extreme party of Irish politicians developed their organization under the name of Sinn Fem ("Ourselves Alone") and demanded complete severance from Great Britain and the recognition of an Irish Republic. Various efforts have been made by the Cabinet to arrive at a solution of the Irish problem, which is complicated by the separatist demands of the extremists (who are in open rebellion against the Government), and the desire of the Protestants of Ulster to remain united with Great Britain, with the additional problem of the minorities of Protestants in the Southern counties. Home Rule Bill, in lien of that placed on the Statute Book in 1914, was before Parliament

#### THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat.  $g_4^\circ$  3  $-g_4^\circ$  28' N. and long.  $4^\circ$  28'  $-4^\circ$  47' W., nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 acres (257 84. miles), with a population (1515) of 55,016. The cultivated area (1550) was 88,831 acres, and the live stock in-(1980) was \$8,821 acres, and the live scale cluded 6,334 horses, st.710 cattle, 72,950 sheep, and 2,338 pigs. In the ninth century a body of the Norway emigrated to the malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 370 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western isles, and Man. For three centuries the Norwegian rule remained intact, but when, in 1863, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle to the English throne, Henry IV. seized on the laise of Man, and in zec's bestowed it on the Stanley family. In stay the Crown purchased it for the sum of £47,244. The land is rich in minerals, lead, fron, blende and sinte, and exports large quantities of agricultural produce. Fifty miles of railway have been constructed, and shout ag utiles of electric tram read.

Wan is accepted by a secretar Legislature.

Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. Unless signed by the legal quorum of each House a Bill is not sent for the Royal Assent, the quorum of the Upper House or Council being the Governor and two Members, and of the Lower House or Keys thirteen Members, the majority of the whole number (as). After receiving the Royal Assent, it does not become law until promulgated in the English and Manx languages on the Truwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys.

CAPITAL, Douglas. Pop. (1921), sr, 192 (Castletown is the aucient capital); the other towns are Peel and Ramsey.

Fry, K.C.V.O., C.B. (with house) ............ £2,200 Government Secretary & Treasurer, B. E.

jead, gron, bleade and sizte, and exports large grountities of agricultural produce. Fifty miles of railway have been constructed, and about as miles of electric trans read.

Man is governed by a separate Legislature, called the Tyawald, consisting of two branches of Rower-General, (vacant) and Council and the House of Spisker, House of Eq., G.T. (vacant).

## THE CHANNEL ISLANDS

situated off the north-west coast of Franca (at distances of from ten to thirty miles) are the only portions of the Bukedom of Normandy now belonging to England, to which they have been attached ever since the Congasst. They consist of Jerney (as, yer acres), Guerney (12, 63, acres), and the following dependencies of Guerney— Alforrey (ast agres). Busedom (2), Grest Bark Alderney (1,96s acres), Brechou (74), Great Sark (2,936), Little Sark (299), Herm (320), Jethou (44), and Lithou (36), a total of 47,683 acres, or 72,4

square miles.

The climate is mild, and the soil exceptionally productive. The land under cultivation in rest was 49,578 vergion (a 1/4 vergion = 1 acre), the principal product of the soil of Jersey being potatoes, cipal product of the soil of Jersey being potators, tomators, and wheat, and of Guerney green crops and cotts, fruits and tomators. The famous Jersey and Guerney breeds of cows have carned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the States, and of the Enyal Court, and is still spoken by the people, but English is now permisable in the Legislative Assembly. The Balliff, appointed by the Crown, breatdes over the States and over the Boyal Court medical court the Royal Court presides over the States and over the Royal Court or judicial body. The islands being all but exempt from imperial taxation they possess a very large trade. The chief town of a very large trade. The chief town of Jersey is St. Heller, on the south side, where there is excellent sea bathing: the principal town of Guernsey is St. Pierre Port, on the east coast.

. . . . JEERRY. Revenue, 1919-20, £123,703; Expenditure £ 226,605 -46

# THE CORPORATION OF THE CITY OF LONDON.

LONDON, was famed for its wast conflux of traders and its abundant commerce even in the ant century of the Christian era. From the Romans it is said it received municipal institutions, which have endured in their main features to the present day. In Sexon times it was in reality a small independent State, and its burgesses maintained their independence even after the Entile of Hastings. William the Norman only gained possession of their city by means of a treaty with them, and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (i.e., possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in rigs, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for as years. On his death a new charter was granted by King John in 1284, which directed the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times, A.D. 1307, 1308, 1406, 1410); and many modern cases have occurred The title of Lord Mayor is said to have been first bestowed in 2354 by Edward III. The Lord Mayor is elected at Michaelmas; he is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant, conducted with some degree of civic state, being popularly known as the Lord Mayor's Show.

Aldermen were first appointed by a charger of Henry III, in mea, and were elected annually between 1278 and 1206, when a charter of between 1379 and 1366, when a charter of Richard II. directed them to be chosen for life. The Common Council was at an early date substituted for a pupular assembly called the Folkmote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 26 members, and none less than four. Sherifa (as well as aldermen) were Saxon officers, who usually had charge of a large district. The time of their appointment for London is uncertain, but they appear in ancient records as early as A.D. 1130. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but King John gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888, but they continue as heretofore to choose the Sheriffs of the City of They are appointed on Midsummer London. Day, and enter on office at Michaelmas.

Officers.—The Recorder was first appointed in

Officers.—The Recorder was first appointed in ragh. The Chamberlain is an ancient officer. There were at one time two Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhail. The former appears to have fallen into abeyance circ. 2325. The first contemporary record of the office of City Chamberlain is 225. The Town Clerk (called Common Clerk) and Common Serjeant (now appointed by the Crown) are mentioned as officers in the charter of Relward II., A.D. 2329, but the offices can be traced to a much earlier date

than this.

# THE CITY GUILDS (LEVERY: SOMPANIES).

As will be seen from the following table, many positives. Upholders (apholderers), and Wintmore of the London Guilds, or Livery Companies, are (wine sellow) retaining the ancient name of the possessed of great wealth. Sixteen of the Compeanies have more than ten thousand pounds a year, and most of them are very liberal in their charities, especially in the way-off-ducation.

In the majority of cases the designation of the

The order of precedence is given in paren-theses after the name of each Company. 8,ass Liverymen of the Childs are entitled to vote In the majority of cases the designation of the Company gives a clue to the trade which gave rise to the guild, the Cordwalers (orbitale, bit, and apur (arrow makers), Loriners (bridle, bit, and apur who have residential or other qualification; in the makers). Positives (positiverers) for even or company gives a clue to the trade which gave rise to the guild, the Cordwalers (orbitale, bit, and apur who have residential or other qualification; in the makers). Positives (positiverers) for even company of the positive or the makers).

Offices, County Hall, Spring Gardens, S.W. z-Rducetion Officing Victoria Embandment, W.G. Hours e.ze to s (Saturday e.ze to z).—Meets on Tuesday at also p.m.

is an administrative county, covering an area of 117 square miles.

The City of London is an electoral division of the county.' The County of the City of London is a county for son-administrative purposes, such as quarter seasions, justices, &c.; and the Metropolia outside the City is a county for non-administraties purposes, by name the County of London, in which the justices continue their judicial duties.

The Council comprises a chairman, so aldermen, The Council comprises a constraint, so second mon, and man councillors, together 148, or, if the chairman, be also an elected member or a derman, 144. By the Representation of the People Act, 1918, following on the redistribution of seats under that act for parliamentary and local government purposes, the membership of the Council was increased by 6 councillors and z alderman. The term of office for aldermen is 6 years, and half retire every a years. The councillors are elected for a years. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same, except as to the term of

The method by which the Council discharges the multitudinous duties entrusted to it is a generous delegation of powers to committees under well defined rules, subject to the reserva-tion to the Council itself of all questions of principle, and to periodical reports of action taken.

The Finance Committee have important statu-tory powers. No costs, debt or liability exceeding Ase may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money raising body for all the local anthorities in the county, and has a net debt, according to the latest returns of £44,734,000 (of which £10,945,000 represents debt incurred for revouse-producing undertakings), and an annual expenditure of about twenty-sever millions, of which about twenty-sever expended on education. The Asyluma and Mental Department Committee administer the duties failing on the Council under the Lunacy Acts and the Mental Deficiency Act, 1913. The Council has mental hospitals with accommodation for over so,coo patients. The Housing Committee perform the duties cast upon the Council by the Housing of the Working Classes Acts and the Housing, Town Planning, &c., Act, 2929, including the clearance of insanitary areas and the building of working-class dwellings. The total capital outlay up to 3xst March, 1900, in respect of schemes carried out prior to the Act of 2929 was : Clearance of imminitary areas, 

THE London County Council was constituted to the appeal of the flovernment to local authorities generally, the Council prepared a scheme an education to the generally, the Council prepared a scheme an education of the council prepared a scheme against miles. for the erection of seese new dwellings of accommodate approximately research people. Any deficiency on this scheme, in excess of the produce of a panny rate, will be met out of moneys provided by Parliament.

The Improvements

The Improvements Committee are responsible for the carrying out of street improvem the construction of bridges (outside the City of London) and tunnels across the river Thames, The largest improvements carried out in recent years are the new streets between Hulborn and the Strand, now known as Kingaway and Aldwych; tunnels under the Thanes at Rotherhithe and Woolwich; and an extensive improvement at Westminster, including a new embankment of the Thames between the Houses of Parliament and Lambeth Bridge.

The Metropolitan Main Drainage system covers about 149 square miles, including certain districts outside the county, and comprises 170 miles of main, storm-relief, intercepting and outfall sewers, eleven pumping stations, two sawage precipitation stations, and six sludge vessels. The sewage is conveyed to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, and the studge is taken out to sea. The Council is carry-ing out experimental work in connexion with other systems of sewage treatment. The jotal capital outlay on main drainage is upwards of £ 12,700,000, and further expenditure, amounting to several millions, is in prospect for a scheme to relieve certain districts from flooding after heavy falls of rain.

The Council is the Tramway Authority for London. The system extends over 140 street miles, of which x44 miles are electric lines (mostly underground conduit). Practically the whole of this great system is worked by the Council, and through running with various systems outside the County of Landon is now maintained, to the great advantage and conveni-ence of the travelling public. The total capital outlay on tramways amounted, on March 318t, ages, to £12,887,000, and the net debt outstanding to £3,085,000. The results of working for the year 1919 so were gross receipts £4,293,846, surplus on working £624,947, net deficiency after payment of interest on capital outlay and providing for repayment of delit, £100,722, of which £82,828 was met out of the Renewals Fund and General Reserve Fund and the balance

of £18,814 carried forward to 1920-21.
The Education Committee comprises thirtyeight members of the Council and twelve co-opted members, of whom not less than five are

buildings and district surreyors; dangerous tractured; cattle districts outrolling storage of explosive substances and petroletum; infant life protection; gas, gas-meter, and electric-meter testing; testing weights and measures; licensing, of, alaughtes-houses; and of own-house; supervision et.common lodging-houses; the granting of music and dancing licences; public health, including treatment of tuberculosis and diagnosis and treatment of tuberculosis and diagnosis and treatment. of veneral diseases; historic buildings and monuments; inspection of factories and certain other buildings to secure means of escape from fire; administration of the Shope Act, the Children Act, and the Midwires Acts; licensing and inspection of employment agencies; registration of motor cars; collection of duties on dog and establishments; licensing of preintest under the Cinematograph Act; registration of motor cars; collection of duties on dog and establishment and certain other local taxation licences; and registration of War charities. A Motor Ambulance service

has been justalled, with six statious aprend over the county and special facilities for calls by

talephone.

The Expenditure of the Council, including lease to other local authorities, is met by two chief sources of supply—capital money-raised by the issue of Stock, Bonds or hills, or by the use of the Silnting Fund of the Council's debt, and current income paised in a county rate or by the revenue of undertakings. Certain contributions, including advection grants, are also reserved from the imperial Exchequer. During the war, expenditure on capital second was reduced to very small proportions, and large sums available from the sinking fund and other sources were invested in War Loan and War Bonds.

No issue of London County Consoldated Stock has been made by the Council since May, ages, but the Council in April 1900 made an issue of \$7,000.000 5% per cent. Bonds, convertible under certain conditions into 5 per cent. London

County Cosmolidated Stock, and unbequently agreed to a further insue of \$3,000,000 of such Bonds. In co-operation with the Councils of the Metropolitan Boroughs the Cosmolid has also made an issue of 8 per cent. Local Bonds for Housing, the amount of the issue in the first instance being £5,000,000. This is to meet the expenditure of Metropolitan Borough Cosmolis on bousing schemes which rank for State financial assistance, to which reference has been made under the Council's housing scheme. All made under the Council's housing scheme. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, semicient to repay all expenditure within a period of 60 years. The total Stock now outstanding amounts to £77,836,632. These figures are total issues of £77,836,err. The exclusive of the issues of Bonds.

The Rating for the year ages at was estimated at the beginning of the year at the shooting abown in the statement given on p. 44, handly, as. 2d. In the pound over the whole country, and a further rate over the country outside the City of 4d. In the pound, together 4s. 3d. Of the total rate, st. 3d. was for education. One-half of these amounts was raised for the first half year. For the second half year, however, the rate had to be increased by \$1/4d, in the pound, of which \$6d. was in respect of education, and this increase, representing £2,745,328, must be borne in mind in respect of education, and this indresse, representing £x,y4c,32c, must be borne in mind in connection with the figures in the statement. The Assessable Value of the County of London on 6th April, 2900, was £48,634,637, a.zd. rate over the whole county producing £190,145.

Royal Levies held here during the season. Representatives of here during the season. Representatives of Foreign Powers are still accredited "to the Court of St. James'a."

ST. JOHN'S GATE, Clerkenwell, E.C. 1.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the gate of the Priory of that Order, of which the gate (early 16th century) and Church (crypt rath century) alone survive. The gatehouse may be inspected by written permission of the Secretary of the

Chancery. St. Thomas's Hospital, Albert Embankment S.E. z. - Founded 1213. Present buildings (7 red brick houses) by Currey, 1868-71. 1,000 beds.

SMITHFIELD, E.C. 1.—Sir Richard Wallace was executed there (1205) in the reign of Edward I., and Wat Tyler was "despatched" by Lord Mayor "Walworth (1251) in the reign of Richard II. Anne Askew, a Protestant martyr (1255) was burned there in the reign of Henry VIII.; and under Mary I. (1252-1255) many suffered there for the Protestant faith. (A memorial is affixed to the W. wall of St. Bartholomew's Hospital.) The last to suffer for

religion at Smithfield was Hartholomew Leggatt, Unitarian (182a), in the reign of James I. At the corner of Cock Lane (W. side of West Smithfield) is a small gilt figure commemorating the spot where the Fire of Loudon was finally checked by the demolition of houses, Sept. 6, 1866. Smithfield Market occupies the W. side of West Smithfield.

Somerset House, Strand, W.C. 2, and Victoria Embankment, W.C. 2. — The beautiful river fayade (500 feet long) was built at the close of the 18th century from the designs of Sir W. Chambers; the remainder of the building is early 18th century. Somerset House was the property of Lord Protector Somerset, at whose attainder in 1852 the palace passed to the Crown, and it was a royal residence until about the close of the 18th t

STUCK EXCHANGE, E.C. a. (Strangers not admitted)—Known in the City as the "House," was founded in 1773 and now consists of about 4,000 members. A 'jobber' does business only with other members, a "broker" is the intermediary with the public. Speculators for a rise in prices are "bulls"; those for a fall are "bears.'

THAMES EMBANKMENTS—The Victoria Embankment, on the N. side (from Westminster to Blackfriars), was constructed by Bazalgette for the Metropolitan Board of Works, 1850-1870 (the seats, of which the supports of some are a kneeling camel, laden with spicery, and of others a winged sphinx, were presented by the Grocers' Company, and by Rt. Hon. W. H. Smith, N.P., in 1874); the Westminster to Vauxhali seption, on the S (Surrey) side, 1850-1869; the Chelsea Embankment, 1871-1874. The total cost exceeded £3,000,000. Sir Joseph William Bazal gette (1871-1871) also constructed the London main drainage system, 1825-1865, at a cost of £4,600,000. A medallion has been placed on a pler of the Victoria Embankment to commemorate the engineer of the Thames waterside improvements ("Flumini vincula posuit"). The County Hall scheme of the L C C. (now under construction) includes an embankment on the Surrey side giving a river approach to the County Hall.

THAMES TUNNELS.—The Rotherhithe Tunnel (foot passengers and vehicles), constructed by the L.C. and opened in 1926, connects Commercial Road East, Poplar, with Union Road, Southwart: the total length is 7 mile 440 yards, of which 310 yards are under the river. The cost of the tunnel and its approaches was £1,560,041. The Blackwall Tunnel (foot passengers and vehicles) was constructed by the L.C.C. and opened in 129, connects West India Dock Road, Poplar, with Blackwall Lane, Hast Greenwich. The total length of the tunnel saye yards are under the river. The cost of the tunnel with its approaches was £1,22,324. Greenwich Tennel (foot passengers only) constructed by the L.C.C. and opened in 1926, connects the Isle of Doga Poplar, with Greenwich. The length of the subway is 406 yards, and the cost was £18,357. The Woolwick Tunnel (foot

passengers only), constructed by the L.C.C. and opened in spra, connects North and South Woolwich below the passenger and vehicular ferry from North Woolwich Station, E. 26, to High Street, Woolwich, S.E. 28. The length of the subway is 2ny yards, and its cost was \$\frac{2}{3}\$. Size, The Thurnes Tunnel (1300 feet) was opened in 1843 to connect Wapping (N.) with Rotherhithe (S.). In 1866 it was closed to the public, and purchased by the East London Rallway Company. The Tower Subway for foot passengers was opened in 1870, and has long been closed.

TOWER HILL, E.C. r and E.C. 3, was formerly the place of execution for condemned prisoners from the Tower, the site of the scaffold being marked in the gardens of Trinity Square.

THEATRLE IN 1929-20. The most notable productions in 1929-20 were Gay's Beggar's Opera, revived after about two centuries (1727), at the Lyric Opera House, Hammersmith: The Skin Game, by John Galsworthy; Mary Rose, by Sir J. Barrie; two comedies (Mr. Pim Passes By and The Romantic Age), by A. A. Milne; the spectacular Garden of Allah (Hichens), which opened at Drury Lane on June 24, 2220, and occupied the theatre during the usual pantomims season of 1920-22; a Grand Greignal season at the title Theatre; a Repertory season at the old Drill Hall, Hampstead; and Shake ap arean and other classical works at the "Old Vic" Chu Chin Chine (His Majesty's), reached its 1,457th consecutive performance on Oct. 29, 1920. The "record ran" at a Loudon theatre, in pre-war days, was held by Charley's Aunt (1,466 consecutive performances).

The season, as a whole, was prollife in production, with frequent changes in programme after short runs, a total of yz new plays and adaptations being introduced, is addition to many revivals. Shakespearean productions at West End Theatres included Chiello, Hamlet, Henry V. and Julius Casar.

A tablet has been affixed by the Records Committee of the London County Council on 32 Curtain Road, Shoreditch to commemorate the site of "The Thesite" Expreditors, the first theatre in London.

CIEFMATOGRAPH THEATRES.—It has been stated that there are spreade of 4,eeo Picture Palaces and Cinematograph Theatres in the United Kingdom. The latest tendency is for the production of high-class work, and the general level of the productions shows an upward movement. The following are the principal "Cinemas" and "Picture Theatres" in Loudon:—

Broadway Garden Cinema, Watham Green,

S.W. 6.
Cinema de Paris, Bear St., Lelcester Sq., W.C. a.
Cinema House, 225, Oxford Street, W. z.
Cinematograph Theatre, 22-25, Oxford St., W. z.
Coronet Theatre, Notting Hill (3ste, W. z.
Holborn Cinema, 220, High Holborn, W.C. z.
Küburn Grange, High Boad, Küburn, N.W. 6.
King's Picture Playhouse, King's Read, Chelsea,
5.W. 2.

S.W. & S.W. & Leicester Square, W.C.a. Maida Vale Palace, 120, Maida Vale, W. 9. New Gallery Kinema, 1211A, Mogont Street, W. 2. Palace de Luce Chiema, 127, Great Windmill

Palais de Lure Oinema, 17, Great Windm Street, W z. Pavilien, Marble Arch, W. z. Pavilien, Shaileabury Avenue, W.C. a. Polytechnic, Regent Street, W. z. Polytechnic, Regent Street, W. z. Scala, Charlotte Street, Fitzroy Square, W. z. Strend Oinewa, Agar Street, Straud, W.C. a. Strend Oinewa, Agar Street, Straud, W.C. a. West Said Oinewa, J. Dovembry Street, W. z.

nancom-pattern cab so that the doors do not

close over it is deemed to be vutside within the

caning of this clause. Extra Persons.—For each above tw (two children under so years of age count: a d.

as one person)..... WAITING.—By distance: for every as minutes completed—if hired within the Four-Mile Circle, 4 wheels, 64.; a wheels ...

If hired without Circle, a or a wheels ...

#### GENERAL REGULATIONS.

GENERAL REGULATIONS.—The farm by Taxi-meter Motor Cabs are based upon a combination of time and distance. When the cab is kent waiting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time. When travelling at a speed of six or more miles an hour, then the charge is by distance. Fares for horse-drawn cabs are according to distance or time, at the option of the hirer, expressed at the commencement of the kiring: if not otherwise expressed, the fare to be paid according to distance; but driver can refuse to

be hired by time between \$ p.m. and \$ a.m. DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding.

If the driver agree beforehand to take any sum

less than the proper fare, the penalty for demand-ing more than the sum agreed upon is 468. The driver of every cab shall have with him, and when required produce, the Authorized Blook of Distances, and every diversof any cab shall, if so required, deliver to the hirers printed

ticket, showing fares, &c.
Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thisher. Penalty 40s., if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, emacts that if any person hires a cab, knowing, or having remort to believe, he cannot pay the fare; or, fraudicintly endeavours to avoid payment of a fare; or, having failed, or refused, to pay a fare, refuses; or gives a false address, is liable, in addition to the fare,

to a penalty of 40

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inade of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as falls for a

of the surriage, had not shall be disposited by the driver (and in the case of si shape assistant, by the sendator; of driver it no

London Cabs. Morino if

conductor) at the nearest Police Station within twenty-four hours, if not score chained by the owner; Midd' property to be esturned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of tate has by order prescribed. Property found in

deate has by order prescribed. Property found in a stage cartifies by a massenger must be given up to the conductor under a penalty of £ss. All inquiries, &c., relating to public carriages should braddensed to the Public Carriage Office, New Southand Yard; but inquiries as to property left is, a cab or stage carriage should be made at the Lost Property Office, New Southand Yard. Office hours, we be a staged to the public of the carriage and the contract of the carriage and the contract of the carriage and the c

The following regulations, under the Lights (Vehicles) Order of September 30, 2929, apply to the whole of England and Wales

EVERY VEHICLE, between half an hour after sunset and half an hour before suurise, must

At the front—two white lights, one on the extreme off side, and the other on the extreme near side.

At the rear-a red light on the off side.

Except that :-

(1) BIOYOURS AND PRDAL TRICYCLES need have only one white light in front and one red ght at the rear.

(a) HANDCARTS need only carry one lamp on the off side showing a white light to the front and a red light to the rear.

In addition:-

TRACTION ENGINES must carry the above lights | sz,434.

from sunset to sunrise during the six months from October ; to March 3s, that the lamps must be provided with shutters to enable them to be emporarily screened.

HARVERTERS...-County Gouncils have power to make orders exempting archicles used for the burpose of harvesting fresh carrying lights. STAGE CARRIAGE Illemed in the Metro-

politan Police District must carry a lamp inside, properly lighted, between sunset and sunrise.

HACKNEY CARRIAGE STATISTICS.

MACKREY CARRIAGES STATISTICS.

During resp there were licensed public carriages:—Hansoms, 38; clarences—animal 549,
mechanical 5,39; combuses—animal 15,mechaical 3,399; trumway cars—mechanical a,549;
total, 21,92; Drivers and conductors:—Cab drivers—animal 799, mechanical 8,600; stage drivers—animal re, mechanical xx,597; composite licences (stage driver and conductor)—animal sg: mechanical xx,985; conductors, xx,490; total,

98.430. HACKHEY AND STAGE CARRIAGE DRIVERS THE FORE obtaining a licence are required to pass an exa-mination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London. During 1919, of 805 men examined, 223 were successful. The proportion of drivers to backney carriages is 13"? drivers to so carriages.

#### LOST PROPERTY.

Of lost property, ss. ssa articles were deposited, of which as, 174 were claimed by the owners. The number of swards paid to drivers; &c., was

#### STREET ACCIDENTS IN U.K., 2019.

In addition to the accidents on the various rallways of the U.K., there were no fewer than 51,386 accidents caused by vehicles on streets and roads in 1919. Of this number a,608 were fatal and 48,668 non-fatal, compared with s,see fatal and 25,73s non-fatal accidents in 1918.

## DECREASE IN BANKRUPTCIES.

England and Wales.
The total proceedings becun The total proceedings begun in all courts during 1918 was all of the proceding year, a decrease of 1977,757, or ay per cent. As in previous years, the falling of a slimest wholly in proceedings commenced in county courts, these declining from 69,586 to 438,88, a decrease of 272,344, or as per cent. If the county court figures are excluded from the total of proceedings commenced, the decrease is the other courts was only 6,413, or as per cent.

only e,473, or 22 per corn.

Both bankruptoy potitions and companies winding ap proceedings have steadily diminished, the former since sage and the latter since sgra.

Bankruptoy petitions fell from 3,932 to 2,276 during the war, a decrease of 68 per corn.

Actions in communic decreased from order. Actions in county courts decreased from over z,coc,cee in rate to under goe,cee in rate. On the other hand, the average amount claimed per plaint rose from £2 in 1913 to £4 78. 6d. in 1918.

#### TITHE RENT CHARGE

THE Tithe Rent Charge is based on the septennial average price of wheat, barley, and onto, the basic price per imperial quarter being taken at \$6. sel, for wheat, sat. 5d. for barley, and spat. for oats (the Rent Charge being £ no when based on these farmes)

#### THE CHILTERN HUNDREDS.

RESIGNATION OF MEMBERS OF PARLIAMENT.—
No duly elected member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement, 2907 (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the Chiltern Hundreds, or of the Rachastorship of Munster, whereupon the seat is declared vacant (under the Place Act of types, which expressly permitted acceptance of such offices to herve he an express for resignation) and a new part is impact by the Speaker.

#### PRIME MINISTER'S RESIDENCE.

DOWNING STREET, Whitehall, S.W. z.—Named after a politician of Charles II. a reign. No. ro is the official town residence of the Prime-Minister, No. xz of the Chanceller of the Exchequer, and No. ra is the office of the Government Whips. Chequers, a gountry residence for Prime Ministers (from Jan. 1, 1994), was accepted by Mr. Lloyd George in 1927 (with an endowment to maintain the estate, d.c.) from Lord and Lady Lee of Parelsans. Chequers is a Tudor mansion in the Chilternia. Chequers is a Tudor mansion in the Chilternia about 2 pales from Primes Risborough, Buoks, and contains a collection of Crongwellian portraite and relies.

NORE.—WHITAKER'S ALMANACK was first published in 1868 (for the year 1969), and since 1887 there have been two editions. For 1921 the Pepular Edition (in paper cover with Edition (initial) consists of 578 pages, and is seld for Se. net; the Half-Eound Edition (in red and green cloth cover), consists of 970 pages, and is sold for 7c. 6d. net.

THE INDIAN EMPIRE extends over a territory larger than the Continent of Europe without Russis. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any officer subordinate to him; while "India" means British India, together with any territories of any prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or any officer subordinate to him (Act 52-8 Vict., c. 63, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government.

Boundaries.—The political boundary of India marches with Persia from the Gulf of Oman to near Zulfikar on the Ifarirud; then with the former Russian Empire along the frontier laid down by agreement in 1885 as far as the Oxus at Khamiab; thence along the Oxus by the Panjah branch up to the Victoria lake, and from the east end of that lake by the line demarcated in 1895 up to Povalo Schveikovski on the Taghdumbash Pamir, where three empires—the British, Russian, and Chinese—meet. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire, mainly along the crests of the Muztagh (Karakoram) range and the Himalayss, till the limits of French Indo-China are reached on the Upper Mekong. The Indian frontier, on leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive and Minicoy Islands, Aden and Perim, besides protectorates over Socotra, Bahrein, and various chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° R. latitude, and from 61° to 10° E. longitude. Delhi, the new capital, lies in 77° E. long.

Area and Population.—The total area of India proper is about 1,803,000 square miles, with a population of over 315 millions (about three-fourths of the population of the British Empire). The British Provinces, as distinguished from the Indian States comprise 61 percent. of the area, and nearly 78 percent. of the population. The details are as follows:—

Physical Features.—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region,

the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and I)haulagiri, 26,826 feet, near the centre of the range; and Mount Godwin Austen, 28,250 feet, near its -junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Mursee, Smila, Musseorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oata, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Tarai or Duar jungle, densely forest-covered and full of big game.

The Great Plain.—The northern river-plains, lying at the foot of the Himalayas,

comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly r,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus, and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Thus the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. richest, most populous, and most historically famous part of India lies in the basins of these Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a deuse population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand, in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bihar and the United Provinces. In Northern India there are two harvests, rabi (spring) crops being reaped in March and April, kharif (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrals, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Decoan.—Just as the Himalayas on the N. and the Hindu Kush and Suleimas Mountains on the N. W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Decean, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghauts all but complete this environing triangle of mountain ranges. In the extreme N.W., south of the Vindhyas, and parallel to them, but north of the Western Ghauts, we find the Nerbudda and. the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghauts lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Rastern Ghauts, into the Bay of Bengal. The four chief rivers are the Mahanaddy, in the extreme N.E. (500 m.), the Godsvery (900 m.), the

Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical geography of Southern India has shaped its listory: the S.W. coast, shut in by mountains, avery primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghants, which rise to 8,000 feet in the Nilgiris, arestill covered with the splendid egetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monasite, and gold.

Burma.—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawady and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs; while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamnum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold in Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalay an region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

Population.—The fourth general census of India was taken on the 10th March, 1911. The enumeration embraced the whole of the Indian Empire, but only estimates could be made for a few outlying tracts and tribal areas on the frontier. The census returns gave a population of 315,156,396, as compared with 294,361,056 in 1901 (for details see p. 579), an increase in the ten years of about 7 per cent. The returns were in some parts much affected by severe malarial fever and plague, which caused a large temporary decrease in certain towns, particularly Cawnpore and Nagpur. The census total of 1911 is divisible into 244,267,542 (or 78 per cent.) for British India, and 70,888,854 (or 22 per cept.) for Native States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist. There were in 1911 29 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 10 per cent. of the total population.

Caste.—Owing to the operation of the caste system India is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of families, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting intermarriage, but its social status

depends on the occupation of its members and their habits in respect of diet.

Religious.—The population by religions, so far as ascertained, includes 217,586.802 Hindus (69 per cent. of the total), 66,647,299 Muhammadans (21 per cent.), 10,721,453 Buddhists (3 per cent.), nearly all in Burma, leaving 7 per cent. for all other religious, including 3,876,203 Christians (three-fifths of whom are in Madras, Travancore, and Cochin), 3,024,466 Sikhs (a large increase), 1,248,182 Jains (a decline, ascribed to plague), 100,006 Parsis, and 10,205,168 described as Animists, who believe in magra and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus. are infected with the caste system and other Hindu characteristics. The number of Indian Christians has increased nearly threefold since 1872.

Occupations.—Over 72 per cent. of the population was in 1911 dependent on pasture and agriculture. Industrial occupations support 35,000,000 persons, of whom nearly one-fourth are dependent on textile industries. The most important of these are industries connected with cotton, which employ nearly 6,500,000 persons, the majority of which depend on hand-wearing. The public services appoint over 5,000,000 persons.

hand-weaving. The public services support over 5,000,000 persons.

Sec. Marriage is almost universal owing to religious obligations. The movement against infent marriage and enforced widowheed is gaining ground. There were in right

over 26,400,000 widows in India. The males outnumbered the females in 1911 in the

proportion of 1,000 to 954.

Languages.—Indis has 220 vernacular languages, of extraordinary variety. The languages speken by 312,912,624 persons in 1911 are grouped in four families; and 23 languages belonging to these families are spoken by not less than one million persons each. The principal languages are Hindi (spoken by 82,003,235 persons), Bengali (48,367,915), Telugu (23,542,861), Marathi (19,806,636), Tamil (18,128,365), Punjabi (15,876,758), Rajasthani (14,007,590), Western Hindi (14,007,882), after which come Gujarati, Kanarese, Oriya, Burmese, and Malayalam. Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and is the lingua franca of India. English is understood by many.

### kndia under the Crown.

For a brief sketch of Indian History from 326 B.C., the date of Alexander's invasion of India, to 1858, see WHITAKER'S ALMANACK for 1917, page 356 et seq.

In 1827, during Earl Canning's administration, a mutiny of sepsys broke out on the xoth May at Meerut, and spread through the whole Bengal Army. Belit was for some months in the possession of the rebels, and many chief-joined the revelt. The slege of Dellni, the massacre at Cawnpare, the relief of Lucknow, and the Central India campagn stand out among the strring events of that momentous time. Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutiny was laid to the charge of the Rast India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN.—The "Act for the Better Government of India" established the authority of the Crown; and a Proclamation to the Princes, Chiefa, and People of India, dated the 1st Nov., 1858, announced the resolution of

Her Majesty to assume the government of the certifories in India "heretofore administered in trust by the Honourable East India Company." Legislative Councils were established. Lord Canning was succeeded in 1866 by Lord Elgis, who, however, died in Nov., 1863.

Sir John (Lord) Lawrence (1861-69) reformed by the heavy military expenditure necessitated by the Hutiny. His administration was marked by the Buttan War (1864) and by the terrible Orissa Famine of 1866. He encouraged irrigation.

Lord Mayo (1865-ya) effected many administrative reforms, instituted State railways, promoted the construction of roads and canals, and inaugurated the system of provincial finance, which has since been extended.

During the tenure of office of Lord Northbrook (1873-6) the late King Edward VII., then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief. In

One-inch Ordenance Survey Maps are published by the Survey of India, and can be obtained from the India Office Sale Agente, Messra E. Stanford, Ltd., zz to z4 Long Ages, London, W.C. s

(ss. to ss. od. each).

875 the reigning Gackwar of Barnda was deposed

for misrale and disloyalty.

Lord Letton's administration (1976-80) was made eventful by a terrible famine in Southern India and by the Second Afghan War. In 1877 the Queen assumed the title of Empress OF INDIA.

The peaceful term of the Marquess of Ripon 68-84) was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms.

His successor was the Marquess of Dufferia (234-55). In 1955-5 occurred the Third Bunnese War, by which Upper Burms with the Shan States was annexed. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened. and the army increased. The first Indian National Congress met in 1894.

The Marquess of Lanedowne (1868-94) continued his predecessor's policy of attengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. He took the first step in currency reform by closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in race by introducing a more popular element. and conferring a limited right of interpellation

and criticism in financial matters. The viceroyalty of Lord Elgin (1894-99) was full of events. In 1895 an outbreak in Chitral made necessary a large military expedition to relieve the garrison. Plague broke out in 1896, and has In 1896-7 raged more or less severely ever since. an area of 307,000 sq. ms., with a population of 70 millions, was visited by a grievous famine. In 1897 the border tribes from Chitral to Baluchistan rose against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several houndaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong. The frontiers of Afghanistan, Persia, and China were also defined. The general Customs tariff, abolished in **88**a, was reimposed in **1894**.

Lord Curron (1899-1994 and 1994-5) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to £z. In 1893-2500 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ma. with a population of 60 millions. Lord Curzon's term of office was a period of reform and reconstruction. He appointed Commissions of Inquiry on irrigation, railways, univer-sities, agricultural banks, excise, and police, all of which suggested important reforms. He instituted agricultural banks and departments, and initiated legislation to free the cultivators from the money-lenders. The famine codes were amended. A new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901). The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. Educational policy was reviewed and reforms introduced. A muchneeded reform of the police was undertaken Lord Curson also secured a perpetual lease of Berar from the Nimm. In 1994 a mission with a mables them to dispose of growing acuroes military escort proceeded to Tibet, and secured a favourable treaty. During Lord Carson's India being reland. A Rayal Commission was absence in England for a few months in 1994 Lord appointed in 1995 took formal possession of the new headquarters

the treaty with Afghanistan was renewed. The Vicercy reduced the dimensions of Bengal, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. He carried outgreat reforms in the Army in conjunction with Lord Kitchener (appointed Commander in Chief in seed, but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Govern-

that he lacked the support of the Home Government, he resigned (Aug. 2002).

Lord Minte succeed.d in Nov., 2003. The Prince of Wales (now H.M. King George) made a tour in Inuia during the winter of 2003-6. For some years after 2005 there was agitation ameng Bengalis owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov., 2003. In his Budget speech in 2007 the Secretary of State, Viscount Morley, forestadowed important reforms in Indian administration, designed to associate the Indian administration, designed to associate the people more closely with the Government. He nominated two Indian members to his own Council, and an Indian member to the Governor-General's Council. He appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action was taken on their reports. In 1908 the unrest in Bengal assumed an anarchical character. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was issued in Nov., 1908, promising extended selfgovernment. Owing to the continued unrest in 1909 and 1910, a Press Act, to control printing presses, was passed.

Lord Hardings succeeded in Nov., 1920. Indian Legislative Council in June, 1911, pro-hibited indentured emigration from India to Natal after z July, zgzz, and a new Seditious Meetings Act was passed. A great Durbar was held at Delhi on as December, 1911, by R.M. King George, to announce his Coronation. On this occasion the King-Emperor also made announcements of new and far-reaching steps in Indian policy, viz., the transfer of the seat of Government from Calcutta to Delhi, and the or devernment from Calcutta to Belin, and the creation of a Governorship for the presidency of Bengal, of a Lieut.-Governorship for Bihar, Chota-Nagpur, and Orisas, and of a Chief Commissionership for Assam Delhi was chosen as the capital on geographical, historical, and political grounds. The provincial changes involved a natifal washester of the natifical Grand and the capital or the provincial changes involved a partial rescission of the partition of Bengal and the abolition of the province of Eastern Bengal and Assam, created in 2005. Bengal as recon-stituted is a compact Bengali-speaking province, placed under a Governor in Council. placed linter a province was formed, includ-ing Chots-Nagpur and the Sambalpur district. Assam again became a separate province, under a Chief Commissioner. The reconstituted provinces came into existence on z April, zera. In pursuance of recommendations by the Decentralisation Commission, enhanced powers in respect of appointments and expenditure were granted to local governments having a quasi-permanent provincial settlement. More-Moreover, greater permanency was arranged for in financial settlements with the provinces, which

at Belhi. The State entry was marred by an attempt on the life of the Vicercy. A Royal Commission was appointed in April, rers, to examine and report on Indian Finance and Currency The outbreak of war in Europe in August, spra, was the signal for a great outburst of loyalty and devotion to the King-Emperor on the part of the princes and peoples of India. Practically all the ruling chiefs placed their military forces and the resources of their states at the disposal of the Government, and large forces of Indian troops were despatched for service in Europe, Asia, and Africa.

Following on the ontbreak of war serious disturbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbued with revolutionary ideas. Order was restored as a result of measures taken under the Defence of India Act, which was passed in March, xys. Several tribal risings on the North-West Frontier were promptly and rigorously suppressed. Lord Hardinge's term of office as Viceroy was extended from November, xys, to March, xys6. The Viceroy amounced in March, xys6, that it had been decided eventually to abolish the system of indentured emigration from India. Lord Hardinge put forward proposals for post-war constitutional reforms.

Lord Cheimsford succeeded in April, 1916. A strong Commission was appointed to examine and report on the possibilities of further industrial development in India. The year 1917 was marked by certain symptoms of unrest and the development of an agitation for constitutional changes towards self-government, or, in its extreme form, "Home Rule for India," formulated by Mrs Besant and her party. Restrictions, afterwards removed, were placed on Mrs Besant in consequence of her methods.

The Mesopotamia Commission strongly criticised the administration from India of the early stages of the campaign The Public Services Commission, appointed during Lord Hardinge's administration, reported Three leading Indians attended the Imperial War Cabinet. As regards indentured Indian labour in the Colonies, the Dominions' representatives accepted the principle of reciprocity of treatment, and commended to the favourable consideration of their Governments three general principles: that the facilities for settlement accorded to Indians should not be less advantageous than those allowed to other Oriental nations; that facilities should be accorded to educated Indians visiting the Colonies for travel and study; and that Indians who have been permitted to settle should receive sympathetic treatment. Action was taken against the Mahsuds and Mohmands on the North-West Frontier. The Lahore and Burma conspiracy trials were concluded and the leaders sentenced. During the year the Vicercy made the following important announcements:-The grant of King's Commissions to Indians, a contribution of £100,000,000 towards the cost of the war, and further grants towards the improvement of education. The special conditions arising from the war induced the Government of India to anticipate the findings of the Commission by organising at once, as far as was possible, the resources of the country, with a view to making India more self-contained. It also devoted itself to the supply of essential stores for the armies in the field, and a Munitions Board was created for the purpose of mobilising the resources of India for the war.

Towards the end of very the Secretary of State visited India in connectors with a development of constitutional progress, for some time under consideration by the Home and Indian Governments. The Secretary of State and the Vicercy submitted their report to H. M.'s Government in April, 1928.

The year 1918 was marked by some symptoms of unrest; the Rowlatt Committee, appointed in rg17, reported, and revealed evidence of the association of the Bengal seditionists with German plots; anti-Moslem riots broke out in Berar, and Muhammadans organised agitation leading to disturbances in Madras and Calcutta. cruiting for the Army broke all records; the operations against the Marris were closed; a War Conference was held at Delhi with the object of stimulating India's efforts in the war. The Bombay Government took the first steps towards obligatory primary education; a policy of more complete local self-government was decided on by the Government of India. Reckless speculations in Broach cotton prevailed, and a certain amount of discontent due to high prices was manifested. The Home Rule League continued its activities. The influenza epidemic spread to India, and it is estimated that over 7 million deaths in British India and Native States resulted. The Industrial Commission, appointed in 1916, issued a report; its broad general conclusions were that—India is rich in raw materials and in industrial possibilities, but poor in manufacturing accomplishment. The deficiencies in her industrial system are such as to render her liable to foreign penetration in time of peace and to serious dangers in time of war. Her labour is inefficient, she relies almost entirely on foreign sources for foremen and supervisors; and her educated people have yet to develop a right tradition to industrialism. Her stores of money lie inert and idle. The necessity of securing the economic safety of the country, and the inability of the people to secure it without the co-operation and stimulation of government impose on government a policy of energetic intervention in industrial matters. Two representatives of the Indian people, appointed by the Government of India, attended the Imperial War Cabinet in London. In 1919 a bill was introduced into Parliament embodying the proposals of the "Montagu - Chelmatord Joint Report," and eventually passed. During the year considerable distress occurred in consequence of the partial failure of the 1918 antiumn crops throughout Northern India and the Peniusula, and relief measures were undertaken 'A strike, of brief duration, of mill-hands, due partly to economic duration, of mill-hands, size partly to economic and partly to political "causes, occurred in Bombay. Serious disturbances in the Punjab and Delhi, resulting in "many deaths, followed on a "passive resistance," "movement, inaugurated by Mr. Ghandi masters the "Rowlatt" Bills, introduced by the devernment of India, on the recommendations of the "Rowlatt" Committee, for renewing sense of the powers which the Government had provided themselves during the War to deal with suddition. The movement spread to Bombay, and "the local government was forced to deport Mr. Horaiman, the Editor of the Bombay Chronicle. A Commission was appointed to enquire into the whole matter of of the Bombay Chronicle. A Commission was appointed to enquire into the whole matter of the disturbances and the steps taken to suppress them. The murder of the Amir and the subs quent events in Afghanistan were followed by an

inroad of Afghans and some frontier tribes into India, necessitating prompt military action by the Government of India. Hostilities were terminated in August and a treaty of peace concluded (see p. 6ey). The attitude of the frontier tribes was, however, on the whole good. Committees were appointed (s) to enequire into the organization and procedure of the civil secretariat of the Government of India; (a) to enquire into the administration and organization of the Army in India, whose conduct of the late campaign on the North-West Frontier, following the troubles with Afghanistan, was much criticised; and (3) to advise in regard to the future of currency and exchange; (4) to investigate the system of prison administration. The "Sadler" Commission on the Calcutta University reported during the year, and made drastic proposals for recasting the Indian secondary and university educational system. After reviewing the changes in social and economic conditions which call for reorganisation and improvement in the educational system of Bengal, the Commissioners made recommendations, involving an additional annual expenditure of half a million sterling, and a non-recurrent expenditure of an equal amount, for the establishment of a wholly new system of administration for secondary and higher secondary to to to to the secondary and higher secondary tution to be known as an Intermediate College, providing not only preparation for the University, but also for vocational training, by means of a sound secondary education continued as a rule up to the age of x8, affording a good grounding for careers in agriculture, commerce and industry, and for the medical, engineering, and teaching professions, as well as for the ordinary science and arts courses of the University; the organisation of a special corps of western-trained teachers; the immediate establishment of a self-contained teaching University at Dacca; the creation of a genuine teaching University at Calcutta; a complete re-casting of the system of governance of Calcutta University: the encouragement of women's education; and for the improvement of conditions under which students live (provision of hostels, playing fields, etc.). After the publication of the report, the Government of India, in October, introduced a Bill for the establishment of the proposed University at Dacca. A scheme for the amalgamation of the three Presidency banks was formulated; the recommendations of the Indian Cotton Committee, appointed in 1917, for the extension and improvement of cotton cultivation in India, aroused much interest; there was an awakening of interest in industrial enterprise in India, attended, however, by some reckless speculation; and, as elsewhere, the rise in prices necessitated improvement of pay in the various branches of the public service. The Union Government appointed a Commission to enquire into the Indian question in South Africa. worthy features in the progress of India during the year were the appointment of an Indian, Lord Sinha, as Under-Secretary of State for India in the Home Government, and the repre-sentation of India at the Peace Conference by two Indians, H.H. the Maharajah of Bikanir and Lord Sinha. The movement for compulsory elementary education continued to grow. The policy underlying the Government of India. Act, 1219, mainly based on the recommenda-tions of the "Montagu-Chelmsford" Report,

vis., the increasing association of Indians in every branch of the Administration, with a view to the progressive realisation of responsible government, was carried forward a further stage in zees by the Home Parliament, which, by rules, laid down the details of the constitution of the new Central and Provincial Governments (see pp. 39-90), and in furtherance of which elec-tions were held during the year, preparatory to the inauguration of the new Councils early in 1921 by H.R.H. the Duke of Counsught. One section of the India Home Rule for India party, dissatisfied with the Act, threatened non-co-operation with the Government in the future working of the reforms, and with the assistance of some Muhammadans, Mr. Gandhi, a Hindu, com-menced a movement to carry out the threat, but the support of the "Moderate" wing of the party, including that of Mrs. Besant, was given to the Government. A prominent and distin-guished Indian, Lord Sinha, was designated as the first Governor of Bihar and Orissa. In consequence of the agitation in support of more lenient Peace terms for Turkey, some Muhammatans, estimated to number over 20,400, emigrated to Afghanistan, but many of these Muhajarins returned greatly disabused by the reception accorded to them The Amir's representatives visited India and discussed with officers of the Indian Government the possibility of a resumption of more friendly relations. Bolshevik propaganda created an unhealthy political atmosphere in some quarters. Fighting with the Mahauds on the North-West frontier continued throughout the year, in consequence of which the Viceroy announced Government's intention to occupy Central Waziristan, and to continue the railway from Jamrud towards the Khyber. Unrest, due in some measure to labour trouble, evidenced by an unprecedented number of strikes, and partly to unsatisfied political aspirations, was prevalent during the year. Trade showed remarkable expansion, and crop forecasts were good. Government, in pursuance of its policy of making India commercially more self-supporting, instituted several inquiries into various trades and industries, and appointed a committee to inquire as to whether the adoption of a system of preferential tariffs would be beneficial. Further steps towards employing more largely Indians in the various Government services and for the improvement of conditions of service and pay of both European and ludian members of the same were taken. Several large works' programmes were sanctioned. A committee was appointed to inquire into the administration of the railways. The recommendation of the Exchange and Currency Committee for the linking of the rupee to gold and the adoption of an exchange rate equivalent to onetenth of the gold contents of the sovereign, i.e., an exchange rate of Rs. so to the £, was adopted. With a view to increasing banking facilities steps were taken to establish a large Imperial Bank. A High Commissioner for India in London, with a separate establish-ment, responsible to the Government of India tor certain agency work, previously performed by the India Office, was appointed. The Army in India and the Medical Services Committees respectively reported and their conclusions are under consideration. The recommendations of the Army in India

The recommendations of the Army in India Committee postulate:—(x) control by the Gevernment of India over Indian military

affairs ; (a) giving to India a voice in Imperial | Council must have served in India for 10 years, defence; and (3) allowing to the Imperial General Staff a considered influence on Indian military policy. To ensure uniformity of military policy between Great Britain and India the Committee recommend:—a diminution of detailed control by the India Office; abolition of the Military Member of the Council of the Secretary of State for India; the Chief of the Imperial General Staff, either directly or through the Military Secretary at the India Office (appointed on his recommendation) to be the sole military adviser of the Secretary of State for India; the attendance of the Chief of the Imperial General Staff at meetings of the India Council; the attendance of the Military Secretary of the India Office at meetings of the Army Council; the Commander-iu-Chief in India to be the administrative and executive head of the Army, subject to the control of the Governor-General in Council: the appointment of Commander-in-Chief on the recommendation of, and with the right of communicating with, the Chief of the Imperial General Staff; a Military Council of high staff and other officers to assist the Commander-in-Chief in India; the to assist the commander in this in think is abolition of the Secretary to the Government of India in the Army Department; decentralisation of responsibility by the creation of four commanda. A majority of the Committee recommend the placing of production and supply under a Civilian Member of the Viceroy's Executive Council, instead of under a Surveyor-General, responsible to the Commander-in-Chief, as recommended by the Minority. The Committee also recommend :- Closer relations, co-operation in training, distribution of high appointments, and adjustments of pay, between the British and Indian Armies; a corps of officers fitted to serve with either British or Indian troops; the amalgamation of certain Corps; the removal of grievances, more sympathetic treat-ment of all ranks; re-organisation of existing, and the development and equipment of new. services.

IMPERIAL LEGISLATION.—Legislation for India in England is chiefly of a constitutional or finan-cial character. The Regulating Act (1773), which created the first Governor-General, a Council of five members, and a supreme court with a chief judge, was the first statute that recog-nised the East India Company as a ruling body. Pitt's India Act (1784) left the business and most of the patronage to the Court of Directors, but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while on the next renewal in 1833 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In r853 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" [1858], for the Better Government of India" (1885), which still regulates Indian affairs, all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State of India exercise of the Economic Versions of State of the India exercise of the Economic Versions of State of the India exercised by the Company of State of the India exercised by the Council Version of State of the India exercised by the Council Version of State of the India exercised by the Council Version of State of the India exercised by the Council Version of State of the India exercised by the India exe for India, assisted by a Council. Under this Act, as amended by Acts of 1852, 2907, 1915, and 1929, at least one half-of the members of

and must not have left India more than 5 years prior to their appointment. The number of members may be is and must not be less than 8, and is st present 8. Their term of unan 5, and is at present 3. Their term of office is now 5 years, with power of extension. There are now 3 Indian members. In 1877 (under the Eoyal Titles Act) Queen Victoria assumed the title of Empress of India. By the Indian Councils Act (1999) the imperial and provincial Legislative (councils were enlarged, their powers of interpellation and criticism enhanced and the elective element excriticism enhanced, and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadans, and European and Indian traders and planters. The executive councils of Madras and Bombay were increased in size, and power was given to constitute executive councils in provinces under Lieut.-Governors. Government of India Act (1912) created a Governor of Bengal, established an Executive Council for Bihar and Orissa, and authorised the creation of legislative councils in provinces under Chief Commissioners The Indian High Courts Act (1911) empowered the Government of India to increase the number of High Court judges from 25 to so, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in 1915. The Government of India Act, 1919, confers on provinces a larger measure of independence of the Government of India; it distinguishes the functions of local governments and local legislatures from the functions of the Governor-General in Council and the Indian Legislature : it provides for the devolution of authority in respect of provincial subjects to local governments for the allocation of revenues to those governments and for the use under the authority of the Governor-General in Council of the agency of local governments in relation to central subjects; it provides for the transfer of some provincial subjects to the adminis-tration of the Governor acting with Ministers. It gives borrowing powers to local governments It lays down that the 8 major provinces shall be governed, in relation to reserved subjects by a Governor in Council, and in relation to transferred subjects by a Governor acting with Ministers, appointed from among the elected Members of the local legislative Council. confers extended powers on local legislatures For the Supreme or Central Government, it provides that the Legislature shall consist of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly. It provides for the appointment of an Auditor-General and a Public Services Commission on India. A Statutory Commission is to be appointed to years after the commencement of the Act for the tempose of enquiring, among other matters, as to the desirability of a further extention of the principle of selfgovernment in India.

INDIAN LAW.—The law administered in the Indian courts consists mainly of: (r) The enactments of the Indian Legislative Councils (imperial and provincial) and of the bodies that preceded them; (a) statutes of the British Parliament applicable to India; (3) the Hindu and Muhammadan laws of inheritance and domestic law; (4) the cus. tomary law affecting particular ca

# The Government of India. emperor of india—u.i.m. george v.

Secretary of State-The Rt. Hon. EDWIN SAMURL MONTAGU, P.C., M.P.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. Subject to the provisions of the Government of India Act and rules made thereunder, the Secretary of State can impose his orders on the Government of India, and no expenditure from Indian revenues is legal unless sanctioned by him and a majority of his Council. In matters requiring secrecy(e.g., foreign policy and the affairs of native States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office and at the office of the High Commissioner for India (see pp. 246,

The King-Emperor appoints the Governor-General, the Governors of the 8 major Provinces (Bengal, Madras, Bombay, the United Provinces, Bhar and Orisas, the Punjab, the Central Provinces, and Assam), the Commander-in-Chief, the Members of the Executive Councils of the Governor-General and of Governors, and the Judges of the High Courts. The appointments of Lieutenant-Governor are made by the Governor-General, subject to the Secretary of State's approval. The term of these appointments, except judgeships, is usually 5 years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council. The Governor-General's Executive Council now contains 8 members including the the Commander-in-Chief (of whom one-half must have served in India 10 years), as well as himself. Ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority. In accordance with the Government of India Act, 1919, and rules thereunder, the Indian Legislature will consist of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly (see p. 580 as to their constitution). Except as otherwise provided by or under the Act, a Bill will not be deemed to have been passed unless agreed to by both Chambers, but the Act confers powers on the Governor-General of securing essential legislation in emergencies, subject to disallowance by His Majesty in Council, of returning Bills for reconsideration, and of vetoing proposed legislation affecting the safety or tranquillity of British India. The Indian Budget is to be submitted to both Chambers, and to be voted on by the Legislative Assembly except in regard to certain specified heads, but the Governor-General in Council may act, notwithstanding a refusal or reduction of grants, where essential to the discharge of his responsibilities, and the Governor-General may authorise expenditure necessary for the safety and tranquillity of British India or any part thereof. Differences of opinion between the two Chambers may be referred for decision by the Governor-General to a joint meeting of members of both Chambers appointed for the purpose. Although the Government will not in future command a majority in the Indian Legislature, it is neces-

sarily given the power to reject adverse votes, since its responsibility is not to the Indian Legislature, but to Parliament. The seat of the Supreme Government is now at Delhi, the summer headquarters being atil at Simia.

summer headquarters being still at Simla.

Business is conducted by 11 Departments—
Finance, Foreign and Political, Home, Legislative, Revenue and Agriculture, Public Works, Commerce, Industry, Education, Army, and Railway. Each Department is in the charge of a Secretary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Viceroy's Executive Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his Council. The Governor-General himself superintends the Foreign and Political Department. The Finance Department deals with public accounts, loans, taxation, opium, currency, banking, mints, &c. The Foreign and Political Department conducts relations with Afghanistan, Nepal, and other conterminous countries, and, through its Political Residents and Agents in the various native States, supervises their administration and regulates their relations with the paramount Power. The Political Residents in the Persian Gulf, Muscat, and Turkish Arabia look after the commercial and political interests of India in those quarters. The Home Department deals with the civil service, judicial affairs, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in comparion with the Legalating Department. connexion with the Legislative Department. The most important subjects that come before the Revenue and Agriculture Department are land revenue and surveys, forests, agricultural development, famine, and meteorology. The Public Works Department deals with irrigation, roads, buildings, &c. The department of Commerce deals with trade and shipping, customs, excise, ports, post-office, telegraphs, &c. The department of post-onice, telegraphs, ac. The department of Industries deals with munitions, industries, stores, factories, &c. The Army is under the Army Department, of which the Commander-in-Chief has charge in Council. The Education Department has the control of education, local government, sanitation, &c. Railway administration is entrusted to a Railway Department, which is in the charge of the Commerce Member of Council.

British India is divided into 15 Local Governments and Administrations, viz.:—Under Governors, Madras, Bombay, and Bengal, still termed Presidencies, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces and Assam; under a Lieutenant-Governor, Burma; under Chief Commissioners, who are under the immediate authority of the Governor-General in Council, the North-West Frontier Province, British Baluchistan, Delhi, Ajmer-Merwars, Coorg, and the Andaman and Nicobar Islands. The Governors of Madras, Bombay and Bengal

The Governors of Madras, Bombay and Bengal are permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which in the District Officer, called Collector-Magniturate or Deputy-Commissioner, as the case may be. In authordination to Commissioner, who is the case of the case

#### PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.\*

rules made thereunder, the local governments are given a larger measure of independence of The Act distinthe Supreme Government. guishes the functions of local governments and local legislatures of the Provinces from the functions of the Governor-General in Council and the Indian Legislature. The Supreme Government is given authority over certain subjects, classified as "Central," such as defence, political relations, railways, tariffs, etc. Other administrative leads, classified as "Provincial" -viz, local self-government, public health, education, public works, water supply, land revenue administration, famine relief, agriculture, excise, administration of justice, etc., are wholly or partly handed over to Provincial Governments with responsibility, subject to certain limitations, within their own areas," for administering them. In the eight major of "Governos" Provinces—i.e., Madras, Bengal, Bombay, the United Provinces, Bihar and Orissa, the Central Provinces, the Punjab and Assam provincial subjects are further divided into "reserved" and "transferred subjects," the administration of, and responsibility for which, will rest with the Governor and his Executive Council and with the Governor and Ministers respectively. Ministers will be chosen from among the elected members of the Legislative Council by, and hold office during the pleasure of, the Governor They will be directly responsible to the Legislative Council

\* The areas and populations or the separate provinces are for limitsh territory only. The populations are according to the Census of 1911

Under the Government of India Act. 2529, and less made thereunder, the lecal governments subjects, but may be over-ruled by the Governor tegiven a larger measure of independence of if he considers their policy inconsistent with the Supreme Government. The Act distinct of the removabilities.

the discharge of his responsibilities.

The Act legislates for a transition from a bureaucratic to a self-government system and for the gradual transfer of more subjects to the Ministers. Matters of departmental or minor importance will be dealt with, as a rule, by the Governor, his Council, and the Ministers sitting in conclave, but the decision on reserved subjects will rest with the Governor in Council, and that on transferred subjects with the Ministers, subject to the Governor's intervention and control

Legislative Councils will have an elected majority, and normally a life of three years, but may be sooner dissolved by the Governor. The may be sooner dissolved by the Governor. previous sanction of the Governor-General in Council will only be required, in future, to the introduction of certain classes of Provincial Bills. The Governor has powers of veto in regard to proposed legislation affecting the safety or tranquillity of his Province or any part of it, or of another Province, and can secure legislation essential to the discharge of his responsibilities for reserved subjects Such Bills must be sent to the Governor-General for the signification of His Majesty's pleasure, but in emergencies the Governor-General may assent to them, subject to disallowance by His Majesty his Council. The Governor has powers of assenting to, of withholding assent to, or of returning for reconsideration, other Bills, but must in certain cucumstances send them to the Governor-General for consideration, who may reserve them for His Majesty's pleasure.

In Governors' Provinces and in Burma certain sources of revenue are allocated to the local governments as sources of provincial revenues, and the amount of contributions from local governments towards the support of the Central Government will be fixed for rgar-ss and successive years. The contributions proposed to be required to be made by local governments in rgar-ss are (in lakhs of rupees) Madras, 248; Bombay, 26; Bengal, 63; United Provinces, 240; Panjab, 175; Burma, 64; Central Provinces and Berar, as; Assam, 15. Borrowing powers are also conferred.

An important change is made in regard to Provincial Budgets, which will, in future, be voted on by the Legislative Councils, who are thus given, for the first time, a voice in the disposal of provincial revenues, but the Governor has power to act, in respect of a demand for reserved subjects, notwithstanding a refusal or a reduction of grants, if the demand is essential to the discharge of his responsibilities for the subject, and in cases of emergency he can authorise such expenditure as may be necessary for the safety or tranquillity of his Province. Certain heads of expenditure will not require an annual vote, thus avoiding a deadlock in case of irresponsible action by the Legislative Council in the matter of supply.

Of the members nominated to the Indian Legislature and Provincial Legislature Councils some will represent certain communities and interests. Males over an years of age possessing certain qualifications residence within the constituency and the possession of certain property qualifications, the payment of land revenue, rent, local taxes, income-tax or municipal rates) are eligible for the franchise. Women are not qualified for registration, but the disqualification may be removed in certain circumstances in any Province, or in all. The franchise is low, and will give the vote to small cultivators and some wage earners, and it is estimated that the first electorate will comprise over 5,000,000

(z) MADRAS (area, 14a,330 sq. miles; pop 41,405,404) was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 180z. With a coast-line of 1,730 miles the province has no good natural harbour, but an artificial hasbour has been constructed at Madras at great expense. The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oliseeds, cotton, indigo, spices, to-bacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. About 90 per cent. of the people are Hindus. There are about x,soo,ooc native Christians, mainly Roman Catholics. Many natives of the Presidency emigrate to Burna and Ceylon, some only temporarily. The languages principally spoken sre Tamii and Telugu. Madura (24,130) and Trickinopoly (smagns), famous for their Hindu temples, are the chief cities after the capital.

(a) BOMBAY.—The Island of BOMBAY was part of the dowry of the Infants of Portugal part of the dowry of the images of rottogat (a66a), and was made over by Charles II. to the East India Company in x668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. Sind was conquered in 1843. The province (including Sind, but not Aden and Perim, which are also attached to it) contains 122,979 square miles (about equal in size to the British Isles), with a population of 19,626,477 Eastern Sind is desert. The administration of Sind (which occupies about two-fifths of the Presidency) is in some respects separate. About 76 per cent. of the people of the Presidency are Hindus, and so per cent. Muhammadans. The Parsis, who are very prominent in trade, are mainly found in Bombay. Marathi, Gujarati, Sindhi, and Kamrese are the principal languages. Millet and other food-grains and oilseeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton mills of Bombay and Ahmedabad. The chief railway cotton - mills of systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (with the Indian Midland) eastwards; south-eastwards is the Madras and Southern Mahratta system; while Karachi (Sind) is the port for the extensive North-Western Railway system. Ahmedabad (ax6,777), Poona (xz8,856), Surat (xz4,868), and Karachi (xzx,903), the capital and chief port of Sind, are the most important cities. For Aden and Perim, see p. 595.

(3) BENGAL (area of newly-constituted province, 78.699 tq. miles, with population of 45,483,077) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but subsequently the province consisted of part of Bengal proper with Eihar, Orissa, and Chota-Nagpur. Fifteen districts of Eastern Bengal wave defacted uncort and combined with Bengal were detached in roos and combined with Assam, while one district from the Central Pro-vinces was added to Bengal. This partition was revoked in 1911, and Bengal now includes five Bengali-speaking divisions. Alout 53 per cent. of the population are Muhammadans and 45 per cent. Hindus The principal languages are Bengali and Hind. For the most part the province is a great alluvial plain, very populous and productive. The chief products are rice, into produces are the conditions are the produces are frequency of the Ganges Valley. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running north, and the Bengal-Nagnur, south, from Calcutta, are also important. The Governor is assisted by an Executive Council of three members, created in 1910 Important cities are Dacca (108,551), now the second capital, and Howrah (x79,006), a great jute-manufacturing centre adjoining Calcutta.

(a) The UNITED PROVINCES of AGRA and OUDH, called "North-Western Provinces and Oudh" until 1902 (area, 107,267 89 miles; pop 47.182.044), forms the upper part of the great Ganges plan to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. Originally (evoluting Oudh) it formed part of the Bengal Presidency, but in 1835 a separate administration was formed und r a Lieutenant-Governor. Oudh was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were con-bined. The chief products are wheat tired barley, pulse, tolacco, millet, cotton, sugar, and oilseeds. About 85 per cent. of the population are Hindus and 14 per cent. Muhammadans. Hindi and Western Hindi are the chief tongues The province is served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. In 1887 a Legislative Council was estab-Among the important cities may be named the ancient city of Agra (185,449), containing the Taj Mahal and other great works of architecture, the sacred Hinducity of Benares (203,804), the great manufacturing centre, Cawapore (178,557), Bareilly (129,462), and Meerut (116,227)

(5) The PUNJAB (area, 99,222 sq. miles; pop. 29,983,128) occupies the N.W. angle of the great northern plain of India, and derives its name from the "Five Rivers" which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849. Up to 1853 it was under a Board of Administration, who were then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 2859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being greatly extended, and are highly remune-rative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton The Punjab possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form the principal exports. Timber is scarce. More than half the population are Muhammadans, and more than a third are Hindus. The Sikhs number about 2,883,000 in the Punjab and Punjab States, to which they are mainly confined. Punjabi and Hindi are the chief languages. The various branches of the North-Western and Southern Punjab Railways serve the province. Amritsar, the sacred city of the Sikhs, has 152,756 people.

HIGH COURT, PUNJAB AND DELHI.

(6) BURMA is bounded by Tibet on the north, by China, French Indo-China, and Siam on the cast, and by Assan, Bengal and the sea on the west. It is the largest province, having a total area of spo.3mg. as miles, shout equal to Spain and Portugal, with a population of 12,125,217.

These figures include the Shan States and Chin Hills. Many immigrants come from Rengal, Madras, and China. Tenasserim and Aracan were amexed after the first Eurmese war in 1885, Pegu after the second war in 1886, and Upper Burms and the Shan States after the third war in 1885. The Shan States are administered by local sawbwas, or chiefs, under the superintendence of a political officer. The province is thinly peopled; but, owing to remarkable pros-perity, the population has increased over a per cent. in 10 years. The inhabitants belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. Burmese and Karen are the chief languages. Buddhism, now almost confined to Burms, so far as the Indian Empire is concerned, is the religion of 36 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above From there is upland, hilly country. Rice, the main product of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum, rubies, jadestone, and wolfram. The Irrawaddy and its chief tributaries, the Chindwin, the Shwell, and the Myitnge, form important waterways. The main stream is navigable beyond Bhamo, see miles from its mouth, and carries much traffic. There are considerable exports by land to Western China. The Burms Railways have reached Myitkina, on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwin basin. The Lieutenant-Governor of Burma has a Legislative Council consisting of 30 members, as nominated (including as officials) and a elected, besides a extra members.

(8) The CENTRAL PROVINCES and BERAR (area, Central Provinces alone, 82,057 sq. miles; pop. 10,859,146). The Central Provinces were formed in 1861 out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur The country, hilly and forest-clad, contains a large population of aboriginal tribes The people are mostly Hindus, and they speak mainly Hindi and Marathi The province, which is served by the Indian Midland, Great Indian Peninsula, and the Bengal-Nagpur Rai'ways, possesses coal and manganese ore, and produces rice, wheat, millet, pulse, oilseeds, and cotton There are cotton mills at Nagpur.

Since 1st October, 1908, BERAR has been amalgamated with the Central Provinces. Berar (area, 17,765 sq. miles; pop. 3,057,16s), which lies to the north of Hyderabad, was placed in British hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent (which was in zee3 incorporated in the Indian Army). In zees Berar was leased in perpetuity to the Government of India on payment of £167,000 a year to the Nizam. Berar is purely agricultural. It is very fertile, and yields cotton, millet, oilseeds, de. The chief language is Marathi, and most of the people are Hindus.

(12) British Baluchistan (area, 54,228,200, 200, 200, 424,422) was constituted a separate administration in 1838, under the Governor-General's Agent in Baluchistan, who also controls the affairs of the native States of Baluchistan up to the Persian froutier. The districts it comprises (Sibi, Quetta, Pishin, Thal-Chottalt, Nushki, Zhob, Chagai, Nasirabad, and the Bolan) were acquired partly from Afghanistan by the treaty of Gundamuk (1879), partly from the Khan of Kalat by arrangement. Baluchistan consists largely of mountains and sandy deserts, and is spansely populated. A large part of the people lend a pastoral, nomad life. In religion they are Senni Muhammadans. The Afghan-Baluch frontier was demarcated in 1896-7. To Chaman, on this frontier, a railway runs sid Quetta and is continued to Dalbandin, where there is a caravan route (198 miles), opened in 1896, with wells, rest-houses, telegraphs, &c., to Persian Seistan. The Khan of Kalat the head of a loose confederacy, receives about £12,000 per annum for quit-rents, subsidy, &c. British troops occupy Quetta, commanding the Bolan Pass, and have the treaty right to occupy any other position.

(24) DELHI.—This province (area, 557 sq. miles; pop. 321,828) was constituted on October s, 1921, out of the Punjab division of Delhi, in pursuance of the policy amounced by H.M. the King-Emperor at the Delhi Durbar in December, 1921, to move the capital of India and its seat of Government from Calcutta to Delhi.

Chief Commissioner, H. P. Tollinton (offg.) Rs. 4,000

(15) The ANDAMANS and NICOBARS (area, 3,148 aq. miles; pop. 26,459) form a chain of chain of silence 1858 Port Bisir, in South Andaman, lass been used as an Indian penal settlement. Much valuable timber, worked by convict labour. Is pled obtained. The Nicobar Islands, almost due? Power.

south of the Andamans, were first occupied by the British in 1869. They comprise 19 islands. The principal products are coo-mus. Chief Commissioner, Lt.-Col. M.W. Douglas, C.S. E.

The Laccadive Islands comprise 14 islands (nine inhabited), distant soo miles from the Malabar coast of the Madras Presidency, inwhich they are included. (Pop. 20,60c.)

Aden and Perim .-- From old time the peninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea traderoute between Europe and the East, has been an important trade centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great coaling-station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. Aden and Perim—a small unfortified island serving as a coaling station at the southern entrance to the Red Sea, occupied in 1857—form part of the Bombay Presidency, and have an area of 80 square miles and a population of 46,265 (1911). Aden is a free port. The traffic in (renz). Aden is a free port. The traffic in arms and ammunition is subject to special regulations. The total trade in 1928-12 was f. 10,045,000. In 1918-19, 1,425 vessels called at Aden, and 248 at Perim. The British Government has treaty engagements with, and subsidiases, the neighbouring Arab tribes, both inland and along the coast (Hadramaut), from the Straits of Bab-el-Mandeb to Museat territory at Ras Sair.

Aden: Political Resident, Maj. - Gen. James Marshall Stewart, C.B. ...per mensem Rs. 3,000

The Kuria Muria Islands, to the S. of Oman, have been in British possession since 1854. In 1854 the East India Company occupied Solotra (area, 1,400 sq. miles), 150 miles from Cape Guardafun, which has a pastoral Muhammadari population roughly estimated at 5,000, mainly Arabs. A formal protectorate was established in 1886. The Sheikh receives a small subsidy, and is pledged not to cede the island to any foreign Power.

#### INDIAN APPOINTMENTS.

THE higher civil administration of British India is recruited from four sources—x. Open competitive examination in England. z. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments.

The Civil Service of India.—The annual examination ordinarily commences in London Aug. z. Candidates must be over at and under at on Aug. z in the year of examination. Application for permission to compete must be made on or before June z, on forms that can be obtained from the Secretary, Civil Service Commission, London, W. z. Examination fee, 28. Selected candidates are on probation in England for one year, and receive an allowance of £ see if they pass their probation at one of the Universities or Colleges approved by the Secretary of State, conduct themselves well, and comply with all the rules laid down for their guidance. A final examina-

tion is held in Indian law, language, &c. An allowance of £40 on account of passage to India (£56 in case of passage to Indiagoon) will be paid to newly appointed civilians. In case of failure to pass the final examination, or failure to execute the usual covenant and to proceed to India, all allowances received must be refunded. The salary of a covenanted civil servant commences usually at Es. 7,200 a year. No person will be eligible for admission to the Indian Civil Service who has made before any tribunal established under the Military Service Acts, 1925, an application for the issue to him of a certificate of exemption from the provisions of those Acts on the ground of a conscientious objection to the

undertaking of combatant service.

Concessions as to the age limits, in the case of candidates who have served in the Agus or Mary, are made, and full particulars can be obtained from the Civil Service Commissioners.

The Indian Army. - Candidates for commissions in the Indian Army are required to pass the Army Entrance Examination held by Candidates the Civil Service Commissioners. must be between 17½ and 19 years of age (ax in the case of candidates already serving in the Army, for which the upper limit of age will be Of the cadetships for the Indian Army offered, some are allotted to King's India Cadets nominated by the Secretary of State for India and by the War Office, the remainder being offered to candidates in the order of their passing the entrance examination. At the end of the period of training at Sandhurst, cadets recommended for commissions are gazetted to the Unattached List for the Indian Army. On appointment to an Indian regiment, an officer's minimum initial pay is at the present moment Rs. 485 a month (equals £42 ros. at present exchange of as. per rupee). Regulations and examination papers can be estained from His Majesty's Sta-

tionery Office, Imperial House, Kingsway, W.C. Indian (Imperial) Police Force—It has been announced that a competitive examination will be held in London and other centres in the summer of 1921, in conjunction with the Army and Air Force Examination. A fee of £4 will be required from caudidates examined in London, and a larger fee from those examined in other centres. At the time of a candidate's birth his father must have been a natural-born British subject, but exceptions to this condition may be made in the case of candidates who have served in His Majesty's Armed Forces during the war. Candidates must be above 19 and under 22 years of age on Aug. 1, 1921; must be unmarried, and if they marry before reaching India will be required to forfeit their appointments. Applications to compete at the examination must be made on forms to be obtained from the India Office, Whitehall, London, and must be returned not later than April 30, zone. Successful candidates will be required to undergo a strict medical examination; will be examined as to their ability to ride, and will be required to provide themselves with uniform, towards which a contribution of £30 will be made by the India Office. Nowly appointed officers may be required to provide themselves, in India, with a horse and saddlery, towards the cost of which the Government may contribute up to Rs. 600. Free passage to India will be granted to probationers. The initial pay for officers recruited in the United Kingdom is Rs. 325 per month, plus an overseas allowance of Rs. 125 per month in the case of probationers with non-indian domicile. The pay proceeds by increments to Rs. 200, and thence to Rs. 1,400 per increments to Rs. 500, anotherice to Rs. 7,400 per month, subject to efficiency hars. There are superior appointments (not reserved, however, exclusively for officers so recruited), with pay proceeding from Rs. 7,600 to Rs. 3,000 per month. Officers are subject to certain Leave, Pension, and Provident Fund Rules, details of which may be obtained from the India Office.

The patronage of the Secretary of State for Table is even all and to now other decreases.

The patronage of the Secretary of State for India is small, and is now chiefly dependent on the requirements of the Government of India in the Judicial Department. Some appointments to the Indian Reducational Service, which includes teaching and inspecting posts, are made on the recommendation of a Selection Committee, constituted by the Secretary of State for India, from among candidates who must have received a liberal education and who seems to be most suitable by the Board of Education

or the Scottish Education Department. age is usually from as to so. Appointments are in the first instance for two years, the salary beginning at Rs.400 a month, rising by annual increments of Rs 50 a month to Rs.2,250, with prospects of promotion if service is extended. Officers of non-Indian domicile receive addi-Officers of non-transactions of Ra. 250 per mouth during the first few years, but the amount is increased later. Initial salary and date of increments will be ordinarily determined in the continuous of the cont future by age. Appointments of Chaplains of the Church of England and the Church of Scotland to the Indian Ecclesiastical establishments are normally made, on the occurrence of vacancies, by the Secretary of State for India from amongst caudidates nominated by the Indian Chaplaincies Board of the Church of England and the General Assembly's Committee on Indian Churches respectively. Church of England candidates must be between a7 and 34 years of age, and Church of Scotland candidates must be under 34 years of age. On appointment chaplains are on probation for two years and receive a salary of Rs. 600 per month, rising by annual increments to Rs. 1,300 per month.

The superior Engineer establishment of the

Indian Public Works Department is engaged on the construction and maintenance of the various public works undertaken by the State in India. In rose the Europeans appointed by the Secretary of State for India were selected from among candidates who had served in His Majesty's forces during the war and who were in possession of certain University engineering degrees or diplomas, or, not being able to produce one of the recogon, is defined as the following had received a general education high enough to fit them to receive proper professional training and to become members of the engineering profession, had received some technical education in engineering, and had some practical training and experience in engineering as civilians and in military or quasi-military service. In 1920 only those who had been born on or after Aug. s, 1893, and on or before Aug. z, 1898, were considered. The pay and allowances of Europeans so appointed commence at Rs. sas a month in case of men under a4 years of age, but candidates, if above a4, are credited with service as though they had been appointed in their a4th year. The pay rises by annual increments to Rs. x,6ag per month, with possibilities of promotion to higher posts. There is a prospect of pension, and there is also a Provident Fund. European candidates in India and Mesopotamia, if considered suitable, were required to appear before a Local Advisory Committee in India. Appointments are usually made in July in each year. From time to time appointments to the Locomo-tive, Carriage, Wagon and Traffic Departments of Indian State Railways are made, full information regarding which can be obtained from the Public Works Secretary, India Office, London.

Public Works Secretary, India Office, London.
Further information regarding these and other
Indian appointments, viz., to the Indian Agricultural, Civil Veterinary, Geological, Medical,
Queen Alexandra's Military Nursing, Royal
Indian Marine and Bengal Pilot Services, and of
Forest Engineers, can be obtained, on application, from the Under-Secretary of State, India
Office, Whitehall, London, S.W. Pay, Leave,
and Pension Regulations of the Indian Services
are contained in the Civil Service Regulations,
which can be consulted at the India Office.

Budget

1920-81.

£23,008

GROSS AND NET REVENUE AND EXPENDITURE. The statement of Green Revenue and Expenditure exhibits all revenue receipts and payments therefrom, except that railway working expenses and the surplus profits paid to certain railway companies are deducted from revenue. A clearer view of the financial position is obtained from the following statement of Net Revenue and Expenditure, in which departmental receipts, which are a set-off against expenditure, have been deducted, as also interest charges and working expenses of railways and irrigation works, refunds and assignments, cost of cultivating and manufacturing opium, &c.

In 1925-16 there was a deficit of Revenue as compared with expenditure of £1,188,661, in rend-ry a surplus of £7,476,720, a surplus of £3,65,000 in rezy-18; a deficit of £3,820,000 in rezg-19, an estimated deficit of £10,074,000 in 919-20, and an estimated surplus of £2,515,000

CAPITAL EXPENDITURE.-The following statement shows capital outlay, not charged to Revenue, on State Railways, Irrigation Works and the new capital at Delhi.

Revised Proposed Estimate Estimate 1918-19. 1919-20.

State Railways... .... £4,857 £9,100 £13,277 Irrigation Works..... 236 237 286 575 New Capital at Delhi BURDEN OF TAXATION.—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, and Customs duties which fall on persons in the Native States, the burden in 1918-19 was 3s. 3d. per head, or, if land revenue (which is akin to rent) be added, 4s. rod. per head. The Budget for 1917-18 introduced a super-tax on large incomes, enhanced the export duties on raw jute, increased the import duties on cotton manufactures, and imposed, as a war measure, a surcharge on railway goods and traffic. The Budget of 1919-so introduced a duty of 50 per cent on excess profits, but this tax was discontinued in 1920-21. The Budget for 1920-21 amended the super-tax law, with the objects of, firstly, bringing the law relating to super-tax into relation with that governing income-tax, and, secondly, replacing the super-tax on the

income of companies in excess of Rs 50,000. DEBT AND ASSETS.—On 32 March, 1920, the debt of India amounted to £421,005,000.

Miscellaneous obligations (Savings Bank believes a charge of £3,358,000 for various railway annuities. Its advances to Native states, corporations, agriculturists, &c., stood at £13,808,000, and to railway companies £3,336,000. Other assets were the Gold Standard Reserve of £36,344,000, and the cash balances in England and India, £12,004,000 and £2,358,000 are £2,358,000

undivided profits of Companies and firms by a

new super-tax at a flat rate on the whole taxable

respectively

LAND REVENUE.—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal and Bihar and Orissa, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed; elsewhere generally the assessments, or settlements, are revised periodically (usually once in so or 30 years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (zamindari), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Bombay and Sind, Assam, and most of Madras) the raigativari tenure prevails, and each raigat, or peasant proprietor, holds direct from the State. In temporarily settled zamindari districts the land revenue usually amounts to about so per cent. of the rental paid to the landlord by the cultivating tenant, while in temporarity settled raiyatwari districts the revenue varies from so per cent. of the gross produce down to much smaller cent. of the grow produce down to mann smaster proportions, averaging about 8 per cent. Frivate improvements are examplifrom assessment. The grow land revenue paid to the State in 1918-19 amounted to far-gaines, of which it reasons was due to invigation and credited under that head.

THE OPIUM ENVENUE.—Poppy may now be grown only in parts of the United Provinces (Bengel opium) and in the Central Indian (Malwa) native States. Except in these States the manufacture is a Government monopoly. In 1918-19 5,102 chests of Bengal opium were sold for export, in addition to 8,666 chests sold direct to Gevernments of Hong Kong, Straits Settlements and Notherlands (Indies), etc. The gross revenue from Bengal opium, including the value of opium sold by the Excise Department for consumption in India, was £3,389,000. The expenses of production, &c., were £1,307,000.
Formerly, most of the opium experted from India was consumed in China; but the Government of India, in furtherance of the efforts of the Chinese Government to suppress the growth and consumption of opium in China, decided in 1907 to reduce progressively the amount of Indian opuum exported to China, and as from 31 March, 1917, export of Indian opium to China is prohibited.

Exciss. - Licence fees and duties are levied on the manufacture and sale of intoxicating liquors, opinm, and other drugs. The revenue, owing partly to stricter administration, and partly to enhanced duties, has greatly expanded in recent years, and amounted to £11,488,000 net in 1988-19. Reforms in excise administration are

in progress.

CUSTOMS.—The net revenue was £11,580,000 in 2018-19. (For tariff see page 602.) The export duty on 11ce yielded £740,000, and the countervailing duty on Indian cotton goods Loaz, coo in 1918-19. New and enhanced duties were brought into effect on x March, 1926, and x March, 1927.

INCOMR TAX is levied on non-agricultural in-

comes at the following rates :-

A	nnual .	Income	P	Rate of or Rupee	'Tex. = per £
Rs.	2,000	and over		5 pies	6% d.
20	5,000			6 ,,	7½d.
	10,000		•••••		11 ¼ d.
. "	25,000	. 12		2 ,,	18. 3d.

Super-tax is leviable in addition to ordinary income tax on incomes of individuals and registered firms above Rs. 50,000, of Hindu undivided families above Ra. 75,000, at rates equal to zs. 3d. to 3s. 9d. in the £, and on incomes of companies above Ra. 30,000 at a flat rate of zs. 3d. in the £.

STANPS.—Stamps yielded £5,985,000 (net) in 1928-19. About two-thirds of the revenue is from court fees and one-third from commercial stamps.

SAIT.—The sait duty was reduced from Rs. 2½ to Rs. 2 a maund (\$2 lh.) in 2903, to Rs. 2½ in 2905, and to R. 1 is 1907. It was increased to Rs. 2½ with effect from 2 March, 2915.

FORESTS.—About 99,000 square miles of forests are reserved and scientifically worked by the State, while about 130,000 square miles besides are under State control. A third of the

revenue comes from Burma.

POSTS AND TELEGRAPHS.—The Post Office in 1918-19 conveyed 1,194 millions of letters, poet-cards, newspapers, &c., and issued over 35 millions of money orders. Inland letter rates are the lowest in the world. The length of telegraph lowest in the world. The length or telegraph are losses in India on 32 March, 1919, was 325,000 miles, and the number of messages sent in 1918-19 was over at millions. Their capital cost to the end of 1918-29 was £5,121,000. The Indian Postal and Telegraph services were amalial on 1 April, 1914. The combined services were analytically and the post 1918-29 was £5,121,000. The Standard Reserve, now called the Gold gamated on 1 April, 1914. The combined services with this exception the whole of the net profit to the end of 1918-29 was £5,121,000. The manufacture of 1918-29 was 2018-29 and 1918-29 was 1918-29 and 1918-29 was 1

of £x,368,200. The Indu-European Telegraph Department yielded a profit of \$4,127 per cent. on

Department yassect a prout or aging you was well as easiful expenditure of £1,265,000.

BAILWARS.—Nearly all the railways in India are owned by the State and administered-by a Railway Board, though many are leased to and worked by companies. The mileage open for worked by companies. The mineage open for traffic on 3x March, 1929, was 36,666, while the mileage under construction was 1,803. Of the mileage open about 50 per cent. was on the standard gauge (5½ ft.), and about 4x per cent on the metre gauge. On the 31st March, 1929, the total capital at charge was £403,375,000. The net carnings of the railways in 1918-19 amounted to £29,637,000. The number of passengers increased to 47s millions, and the conds traffic to on million tons. Rates are goods traffic to op million tons. Rates are very low, third-class passengers travelling on the average over four miles for a penny. The net working profit from State railways was £10,858,000 in 1918-19. The total capital ex-£10.858,000 in 1918-19. The total capital ex-penditure on State and other railways in 1918-19 was about £3,158,000.
IRRIGATION.—The total capital outlay on

State irrigation works up to 3xst March, 2929, was £50,941,000, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State, after payment of interest charges, of about £2,254,000. The area irrigated by Government brigation works was about so million acres, while the annual value of the crops raised is estimated at over 125 per cent. on the capital outlay. Two-fifths of the irrigation revenue comes from the Punjah.

irrigation revenue comes from the Punjah.

Home Charges.—The net expenditure in England, chargeable to Revenue, amounted in 1918-19 to £20,000: Interest on Railway Debt and Annutities, £5,95,000: Interest on Ordinary Debt and Management of Debt, £1,950,000: Stores, £5,700,000 of Which £1,450,000 was for Marine and Military Stores; payments for Hritish forces, troop service, 60. £1,250,000; Civil annuties, pensions, &c. £2,250,000; Civil annuties, pensions, &c. £2,250,000; Civil annuties, pensions, &c. £3,250,000; Furlough payments, civil and military, £350,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling.

CURRENCY. - The principal coin in use is the alver rupee, containing 163 grains of fine silver and 15 grains of alloy, and weighing in all 180 grains troy. Up to 1893 the Indian Mints were open by law for the unre-stricted comage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from 1871 to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fail, but subsequently it rose, and between 1898 and rote, was practically stable at rs. 4d. The Act of rage made the British sovereign legal tender in India at the ratio of rg rapes to the sovereign, the rupee, however, remaining also legal tender to any amount, but the ratio was altered to so rupees in som. In some and

g. maintaining the rate of exchange between lagland and India. On as March, 1922, the aveatments of this fund in sterling securities anounted to £35,344,000 (estimated value), while £352 was held in cash in England. In lune, 1922, it was decided that no portion of he profit on coinage will be used for railways ill the total sterling assets of the Reserve mount to at least £25,000,000. India has a saper currency. The r, 1%, 5, 10, 50, and 100 upon notes are legal tender everywhere in udia, but other notes only within their circles of saue. In 1928 a branch of the Eoyal Mint was stablished at Bombay for the minting of gold

ARMY.—In peace time, the Army in India consists, first, of British troops, about 76,000; and, secondly, of Indian troops (largely Muhammadans), about 160,000. In addition, he native Army Reserves number nearly 10,000 men, and the Imperial Service Troops urnished by native States contribute 21,000, ncluding cavalry, transport corps, and sappers. further, there are 38,000 European and Eurasian volunteers (efficients). For police duties and frontier service the regular military is supplemented by frontier militia and local levies. During the period (1902-9) when Lord Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army. On x June, 1907, there was a redistribution of the Army of India. The net military expenditure (including marine) has risen from about £20,000,000 in 1912-13 to about £44,480,000 in 1918-19, and to an estimated expenditure of £40,000,000 in x920-ax. During the war of zoz4-z8 the Government of India recruited on a voluntary basis over 800,000 combatants and more than 400,000 non-combatants, giving a grand total of about x'3 million men. z, zzg,ooo officers and men were sent on service overseas from India; the total Indian casualties were roz, coo. In rozz the bar hitherto precluding the admission of Indians to King's Commissions was removed; the pay and pensions of the Indian soldiery were improved. It is proposed to form an Auxiliary Force on a volunteer basis. The "Esher" Committee, appointed in 1919, reported in 1920, and made various recommendations (see p. 986), which are now under consideration. Ague is the chief cause of sickness among British troops, and enteric fever the chief cause of death.

The ROYAL INDIAN MARINE consists of ten sea-going vessels, and numerous smaller steamers and launches.

eleven Universities, viz., those of Calcutta, Madrax, Bombay, Allahabad, Benares, Patna, Dacca, Adigarh (Mahammadan), Lahore, Hyderabad and Mysore. There are movements for compulsory elementary education. In State institutions education is secular. The institutions in 1918-19 numbered 197,000 and the scholars 7,037,000, including 1,313,000 females. Of the institutions, about 70 per cent. are maintained by the State or aided by grants, the rest being private and unaided. Of the total expenditure on education in 1918-19, \$8,658,000, £2,264,000 came from fees, and £4,78,000 from provincial revenues or local and municipal funds. The census of 1911 squares and 1911 senses of the same services and so females per thousand can read and write.

LOCAL SELF-GOVERNMENT, municipal and rural, in its present form, is a product of British rule. The municipalities at the end of 1918-19 numbered 731, controlling a total population of nearly 17½ millions, and receiving an income of £4,650,000 from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c.) and £8,475,000 from other sources (excluding loans). Out of 9,943 members of municipal bodies 9,179 were Indians, and 8,220 were non-official. In almost all districts in British India there are local district boards, partly representative Nearly one-half of their total expenditure of about £5,978,000 in 1918-19 was devoted to civil works, one-fourth to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND FRISONS.—There are

JUSTICE, POLICE, AND PRISONS.—There are about xx,ooo officers exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are Indians. In 1918 a, 150,000 civil suits were instituted; x,930,000 persons were tried, and 919,000 convicted, in criminal cases, of whom 534 were sentenced to death, a, 149 to transportation, and 253,734 to imprisonment. The strength of the police in 1918 was 24,345 officers and 188,447 men. There were 774 prisons, with a daily average of 116,000 prisoners, in 1918. At the convict settlement of Port Blair (Andamans) there were 124,212 prisoners on 2x March, 1920.

12,42 prisoners on 3: March, 1919.
VITAL STATISTICS.—The reporting of vital occurrences is still defective, and proposals have been formulated with a view to securing more complete and accurate vital statistics. The recorded death rate for British India in the decennium ended 1913 ranged between 28° ar per 1,000 in 1918, the increase being mainly due to influenza, there being over 7 million deaths from this cause. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhoa, smallpox, and since 1806 plague being other chief causes. The reported deaths from plague up to the end of 1918 were about 10,465,000 in India as a whole. Over 25,000 people were killed by snakes in 1918. In 3,127 hospitals and dispensaries, maintained mostly from public funds, 25,600,000 patients were treated in 1918. The number of persons vaccinated was 9,000,000. According to the cenaus of 1911 there were 110,000 lepers.

SURVEYS.—The Survey Department superintends forest and cadastral surveys, as well as trictonometrical and topographical surveys, special explorations, and map production. Marine, geological, botanical, and archeological surveys are in operation. The Meteorological Department is of great service in forecasting rainfair.

TRADE OF INDIA.—Among the countries constituting the British Empire, India comes second to the United Kingdom itself in the volume of metals and ores, rubber, chemicals and oils. its sea-borne trade, which almost equals that of Canada and Australia combined. During the five years ending 1913-14 both imports and exports were, on the average, twice as great as they were as years ago. The ordinary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure. The above table exhibits the leading figures for the last five years in thousands of pounds sterling. As the publication of the treasure figures has been temporarily discontinued, it is not possible to give the

total imports and exports for 1917-18 to 1919-20.
In 1913-14 both imports and exports of merchandise were of unprecedented magnitude, but the outbreak of war during the course of the year x9x4-x5 brought the figures for the year down to the level at which they stood five or six years earlier. There was, however, a recovery in 1916-17. The rise in prices was, and continues to be, a very potent factor in the increase in values. During the year 1919-so as compared with 1918zo the value of the imports of merchandise and Government stores increased by £22,712,000 and the exports by £51,929,000. These figures and the exports by £5x,939,000. These figure exceed all previous records. In imports the principal articles showing increases were:— In imports the principal arucies anowing increases were:

singar (£,2,00,000), mineral oils, chiefly kerosene
(£,2,768,000), machinery (£,2,05,000), iron and
steel (£,2,56,000), motor cars, motor cycles, &c.
(£,365,000), railway plant, &c. (£,365,000),
silk goods (£,2,77,000), grain, &c. (£,365,000),
copper (£,94,000), hardware,provisions, fruit and
vegetables, glass, raw silk, wood and timber. There
were degreases in order warm (£,200,000), ichmit were decreases in cotton yarn (£3,005,000), chemicals (£587,000), woollen manufactures (£384,000), paper (£25,000), salt, tea-chests, spices, cigar-ettes, &c., apparel and haberdashery. Japan did not maintain its former position in

the Indian market for textiles.

In the export trade raw cotton increased by £18,415,000, seeds by £10,007,000, cotton yarn and manufactures by £9,532,000, hides by £9,536,000. Exports of lac, copra, test, leather, &c., increased. The chief and

As will be seen, the bulk of the imports consists of manufactured articles, while two-thirds of the exports consist of food tobacco, and raw materials.

The following table shows the distribution of the Indian private sea-borne trade in 1919-so:

Countries.	PRIVATE MERCHANDINE ONLY				
Total Value (occ omitted)	Imports £138,677	Exports £ 206, 166			
United Kingdom	Per cent. 50'4 0'9 0'7 10'4 1'2 1 8 1'3 9'2 2'9	Per cent 30'0 5'0 8'5 0'6 3'5 3'5 8'8 25'0 2'3			
Mauritius	06	1'8 0'4 35'7			
All other countries	2.8	17.5			

In imports, the United Kingdom comes easily first with so per cent. of the total, but is much less prominent in exports from India, on account of the wide demand for India's raw produce for food and manufactures England reexports a large quantity of her imports from India.

CUSTOMS DUTIES .-- The Indian Tariff (Amendment) Acts, 1916 and 1917, introduced new and enhanced Customs duties with effect from x March, 1916, and 1 March, 1917, respectively. The general import tariff, which has stood at 5 per cent ad valorem since 1894, was raised to 71% per cent. The principal exceptions to the general rate are as follows:—Cotton yarn and thread are exempt, but the duty on other cotton goods is 7½ per cent, an Excise duty of 3½ per cent, being levied on those weven in Indian mills. Arms and ammunition pay so per cent., sugar so per cent., cigars and cigarettes so per cent., spirits generally Rs. 11½ a gallon, sait Rs. 1½ a maund (8s lb.), silver coin or bullion As. 4 an ounce, silver plate, silver thread and As 4 and others, sirver priors, sirver of the wire, and silver manufactures to per cent., refued petroleum As. 1½ a gallon (with an additional 6 as per gallon on motor spirit; an excise duty of 6 as, per gallon is levied on motor spirit produced in India), coal As. 8 a ton Iron and steel goods, grain, teathers, which we have the produced to the steel goods. chests, printing materials, machinery other than cotton machinery, railway materials, and a few other articles pay at per cent. Gold, living animals, raw hides, skins, raw cotton and wool, certain agricultural requisites, cotton machinery certain agricultural requisites, could machinery quinine, and a few other articles are free. There are export duties of As 3 a maund on rice, Rs. 1½ per 100 lb on toa, Rs. 4½ per bale of 40 lb on raw jute other than cuttings, in the case of which the rate is Rs. 1½ per bale; Rs. so per ton on jute sacking, Rs. 3s per ton on hessians, and 15 per cent. ad valorem on raw hides and skins, with a rebate of two-thirds of the duty on hides and skins exported to countries

within the British Empire.
SHIPPING.—In 1928-19 the number of vessels engaged in the foreign trads which entered and cleared at ports in British India was 9,492, with a tonnage of 10,480,000. Of this tonnage, 90 per cent. was under the British flag.

PORTS.—The chief ports are Calcutta, Bombay, Karachi, Rangoon, and Madras. These ports are administered by port trusts having wide powers, but subject to Government supervision.

FOREIGN LAND TRADE OF INDIA .- The most important countries in the land trade are Nepal and the Shan States
The Imports of merchandise and treasure in 1919-20 were £ 10,310000, and the exports £9,495,000 (12 months)
AGRICULTURE is by far the most important

occupation of the people of India. In British territory in 1918-19, as million acres were cropped, a decrease of 37 million acres as compared with 1917-18, due to the widespread failure of the monsoon of rors. Of the total area cropped about 8 per cent. was under wheat, 34 per cent. under rice, and 37 per cent. under other food-grains and pulses, 5 per cent. under oilseeds, and 8 per cent. under cotton, jute, and other fibres Jute cultivation has been extraordinarily profitable. Sugar, tea, and tobacco are other important crops. The total area under irrigation was 47 million acres. The agricultural departments (central and provincial) which have been much developed since 1906, supply information as to crop prospects, new staples, manures, crop experiments, implements, cattle-breeding, &c . and distribute

seeds. There is also a civil veterinary department.

BANKS AND CO-OPERATIVE CREDIT SOCIETIES. -Besides the three Presidency Banks, closely associated with the Government, there are jointstock banks, European and Indian, and many small native banks. Much success has been achieved in rural districts by co-operative credit societies. In 1918-19 there were 1949 central,

societies. In 1922-19 there were road central, sp.65x agricultural and 1,500 non-agricultural societies, with a total membership of 1,117,000 and a capital of £10,763,000.

MINERALS—The output of coal in India in 1920 was 25,628,000 tons. The production has much increased in recent years. Nine-tarths of the increased in recent years. Nine-tenths of the total comes from Bengal and Bihar and Orissa. The production of crude petroleum in India (chiefly Burma) has increased from zo million gallons in 1897 to 306 millions in 1919. The production of salt is about 1,764,000 tons. The production of manganese ore in 1919 was about 507,000 tons, and of saltpetre 18,000 tons. The yield of gold (nearly all from Mysore) was about 507,000 oz. in 1919. There is a considerable output of mica and a fluctuating output of rubies and jade. Monazite and wolfram have now taken an important place in the list of minerals of economic value produced in India. The output of the former in 1919 was 2,024 tons, and of the latter 3,570 tons.

MANUFACTURES. - In India the ancient village handicrafts still survive, though they suffer more and more from the competition of machine-made goods. Cotton-weaving is by far the most important hand industry. Power mills have grown up under European auspices, but are now largely owned by natives. The sec cotton mills at work in British India and Native States in 1918-19, mostly in Bombay and Ahmedabad, contained 6,592,000 spindles and 226,000 looms. Up-country cotton mills have increased. The production in 1918-19 was 615 million ib. of yarn (mostly of low counts) and 350 million lb. of weven goods. There is a tendency to produce finer yarm and to pay more attention to weaving. The 56 jute mills, mostly situated in or near Calcutta, con-tained &c.oco spindles and 40,000 looms. There were, in 1919, 2 woollen and 9 paper mills, 26 breweries, and various other factories.

N.B.—There are also rr other chiefs entitled to salutes of rr guns.
† The present chief has a personal salute of two additional guns

### STATES OF THE RULING PRINCES AND CHIEFS OF INDIA.

THE States in India whose chiefs are in subordinate alliance with, or under the suzerainty of, the King-Emperor, comprise about two-fifths of the area, but only two-ninths of the population of India. Their administration. with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States; the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction; and in case of misrule the Supreme Government can dethrone the chief or temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay tribute, most do not. Tributes aggregating 5.504.000 (£833.000 from Mysore) were paid to the Government of India in 1918-19. Generally speaking, the States are governed by their Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a

group of States. A common characteristic of all Indian States, important or insignificant, is that in their territory British Indian law does not run. For them the Legislative Councils of the Governor-General or of the Provincial Governments cannot legislate; and over them the High Courts or Chief Courts of the Provinces bave no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta), and Berar are still technically Native States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petry chiefs. Excluding these territories, the Indian States have a combined area of 702,853 square miles, and a population of 70,285,854. They maintain in the aggregate a considerable body of troops of inferior military organisation in addition to their Imperial Service troops. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of Indian States served in almost every Indian campaign of the 18th republication. Lord Curzon inaugurated an Imperial Cadet Corps of Indian princes and nobles. The States vary greatly in size and importance. Hyderabad is nearly as large as Great Britain, and the Nisam enjoys a very large revenue. On the other hand, in Kathiwar and

elsewhere, where family custom has led to minute sub-division, there are many chiefs of single yillages. In these petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over an Indian State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connexion with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the Indian States, large and small, number 693, only about soo are of any real importance. The majority represent the scattered military chiefships which sprang from the rains of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1910, when a new Indian State was created out of the family domains of the Maharaja of Benares.
The salutes enjoyed by the Indian princes

indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 603-604 are the names of 73 ruling chiefs who have salutes of eleven guns or more, with some particulars of their States. Some well-known Indians of title, such as H.H. weit-known Indians of title, such as Lin-the Agha Khan, G.C.S.I., G.C.I.E., the Maharaja of Darbhanga, G.C.I.E., and the Maharajah of Birrdwan, K.C.S.I., K.C.I.E., are not ruling chiefs. The States of Hyderabad, Mysore, Baroda, Kashmir, Sikkim, and Kalat, and shose belonging

to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. The remainder, chiefly minor States, are under the supervision or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderahad, Mysore, Barods, Kashmir, Jaipur, Udaipur, Gwalior, Indore, and Travancore and Cochin. The Indian States may be thus classified:—

z. Hyderabad, the premier State in India (capiin India (special terms of the first state in India (special) Hyderabad, pop. 500,653—the fourth city in India). This State is in the centre of the Deccan or central plateau of Southern India The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Vicercy of the Deccan in 1718, and then independent of the Mogul Emperor. Telugu and Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranteed Railway is the principal line. s. Mysore. This State, situated on a plateau in Southern India, was administered by the Indian Govern-ment from 1831 to 1881, when it was restored to native rule, under a somewhat strictly framed instrument of transfer. In Dec., 2923, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the Feudatory Chiefs of India. Kanarese and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysore has important goldfields. 3.
Buroda, situated in Western India in Gujarat and
Esthiawar and much interlaced with British districts. The selenter Gaskwar was the adopted

heir of the ruler deposed in 1875 for misgovernment and misconduct. 4. The Himalayan Hill States, west of Nepal, including Kashmir. The important frontier State of Kashmir (capital, important frontier State of Kashuw (capital, Srinagar, pop. 126,344) was granted to Gholab Sing by Lord Hardinge, after the First Punjab War (126). It comprises Jammu, Kashurir, Ladakh, Gilgit, and Baltistau. A British force stationed at Glight wat hes the northern passes and controls the fendatory chiefships of Hunza and Nagar; while on the west the subordinate chiefship of Chitral is occurred by British traces despudies for their occupied by British troops, depending for their support on the Peshawar border. 5. Sikkim, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the between Nepsi and Brutan, acknowledged the British protectorate in 1800, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention. 6. The Sikh States, in the Sirhind plain, south of the Sutlej. The most important of these is Patiala. 7. Rajputana, comprising the ancient soversignities lying between Sind and the United Provinces. Rapputana (pop. 10,530,432) extends some 460 miles from north to south, and is 330 miles in breadth, and is larger than the British Isles. About half of the area is desert. It comprises so States of varying size and importance. Of these 17 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are Jodhnus (Marwar), Udaipur (Mewar), and Jaipur. The (Marwar), Udaipur (Mewar), and Jaipur. Rajput dynasties, the most ancient in India, go back before the Mogul Empire, and resemble feudal monarchies. 8. The States of Central India, lying to the north of the Nerbudda and India, lying to the north of the Nerbudda and to the south and east of Rajputana, although in the aggregate one-third less in extent than those of Rajputana, are nearly four times as numerous. All but 17 are petty chiefships. The most important are Greatior and Indore, which include between them one-half of the whole area. The 31 minor States of Bundeikhand (largest, Revei) are in political relation with the Central India Agency Bhopul, one of the principal Muhammadan States in India, is now for a fourth generation under female rule. now for a fourth generation under female rule.
g. The Malayalim States of Travancors and Cochin, lying together in S.W. India. These important States, attached to Madras Presidency. portant States, attached to Biadras Fresidency, represent ancient Hindu dynasties. 2c. The three northern Muhammadan States of Khairpur (Sind), Bahawalpur, and Rampur. 2r. Kalat (including Makran and Kharan) and Las Bela, with tribsi areas in the possession of the Marri and Bugti tribes. 2s. Gujarat, including Kutch and the numerous petty chiefships of Kathiawar. 23. The Southern Mahratta States. 24. The numerous Afghan and Baluch tribes of the N. W. frontier, inhebiting the mountains from the north of inhabiting the mountains from the north of inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of Sco miles. The names of some of these tribes, Waziris, Orakzais, Afridis, &c., have become familiar owing to the many expeditions against them. 18. The aboriginal Good and Kol tribes, under petty princes of aboriginal or Rajput blood, in Chota-Nagpur, Orissa, the Centrair Provinces, and the Jaipur (Vizagapatism) Agency, 75. The Indo-Chinese group of States, and the number our shill tribes of the N.E. frontier.

## Countries Contiguous to India.

NRPAL

Sovereign, Bis Majesty Maharaja Dhiraja Trib-huhana Bir Bikram Jung Bahadur Shah Bahadur Shamaher Jang ; suc 1911. Salute in

British territory, at guns. Prime Min., H.H. Maharaja General Sir Chandra Shamsher Jang, Bahadur Rans, G.C.B., G.C.S.L.

G.C.M.G. G.C.V.O., D.C.L.

Mepai (area, about 54,000 sq. miles; pop. 5,539,092) lies between British India and Tibet on the S. shopes of the Himalayas, and includes Mt. Everest (39,24; ft.). Amid the sterile mountains lie many fertile valleys, The lower hills are covered with the state of the Amid the sterile mountains. with jungle, in which wildanimals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces. In 1989-30 its exports to British india were 5.343,000.\* while its important to fr., 785,000.\* The chief trade route is that between Kathmandu and the Bengal frontier 6 miles). Nepal experts rice and other grains, hides offseeds, ghi, cattle, jute, &c., and imports cotton goods and yarn, sugar, salt, spices, metals, &c. The revenue, realised chiefly from land rent, forests, customs, &c., is over £1,000,000.

The aborigines are Mongolian in type, and their religion is Buddhism. The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be Rajputs. Their frequent aggressions led to a war with the British in 1814-6 Relations have now long been friendly. The policy of sectorion is, however, consistently followed by the native rulers The real political power rests with the Prime Minister, who paid a most successful visit to England in 1908. British Envoy does not interfere in internal affairs. The army numbers about 45,000. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments.

CAPITAL, Kathmandu (pop. 50,000) — British Envoy at the Court of Nepul, Lieut. Col. R. L. 

### BHUTAN.

Bhutan (area, about 20,000 sq. miles; pop. about 350,000, mainly Buddhists) also lies on the S.E. of the Himslayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 1910 this allowance was fixed at £6,667, and Bhutan agreed to be guided in its external relations by the advice of the British, who, however, will not interfere in its internal affairs. The former dual government of a spiritual chief and a temporal chief came to an end when the Tongsa Penlop, the chief councillor and virtual ruler, Sir Ugyen Wangchuk, K.C.S.1 , K C.I.R., was chosen hereditary Maharaja in 1907. He has a salute of 15 guns in British £13.000. Bhutan's total trade with India in British 1919-20 Was £45 690.\* Resident.

CAPITAL, Punakha.

### AFGHANISTAN.

Amir of Afghandstan and its Dependencies, H.H. Amir Amanulla Khan; suc. 1989. Salute in British territory, az guns.

Afghanistan (called Khorassan by the natives) lies on the N.W. frontier of India

Estimated area, 250,000 sq. miles, and pop. 4,600,000. It is bounded on the W. by Persia 4,500,000. (boundary fixed rigy and spea), on the S. by Bainchistau (boundary fixed rigo-y), on the N. by Asiatic Bussus (boundary fixed rigo-y and riggs-y), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway ter-minus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Burand agreement of 1903. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much infinenced by mullahs.

Mountains, chief among which are the Rindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed. The Afghans (or Duranis) have predominated since ryaq, especially in Kandahar; next come the Ghilzals (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashes, who belong to the Shiite sect.

The national tongue is Pushtu.

Afghanistan is divided into six provinces, Kabul, Kandahar, Herat, Turkestan, Farrah, and Badakahan (with Kafiristan and Wakhan), which are under governors, with subordinate nobles and judges, police, shd revenue officers. Amir Abdurrahman (1886-1901) established a strong central government; with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. It comprises about 90,000 regulars and irregulars, but lacks discipline and cohesion. Considerable quantities of rifles and artillery have been purchased in Europe under arrangements made with the Government of India. Factories for arms and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are Islamic sacred laws, tribal laws, and those of the Amir, who is the Court of Appeal. The law is bulky and the criminal law severe. Recently steps have been taken to develop education, hitherto controlled by the muliahs. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There is excellent irrigation and all profitable soil is utilised. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and dol. Afghanistan is right in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manu-factured. Salt, silver, copper, coal, iron, lead, rubies, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by pack animals. The chief trade routes to India are the Khaibar Pass, from Kabul to Peshawar (192 miles), along which a motor service was established by the late Amir, and the road from Kandahar to Quetta (125 miles). The Sind-Pishin railway is now completed to the Baluchistan-Persian Trontier. The trade of

Figures for an months ended Pebruary, 1920.

Afghanistan with India in sort was over 63,245,000. The exports to India in the state of the imports therefrom are chiefly collections and piece goods, metals, leather goods was all sugar. The Afghan customs duties are heavy. There is a large export of wool to Fersia and Russia, cotton and slik goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £780,000. There are taxes on land, a grazing tax, customs duties, stamps, fines, poli-taxes, receipts from State lands, monopolies, and factories, and mining royalties.

As the result of a British mission to Kabul in 2004-5 the engagements which had existed with the Amir Abdurrahman since 1850 were renewed by the treaty of at March, 1905. By the Anglo-Russian Convention of August, 2007, Russia declared Afghaniatan outside the Russian sphere

of influence.

His Majesty the late Amir Habibullah Khan was assassinated on February 20, 2019; his brother, Nasrulla Khan, by a coup detat thereupon seized and temporarily held the reins of government at Kabul, but the Amir's third son, Amanulla Khan, 2000 after declared himself, and was recognised as, Amir. Aighan troops crossed the Indian frontier on May 2, on which the Indian Government took immediate steps to expel them; fighting followed and Dakka was occupied by British troops, but overtures were made by the Amir and a greaty of peace was signed in August.

The treaty provides that the privilege enjoyed by former Amirs of importing arms and ammunition through India is withdrawn; the arrears of the late Amir's subsidy are confiscated, and no subsidy is to be granted to the present Amir; the British Government express willingness, conditionally, to receive another Afghan mission, after six months, for the discussion and settlement of matters of common interest and the re-establishment of the old triendainjo a satisfactory basis; the Afghan Government agree to the Indo-Afghan frontier accepted by the late Amir and agree to the early demarcation by a British Commission of the West Khyber where the Afghan aggression happened, and to accept such boundary as the British Commission may lay down. By this treaty Afghanistan is left officially free and independent, both internal and external. All previous treaties have been cancelled by the war. Representatives of the Indian Government and of the Amir met at Mussoorie in reac to discuss questions affecting the relations between the two governments.

CAPITAL, Kabul (about 180,000). The chief commercial centre is Kandahar (80,000). Other provincial capitals are Herat (20,000) and Tashkurgan (27,000). British Agent (vacant), Bs. 1,000.

MISOPOTANIA AND THE PERSIAN GULF.—For the centuries England has taken the lead in the full trade. She has suppressed piracy, slavery, and inter-tribal warfare on land sad sos, made surveys, and had down buoys and cables. Vigorous measures have been taken against gun-tensing. anglasse and India still have the lion's share of the trade, the bulk of which is conducted by Indiana, who make Bombay their entrepot. The Arabian shores are low-lying deserts, the Persian coasts mountainens; at the head of the Gulf are great altuvial plains. The heat is intense in summer. Natural harbours are few. The British Government have been entrusted with the mandate for Mesopotamis and are taking steps to expedite the creation of an Arab Government, with British advisers, and with the ultimate object of the development of Mesopotamia as a Self-governing State. Municipal Councils, representative divisional councils, and councils of Notables have been set up. The estimated cost to the British Richequer of the occupation by British Troops is £ss, see, see for the current year, but the civil administration is self-supporting and shows a surplus of revenue over expenditure. The port of Baars has been greatly developed and a large capital expenditure has been incurred on railways during the British occupation. High Commer. Mesopotamies, Maj.-Gen. The Hon. Sir P. Z. Cox, G.C.I.B., K.C.S.I.

Bahrein (capital, Manama), governed by Shelkh Isa bin Ali and under the protectorate of the Indian Government, is the largest of a group of islands half-way up the Gulf, near the Arab ceast (El Katz). It is the headquartene of extensive pearl fisheries, and a distributing centre for the adjacent maintand. Pearls are the only notable export; rice, cotton goods, dates, sagar, and apiess the chief imports. In 1918-19 the value of the exports was £1,218,000 and of the imports £1,220,000 The people (about 100,000) are Muhammadans. The Sheikh has been in treaty relations since 1800 with the Government of India, who have a Political Agent at Bahrein. In 1856 he engaged not to make treaties with any other State.

The Sultan of Oman (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent at

his Court.

The independent tribes on the Pirats (Arab) Coast from Ras-el-Kheima to Odeid are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1823 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Tructial" chiefs. The British Political Resident in the Persian Guif is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1823 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports largely consists in exports of pearls to India viet Lingah and Bahrein.

Important caravan routes converge at Koweit, which has an excellent harbour. The Sheikh is under treaty obligations with the Indian Government.

Actg. Pol. Resident, Persian Gulf, Lt.-Col. A. P. Trevor, C.B.I., O.L.B. ......ger mensen Rs. s.sso Pol. Agent, Muscat, B. E. L. Wingate ... Rs. L. B. Do., Koweit, Major J. C. Moore, B.S.O., Ma. s.sso Do., Bahrein, Major H. R. F. Dickson ... Rs. s.sso

PERSIA (q.v.) borders on Baluchistan and Afghanistan. The demisrcation of the Ferse-Baluch frontier, partially carried out in 1872 and 1895, was

<sup>\*</sup> Figures for at months ended February, ages.

completed in zoos. A Trans-Persian railway, linking Russia with India, is under discussion. By the Agreements of Aug., sere, between the Governments of Great Britain and Persia, the former reiterates past undertakings to respect absolutely the independence and integrity of Persia; to supply, at the cost of the Persian Government, expert advisers for the several departments of the Persian Administration, and also officers, munitions, and equipment of modern type, for the formation of a uniform force which the Persian Government proposes to create for the establishment and preservation of order; and loans £2,000,000 to the Persian Government, at 7 per cent., secured on the Persian Gulf Customs revenues; and agrees to co-operate with Persia for the encouragement of Anglo-Persian enterprise for the improvements of communications in Persia; the two Governments agree to the appointment of a Joint Committee of experts for the examination and revision of the existing Customs Tariff. In addition the British Govern-ment waives all claims from Persia for the cost of the maintenance of British troops sent to Persia during the war.

ASIATIC RUSSIA -A portion of what was once the Russian Empire is conterminous with Persia and Afghanistan. The Trans-Caspian Railway runs, vid Merv, to Samarkand and Andijan, with a branch to Tashkent. The Murghab Valley branch from Merv to Kuskh on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 450 miles of the Chaman terminus of the Indian railways. Another important strategic line connects Tashkent directly with Orenburg. The Amu-Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers.

CHINA -India is in contact with two dependencies of China, Chinese Turkestan and Tibet, and one province, Yunnan.

Chinese Turkestan is surrounded by the mountains of Tianshau, the Pamirs, and Kuenlun. There are three difficult passes into Russian Turkestan and two still more difficult ones into The boundary between Kashmir and Chinese Turkestan has not been officially defined. There is a British consul-general at Kashgar (Major P. T. Etherton). Trade with India is chiefly carried over the Karakoram Pass (18,500

feet) vid Ladakh, in Kashmir.

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma, but is separated therefrom by the Himalajas. India imports from Tibet wool, borax, salt, and musk, in exchange for cotton and woollen goods and grain. The total trade in 1919-so was about £700,000. Trade passes from Bengal (through Sikkim) and from the Punjah and the United Provinces. Under the Anglo-Chinese Sikkim Convention of 1800. a trade mart was opened at Yatung; but as the Tibetans persistently disregarded the Convention, a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on a August, seed. A new Convention was signed (7 Sept.), providing for the erection of boundary pillars between Sikkim and Tibet; for three trade marts, with British and Tibetan agents; for unrestricted traffic by existing routes; and for payment of an indemnity. The Tibetana pledged and adjacent themselves not to alienate any territory or grant of influence.

concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (April, 1906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Thet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec., 1905, the ruler of Tibet, the Tashi Lama, visited India. The Dalai (or Sacred) Lama, who fled before the British advance on Lhasa, returned to Tibet in Jan, 1010. The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb , 1910 the Dalai Lama again fied to India, pursued by Chinese troops He was then deposed by the Unnese Emperor. The British Government refused the Dalai Lama's appeal for their intervention, but allowed him to remain at Darjiling. He left India in June, 1918, for Lhasa, where sharp fighting occurred between the Chinese and Thetans, the former being worsted. In August, 1918, the British Minister at Peking presented a Note to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed. and representatives of the British, Chinese and Tibetan Governments met in conference at simia in Oct., 1913, to discuss the relations between the three countries. A convention, the terms of three countries. A convention, the terms of which have not been made public, was initialled by the three representatives, but the Chinese Government have so far refused to ratify it

Yunnan is a Chinese province to the N E of Burma. By Anglo-Chinese agreements of 1804 and 1807 a boundary was fixed between Burna and Yunnan, and arrangements were made regarding trade, extradition, &c. Part of the boundary is still undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might Yunnan is chiefly by a difficult route from Bhamo, in Upper Burma. The direct trade was about £1,500,000 in 1919-20. Burms imports from Yuman hides, raw silk, &c, and exports cotton goods, &c. Teng-juch and Samaoo, near the Burms frontier, are treaty "ports." There are British consuls at Teng-juch and

Yunnan-fu.

SIAM (q v.) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this and considerance trade is carried on over this frontier, mainly with Chiengmai. Burna imports from Siam teak, cattle, silk goods, &c., and exports ootton goods, &c. In 1919—30 the value of the total trade was about £600 coo. The boundary of Burna and K.W. Siam was demarcated in 1850—2. France in 2004 recognised the portion of Siam west of the Moram basis including the Malay registeric Menam basin, including the Malay penincula and adjacent islands, as within the British sphere.

The Indian Population was 127,930 in 1901, 125,492 in 1915, and 105,998 in 1917. The Eskimon numbered 3,096 in 1927.

### PHYSIOGRAPHY.

Canada was eriginally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudon Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), from 49° North latitude to the Arctic seas, and from the Paculic to the Atlantic Ocean. The boundaries between the Ungava district of the Labrador peninsula (transferred to Quebec in 1912) and the Labrador coast region of Newfoundland are expected to be settled shortly by a Judicial

Commission.

Relief. -From a physical point of view Canada may be divided into an eastern and a western division, the Red River Valley, in long. 97°, forming the separating line. The eastern division comprises three areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Montreal, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rucky escarpments. The main hydrographical feature is the chain of lakes, with an area of 150,000 square miles, contributing to the great river system of the St. Lawrence. (3) The northern area, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river as stems, the Nelson and the Mackenzic. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Hooker, 15,700 feet) and the Gold and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded.

Climate.—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the couth-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autuum are of about seven to eight months' duration, and the winter four to five months. The soil is generally fertile and all the products of the

temperate zone are cultivated.

### GOVERNORS GENERAL OF CANADA SINCE 1867.

Name,	Date of Appointment	Date of Assumption of Office.

### GOVERNMENT.

Canada is a self-governing Dominion within the British Empire, its constitution resting on the British North America Act of 1867, under which the Dominion of Canada came into being on July 1, 1867 (Dominion Day). The Executive power is vested in a Governor-General appointed by the Sovereign and aided by a Privy Council.

## THE JUDICATURE.

The Judicature.—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first-named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five pulsne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by separate judges, and its sittings may be held anywhere in Canada The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Bessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails Rt. Hon. Chief Justice of Canada, Rt. Hon.

Dominion, Hon. Sir Walter Cassels .... 8,000 Puime Judge of the Exchequer Court, Hon. Louis A. Andette, Id. D. ...... 7,000 Registrar of the Supreme Court, E. R.

#### DEFENCE.

Service in the Militia is universal and compulsory on all male citizens from 18 to 66. Service in the Active Mistria is for 3 years with 8-16 days' annual training. The Peace Effective consists of a Permanent Force of 7,000 officers and men, and about 100,000 Active Militia. The War Effective consists of four classes: the unmarried men 18 to 30; the unmarried men 18 to 45; and, finally, the remaining male citizens of 18 to 60 a. a total of 2,000,000.

Empeditionary Force.—The number enlisted up

Repeditionary Force.—The number enlisted up to the cessation of hostilities was 195,44x, of whom 4x8,05s were sent overseas. Up to Nov. 9s, 1938, the total outlay for the War was \$x.068,607,000.

### Militia Council.

President, Maj. - Gen. Hon. S. C. Mewburn, C.M.G., M.P. Vice-President, Surg.-Gen. Sir E. Fiset, C.M.G., D.S.O.

Inspector-Gen. and Müttary Counsellor, Gen. Sir A. W. Currie, G.O.M.G., K.C.B. Adjutent Gen., Maj.-Gen: B. C. Ashton, C.M.G. Quartermaster-Gen., Maj.-Gen. Sir H. Burstall,

K.C.B., K.C.M.G., A.D.C. Finance Member, Brig.-Gen. J. G. Langton. Secretary, A. B. Goldwyer-Lewis, B.A. Asst. Sec., E. J. Bong.

Royal Canadian Mavy.

There are Naval stations on the Atlantic and Pacific, and H.M.C.S. Aurora, Niobe, and Rainbow (cruisers), and Patriot and Patrician (t.b.d.) are maintained and used as training ships for the Royal Canadian Navy.

#### EDUCATION.

Education is under the control of the Provincial Governments, the cost being met by local taxation, aided by grants from the several Provincial Governments. There are (2917) 28,007 clementary and secondary schools (attendance at the former being compulsory except in the Province of Quebec), with over 2,385,722 pupils; and 65 universities and university colleges with about 24,000 attdents. The 22 universities had about 25,000 attdents in 292.

Total, 1918 ..........38.879 \*1,999.880,494 Canals.—In 1918 the vessels passing through the canals of the Dominion numbered 25,700, or 27,427,178 tons, carrying 212,125 rassengers and 18,833 619 tons of freight. The total

and 18.832 for tons of freight The fotal movement of Canadian wheat hy canals was 171.803,121 business in 1927. There are six systems under control of the Dominion Government with a total waterway of 1.594 miles (of which

zzy miles are constructed canals)

Profit and Telegraphs.—There were 13,622 post-offices in 1927-18. The total value of money orders issued from 4,920 offices was \$142,059,168, and the net postal revenue \$21,343,394, expenditure \$18,064,534. At the end of the fiscal year 1918 there were 3,694 rural mail delivery routes on which were creeded 192,350 loves; the corresponding figures for the calendar year 1923 were 3,432 routes and 194,183 loxes. The length of corrament telegraph lines in 1927 was 12,027 miles (including 385 miles of cables), and the number of offices was 1,002, from which 371,883 messages were sent and received. The chartered telegraph companies have a line mileage of 43,473, carrying 205,575 miles of wire (including 96s miles of cables), and 3,680 offices, from which 17,526,022 messages were sent and received. In 1927 there were 49 radio-telegraph land and coast stations operated in the public service of Canada, having a range of 200 to 750 nautical miles, or an average of about 270 nautical miles, or an average of about 270 nautical miles, and also one at New Castle, N.B., with a range of 2,500 nautical miles, and also one at New Castle, N.B., with a range of 2,500 nautical miles, and also one at New Castle, N.B., with a range of 2,500 nautical miles, and also one at New Castle, N.B., with a range of 2,500 nautical miles, and also one at New Castle, N.B., with a range of 2,500 nautical miles, and also one at New Castle, N.B., with a range of 2,500 nautical miles, and are of 2,749. Twenty-four Government steamers are equipped with wireless, having a range of 5,500 naverage of 55 miles of 55 mil

range of too to 4ce miles, or an everage of se miles.

On June 3c, 1917, there were 6c4,136 telephones and 1,705,203 miles of telephone wire in use; of the latter, 1,286,228 miles were urban and 321,675 rural. The carnings amounted to \$20,122,223,236, and the expenses to \$12,095,426.

Sao, 128, 288, and the expenses to \$1.005, 400.

Shipping,—The sea-going and lake mercantile marine of Canada on Dec 31, 1917, consisted of 4,925 failing vessels and 4,265 steamers (total net tounage, 971,479). The sea-going vessels entered and cleared at Canadian ports in 1918 were: Canadian 20,926 (4,342,343, 1018), British 7,327 (16,323,340, 1608), Fereign 25,377 (17,432,444, 5018); total tounage 32,767,129. The principal

seaports are Halifax, N.S., Victoria, B.C., Montreal, Que., Vancouver, B.C., St. John, N.B., Sydney, N.S., Louisburg, N.S., Quebec, Que, and Prince Rupert, B.C.

Chief Justice, Exchequer Division, Hon. Sir William Mulock 8.000 Chief Justice, Common Pleas, Hon. R. M. Meredith.....

Agent-General for Ontario in the British Isles, Dr. George C. Croelman, 262, Strand, London, W.C. a. Assessant, S. E. Percival.

Agriculture and Live Stock .- The total area is \$24,763,000 acres, and in 1939 the area of cleared land was 14,897,839 acres, of which 9,915,884 acres were under crops. The total value of the agricultural production in 1930 was \$397,338,400. In 1919, 980 cheese factories produced 128,698,948 lb. of cheese valued at \$32,543,343, and aportreameries made 27,070,887 lb. of butter valued at \$8,635,026. In 1919 there were 719,569 houses, 2,927,191 cattle, 1,103,740 sheep, 1,695,487 pigs, and 11,705,800 poultry. Free grants of land are obtainable in the great clay belt of Ontario, opened up by the Temiskam-ing and Northern Ontario railway. Improved farms, orchards and small holdings can be bought on reasonable terms in the older settled parts of the Province. There is a scheme of land settlement, with free land and fluancial assistance for returned soldiers, both Imperial and Canadian. There is always a demand for farm workers

Log Products.-The total production of log and timber products and wood pulp amounted in 1916 to \$42,260,053, or 24 per cent. of the lumber and pulp trade of the whole Dominion.

Manufactures.—Ontario is the chief manufac-turing province of Canada. The total value of tts manufactures in 1913 was \$715,531,839, an increase since 1910 of \$15,000,000. There were in 1915, 6,538 factories with nearly 20,000 employees, an invested capital of \$946,619,114, and an annual wage bill of \$140,600,601.

Minerals.-The mineral wealth of the Province is enormous, although its development is only is chormous, although its developments is only in its infancy, and in 1919 Ontario contributed 45 per cent of the output of Canada. In 1919 its mines yielded \$58,83,340. The principal metals are: gold, output in 1919 £10.451,709, silver, \$13,904,323, nickel, \$11,971,931, and copper, \$3,709,687. The oll wells produced silver, \$12,904,312, nickel, \$11,0 copper, \$3,709,687. The oil well 220,100 barrels of petroleum in 1919.

Hudro-Electric Power .- One of the greatest Government-owned public utility organisations in the world is the Ontario Hydro-Electric Commission, supplying light and power from Niagara and elsewhere. These works are now developing 237,733 horse-power, and a further develop-ment of 300,000 horse-power is now under construction

Principal Cities.—CAPITAL, TORONTO, population (1929) 499,278, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity; Hamilton, the "Birningham of Canada" (re8, 43); Ottawa, the Federal capital (re7,72a), with a large lumber trade and woodenware manufactories; London trade and woodenware manufactories; i.onoon (59,110); Brantford (28,189); Kingston (23,361); Peterborough (21,200); Windsor (23,569); Fort William (12,200); St. Thomas (12,799); Stratford (18,200); Owen Sound (12,218); St. Catharine's (19,199); Port Arthur (15,094); Sault Ste. Marie (22,099); Chatham (25,280); and Galt (12,434).

QUEBEC.

Area and Population.-The Province of Quebec Area and Population.—The Fromme or queries contains an area estimated at 703,623 square miles, with a population (1925-28) of 2,325,427, an. increase since the last Commer of 353,522, In 2912 the Province was enlarged by 321,760 square miles by the addition of the greater part and the Tabusche Desirement. of the Labrador Peninsula, knews as Ungava (or New Quebec).

Government. -- The Government of the Province is vested in a Lieutenant-Governor, the Council of Ministers, a Legislative Council consisting of as members appointed for life, and a Legislative Assembly of \$1 members elected for five years to represent the same number of electoral districts in the Province.

Lieutenant-Gorernor, Rt. Hon Sir Charles Fitzpatrick, G C.M.G., born 1851 (1916)......\$10,000 Aide-de-Camp, Capt Landry .....

Agent-General for Quebec in England, Lt -Col. J. P. Pelletier, 38 Kingsway, W.C. a.

Finance.-The actual revenue for the year zgz8-zg was \$zz,666,3gz and the actual expenditure \$zz,szz,675 The Debt is stated at diture \$22,272,675

\$27,726,266.
Production and Industry.—The total value of Troduction and Industry.—The total value of inanufactured products in 1922 was \$99,900.55 (1900, \$158,87,904), the principal manufacturing centres being (1923): Montreal (\$43,327,575), Quebec (\$5,623,541), Hull (\$5,737,374), Maisonneuve (\$5,623,541), and Lachine (\$3,237,828). The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial denument has country for the country has been too much denuded of wood, and the provincial denument has country for the country has been too much denuded of wood, and the provincial country has been too much denuded of wood, and the provincial country for the country has been too much denuded of wood, and the provincial country is the provincial country to the country has the country of the count Government has found it necessary to organise an effective service of rangers to prevent the

destruction of trees by forest fires. The forest lands cover an area of over 150,000,000 acres, of which 45,000,000 are under license to cut timber. The wood-pulp industry is assuming great importance; several large factories have recently been built, and the value of the output, which was only \$8,516,683 at the Census of 1911, was, in 1916, \$6,840,489. Improved farms may often be obtained in the eastern townships, largely occupied by settlers from Great Britain, at from £4 to £6 per acre, including dwelling-house, outbuildings, and fencing; while unimproved lands may be bought from the Government at from 20 to 60 cents per acre, and the purchasemoney paid in five instalments. The area of land subdivided for the purpose of settlement unsold on June 30, 1917, was 7,297,471 acres. In 1916 there were 885 theese factories, 666 butter factories, and 445 butter and cheese factories combined. The total value of dairy industry

products was \$22,875,337.

Education.—The Superintendent of Instruction, assisted by a Council of 44 members, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1915-16, 7,288 schools with 490,718 schools and 14 normal schools supported by the State. There are also Schools of Agriculture, Commercial and Classical Schools, and three Universities—two Protestant, McGill College, Montreal, and Bishop's College, Lennoxville; and Laval Uni-versity, Roman Catholic

Principal Cities. - CAPITAL, QUEBRC (population, xxo,ooo), with a large export timber trade, and the great seaport town of Canada; and Montreal (population, 750,000), the commercial metropolis, and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St Lawrence Rivers. Ocean-going steamers ascend the St Lawrence as far as Montreal Other important cities are Hull (ag,488), Sherbrooke (ag,212), Westmount (18,500), Trois Rivières (21,000), Verdun (24,100), St. Hyacinthe (xs,49x), Sorel (9,229), and Levis (9,672).

### NOVA SCOTIA.

Area and Population .- NOVA SCOTIA is a peniusula between 43° ag-49° N. lat. and 39° 40-56° ag' W. long, and is connected with resonance of the surfa the sea) with a total population, at the Census of 1911, of 492,338 (agr,org males and 241,319 females), an increase since the last census of

32,764 persons.

Government —The Government is administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council of az members, and a Legislative Assembly of 43 members.

Lieut.-Governor, Hon. MacCallum Grant.

Agent-General for Nova Scotia in England,' John Howard, 574 Pall Mall, 8 W

Agriculture and Live Stock -About 20,000,000 acres are fit for tillage, and the soil is of good average fertility. The climate is delightful, the winter being less severe than in most of the other parts of the Dominion. In 1919 there were 5,250,455 acres of land occupied, of which 2,03,633 acres were under crop, 3,256,858 acres in pasture and partially wooded lands, of which about 70,000 acres were in gardens and orchards. Hay is the most important crop of the Province, occupying over one-half of all the improved land, and yielding 1,279,326 tons in 1919. Fruit is ex-tensively cultivated, and Nova Scotia apples are claimed to be the best in the world. The yield has ranged in recent years from 750,000 to 1,800,000 harries, the principal fruit belt being the Annapolis Valley. Thirty-five model orchards have been set out during the past fifteen years. In 1919 there was an increase in the output of the creameries of more than 15 per cent. over that of 1917. Wheat-growing areas were more than doubled during the war, in which period ruller process mills were placed so that almost every part of the Province is served. The total every part of the Province is served. Into Oct.

returns from the agricultural industry in 1272 were \$51,034,000. Improved farms of res to 250 acres, with house and buildings may be obtained at from \$100 to \$2,000, whilst the Government offer uncleared Crown lands at \$50 per 100 acres or \$0.0000 the per 200 acres for any additional quantity. Through the Land Settlement Act, the Govern-

ment gives practical assistance to skilled farmers There is a Government agricultural college and experimental farm at Truro for men and women

and a well-equipped technical college at Haiffas.

Monufactures.—In many there were a.rey industrial establishments with a capital of \$136,928,828, paying 26,646 wage-carners salaries amounteding to \$23,533,000. The value of the total output in to \$23,533,000. The value of the total output in 1917 was \$176,369,025 (1900. \$23,592,513).

Fisheries.—Up to March 31, 1918, the sum of

\$9,695,828 represented the amount invested in the fisheries. The total value of the fish marketed in 1919 was \$14,350,000 and the number of persons employed was 30,000.

Minerals.—The coal deposits are extensive and

of quality ranging up to 14,000 B T.U.; 5,004,757 gross tons were produced in 1919; 333,379 tons limestone, 48 568 tons of gypsum, and 7,107 tons of calcined gypsum. Iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney and Sydney Mines, Cape Breton.

Principal Cities .- CAPITAL, HALIFAX (population 65,000), one of the terminals of the Inter-colonial Railway, with a magnificent harbour, is the principal winter port of Canada, and the entrepot of a large trade with the West Indies and South America. A shipyard for the building of large ocean-going steamers is now in process of construction. Other towns are Sydney (21,400); Glace Bay (18,600); Amherst (9.250); Sydney Mines (8,700); Truro (7,500), Yarmouth (6,600), New Glasgow (7,400); Spring Hill (6,400); North Sydney (6,780), and Dartmouth (6,400).

CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,975 square miles, with a population of 230,000 inhabitants. The chief city, Sydney (pop. 21,400), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the largest steel works in Canada. The plate mill recently erected will supply the steel plates required by the various steel shipbuilding plants of Canada. The Canadian Government Railway connects the island with the mainland.

#### NEW BRUNSWICK.

Area and Population.—NEW BRUNSWICK is situated between 45°48° N. lat. and 63°47′—69° W long., and comprises an area of 57,585 square miles, with a population in 1912 of 33,889 (179,867 males and 172,022 females), an increase since the last census of 20,769 persons. It was first colonised by British subjects in 2762, and in 2783 by the inhabitants of New England, who were dispossessed of their property in conse-quence of their loyalty to the British Crown. Government.—The Government is administered

by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 48 members elected by the people.

Lieutenant-Governor, Hon. Wm. Pugaley,

Agriculture and Live Stock—In 1919, 35,641 acres were under wheat, 305,484 under oats, and 74,642 under buckwheat, with 10,656 acres under barley. The produce in 1919 was 623,000 bushels of wheat, 9,250,000 bushels of oats and 1,871,000 bushels of observed bushels of oats and 1,871,000 bushels of observed bushels of oats and 1,871,000 bushels of oats and 1,871,000 bushels of buckwheat. 75,573 acres of potatoes produced 20,790,000 bushels, and 24,279 acres of turnips 8,696,800 bushels. The total value of the field crops in 1979 was \$52,000,000 cheeped in 1979 bushels. The total value of the field crops in 1979 was \$52,000,000 cheeped in 1970 bushels are obtainable at reasonable rates. The fisheries include salmon, cod, nackerel, herring, and shad; the capital invested in this industry is upwards of \$52,000,000, giving employment to 2,000 persons. In 1979 there were 24 cheepe factories in operation, producing 2,250,388 lb., value \$347,772, and from 27 creameries 915,816 lb. of butter valued at \$5504,600.

Manufactures — The value of the total output of manufactured goods in 1910 was \$35,4sa,30s (1900, \$80,97s,470), the principal manufacturing centre being 8t. John (\$70,08,65). The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in immense quantities in Albert County, and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found, also sliver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable

quantities. — CAPITAL, FREDERICTON; population (2921), 7,208. St John (pop 52,000) is one of the principal winter ports of Canada, and is connected by C.P. R. and Intercolonial Railways with Montreal; Moncton (x2,260), Chatham (4,666).

#### MANITOBA

Area and Population.—Manitobs, formerly the Red River Settlement, is situated in about the centre of the continent, between 49"—60" N. lat. and 95"—xxx" W. long., with a total area of 25.32 square miles and a population (2376 Census) of 553,850 (294,609 males and 259,851 females), an increase since the last sensus of

200,403. The population was estimated at 620,000 in 1920.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 7 members and a Legislative Assembly of 55 members

Agriculture and Live Stock - Of the total area, x52,340,320 acres are land; and of the total area surveyed, 78,981,681 acres are land, 1,909,800 are water, and 1,466,400 roads. Forest reserves and parks extend to 5 953,700 acres, and the Indian reserves amount to 1,078,454 acres, while rendered. The area under homesteads, &c , was 27,373,200 acres in 1920, while 15,177,063 acres had been granted to railway companies, 3,183,200 to Hudson's Bay Company, 3,938, soo acres were school land endowment, and 76,672 had been sold under irrigation system. The area under

grain crops in 1919 was 17,116,123 acres.
The principal products are grain and cattle. In 1919 there were 10,587,363 acres under wheat, the produce being arr, 6rr, 277 bushels) The ostinated crop area for 1990 was: wheat, 9,456,525 acres; oats, 5,273,561; barley, 496,137; and flar, 1,004,039 acres

THE YUKON TERRITORY, which occupies the

north-western extremity of the Dominion, was constituted in 1808, and contains a total area of 207,076 square miles, with a population in 1911 of 8,528 (6,528 males and 2,004 females). Mining is the chief industry. The Government is administered by an executive officer, styled the Gold Commissioner, with an elective Legislative Council of three members.

Gold Commissioner and Crown Tumber and

Land Agent, George P. Mackenzie ... \$6,500 THE NORTH-WEST TERRITORIES comprise the present unorganised part of British North America north of the Provinces of Quebec, Ontario, Maultoba, Saskatchewan, and Alberta, a total area estimated at 1,848,884 square miles. Population in spar, zy, 296.

### PHYSIOGRAPHY.

The Island of Newfoundland is situated between 46° 37'-51° 37' N. latitude and 52° 44'-59° 30' W. longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 370 miles long and 290 miles broad, and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.). and Cape Ray (S.W.) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with tolts (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of pine and birch. The climate is salubrious, and the people are a strong, brave, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

#### GOVERNMENT.

Newfoundland, the oldest English colony, was discovered by John Cabot on June 24, 1497; the first land seen was halled as Prima Vista—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Cortereal, and soon became tentre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 153, the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1721) the whole Island was acknowledged to be British. A Governor was first appointed in 1525, and in 1855 "Responsible Government" was accorded to the island.

The executive is entrusted to a Governor, appointed by the Crown, aided by an Executive Council, with a Legislature of two houses. The Legislative Council is appointed by the Crown and consists of a members; the House of Assembly consists of 5 members, elected by the people, every male Eritish subject aged as being entitled to the franchise.

#### DEFENCE

Newfoundland contributed 12,922 men to the fighting forces of the Empire during the War, in addition to 2,000 enlisted in Canadian and other forces.

#### EDUCATION.

Education is denominational, and is assisted by Government. Primary schools were attended in 1917 by 49,318 pupils, and Secondary schools by 1,509 students. The Government grants in 1917 amounted to \$473,923.

#### RELIGION.

At the Census of zer and zer the following statistics were obtained:—

Religion.  Roman Catholics  Church of England  Methodists  Presbyterlans	1901 75,989 73,008 61,388 1,497	1911 81,177 78,616 68,045 1,876
Salvation Army	6,594	10,141
Various	2,505	2,767

### FINANCE.

The revenue, expenditure and debt of Newfoundland for the six years ended June 30, 1918, and stated as under (\$1 at par = 48. 2d or \$48 = 45 sterling; Nov. 20, 1919, \$4.23 = £1.)

Year.	Rorenuo.	Expenditure	Public Debt.
1918-13 1913-14 1914-15 1915-16 1916-17 1917-18	\$ 3,9x9,040 3,9x0,178 3,950,790 4,7x8,000 5,x06,648 5,5x8,540	\$ 3,803,861 3,920,178 4,008,623 4,250,000 4,554,891 6,197,876	\$ 29,478,060 30,450,765 31,454,678 35,450,000 34,489,765 35,445,785

Newfoundland's surplus revenue for the financial year ending June 30, 1919, amounted to £450,000.

### EXTERNAL TRADE.

The external trade of the island for the five years ending June 30, 1918, is stated as follows —

Year.	Imports	Exports.	Total.
1913-14 1914-15 1915-16 1916-17 1917-18 1918-19	\$ 15,193,726 18,350,706 16,833,500 81,318,310 87,640,000 33,800,000	\$ 15,134,543 13,136,680 19,496,400 88,381,768 30,990,000 36,800,000	\$ 30,3a8,a6g a5,487,666 36,379,900 43,700,078 58,630,000 70,000,000

The trade was chiefly distributed in 1918-19 as under:-

Country.	Imports from.	Exports to
United Kingdom United States	. \$2,399,853	a,713,089 6,513.657
Canada		a,53a,397

The principal imports in 1927-18 were flour, textiles, coal, hardware, and provisions; the principal experts were codish, value \$28,80,000; cod and seal oil, value \$28,770,000; pulp and paper, \$8,700,000; herrings, \$8,070,000; seal-skins, \$900,000; thend lobsbers; copper ore, iron pyrites, and other minerals, \$900,000; total value of the fishery products, in 1928-29 was appwards of \$82,500,000.

### PRODUCTION AND INDUSTRY.

The inhabitants are chiefly located on the coast-line of the shore and bays, nearly ze, one being engaged in fishing—for ead in summer, a large proportion of which is exported to South America—and seal fishing in winter and spring. Agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills have been erected. Duning 1916-17 there was exported from Grant Falls and Bishop Falls paper and pulp valued at \$1,510,440, most of which was consigned to the United Kingdom. The larger portion of the interior is practically in a state of nature, but the railways have opened up large tracts of rich agricultural, mineral, and timber lands hitherto of small value. A valuable discovery of copper has been made at Little Bay, about soe miles from St. Johns.

#### COMMUNICATIONS.

Railways.—There were \$41 miles of railway open in 1917. The trans-insular line runs to Port-aux-Basques, vid Exploits River and Bay of Islands, with branch connexions to Placentia, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay). Branch lines are under construction.

Posts and Telegraphs—There were 742 postoffices in 1916, dealing with 3,770,000 letters and post-cards, 3,450,000 newspapers and books, and 207,850 parcels There are 4,550 miles of tele-

graph line and 955 of telephone wire.

Shipping.— On Dec. 3r, 1917, the Mercantile
Maine of Newfoundland consisted of 3,384
salling vessels of 139,280 tons, and 112 steam
vessels of 20,056 tons. In 1916-17 the tonnas
of vessels entered and cleared at Newfoundland
ports was 2,191,006 tons, of which 1,818,016 tons
were British.

#### TOWNS.

The CAPITAL, ST JOHN'S (population 32,392), contains two cathedrals, several banks, and numerous public buildings. Other towns are Harbour Grace (4,279), Carbonear (3,540), Twillingate (3,348), and Hunavista (3,911).

#### HIGH COMMISSIONER.

High Commissioner in London, Hon. Sir Edgar R. Bowring (1918).

Secretary, Capt. Victor Gordon, 58 Victoria Street, S.W. z.

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits (or to Cape Wolstenholme), on the north; the boundaries between Quebec and Labrador being a matter of keen controversy which is expected to come up for actilement before the Judicial Committee of the Privy Council. Labrador possesses valuable cod, herring, trout, and salmon fisherles. One of the grandest spectacles in the world is provided by the Great Falls of Labrador, on the Hamilton River. The inhabitants of this 850 miles of coastal America are mainly Eskimos, engaged in fishing and hunting. There are no towns, but there are Moravian Mission stations at Maggorik, Hopedale, Nain, Olcak, Hebron, and Killinek. Pulp and paper mills have been founded at Sandwich Bay and Mamilton Iniet to deal with the aimost inextransities supply of timber;

I. Essistaire of Papus, or British New Guinea, a dependency of the Commenwealth. Its rapital is Port Moresby, and its area sit see aguars maker. White inhabitants numbered 1,098 in 1982, 1,288 in 1992, and 7,099 in 1992. The Native population is estimated at 499.000.

### PHYSIOGRAPHY.

The territory of the Commonwealth includes the Continent of Australia, the Island of Tasmania, Norfolk Island, Lord Howe Island, and part of the island of New Guinés (Papua). Australia (mainland) is probably the oldest of all land surfaces in either hemisphere, and may be regarded as the largest island or the smallest of the Continents, being surrounded by the following waters:—North, the Timor and Arafura Seas and Torres Strait; East, Pacific Ocean; South, Bass Strait (which separates Tasmania from the Continent) and Southera Ocean; and West, Indian Ocean. The total area of the Continent is 2,048,366 English square miles, the Island of Tasmania having an area of 26,275 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,210 miles, and the geographical position of the Continent is between 100 30'-30'-11's' South Islatitude and 1130'-5'-153'-16' East longitude; the greatest length East to West is 2,400 miles, and from North to South 1.971 miles. Its nearest

distance to England is about 17,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaties rather than rivers, and but little inland water communication. whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent inter-The Great Barrier Reef extends vals of low and sandy shore on the north, west and south. parallel with the East coast for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the strike of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the terriary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and southeastern Australia, stretching far inland from the coastal range, is a rich grazing country, admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island, which fall into the sea on the south coast; on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt; the scarcity of the natural water supply has been, however, mitigated by successful borings. Minerals comprise gold, silver, copper, iron, and coal in large quantities, antimony, mercury, tin, zinc, &c.

Climate.—The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer). The climate is extremely dry, but, except in the tropical const-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

GOVERNMENT.

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Executive Council of nine Ministers of State and such honorary Ministers who may be appointed thereto. The Constitution rests on the fundamental law of March 16, 1898, ratified by the Imperial Parliament on July 9, 1900; and the Commonwealth was inaugurated on Jan. 1, 1901. Under the Constitution the Federal Government possesses limited and enumerated powers as surrendered by the federating States, the residuum of legislative power being in the Governments of the various States. Briefly stated, the enumerated powers include authority overcommerce and navigation, finance, defence, posts and telegraphs, census and statistics, and conciliation and arbitration in extra-State industrial disputes; with authority to assume the control of railways and lighthouses, marriage and divorce, emigration and immigration, currency and banking, and weights and measures.

Commissioner, Commonwealth Railways, N. S. Rell.

#### THE LEGISLATURE.

The Federal Parliament consists of a Senate and a House of Representatives. The Senate contains 36 members, six from each of the Original States, elected for six years by universal suffrage. The *House of Representatives*, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of g. Representatives for each State. The House of Representatives, reso, is made up of ay for New South Wales, az for Victoria, re from Queensland, 7 from South Australia, and geach from Tasmania and Western Australia, and consists of members of the Liberal, Labour, and County Parties.

President of the Senate, Hon. Thomas Givens.

Speaker, House of Representatives, Hon. Sir
Elliott Johnson, K.C.M.G.

### THE JUDICATURE.

There is a Federal High Court with a Chief Justice and 5 Judges, having original and appellate jurisdiction, subordinate to the final Appeal Court of the Empire, the Judicial Committee of the Privy Council.

Chief Justice, Rt. Hon. Adrian Knox, P.C., C. M.G. Judges, Hon. Isaac Alfred Isaacs; Hon. Henry Bournes Higgins; Hon. Frank Gavan Duffy; Hon. George Edward Rich; Hon. Hayden Erskine Starke.

Arbitration Court, Pres., Hon. H. B. Higgins.

### INTER-STATE COMMISSION.

The Inter-State Commission was constituted in 1913, its members being A. B. Piddington, K.C., and S. Mills, C.M.G. (acting). Secretary, A. (i. Brown, LL.B.

#### DEFENCE.

On June 30, 1918, there was a total membership of the Defence Force of 463,354. The Expeditionary Force 93,464, Milliary force in Australia 209,328, 29,877 riflemen and 90,988 cades. The expenditure on Defence (excluding War expenditure) in 1917-18 was £1,138,893, this does not include Navy expenditure, the Estimates for which in 1917-18 amounted to £4,12,39s. The total expenditure on defence, including war expenditure, was estimated at £ 202,270,914.

#### HAVY.

Under the Australian Defence Scheme, the Commonwealth provides and maintains certain ships of war, which will form an Australian ships of war, which will form an Australian squadron of the Boyal Navy, under the command of a Commonwealth officer in time of peace, and an integral part of the Eastern Fleet of the Boyal Navy in time of war. Ships of the Boyal Australian Navy are known as H.M.A.S. (Fig. Majesty's Australian Ship), and served with the Boyal Naval forces throughout the war. The Commonwealth fleet consists of the Australia, Melbourne (flag-ship), Syding), Erichans, tratia, Melbourne (flag-ship), Sydney, Brisbane, a sloops, 6 destroyers, and 6 submarines. E. M. A.S. Sydney destroyed the German cruiser. Emden at tooks Island on Mev. 9, size. The.

personnel of the fleet is mainly Australian in character, although still supplemented to some posed of members of the Citizen Naval forces, section of the Commonwealth Compulsory Military Training System

### Army.

By a Federal Law of rozo military training is compulsory on all male citizens between the ages of 12 and s6-in Cadet Corps 12-18, and Citizen Soldiers 20-26, with short periods of training in the field. The Peace Effective is about 220,000 of all ranks; the War Establishment shout 127,000 upwards. The Common-wealth had, up to the end of the Great War, enlisted no fewer than 409,613 men, fully equipped for service in the war. New South Wales, 160,699; Victoria, 110,661, Queensland, 56,795; South Australia, 34,390; West Australia, 31,932; Tasmania, 15,138. The Australian forces, who are unrivalled as mounted infantry, have behaved with the greatest gallantry whenever engaged with the enemy. To Aug 5, 1918, their War record was 36 Fef., 370 D.S.O. (14 DRIS), 1.358 M.O. (48 DATS), 920 D.C.M. (10 DRIS), 5,206 M.M. (167 bars and a double bars), sas foreign decorations.

The total cost of the War to the Commonwealth Government from August, 2924, to the end of March, 1929, was nearly £350,000,000, of which amount upwards of \$34,000,000 was charged against revenue, and it is computed that, when the work of repatriation has been completed, and deferred pay and pensions provided for, the War disbursements of the Commonwealth will ggregate some £450,000,000, or £90 per head of the population.

### FEDERAL FINANCE.

The Revenue and Expenditure of the Commonwealth for the years 1915-16 to 1918-19 (and estimates for 1919-20) are stated as follows :-

Years.	Revenue.	Expenditure	Balance repayable to States
1915-16 1916-17 1917-18 1918-19 1919-20	30,76a,816 34,067,434 36,839,868 44,716,918 46,346,600	81,886,300 84,775,783 83,457,600 49,570,800	6,346,995 6,870,419 6,340,374 6,454,333

The Customs and Excise Revenue is collected by the Commonwealth and partly repaid to the States at the rate of ags. per head of the population.

### DEBT.

The Commonwealth has now undertaken responsibility for the Northern Territory Debt and the Port Augusta-Coodnadatta Railway Debt. the Port Augusta Coognagates and any whose combined amounts were £4,192,171 at June 38, 1929. The other State Debts remain at the charge of the State Governments. The total of the Commonwealth Public Debt on June 20, 1928, 1938, 1938, 1938, Adding the June 30, 2920, was £235,000,000. Adding the indehtedness of the States to that of the Federal Government, the total public debts of Australia amount to about £700,000,000, or about £135 per head of the population.

#### COMMUNICATIONS.

The total length of Government (and private) railways open at June 30, 1936, is stated as follows, the private lines being included in the totals and shown in parentheses :

State.	1168 ODE	m.
New South Wales Victoria Queensland South Australia Western Australia Tasmania	6,841	(345) (71) (2,378) (39) (973) (809)
Kadarel Tamitary		

Northern Territory .....

Total...... 25,657 (3,009)

The gross earnings of all Government lines in 1918-19 were £25,306,781, working expenses £19,003.633, and net earnings £6,303,148, being at the rate of s. 4d. per train mile, and representing a return on the total cost (£224,922,708) of a 8 per cent., as against 3'os per cent. in

1917-18.
The great trans-continental railway from West to East, linking up Kalgoorlie in Western Australia with Port Augusta in Spencer's Gulf, a distance of x,osx miles, was completed in 1917, and the first mail train made a successful run through on as October of that year. A scheme is under consideration to connect north and south by a line from Katherine River (Northern Territory) to Oodnadatta (S. Aust.), a distance of r,oxx miles.

Shipping.—The entrances and clearances of vessels engaged in oversea trade at the various Australian ports in the six years 1912-1918-19 were as follows (tonnage in brackets):

Cleared. 1 ear Entered 1913 . . . . . 2,035 (5,163,357) 1913 . . . . . 2,014 (5,371,531) 1914-15 . . . . . 1,568 (4,174,985) 2,017 (5,111,957) x,97x (5,830,427) x,643 (4,484,303) x,670 (4,868,838) x,500 (3,843,280) 1915-16 . 1,654 (4,269,484) 1,486 (3,851,292) 1916-17 ..

All religions are free. gions are free. There is no State About three-fourths of the people are Protestants, the members of the Church of England in New South Wales, according to the Census of sprt, numbering 724,667; Roman Catholics numbering 424,667; Roman Catholics numbering 424,686, Presbyterians 823,009, Methodists 222,300, Congregationalists 25,556, Baptists 20,679, Salvation Army 7,473, and Jews 7,660.

Payments to ministers ceased in 185c, and since that year they have been restricted to those then in receipt of the subvention. In 1933-18. the amount paid was only 2 set to r recipient.

#### PHYSIOGRAPHY.

Relief.—The Eastern or coastal district is traversed by a mountain range known as the Great Dividing Range, which is called locally the Muniong Range in the south—the highest points being Mount Kosciusko, 7,328 feet, and Townsend 7,328 feet)—in the centre the Blue Mount tains, and in the North the Liverpool Range and New England Range, the last-named continuing across the Queensland border.

Rivers.—The eastern or coastal district is watered by the Tweed, Brunswick, Richmond, Clarence, Bellinger, Macleay, Hastings, Manning, Wollomba, Karuah, Hunter, Hawkesbury, George, Shoalhaven, Clyde, Moruya, Tuross, Bega, Towamba, and Snowy Rivers. The western portion of the country is not well watered, but immense reservoirs are being constructed for irrigation purposes, and many artesian lores have been laid down The Darling and the Murrumbidgee are both tributaries of the Murray, which has a total length of s, 310 miles, 1,200 miles forming the boundary between New South Wales and Victoria.

Climate.—The climate is dry and very healthy. At the capital (Sydney) the average mean shade temperature is 63 x ; the mean temperature in the shade for the north coast is 66° to 60°. south coast 57° to 63°, northern tableland 54° to 60°, southern tableland 56°. Western slopes, the mean annual temperature ranges from 60° in the north to 60° in the south; in the summer from 81' to 74", and in the winter from 33" to 42". Western Plains from 69" in the north to 62" in the south; in the summer from 83° to 74°, and in the winter from 53° to 45°.

### · GOVERNMENT.

New South Wales was first colonised as a British possession in 1768, and after progressive settlement a partly elective legislature was

• In spec a project was revived for the creation of a new State in North-Eastern N.S.W., with an area of Specs square miles and a popu atton of seasos. The boundaries of the proposed state are the Queenshand berder from Goodoogs to the coast on the N. and a line from Goodoogs across the Barting River to Newcastic inclusives on the south-west. The proposal has not been aanctioned by the Legislature.

## THE LEGISLATURE.

Parliament consists of two Houses, the Legislative Council and the Legislative Assembly. The Legulative Council consists of not less than ar members (7s in September, 1930), appointed by the Crown for life. Members are not entitled to remuneration, but travel free on the State railways and tramways. The Legislatine Assembly consists of 90 members, representing 24 electoral districts. Each member of the Legislative Assembly receives £500 per annum, and members travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. The Women's Logal Status Act, 1918, removed draqualification regarding the election of women to be members of the Legislative Assembly With few exceptions all natural-born or naturaitsed persons at years of age, who have tesided 6 months in the Commonwealth, 3 months in the State and one month in the electoral district, are entitled to the franchise, which was conferred upon women in 1902, and was first exercised by them in 1904. At the last General Election in March, 1980, of 593,244 male electors enrolled and qualified to vote 363,115, of 612, voted, and similarly of 561,193 female electors #85,594, or 50'9, voted.

President of the Legislative Council, Hon.

F. Flowers ..... £750 Chairman of Committees, Hon. B. B. O'Conor, LL B. ..... 470 Clerk of the Parliaments, W. L. S. 740 I.000

Chairman of Committees, R. J. Stuart-Robertson ..... ...... 740 Leader of Opposition, in addition to 250 Librarian, Francis Walsh ......

### THE JUDICATURE.

The judicial system includes a Supreme Court (with a Chief Justice and six Puisne Judges), an Industrial Arbitration Court, District Courts Courts of Quarter Sessions, Petty Sessions and Children's Courts. Trial by jury has been in force since 1824

Supreme Court.

EDUCATION.

Education.-Education is non-sectarian, compulsory between the ages of 7 and 14 years, and free, school fees in State, primary, and superior schools having been abolished in October, 1908. The total enrolment in 1918 in 3,424 State schools was 280,236, and the average daily attendance 25,790. The State expenditure on Education, Science, and Art was £2,375,330. The University of Sydney, with which 5 colleges are affiliated, including the Women's College, was incorporated in 1851. In addition to the State schools there were, in 1918, 698 private colleges, and schools, with 73,560 scholars, exclusive of many business colleges and shorthand schools.

FINANCE.

The Revenue and Expenditure and Public Debt of New South Wales for the five years ended June 30, 1919, are stated as under :-

Year.	Revenue, including Advances repuid	Expenditure, including Transfers and Advances	Public Debt.
1915 1916 1917	£, 18,946,227 19,703,518 20,522,017	£ 18,516,179 19,553,927 20,790,895	£ 187,735,405 130,514,018 138,138,347
1918	21,543,742 23,448,166	a1,519,918 a3,a33,398	152,584,693 147,174,536

To the total revenue during 1918-19, Railways and Tramways contributed £12,123,006; and other Business Undertakings, £1,833,241. A sum of £2,380,230—equal to 25s. per head of the population—was returned to the State by the Commonwealth Government, in lieu of Customs and Excise revenue collected by the latter. Revenue from Taxation amounted to £4,083,999. Included in the total Expenditure were the following:—Interest upon Paulic Debt, £975.333 (exclusive of £4.704,500 charged to Business Indertakings); Public Instruction, £3.25,599; Hospitals and Charities, £3.003,246; Business

Banking, & 9, 309,479.

Banking, & e. There were (June 30, 1980)
y banks within N.S.W., with total assets,
£15,272,435, including advances, £30,652,144;
coin, buillon, and Australian Government Rotes, com, builton, and Australian Government Ruces, £32,484,7ax; and Habilitles, £766,608,799, in-cluding deposits, £825,272,250. The savings bank deposits on June 30, 1780, smouthed to £49,288,529,representing 2,622,823 depositors, £82,926,529, Excluding Cuartal trade, a servelingis entered ports of N.S.W. during 2926–20, the het

each 2,600 tonnage being 5,427,000; the clearances were 2,277 vessels of 5,227,270 net tonnage. Sydney is the chief port. In 222-20 the shipping entries, including coastal, were 7,242 vessels of 5,30,364 net tounage. The dock accommodation includes four large graving docks, five floating docks, and six patent slips.

Railways.—The railways and tramways of New South Wales, with the exception of a few short South waies, with the exception of a rewainter lines, representing about 127 miles, are controlled by the State. At June 30, 1200, the mileage of the State railways open for traffic was 5,015, the capital cost amounted to £79,328,927, and the net earnings for the year 120,200 to £3,512,863, or 36. 2d. per train mile. There were also 256 or 36. 2d. per train mile. ### 18. No. 10 and many and the capital cost being #5.765.548, and the net earnings £395.676, or 3/d, per tram mile.

The population to each mile of railway line

open was 40s, and the area 6s square miles.

Posts, Telegraphs and Telephones. —The postal, telegraphic, and telephonic services are adminitiered by the Federal Government. In 1928-19 there were 2,599 post offices in New South Wales. The postal matter carried included 240,501,473 letters, postcards, and registered articles, 63,367,875 newspapers, as,864,897 books, packets and parcels, and 7,936,453 telegrams, including 470,702 cablegrams, were received and despatched. The telephone line connections numbered 65,734.

#### TRADE.

The oversea imports, exclusive of gold, into New South Wales during 1919-so were valued at £43,258,456, and the oversea exports, exclusive of gold, at £53,543,915.

#### PRODUCTION AND INDUSTRY.

Agriculture is one of the principal industries of the State; 3,893,602 acres, excluding areas double-cropped, are under cultivation, producing during the year ended June 30, rars, 18,325,000 bushels of wheat, 2,031,927 bushels of maize, 1,273,732 bushels of oats besides other kinds of grain, with 30,356 tons of potatives and 20,932 cwit, of dried leaf tobacco. Sugar-cane to the extent of 105,334 tons was crushed; and 555,790 gallons of wine, and 1,510,346 bushels of citrus fruit, and 250,439 cases of bananas; almost every kind of fruit and vegetable may be grown. The area sown for wheat for the year rays—so was 2,40,669 acres, which yielded 18,325,000 bushels. The total extent of land alienated and in process of alienation on June 30, 127, was 66,077,25 acres, while the area of land leased for pastoral occupation and homestead, mining, and other purposes at the same date

was 113,476,973 acres.

Live Stock.—The great plains are admirably adapted for sheep-farming, and several breeds of sheep, including the celebrated merino, were introduced in 1812. On June 20, 1919, there were 782,723 horses, 570,448 dairy cows, 2,320,288 all other cattle, 37,381,874 sheep, 299,648 pigs, and 1,881 camels. In 1928-29, 295,672,000 lb. (stated as in the grease) of wool were produced, in additional cattles of the second sec tion to 488.650 cwt. of tallow, 65.658,gs lb. butter, 5,98a,zao lb. cheese, and z5.80z,666 lb. bacon and hams. During 1928-19 there were 129,301 persons permanently employed in rural occupations, 172,973 being males, and 25,288 females.

Minerals.—The goldfields were discovered in ngs. Coal, coke, copper, silver, lead, zinc, bismuth, tin, iron, antimony, asbestos, platinum,

alunite, wolfram, scheelite, molyhdenite, cohalt, marble, and kerosene shale, diamonds, rubies, opals, and other precious stones are also found. The total value of minerals raised during spin was £9,445,059, onal accounting for £3,425,565, silver, silver lead and ore £1,323,665 and gold £279,666. The mining industry gave employment to 32,452 minera during the year.

\*\*Manufactories and Works.\*\*—In 1918-19 there

were 5,460 manufactories and works; the employees numbered 127,591, of whom 96,884 were males and 30,707 females, the amount of £16,957,919 being paid in salaries and wages. \$16,957,039 being paid in sataries and wagon Male workers received on an average £154,95.7d. and females £64,762. rd. The capital value of lands, buildings and fixtures amounted to £14,753,557, and of machinery and plant £23,651,852. The machinery in use represented 5=3,652, sgs. The machinery in use represented ays,493 h.p., including steam, 182,612 h.p., electic, 74,859 h.p., and gas, ze,asp h.p. The value of goods manufactured and of work done was £104,803,018; materials used, £69,737,452, and fuel consumed, £2,298,041; the production, i.e.,

value added to raw materials, was £32,767,525.

The principal products of the factories during

### INDUSTRIAL ARBITRATION.

Matters relating to the conditions of industrial employment in New South Wales are determined by a Court of Industrial Arbitration, which is empowered to make awards fixing the lowest rates of wages, the hours and times of work, rates of payment for overtime, &c., and the proportionate number of apprentices and improvers in any industry, and granting preference of employment to members of any trade or industrial union of employees. Industrial agreements between employers and employees may be enforced as an award. Awards were until recently made by subsidiary tribunals known as Wages or Industrial Boards, constituted for each industry, but their functions are now absorbed by Judges of the Industrial Arbitration Court. At June 30, 1920, there were 342 awards and 98 industrial agreements in force. The industrial laws provide for the registration of industrial unions of employers and employees, and for mediation in industrial disputes. Under certain conditions strikes may be recognised as lawful, except strikes by Government employees, or by persons engaged in military or naval contracts, or by employees in an industry of their the conditions are regulated by award or industrial agreement; but when an award has been in operation for twelve mentic, the employees may decide by secret, ballot to withdraw from its conditions.

When a strike occurs or is contemplated, the Minister for Labour may order a secret ballot to ascertain if the majority of the employees favour a strike.

A "Board of Trade of New South Wales " has Been constituted in zers with extensive powers regarding industrial matters, one of its functions being to declare annually the rate of living wage fo. adult employees of each sex, to be used as a standard by the Court in determining rates of WEGGS.

Industrial matters which extend beyond the limits of one State are determined by the Commonwealth Court of Arbitration and Conciliation.

#### LOCAL GOVERNMENT

For purposes of Local Government, with the exception of an area of 125,000 square miles in the sparsely-populated western division, the State is divided into x84 municipalities and x36 shires, governed by councils which are elected triennially. The councils are empowered to levy rates on the value of land, to float loans, to acquire land and works, to construct and maintain streets, jettles, wharfs, &c., to make regulations regarding cattle slaughtering, maintenance of public places, traffic, street and road lighting, public health and safety, management

of parks, &c.
The basis of rating is almost wholly on the unimproved capital value of land, which in 1918 was £94,686,224 for municipalities, including the city of Sydney, and £x09,x33,ax5 for shires. Clares Danier

700 1,100 EDUCATION.

Primary Education is compulsory, secular and free between the ages of 6 and 14, there being 254,033 children on the registers in 1917, the average attendance being about 63 per cent. Secondary Education is principally under private secondary Internation in Internation under investigation control, 56, 193 pupils being in attendance at the 495 schools in 1917. There is a State-sided University at Melbourne, with four affiliated colleges (Trinity, Ormond, Queen's, and Newman) and a School of Mines at Ballarat.

FINANCE. The revenue and expenditure and State Debt for the five years ended June 30, 1914-1919, are given as follows :-

1917   11,813,879   11,795,895   76,822,116	Year.	Revenue.	Expenditure	Debt.
	1916	11,470,875	11,683,963	75,504,564
	1917	11,813,879	11,795,895	76,822,220
	1918	12,361,535	18,141,080	78,190,361

Banking, &c.—There were (Dec. 31, 1917) 17 banks, with total assets £59,727,528, within the State, and liabilities £53,229,572. The avings bank deposits at June 20, 1918, amounted to

#35 Agriculture.—Agriculture has of late years much improved, what and oats chiefly being face cultivated; the dairy industry has also made

marked progress. Of the 5,78s,634 acres under cutilvation in 2917-28, 2,630,216 were wheat crops and 293,234 cats, and 748,868 acres were cut for hay. In 1917-18, 800,068 gallons of wine were produced. The estimated value of production in 1916-17 was (including manufacturing values) £,64,702,672.

Live Stock.—There were in 1917, 534,386 milch cows, producing 64,405,711 lb of butter and 5,385,003 lb. of cheese, and 836,661 other cattle, 14,760,013 sheep, 323,150 pigs, and 514,065 horses.

Minerals.—Victoria is one of the leading gold-producing States in Australia From the disproducing scatter in Australia From Lite incovery of gold in 1851 to the end of the year 1917,
the quantity raised—90,306,702 oz. fine—amounted
in value to £308,632,652, the amount produced in
1917 being sor. 872 oz. The value of other minerals
raised to the end of 1929, consisting principally
of tin, copper, coal, and antimony, is estimated at about £10,824,067 (including building stone, &c., £5,091,737)

Trade and Industry .- Wool, gold (including specie), wheat, flour, biscuit, and butter are the staple productions of the State; and the manufactures (5,627 factories, &c., employing 218,241 hands in 2917-18) are mainly for home 218,44 hands in 1919-183 are mainly for home consumption. In 2019-18 the chief exports oversea were: Wool, £6,820,005; lead, £37,145; butter, £1,664,995; wheat, flour and bisenit, £4,381,985; leather, £328,965; skins and hides, £4,78,236; tallow, £133,577; live stock, £124,742; jams and fellies, £63,765; and milk and cream, £995,792. A trade is also springing up in preserved and frozon meats, the value of the exports (excluding bacon and hams) being £328,666 in 2917-18. The principal oversea imports of the Mate in 2917-18 were:—Iron and steel. £435,842; muchines and machinery. steel, £455,443: machines and machinery, £924,096: metals and metal manufactures, £758,800: silks, velvets, &c. £1,309,310; apparel and attire, £784,092, bags and sacks, £1.006,529; tes, £548,127, cottons and linens, £34,443,449; woollous, £769,931; and timber, £445, 154.

MELHOURNE, the chief city and seat of federal government, is an episcopal see, and is distin-guished for its 'iniversity, museum, Mint, public gardens, observatory, public library, hospital, its churches and other institutions. With its suburbs it contained on December 31, 1918, a population of 723,500 inhabitants. Other towns are Ballarat, 39,970; Bendigo (Sandhurst), 35,590 (feelong, 34,080; Castemaine, 7,76s; Warnambool, 7,400; Maryborough, 5,000; Hanilton, 4,700; and Mildura, 6,500.
Transmission of mails, approximate, 30 days.

### III.-SOUTH AUSTRALIA

The State of South Australia is situated between s6° and 37° S. lat. and rs9° and r42° E. long., the total area being 380,070 sq. miles.

### POPULATION.

Birth rate 24'27, death rate 12'01, marriage rate 8:46 per s,000 of population. Infantile mortality, 64 or per s,000 births, being one of the lowest rates in the world.

### Religions.

Religion is free and receives no State aid. At the Census, zorr, the persons belonging to the principal religious denominations were as follows :- Church of England, xx3,76x; Methodists, 200,402; Congregationalists, 23,357; Baptists, 21,863; Lutherans, 26,681; Roman Catholics, 20,964; Presbyterians, 22,967; and Church of Christ, 9,324.

### PHYSIOGRAPHY.

Relief.—The eastern portion of the State is divided longitudinally by the Flinders Range, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The western portion is partly desert which can never be brought into cultivation. The northern portion of the State, between Lake Eyre and so South latitude (the northern boundary since the transfer to the Commonwealth of the Northern Territory), is also unpromising in comparison with the fertile land that surrounds the hill country of the east.

Rivers. - Except for the Murray, which flows for some aso miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

Climate. - The mean annual temperature at Adelaide is 63°, the winter temperature (July-August) averaging 53°, and the summer (November-March) 72°. During the summer months the maximum temperature at times exceeds 200, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively

The average annual rainfall at Adelaide, derived from 8: years' record, is 20'06 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas extending from Melrose to Cape Northumberland

In the Mount Lafty Ranges the mean yearly rainfall in places exceeds as inches, while on the Adelaide plains the precipitation has failer as low as 16 inches.

#### GOVERNMENT.

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 18, 1856, the executive authority being vested in a Governor and the constitution of the consti ppointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant-Governor.

EDUCATION.  Public Education (Primary, Secondar Technical) is provided by the State, au trolled by a responsible Minister; it is a compulsory, and free; there are 954 State a with 2,437 teachers and 75,68x scholar expenditure in 722-72 was £420,000. Government grants Exhibitions and Schola carrying the holders to higher schools a University. Private schools number 166 7200 teachers and 13,200 scholars. There endowed University at Adelaide, founded i with 500 undergraduates, and 550 others at all classes are epon to women. A State. Of Mines, and Industries has also been lished, with branches at 5 coursery centre to the state of the complete of the state.	

#### FINANCE.

The Revenue and Expenditure and Public Debt for the five years ended June 30, 1916 1930, are stated as follows: -

Year	Revenue.	Expenditure	Debt.
1916 1917 1918 1919	£, 4,356,967 4,874,603 5,526,226 5,798,313 6,582,788	£,4,741,376 5,190,453 5,500,419 5,876,811 6,457,039	£ 37.743,=89 39.364,=80 40,621,480 48,650,=66 43,753,146

Most of the revenue is derived from inland revenue, railways, and territorial receipts, while most of the expenditure is on account of public works and railways, and interest on public debt

Banking.—There are 9 banking institutions in Adelaide, in addition to the Commonwealth Advisate, in additional states of the state faring a total mining of the farings and assets and assets on June 30, 1980, had 377,431 depositors with £12,494,432 to their credit. Nearly 80 per cent. of the population have Savings Bank accounts. The total banking deposits, £37,915,789, averages over £80 per head of population.

### PRODUCTION AND INDUSTRY.

Agriculture.—Of the total area about two-thirds are farmed or grazed, and 5,000,000 acres cultivated—under wheat 8,000,000 acres, hay 600,000, Oats 200,000, barley 150,000, orchards 30,000, and potatoes 4,000 acres, with 1,500,000 acres lying fallow. During the last ten seasons the quantity of wheat produced has averaged a4,000,000 bushels. English fruit, oranges, lemons, almonds, and olives are successfully grown, and fruit drying is profitable. There were 31,000 acres of vines, with an average annual production of about 5,000,000 gallons of wine; 50,000 cwt of currants, and 40,000 cwt of raisins. Considerable quantities of fruits (fresh and dried) and also wine are annually sent to oversea countries, principally the United King-dom. Brandy and other spirits are also produced The land is also very suitable for the growing of all kinds of root crops and vegetables.

Live Stock.—There were 6,625,124 sheep in 1919, cattle number 342,768, horses, 269,255, pigs 79,078, and goats 8,884

Minerals.-Copper and gold, silver, lead, manganese, hismuth, fron, gypsum, salt, phosphate took, coal, &c., are found, the total annual mineral output being valued at £1,400,000. Over £32,000,000 of copper have been produced since the foundation of the State.

Manufactures.—In 1919 there were 1,313 factories, employing 27,913 hands, the gross value of the output boing £20,201,37, and the wages paid £3,339,354. Plant, machinery, land, and paid £3,359,354. Plant, machinery, land, and buildings were valued at £7,224,227 A Department of Chemistry has been established for the purpose of fostering new industries by the utilisation of products at hand, and there is also an Advisory Board of Science and Industry.

£1,842,953; fisheries and game, £376,698; forestry, £388,511. Total value of production, £48,538,544, average £420,240 per head.

Baports of Produce.—A considerable quantity

of the produce of South Australia is experted to Great Britain and other oversea countries, the average annual value being about \$100,000,000.
The main items are wheat, flour, wool, mesta, skins and hides, butter, tallow, leather, minerals, wines, fruits (fresh and dried), jams and jellies, honey, manures.

Communication - There are 3,400 miles of railway in South Australia, x13 miles of electric trainways, 44,000 miles of roads and several good harbours. The River Murray is used for conveying the produce grown on the irrigation settlements along its banks. There are 79x post offices in the State, which transmit annually letters, 10,000,000 newspapers. 50,000,000 5,000,000 packets and parcels, and also 1,800,000 telegrams.

Ships entered and cleared number annually about a soo The larger part of the trade is with the U.K. and other British possessions, besides the U.S. France, Italy, and Japan. The export trade is equal to about 44 per inhabitant.

TOWNS.

ADRIAIDE, the chief city and capital, popula-tion (1919) 256,660, inclusive of suburbs within to miles radius Other towns are Moonta (4,000), Kadina (3,000), Wallaroo (5,500), Port Pirie (23,000), on the east and Port Augusta (3,000) on the west of Spencer Gulf, and Kapunda (s,500), Gawler (4,500), and Peterborough (2,500) on the line from Adelaide to the north, Strathallyn (x,200) in the south, and Mt Gambier (4,500) in the south-east.

Transmission of mails, approximate, so days.

### IV .- QUEENSLAND.

This State, situated in lat. 12° 40'—a9° S. and long. 138°—153° 30' E., comprises the whole northeastern portion of the Australian continent.

Queensland possesses an area of \$70,500 square miles (1 c., equal to more than 5½ times the area of the United Kingdom).

POPULATION.

EDUCATION.

Primary Education is compulsory, secular, and free. In 1917 there were 1,345 State schools and six High Schools in operation, with 4,075 teachers and an average daily attendance of 88, sgo children; and 136 private and 10 grammar schools, with ror teachers and an average attendance of 1,466. A State-aided University was established during rozo.

#### FINANCE.

The revenue, expenditure, and debt of Queensland for the five years ended June 30, 1916-20, are stated as follows : -

\ eur.	Revenue	Expenditure	Debt
1916 . 1917 1918 . 1919	*7,706,365 *7,880,893 *8,491,48a *9,415,000 *9,300,000	7,671,573 8,134,387 8,900,934 9,587,000 10,400,000	£ 56,945,836 61,303,136 63,110,786 65,581,182

Benking—The banking assets were £as,738,659, liabilities £a8 099,540. The deposits on Dec. 31, 1917, were £a8,796,326, apart from the £13,669, equal to an average of £58 or. 1nd. to each deposition) in the hands of the State Government Savings Bank, and Commonwealth Savings Bank deposits, an average of £38 as. ad. per head

PRODUCTION AND INDUSTRY.

Am iculture and Live Stock - Of the total area of 429,120,000 scres the Government have parted with the fee simple of 16,669,837, acres; under a system of deferred payment, 10,215,830 acres more are in process of alienation, and an additional area of arr, 581,200 acres leased out for sheep and out the runs, 68,298,732 acres for grazing farms and homestoads, 40,929,360 acres are held under occupation licence, 241,647 acres under gold-mining and mineral lease, 186,50s for special purposes, and 33s,421 acres perpetual lease, and sumb selections society acres, leaving 36.264, 228 practically unoccupied. Wheat, cats, and barley flourish on the Darling Downs, while a still larger area is devoted to maize, which yields an average crop of about as bushels per acre. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pine-apples, grapes, bananas, coco-nuts, mangues, appies, grapes, bananas, occ-nuts, mangues, planes, and various English fruits. India-rubber and sisul hemp plantations have also been recently started. In the year 1917, 307,714 tons of augar were produced. The live stock in 1917 included 5.326,538 cattle, 17,204,268 sheep, 733,014 horses, and 192,639 pigs. Wool, meat, and uniter are the principal products.

Furestry.—There are many varieties of fancy index sabination and products.

timber which are much utilised by cabinetmakers, &c. ; among them may be mentioned "silky oak," largely used in furniture and office

\* Including net amount received from Commonwealth on a per cupits hours

fittings; maple, a timber with a handsome grain and capable of taking a very high polish; "bean" is also much in demand for furniture; black wainut, penda, beech, crows ash, unandong, bally gum, as well as many varieties of the sucalypt, pine, cedar, and sandalwood, the latter being mainly exported to China.

\*\*Minerals.\*\*—The total mineral output in says was £4,0x2,977. There are rich deposits of geld, copper, tin, lead, silver, antimony, limestone, ironstone, and wolfram, while coal is found in several districts. The gold output in xery was several districts.

ironstone, and woirram, wante cost is found in several districts. The gold output in 1927 was valued at £761,639; silver, £40,774; copper, £3,308,333; tin, £160,600; coal, £527,360; woifram, £3,367; molydenite, £48,638; Commerce.—The chief articles of export overses,

the produce of the State, in 1915-7 were: Wool, £5,401,831; gold, £3,103; silver, £11,518; tin, £72,230; pearl and tortoise-shell, £59,904; meat, including extract, and bacon, hams, and pork, £5.839,965; green and preserved fruit, £13,940; sugar, £107; hides and skins, £275,628; marsuplal skins, £28,640; tallow, £3,686; live stock, £185,837, and borderwise £1,479,483; butter, cheese, and milk, £1,742,696; timber, £2,874

TOWNS.

CAPITAL, Brisbane. Population (2018), 181, 299. The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast —Brisbane, Rockhampton (20,283), Mary-borough (12,200), Townsville (27,200), Port Douglas, Mackay, Thursday Island, Cooktown, and Burdasberg (20,222). Other places of Importance are Ipswich (18,574), Toowoomba (24,200), Charters Towers (27,298), Gympie (22,429), and Cairns, Mt. Morgan (28,023).

Transmission of mails, approximate, 32 days.

#### V.—TASMANIA.

Tasmania is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits, about 240 miles wide, in which are situated the fronte tage inter wine, as wines at the furneaux Group and King Island, included within the State. It lies between 40° 32'—43' 36' S. lat, and 144' 36'—148' 32' R. long., and contains an area of 26,225 square miles.

#### PHYSIOGRAPHY.

The surface of the country is generally undulating forest land, with mountains from 1,500 to 5,000 feet in height, and expanses of level, open plains. There are numerous attenues, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions, and the hot winds of Australia do not reach the Island. At Hobart Australia on the mean annual temperature was 55'4', the mean temperature for Dec., Jan., and Feb. being 62'5', and that of June, July, and Aug 47'6'. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England; the average rainfall varies from so inches to zoo inches in different parts.

GOVERNMENT

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1895. In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was added. In roor Tammania became a State of the Australian Commonwealth, 9.0. The State executive authority is vested in a Governor (appointed by the Crown), aided by a Council of responsible Ministers.

#### THE LEGISLATURE

Parliament consists of two Houses, a Legislative Council of 18 members, elected for six years; and a House of Assembly of 30 members, elected by proportional representation for three years, the electors for the latter being all adult Tas-manians who have resided continuously in the State for me months; the electorate for the Council is smaller, having a property or educational qualification for both sexes.

President of the Legislative Council, Hon.

£350 150

THE JUDICATURE

There are justices of the peace and courts of petty, general and quarter sessions, and a Supreme Court with a Chief Fustice and two Pulsne Judges.

Chief Justice, Hon. Sir H. Nicholls, C.M.G. £2,500 Pursue Judges, Hons. N. K. Ewing; H.

Crisp ... each Solicitor-General, L. E Chambers .... 1,200 700 Registrar Supreme Court, W. O. Wise...... Recorder of Titles, J. W. Whyte, 1.8.0...... 575

EDUCATION.

Primary education is compulsory, secular, and free, there being 483 State schools in zone, with 38,399 children on the registers. Secondary education is also provided by the State (4 high schools with z,z39 scholars), and by private endowment. There is a University at Hobart, and technical substantial and the state of the schools. and technical schools at Hobart and Launceston.

FINANCE.

The revenue and expenditure and debt of Tasmania for the five years ended June 30, 1914-1919, are stated as follows:---

Year	Revenue	Expenditure.	Deht.
1915 1916 1917 1918	1,369,368 1,503,047	£1,384,149 1,340,711 1,408,893 8,459,748 1,644,518	£13,133,046 13,908,913 14,671,640 15,137,355 15,881,881

Banking.-In 1918 the banks of issue had total assets £7,909, x86; the savings bank deposits on Jan. 1, 1919, were £3,089,482.

#### PRODUCTION AND INDUSTRY.

Agriculture and Live Stock .-- Of the total area of z6,778,000 acres, on March z, 1929, 254, 209 acres were under crops and 666,954 under artificially sown grass; wheat, rright acres; while rigogody acres (exclusive of mineral land) were leased from the Crown for pastoral purposes. The live stock on March 31, 1919, included ar8.334 cattle, z.341,924 sheep, 44,325 pigs, and 41,225 horses. The wool clip in 2919 was estimated at 10,279,9981b. Tasmanian blankets command very high prices in the commercial world. Fruit of all kinds and

of the finest quality is grown in abundance.

Forestry.—The forests of Tammania abound in
the most beautiful cabinet woods and the largest size timbers, adapted for every variety of pur-

size timbers, scapted for every variety of pur-pose. In grapabout gs.809, reg super ft., estimated at about \$322,374, were cut by the saw mills. Minerals.—The chief minerals produced are copper, tim, silver, lead, osmoudium, coal, wolfram and schullte, gold and zinc; over \$4,302 acres have been taken on mineral leaser, and

mines of both lode and stream tin are being worked in the north. Coal of a good quality, and in easily secessible positions, is very generally distributed over the island.

Towns

CARITAI, Hobart. Population (1919), 50,000.
Other towns are Launceston (pop. 19,000).
Devouport, Zoehan, Ulverstone, Latrobe, Waratali, Westbury, Longford, Burnie, and Queenstown.

Transmission of mails, approximate, 32 days.

### VI .-- WESTERN AUSTRALIA

Includes all that portion of the continent west of 120° E. long., the most westerly point being in rss gs' E. long., and from rs' so' to 35'8' S. lat.
Its extreme length is r, soo miles, and r, coo miles from east to west, and its total area 975,900 aquare miles

Physical Features.—Large portions of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,000 ft.) in the north-west division or the Stirling Range (5,600 ft.) in the south-west. The greater part of the far interior may be described as a great tableland, with an altitude of from s,000 to a,ooo ft. above sea-level, the surface of which consists of large areas of sand-dunes, varied by wide stretches of clayey soils. Long, straggling tivers, broken during the summer into a series of pools, cross the country as far inland as the hills extend, widening in many cases nearer the coast into large sea-estuaries. Of the area of Western Australia, which is equal to more than half that of European Russia, probably about three-fourths is suitable for pastoral purposes, immense tracts having already been proved emiuently so. Some 60,000 square miles at least are equally fitted for agricultural purposes, more especially for the production of wheat, wine, and fruit, and considerable areas are already under cultivation. Gold, coal, and other minerals in abundance are found in many parts, and wide stretches of land are covered with forests of great commercial value.

POPULATION.

Year.	Males.	Females.	Total.
1915 1917 1917 1919	191,304 159,998 198,701 261,464 196,908	146,712 148,806 150,722 151,983 154,758	318,016 308,806 309,483 313,447 331,660

The apparent decrease in the male population after 1914 existed, of course, only in a technical sense, since it was mainly due to enlistment of volunteers for the war. The total number of man who enlisted in the State during the course of the war was 34,323, and of these sa,565 returned.
The settlement of the soldlers in suitable coupations has been vigorously pushed on since the end of the war. The tide of immigration from the United Kingdom and spewhere has again set in, United kingdom and disconsist as again set in, and in view of the unlimited scope Western Australia offers for further astitement, the Government is doing its utmost to encourage it. It is confidently expected that a better knowledge of the great resources of this say of very meagerly peopled part of the limptre will meet and more

attract large numbers of suitable settless from Great Britain and other populous countries, par-ticularly as the Western Australian Government is again offering every inducement to the book has immigrant.

Matural Increase of the Posnic.

Year	Births,	Deaths.	Marriages.
2915 2916 2917 1918	9,017 8,563 7,88s 7,106 6,937	a,99a 3,465 a,769 a,833 3,599	a, g8z a, 26g z, 6ez z, 6ez a, 294

### Religions.

There is no State aid to religious. At the Census of zorr there were zog,435 persons belonging to the Church of England, 35,505 Roman Catholics, 34,348 Methodists, and s6,607 Presbyterians.

### PHYSIOGRAPHY.

The coastal regions of the west and of the north are undulating, with an interior slope to the central desert of Australia. The Darling the central desert of Australia. The Darling and Hamersley ranges of the west have a western slope to the Indian Ocean, into which flow many streams, notably the Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Fitzroy flows from the Leopold range into the Indian Ocean, and the Drysdale and Ord into the Timor Sea.

Climate.—The average temperature of Perth (lat. 32° S.) for the past 23 years was 64°, while the mean for the barometer for 25 years was o os inches. There are wet and dry seasons, the former lasting from May to October. The total rainfall at Perth during zero was 37 ce, during 1911 23'38, during 1912 27'85, during 1913 36'36, during 1914 20'21, during 1915 43'61, during 1916

during 1914 so'sz, during 1913 43'sz, during 1918 39's and during 1919 45'64, during 1918 39's and during 1919 39'66; the average for the past 44 years being 33'6a.

The climate is one of the most temperate in the world, especially in the south-western portion, where expectative cold is never and excessive that heat very rarely known. The summer heat, which is mostly dry, with hardly any rainfall, is during the greater part of the hot season relieved by cool sea-breezes in the afternoon. The winters are rainy, but with occasional dry spells of perfect weather.

### GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1879 it was granted a partially elective legislature. In 2820, responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present conand a Legislative Assembly. The present constitution rests upon an Amending Act of rigg, further amended by the Constitution Acts Amendment Act, pgr; the Executive is vested in a Governor appointed by the Crown and added by a Council of Ministers.

### GOVERNOR.

### THE LEGISLATURE.

Parliament consists of a Lapicistive Council of a members elected for a years, and a Lapicistive Acembly of a members elected for a years by universal shult suffrage; the electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration

President of the Legislative Council, Hon.

W. Kingsmill, B.A.
Speaker of the Legislative Assembly, Hon. £700 George Taylor .....

### THE JUDICATURE.

There are magistrates' courts and general and quarter sessions, and a Supreme Court with a Chief Justice and three Puisne Judges. Chief Justice, Hon. Sir R. F. Macmillan £3,000
Putene Judges, Hons. R. B. Burnside,
J. Rooth, and J. A. Northmore.....each 1,700

### EDUCATION.

Education .- Education is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There are a training college, technical schools, a school of mines and a Goldfields High School at Kalgoorlie, a modern school, and a University. The total amount expended on education during the year ended June 30, 2300, was £427,830 (including the University, £23,300).

It has been consistently the object of successive for the consistent of the consistent of successive for the consistent of the consistency of the consistency o

sive Governments to place within the reach of each child in the State every advantage of education, from the kindergarten to the university.

### FINANCE.

The revenue and expenditure and debt of the State for the g years ended June 30, 1916 1980, are stated as under :—

Year	Revenue.	Expenditure.	Debt.
rgr6 rgr7 rgr8 rgr9	5,356,978 4,577,007 4,66a.536 4,944,850 5,863,501	£, 5,705,201 5,276,764 5,388,279 5,546,865 6,531,725	29,239,676 40,914,826 42,304,002 43,637,076 46,822,003

Banking.—There were, including the Commonwealth Bank of Australia, 8 cheque-paying hanks, formerly banks of issue, in the State on June 3, rose, with total assets £15,505,27 and lightlities £15,775,185. The amount due to depositors in the State Savings Bank at June 30, rose, was £5,730,005; in the School Savings Bank, £45,381, and in the Commonwealth Savings Bank the amount due to denositors in Western Australia and in the Commonwealth Savings Skall the amount due to depositors in Western Atturalia on the same date was £1,473,301. The combined amounts due to State Savings Bank depositors and State School Savings Sank depositors, on June 30, 1922, averaged £18 784 per head of the population, whilst the amount due to Commonwealth Savings Bank depositors on the same date averaged £4 195 per head of the propulation population,

Wer France. The public constitutions as Western Australia to a variety of War France up to June : a, 1930, tetalled approximately d. 148, 195, or considerably own 1,2 per head of the mess population during the war period.

### PRODUCTION AND INDUSTRY.

Agriculture and Lies Stock.-Ut the total area (des, plt. les acres) interpres acres were under crops in 1919-1910, wheat for grain accounting for non-tier acres; large areas of good wheat-grow-ing soil exist in the southern districts. The live stock included \$80,644 entite, 6,697,951 sheep, 58,260 pigs, 31,986 goats, and 274,929 horses. There were about 2,000 acres of vineyards.

Land Settlement and Auriculture. - It is only a few years since the immense capabilities of the State as one of the world's potential great wheat-producers were more generally realised In those few years the area under wheat for grain has increased annually by leaps and bounds, the acreage in 1988 being only 279 609, whilst in 278 the acreage in 1987 from 1975, owing to the war, a temporary retrogression has set in, the acreage in 1988 being the 1988 being the acreage in 1988 being the acreage in 1920 being 1,041,827. Fruit-growing, prior to the war, was rapidly creating a considerable export trade to foreign markets. Large numbers of English and other immigrants were then annually settled on the still unoccupied agricultural areas of the State. It is anticipated that, with the energetic policy of development now once more initiated by the Government, land settlement will progress even more rapidly than in former years, and that Western Australia will then absorb a constantly increasing stream of immigrants of immigrants A very large portion of the south-western division of the State, containing many millions of acres, is especially suitable for wheat-growing, whilst the hills of the Darling Range and many other portions of the State produce grapes and other excellent fruit in the greatest variety.

Manufacturing Industries. - There were on December 3z, zo18, a total of 939 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed by them was 14,030, as against 18,799 in 1914, the highest number previously eached. The combined output of these establishments was computed at £8,399,262

Forestry.-The forests are among the most extensive within the Commonwealth, and contain some of the very finest hardwoods in the world. Two of these, jarrah (Eucotypius margi nata) and karri (Kucaluptus devernoulor), have been largely exported, and, just prior to the war, their annual export value was over one million pounds. These two timbers are eminently suitable for every kind of constructional purpose and for se in all kinds of railway rolling stock They are already supployed in these respects in Grazi Britain, India, South Africa, Egypt, and cost where. Their hardness and durability is remarkable, and the great size of the trees permit- of beams and pieces of unusually large dimensions being obtained. For furniture and decorate purposes they are also extensively employed, the beauty of the grain when pollahed long equal to that of the best Honduras maho as, he dest these trees the forests contain a wealth of hardwoods, one or other of them suitable for every purpose to which wood one he halfed. The beauty of which wood can be a latest and the ready of grain and delicus of toutking in nearly all of them recommend them to the furniture manufacturer. Sandain and Sandainen cygnorum) is peculiar to the forests, and is exported very largely to the East, its escential oil being ex-tracted locally. There are in the forests many

barks containing tannin. Some of these are exported, the trade in mallet bark prior to the war having been extensive. The transits are rich in gums and resins. An Act for their protection and management was passed in 1918, and a scheme is now being completed for the regenera-tion on scientific lines of out over areas.

Minerals.—The groups of the Coolgardie gold-fields (covering a vast portion of the interior and extending to the resth meridian), as well as other fields, are being constantly worked, the production of gold being 734,066 oz. in 1919, and 400,183 oz. in the first eight months of 1900. To the Coolgardie group belong the following geld-fields: North Coolgardie. Broad Arrow, North-East Coolgardie, Bast Coolgardie, and Coolgardie. I've total amount produced in the State from 1886 to August 31, 1920, is 33,530,702 fine 02.; of this amount the greater portion was received at the Royal Mint, Perth

Magnetic iron, lead, copper, and tin ores exist in large quantities. as also coal

Total Production.-The total estimated value of Western Australian production during 1918 was £17,710,138, distributed as follows: Agricultural, £4,757,763; Pastoral, £4,344,144; Dairy, Poultry, and Bee-Farming, £698,938; Forestry and Fisheries, £922,317; Mining, £4,265,577; Manufacturing, £2,522,299 (value added to the raw material by the production of the industrial establishments).

Industrial Legislation .- Industrial legislation has for many years included industrial arbitration, with the result that wages are not subject to the frequent depreciation prevailing in the older countries.

Trade.-The principal ports are Fremantle, Albany, Bunbury, Geraldton, and Broome. The opening of the Trans-Australian Railway in Oct xox7 has afforded another means of ingress and egress, both for travellers and merchandise. The imports chiefly consist of provisions, sugar, tea, tobacco, spirits, heer, soap, machinery, from mongery, clothing of various kinds, &c. The principal exports are of wool, gold, jarrah timber, silver, tin, copper ore, sandalwood, mallet bark for tanning, pearls and pearl-shells, hides and skins, wheat, flour, fruit, &c. The estimated value of the exports for the year ended June 30, 1980, was:—Wool, £3,937,106; timber, £465,331; sandalwood, £40,579; pearl shell, £33,863; pearls, £96,542; fides and skins, £623,067; wheat, £8,541,668; flour, £8,526,682. During 1919-30 the total imports into Western Australia were valued at £12,360,366; including The imports chiefly consist of provisions, sugar,

Australia were valued at £x2,369,386, including £x2,250,388 from the United Kingdom, and £7.409,269 from other States of Australia. The exports totalled £x5.258,30x, including £6,668,820 to the United Kingdom and £x,x46,383 to other States of Australia.

### TOWNS.

CAPITAL, Perth. Population (1919) of Metro-

politan area, including Fremantle, 144,000. Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantie.
The King's Park (approximately 1000 acres),
on a hill overlooking the city and the wide
estuarine reaches of the river, is one of unique
natural beauty. Other towns are Fremantie natural beauty. Other towns are Fremantic (including suburbs, 95,200), Albany (4,200), Kalgoorlie and Boulder (6000; Acoo), Bunbury (about 4,000), Claremont (6,000), Geraldton (3,200), Mid-land Junction (5,000), and Northam (2,200), Transmission of mails, approximate, 22 days.

## Cerritories.

## THE PARTIES TERRITORY. Nº 16

The Northern Territory occupies the centre of the Australian continent between rand-raff East longitude as far as a6° South latitude, and its administration was taken over by the Commonwealth on Jan. 1, 1911.

The area is estimated at gaz,600 eq. miles. The population on Dec. 3x, 2928, was 4,782 (ex-

clusive of aboriginals).

Part of the country is desert, but large portions of land are suitable for tropical and semi-tropical agriculture, and the Federal Government grants suitable areas rent free for the original settler's lifetime or for az years (whichever shall be longer). The staple industry is pastoral, and pigs and sheep thrive, while cattle and horses do well south of the 1sth parallel. The chief grasses are Mitchell and Flinders. Many grants have been taken up, and a considerable area has been settled and improved. Extensive meat freezing works have been erected near Darwin, which will greatly enhance the value of locally bred cattle, which litherto have been driven to other States for disposal. For the months of April to September the climate is delightful. From October to December it is hot and humid; from January to March is the wet season, when travelling becomes extremely difficult. There are thousands of square miles of first-class pasturage which will one day carry millions of sheep. The chief rivers are Victoria, Adelaide, Paly, Boper, Liverpool, Goyder, Mc-Arthur, and the Robinson. The first five are navigable from 40 to 200 miles from their entrance for boats drawing 4 feet. Pearl fishing of pools drawing a rect. Fear institute is carried on round the coast, the shell being of good quality. There are considerable mineral resources, gold, silver, lead and the being indicated, and when communications are opened up, the industry will become important.

The only railway is from Darwin to Emungalan and the samples of the pools of the constitution of the

(see miles). A further extension to the head of the Roper River (So miles) will be proceeded with in the near future, the permanent survey having been completed. The policy of the present Government is to link up the Territory with the other States by means of a trans-continental

railway.

Darwin, the seat of Government, occupies an elevated site so feet above high-water mark, overlooking Port Darwin, one of the finest harbours in Australia, and contains the offices of the Administrator and officials of the Territory. The cable owned by the Eastern Extension Company lauds at Darwin from Singapore. The town is healthy and free from malaria. The Darwin Botanical Gardens are about 11/2 miles from the town.

Acting Administrator of Northern Territory, M. Staniforth Smith.

Director of Mines, T. G. Oliver. Director of Lands, H. M. Trower.

### PAPUA.

### (British New Guines.)

The total area of the island of Papus is about arises or the same of rapus is about arises on the same of rapus is about a spirituation of rapeo. Of the total area in spirituation of rapeo. Of the total area in spirituation of rapeo area of the commonwealth, the N.E. portion (re,eec eq. miles, pop. rso,seo) was the German Colony of Kaiser Wilhelm's Land, and the W. sportion transfer ag. miles, pop. dec.ess) was part of the Nether's lands' E. Indies. An expedition of Imperial lands' E. Indies. An expedition of Imperial! Australian troops took possession of the German territory (Kaiser Wilhelm's Land) in the northon September as, 1914, and the former German possessions in Papua have been allocated to the Commonwealth. The area of the territory of Papua is thus increased to about 160,000 sq. miles; estimated native population 300,000.

The island is the second largest in the world, and less some so miles to the north of Quoens-land, between o' o' and rs' o' S. lat and between r30 go' and rs4' 3' K. long. Its greatest length is r, 90 miles, with a maximum breadth of 430 miles The islands lying near Papua, some see

miles. The islanus lying are relatively.
in number, form part of the Territory.
The island of Papus was discovered in zgrz,
the island of Papus was the Dutch. The British portion was annexed by Queensland to the Empire in 1883, but it was not then ratified by the Imperial Government. A Protectorate was, however, proclaimed in 1884, on the guarantee of the Australasian Governments of £25,000 annually, to cover the cost of administration, and "British New Guinea" was annexed by the Crown in 188

The two largest rivers of the Territory are the Fly and the Purari. The land is mountainous Fly and the Furair. Instant is mountained generally, the highest point reaching 13,390 feet, and a large portion of the country consists of forest. The climate is favourable to the cultivation of all tropical products. The sell is exceedingly fertile, but the cultivated area is exceedingly fertile, but the cultivated area is exceedingly fertile, but the cultivated area is exceedingly fertile. small. Tobacco is being cultivated and a factory : is established at Moresby. Oil has been discovered, and the petroleum industry is likely to become important. The chief exports are copra, rubber, sisal hemp, gold and copper one.

The ports of entry are PORT MORESBY, Samarai, Daru, and Bonagai.

There is an Executive Council of 6 members. who, with a non-official members, form also the

Legislative Council.

Lieutenant Governor of Papua, His Excellency John Hubert Plunkett Murray,

C.M.G., born 1861 (with allowance £450) £1,250 Govt. Sec., Hon. H. W. Champion ...... Commr. for Lands, Hon. M. S. C Smith ... Treasurer, Hon. R. W. T. Kendrick .......

## PHISIOSRAPHY

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 340 22' and 47º 18' South latitude and 162º East longitude - 173º West longitude, with several groups

of smaller islands lving at some distance from the principal group.

Geographical.—The two principal islands of New Zealand have a total length of 2,040 miles, the total coast-line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,575 ft.) The North Island mountains include are the most important. Of the numerous glaciers, the Tasman (18 miles by 14) is the largest. The North Island in particular is noted for its hot springs and geysers. most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

Meteorological.—Owing chiefly to its great length, New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels. Annual averages:—North Island, mean temperature 56° F., rainfall 48 in. (days with rain 159); South Island, mean temperature

52° F., rainfall 43 in. (days with rain 150).

### GOVERNMENT

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. Dacialus to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. On Sept. 26, 1907, the designation was changed to The Dominion of New Zealand. The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the ('rown and aided by a Council of Ministers, with a Legislature of two houses.

The Dominion centributed an Expeditionary Force for service in the field of more than noncommen, sompletely equipped, and its services in the various theatres of war were invaluable.

Commandant, Maj.-Gen. Sir E. W. C. Chaytor, E.O.R.G., K.C.V.Q., A.D.G. ...... £2,000

### Mayy.

The Maval Defence Act, 2913, provided for the establishment of a N.Z. Naval Force by voluntary enlistment for two years. The cruisers Chatham and Philomet have been handed over to the Dominion by the Imperial Government as the nucleus of a New Zealand-owned navy, to be, however, placed at the disposal of the Home Government in time of war. A number of small vessels, formerly belonging to the Australian Squadron, are located in N.Z. waters. In 1909 the Dominion presented the battle-cruiser New Zealand (18,000 tons) to the Imperial Government. The Calliope Dock, capable of docking two warships, was subsidised by the Imperial Government in 1893. N.Z. war expenditure to Mar. 31, 1920, amounted to £80,089,085.

Naval Adviser, Commr. T. A. Williams, C.B.E., R.N

### FINANCE.

Revenue and expenditure (Consolidated Fund) and debt of New Zealand for the 5 years ended March 31, 1916-1980 —

Year.	Revenue	Expenditure,	Gross Dubt.
1916	£14,507,530	£ 12,493,107	£109,637-397
1917	18,355,194	14,058,770	129,836,105
1918	20,206,222	15,120,288	150,840,055
1919	22,352,372	28,673,599	176,076,260
1920	26,061,340	23,781,924	201,170,755

Taxation by General Government.—The total taxation for the year ended March 31, 1920, was £16,851,769, representing £14 28. 9d. per head of population.

Customs and Excise Duties	 5,185,728
Land-tax	 1,557,003
Income-tax	 6.260.764

Capital value .........£386,268,130 £159,365,315

Ranking — At the end of 1939 there were six
banks of issue doing business, two of which were
New Zealand banks. Total assets, £48,615,209;
liabilities, £37,861,393; value of notes in circulation, £7,087,545.

Post-onice and private savings banks had, at

Post-office and private savings hanks had, at the close of rgrs, 679,398 depositors, having £36,529,534 to their credit.

### EDUCATION.

The State system of education is free, secular and compulsory. There were (December, 2023) and compulsory. There were (December, 2023) and compulsory are also (Dec. 2027) as private schools, with 2024 as a selection of siddition, 22 schools for the Maoria. The higher education of boys and girls in the cities and large them is carried on an 20 endowed colleges and grammar schools. The University of New Zestand (Dr which are 'arithated Auckland' University').

College, Victoria University College, Canterbury College, and the University of Otage; the four colleges having a resultents in 1918) has power to confer degrees.

## PRODUCTION AND INDUSTRY.

Agriculture and Forestry.—The total area of the two main islands is \$5,440,873 acres, and 4x,36x,373 acres of this were in occupation in 1916, this acreage representing 77,389 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. The area under wheat in 1918-19 was 208,030 acres, giving a yield of 6,357,629 bushels. An area of 172,186 acres of 0215 was threshed, the yield totalling 6,884,609 bushels; while 201,724 acres were converted to chaff, hay, or enalage. Other acreages were: hatley, 18,753; Tye-grass, 31,280; and potatoes. 29,126 An area of 436,48 acres was sown in turnips. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine.

Live Stock.—The cattle in 1919 numbered 3.035,478; sheep, 25,825,554; pigs, 235,347; and horses, 363,288. The pastures of the South Island produce the celebrated sheep of the Canterbury Plann.

Minerals.—Coal-mining is one of the largest industries, the output in 1228 being 8,034,830 tons, the approximate total output to the end of 1218 being 48,123,840 tons. Gold-mining, both alluvial and quarts, is an important industry in many districts, and rich iron ore, in the form of ironsand, has been found in Taranaki, and in the form of brown hamatite at Parapars, near Nelson.

## EXTERNAL TRADE.

The total imports and exports of the Dominion are valued as follows, for the g years rerg-re:—

Year	Imports	Exports	Total
1915	£21,728,834	£31,748,912	£53,477,746
1926	26,339,283	33 #86,937	59,626,220
1917*	20,919,259	30,683,159	51,608,418

### COMMUNICATIONS

Railways.—In March, 1920, there were 2,995 miles of Government railway lines in working order, and more under construction; and 137 miles of private lines, together with an excellent coaching system. The number of passengers carried in 1910-20 was 18,760,814 (exclusive of amounted to 6,000,277 tons. Revenue and expenditure were £5,752,487 and £4,105,067 Fespectively.

Shipping .- During 1918 the vessels entered inwards numbered \$43 (tonnage, r.s79,548), and those entered outwards \$44 (tonnage, r.320,627), exclusive of coasting vessels.

Pasts and Telegraphs.—The annual postal cir-

culation was (1918) 249,672,975 letters and postcards, 33,476,aza newspapers, 42, 307,230 books and packets, and 6,376,469 parcels, and the work is effected by 3,344 post-offices. There are 13,813 miles of telegraph line, with 50,742 miles of wire. The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 12,091,017.

## TOWNS.

CAPITAL, WELLINGTON, in the North Island.

The estimated population of the chief cities and towns was as follows (Dec. 31, 1919): Wellington,\* 200,898; Auckland,\* 244,646 Boroughs, + 8,495.

### DEPENDENCIES OF NEW ZEALAND.

Antipodes Group (49° 41' 13" S. lat., and 178° 42' E. long.) are uninhabited.

Auchiand Islands lie about age miles south of

Bluff Harbour, in go 22' S. lat., and 166° 13' E. long. The islands contain several good harbours, but are uninhabited.

Bounty Islands (47° 43' S. lat., 179° o' 30" E. long.) are uninhabited.

Campbell Leland is uninhabited. Chatham Islands, between 42° 36' S. lat. and 175° 40'-177° 25' W. long., have a population of are

† Suburban area.

Buropeans and age Maoris and half-castes. They support large flocks of sheep and some cattle.

Cook Islands Administration.—The Cook and

other islands, annexed to the British Empire in other islands, annexed to the British Empire in October, 1900, and included in the boundaries of New Zealand since June, 1902, consist of the islands of Rarotongs, Attutaki, Mangaia, Attu Mauke, Mitiaro, The Herveys (Manuse and Aoutu), and Takutes. Outside the Cook group are Savage (or Niue), Palmeraton, Penniya (or Tongareva), Humphrey (or Manahiki), Religion (or Rakaanga), Danger (or Pukapuka), and Suwarrow Island, which are situated in the South Pacific, between 8° to 190 S. lat. and 196° to 190° W. long. The population at the Census of 1908 to unwhered 12, 202, all excent 185 being of 1926 numbered 12,797, all except 185 being Natives. The chief products are bananas, oranges, and other tropical fruits, copra, coffee, pearl-shell, and hats (Niue). The trade is pear-is-fil, and hat (Niue). The trade is chiefly with New Zealand and the United States of America. The exports (1918) to valued at £99,485, and the imports at £216,890. Rarotonga is the chief island, with native population of s,853, and a European population of sr. The government is administered locally under the direction of New Zealand. The Federal Council of the Cook Islands, under the direction of the Resident Commissioner at Rarotonga, legislates for all the islands except Niue, which has a Resident Commissioner and an Island Council of its own. The six Arikis of Raiotonga are of equal rank and are all members of the Federal Council. Rarotonga is a place of call for the mail steamers between Sydney, N.S.W., and Wellington, N.Z., and San Francisco, U.S.A.

Resident Commissioner, Rarotonga, F. W. Platts \*\*\*\*\*\* Resident Comm., Niue, G. N. Morris .....

The Kermadec Group, between 20° 10' to 31° 30' S. lat., and 279' 48' to 279° W. kong., includes Sunday, Macaulay, Curtis Islands, and L'Espérance, and some islets. The group is uninhabited.

Nauru Island, just South of the Equator, was captured by an Australasian Expedition in 1914, and is administered by the Commonwealth of Australia and the Dominion of New Zealand. The island has a population of about 1,000. There are valuable deposits of phosphates on the island.

The Samoan Islands, consisting of the islands The Samoun Essance, consistency one instance of Savaii, Manono, Apolima, Upolu, Fansatapu, Namua, Nuutele and Nuulua (the remaining islands of the Samoan group belonging to the U.S.), have a total area of 1.000 square miles and a population estimated at 20,000. The largest islands are Savaii (660 square miles) and Heads for square miles. The largest form of the square miles of the square miles of the square miles. The largest form of the square miles of the square miles of the square miles. The largest form of the square miles) and *Upolu* (340 square miles). Upolu contains the harbours of Apia and Saluafata, of which the former is the capital. In fata, of which the former is the capital. In see, a disastrous tidal wave wrecked three U.S.A. warships and the "Eber" and "Adler" of the German Navy, H.M.S. Calliope, of the British Navy, effecting its escape. The disaster is recorded in "A Footnete to History," by R. L. Stevenson, whose home was at Valima (idear Apia), where also he is buried. The natives of the islands are Christians of different denominations including a few adherents of the Latter. tions, including a few adherents of the Latter Day Saints (Monmous). Coco-nuts (copra), dona and rubber are the citief products of the labeld. The Three Engl (discovered by Tasman by the Seast of the Symbany), in 96° 9°S. Lat und 172° 8°S" E. long., are unimbabled.

## PHYSIOGRAPHY.

Boundaries.—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, i.e., from  $34^{\circ}$  50'  $-22^{\circ}$  South latitude, and include all the British territories within those limits, with the exception of Resutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Relief.—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the fulnous Table Mountain (3,582 feet), while the Great Zwarte Bergen and Lange Bergen run in parallel lines from west to east of the Cape province. Between these two ranges and the Roggeveld and Nieuweveld to the north is the Great Karoo Plateau, which is bounded on the east by the Sneeuwbergen, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the Drakensbergen (11,000 feet), between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3.800 feet, with occasional hills or kopies. The Transvaal is also mainly an elevated plateau with parallel ridges in the Magalies and Waterbery ranges of no great height. The veld or plains of this northermost province is divisible into the Hooge Veld of the south, the Banker Veld of the centre, and the liush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered watet. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The Orange, with its tributary the Vaal, is the principal river of the south, rising in the Drakensbergen and flowing into the Atlantic between the Protectorate of South-West Africa and the Capa of Good Hope. The Limpopo, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portugues Ess.

Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other weakout.

## HISTORICAL SKETCH.

The Cape of Good Hope was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an eceni route to lands. Disc merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East I dies. In 1652 the Netherlands East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be. always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durhan now stands. Natal was then a part of the great Zulu kingdom under T Chaks. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired

responsible government.

The Transvaal was formed as the South African Republic by parties of Dutch Boers from the linglish colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government A war of nearly three years' duration was fought with great tenncity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The Orange Free State was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent

history is identical with that of the Transvanl.

### GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Ac the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony became united on May 31, 2910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transva I, and the Orange Free State respectively.

The Union Government is selsed of all State property, and the Railways, Ports, Harbours, and Cus ome are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1000 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Con aught, x.G., in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town. The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

Union of South Africa Troops.

The South Africa Defence Act, 1912, became This Act provides law on June 14, 1918. for the establishment of Defence Ferces com-Prising (x) a Permanent Force; (a) a Coast Garrison Force; (a) a Citizen Force; (4) a Royal Naval Volunteer Reserve; and (5) Special Reserves

Every citizen between the ages of 27 and 60 is liable to render personal service in time of war, and those between 21 and 25 are liable to under-go a prescribed peace training with the Active Citisen Force spread over a period of four con-secutive years. The Act states, however, that only so per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number. Citizens between the ages of 21 and 25 who are not entered f r peace training with the Active Citizen Force a o to be compelled to undergo training during these four years in a rifle association. Provision is also made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas where facilities can conveniently he arrauged

The Permanent Force—South African Mounted Riflemen-was established on the 1st April, 1913. The Union has been divided into 15 Military Districts To each Military District has been allotted various Enits of different Arms, to which the citizens entered for Peace Training in their soth and zist years are posted. Training Camps began in September, 1913

A Cadet organization is also in existence, and

Rifle Associations have been formed.

In October, 1914, a rehellion broke out, and the rehels attempted to join forces with the Germans of the neighbouring Colony. The Union forces, under the command of General Botha, met the outbreak successfully. An expedition to German South-West Africa, which followed, resulted in the surrender of the German forces on the 9th July, 1915, and the taking over of the administration of that territory by the Government of the Union.

## EDUCATION.

In the South Africa Act, Section \$5 (iii.), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils." For practical purposes it has been provisionally determined that all post-matriculation instruction shall be deemed to constitute higher education. Department of Education, under the Minister, is therefore concerned with :-

(1) The University of South Africa, established April, rgz8, as successor to the University of the Cape of Good Hope, with the following constituent Colleges—(a) Rhodes University College, Grahamstown (1904). (b) Huguer M. College, Wellington (1907). (c) Grey University College, Bloemfontein (1910). (d) Transvaal College, Wellington (1907). (c) Grey University College, Bloemfontein (1910). (d) Transvaal I niversity College, Pretoria (1910). (d) University College, Johannesburg (1910). (f) Natal University College, Pictormaritaburg (1910). (a) The University of Cape Town (1916). (a) The Schott African College—East—in succession to the South African College—East—in succession to the State of College. The Pepartment is further charged with the Teachers' First Class Certificate examination. examinations.

The total number of students at these Colleges in 1919 was 1,420. The State expenditure on higher education during 2919-20 was £187,500. Provision is made on the Vote of the Depart-The State expenditure on

ment of a grant-in-aid to the Potchefstroom University College (37 matriculated students in 2919) and to the South African Native College at Alice, Cape Province, an institution for the higher education of natives, which was formally opened in February, 1916, and has present accommodation for 48 students.

Primary Education and Education other than Higher Education.-The central direction of public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union. Rach Department is controlled by a Director or Superintendent of Education In the Cape Province practically all the schools are Stateaided. In Natal they are partly State-schools, and partly State-aided. In the Transvaal and Orange Free State they are in the main State-In all Provinces primary education is free.

Number of Schools in the Union in 1917 .- For white scholars, 4,945, for coloured scholars,

### UNION FINANCE.

The ordinary Revenue and Expenditure of the Union (exclusive of Railways and Harbour Administration) for the four years ended March 31, zozo, are stated as under :-

Year.	Revenue	Expenditure.
1916-1917	£ 18,408,615 19,657,597 21,911,029	£ 17,845,377 18,959,198 21,322,142

The Public Debt of the Union at March 31, 1919, was £ 166,367,766, composed as follows:

Rate	Funded Debt.	Floating Debt.
3% %	£, 54,104,946 86,548,711 3,000,000 35,907,878 12,470,165 20,405,767	£ 2,335,790  1,055,480 72,200 4,955,500 5,910,448
	£152,037,481	£14,330,888

PROVINCIAL FINANCE

Prior to the passing of the Provincial Rela-tions Act the four Provincial Administrations (Cape of Good Hope, Natal, Transvaal, and Orange Free State) received us revenues beyond the amount voted by Parliament by way of subsi-dies for the performance of the services and duties assigned to them. On the passing of the Act (April z, zozz) certain revenues were transferred and assigned to the various provinces, and, in addition, subsidies were voted by Parliament equal to half the normal or recurrent expenditure. The Cape Province receiv's an additional amount equal to one-half the expenditure by local bodies; Natal and Orange Free State Provinces receive additional grants of £100,000 each; and Natal receives a special grant in lieu of trading and liquor licences payable to local authorities.

The ordinary Revenue and Expenditure for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and March 200,000 for the thear warre and the thear warre and the thear warre and the trade of the thear warre and the trade of the tra

the three years ended March az, 1918, were as follows .-

Totals..... 10,266,135 ,, £3.416,244

The labour employed in coal mining in 1919 was: Natal, 709 whites, 14,048 coloured; Transvaal, 885 whites, 15,139 coloured; Cape, 8 whites, 85 coloured; O.F.S., 154 whites, 1,217 coloured; a total of 1,753 whites and 31,589 coloured.

### Silver.

There are no silver mines in the Union. The output, valued at £224,248, represents silver contained in gold bullion and base metal ores.

### Copper.

## (Tons of s,ooo lb.)

see tons of matte and concentrates, valued and, 780, were shipped from the Transvall, and tons of matte and ore, valued at 686, from the Cape. The figures for 2918 8,006 tons (\$673,483) and 2,669 tons respectively.

## Tin.

(Tons of a,ooo lb.)

z,598 tons of tin concentrates, valued at £372,928, were shipped from the Transvaal, and 32 tons, valued at £5,007, from the Cape. Union figures for 1919 are 1,630 tons, valued at £=77,9=5

### Other Minerals.

The value of the Union's production for zers of other base minerals, such as asbestos. lime, graphite, magnesite. lead, flint, &c., was \$373,964, and of miscellaneous products, such as bricks, cement, coke, tar, &c., £130,187, compared with £298,012 and £909,467 respectively for 2927.

### EXTERNAL TRADE

The total value of the Imports and Exports in the five years 1915-1919 (exclusive of specie) was as tollows -

### COMMUNICATIONS.

Railways.—The first railway in South Africa was commenced in April, 1839, the first sod being turned by the then Governor of the Cape of Good Hope, Sir George Grey. This was very shortly followed by Natal, who started the construction of a line running from Durban. Another two lines finally linked up at Heidelberg in 1893. The Cape line was opened for public traffic to Stellabosch in 1852 and to Wellington in 1853, whi e a track to Wynberg was opened to traffic in 1854. Little progress was however made in succeeding years, and it became evident that the development of the country could not be left to private anterprise. The existing Cape lines were thepsetor purchased by the Government on the

Jan. 125, 1873, and in 1876 Natal followed by acquiring the railways in that colony, increased working at once took place, and the construction of four lines was pushed inland from Cape Town, Durban, Port Elizabeth, and East London. Bloomfontein was reached in 1892, and two years later a line to Germiston linked up with the system already established in the Transvasi.

The total open mileage of Governmentowned lines at the end of March, 1919, was 9,54s miles (comprising Cape 4.24, Orange Free State 1,34s, Transvaal 2,550, and Natal 1,328), of which 3.95s miles are 3 ft. 6 in, gauge and 56 miles a ft. gauge. The capital expenditure on Government sallways up to March 31, 1919, amounted to 5.94,331,365. The gross carnings for the year ending March 31, 1919, were 5.13,382,393 and the net loss, after payment of interest, 5.855,367. Working expenditure (excluding renewals) amounted to \$10,390,375, or 67,0 per cent, of the gross revenue, as compared

with £9,379,539, or 65's per cent. of the gross revenue for the previous year.

Posts and Telegraphs.—At the end of 1919 there were in the Union 2,665 post and telegraph offices open. 113,251,801 inland letters and cards, 66,953,997 newspapers, books, and circulars were received and despatched in 1926, and 7,259,393 telegrams were received and despatched in 1929. The number of money orders issued during the year 1929 was 413,507, while 417,279 were paid; 3,285,645 postal orders were issued, and 2,529,329 paid. The revenue of the post and telegraph department was £3,27,783, and the expenditure £930,193; 12,842 miles of telegraph and telegraph sine, carrying 43,038 miles of wire, were open, and 7,527 miles of telegraph thelephone wire. The number of depositors in the Government Savings Bank on Dec. 21, 1979, was 301,979, the amount to their credit being

£7.349.108.

1. Approx.—In rgrs, 3,rs9 vessels (7,660,000 net tons) entered and 3,r70 vessels (7,665,000 net tons) cleared at the ports of the Union of South Africs.

## RAILWAYS AND HARBOURS BOARD.

The railways, ports, and harbours of the Union are administered and worked under the control and authority of the Governor-Genegal. in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners.

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board. The constitution of the Board at date is as follows:—

Chairman, Hon. Henry Burton, K.C., Minister of Railways and Harbours. Members, Sir Thomas Hyslop, The Hon. J. E. R. Rissik.

Secretary, G. W. Pilkington.

## Chief Officers.

Barticulars of the export of gold are not at present available.

Engiacon in Chief, Tohanneburg, & H. Tippeth M.A.C. B. Chief and Market M. M. Tip-Glide Mach. Relationary Bullands

Chief Mech. Bugineer, Pritoria, D. A. Hendrie, Chief Accountent, Schningsbury, C. A. Reid. Chief Raykory Standbefor, Johannesbury, R. R. Gottine.

Contring Manager, Solings estury, A. H. Simmons.

## South West Protectstate.

Administrator, Sir Edmond H. L. Gorges,

South-West Africa lies approximately between ry' x8'-aa' x8'. Let and xa' aa'-ax' E. Lorg, having an estimated area of ass, one agence-miles, and a population of phout resolve. Partiel with the cenet is a range of mountains (Genetale, organizati, Nubeb, 4.85 feet; Dayati, 6.59 feet; Awas, 8.49. feet; Schamberg, 7.64, feet, which form the western edge of the great Kalahari Plateau, the eastern edge of which merges into the Kalahari Devert. The porthern and southern boundaries are the Cunene and Grange Rivers, that with these exceptions and the Great Fish River (goo miles) there are no streams of importance in the country.

In 1980, Professor E. H. L. Schwartz, F.G.S., (Brofessor at Geology at Rhodes University College, Gushamatown), proposinded a scheme for the irrigation of Desirabeland and the Kalahari (2000, 2000 a weir-on the Gunne Siver to irrigate Ovambaland, and on the Chalse (a tributary of the Zambesi), the water of the fibre being diverted into Lake Ngami and temagraposed lake Makarikari in the Kalahari. It the acheme were to be adopted it is claimed that the present arid wastes would become green and fertile.

The northern district is known as Ovamboland, the contral part as Demaraland (or Herevoland), and the conthern parties as Great Namagualand.

and the southern parties as Great Namaqualand.

In accordance with a census taken on January

c, sec, the white population was x4, 89, and the
native appreciation (excluding Ovamboland and
the Cascivi Zinied) was 76,870. The number of
natives in the areas excluded has been estimated
to be between second and scocco. The principal
native races in the Protectorate are Hottentots,
Bushmen, Bergdamaras, Hereros, Ovambos,
and Bastards. The inhabitants are principally
Animists.

Administration.—The administration of the Protectorate has been vested in the Government of the Union of South Africa under a mandate issued under the Treaty of Peace with Germany. Arrangements have yet to be made giving full effect to the mandate, which was accepted by the Union Parliamant at the Session Extraordinary held in September, 1929.

'Agriculture and stock-raising are the principal industries. The exports (valued at £3,515,14s in 1932) include live stock, guano, horns, hides, wool, meat, ostrich feathers, copper, ore, lead, martile, and diamonds; the imports (£2,171,230 in 1933) include foodstuffs, textiles, metal, and hardware. The railways, prior to occupation by the Union Forces, were divided as follows:—(1) The Otavi line, extending from Swakopmund to Taumeb, with branches from Onguati to Karibib and Otavi to Gracification (as miles). (a) The State (Northern) railways, astending from Swakopmund-vide 3 his heavest to Karibib and Windlink (140 miles). (a) The North and Gouth Railway, extending from Windlink (140 miles). (b) The Squithers Railway, extending from Windlink to Zeedmann-hop-(134 miles). (b) The Squithers Railway, Excending from Windlink Railway, extending from Windlink Railway, extending from Windlink & Zeedmann-hop-(134 miles). (b) The Squithers Railway, Rai

extending from Suderitabuch to Keetmanshoen, with a branch from Seehelm to Kalkfontein (95 milea). These railways, together with the line from Prieska to Kalkfontein (326 miles), connecting the S.W. African railways with Distriction system, are now controlled and worked by the South African Railways Administration. The line from Prieska to Kalkfontein was constructed in connexion with the recent military operations.

The railway system in the Protectorate, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (De Aar to Nakop Protectorate border 344 miles), comprises:—

From Swakopmond the line extends to Walvis Bay (so miles), a Union port now serving the Northern portion of the Protectorate.

The Rehoboth Line (Rehoboth Station to Rehoboth S miles), is now being worked by horse-trolley; the Outjo Line (as miles from Otjiwarongo (incomplets) and the Kalkfeld Iron Line are not in use

The line Rossing to Karibib, via Jakulawater, has been uplifted.

 Privately owned lines (99 miles).

Religion — In zgrx there were z,437,688 Christians—479,835 Dutch Churches, 325,673 Anglican Communion (necluding Church of England, Church of Province of South Africa, Church of Ireland, Episcopal Church of Rootland and Episcopalism, 74,005 Presbyterians, 127,378 Independents or Congregationalists, 325,332 Wesleyans, 23,256 other Methodists, 21,506 Lutherans, 21,706 Roman Catholice, 25,332 other Christians; Mission, 22,334 Roman Catholice, 25,332 other Christians; Muhammadans 24,289, Jews 16,744; "of no religion" 1,077,998, of whom 1,047,233 were natives.

Education.—The Province is divided into as school districts, each under the ontrol of a School Board, two-thirds of the members being locally elected, and one-third nominated partly by Government and partly by Municipal or Divisional Councils. Education is compulsory for children of European extraction. The necessary grants are provided from Provincial Council revenues to supplement local contributions, which, in the case of Public Schools controlled by School Boards, amount to about one-fourth of the total expenditure, and are derived principally from school fees payable by the parents.

Aided Schools, Dec. 31, 1918, 4,794; surolutent 267,374 attendance 224,267. There are 121,378 European pupils and 129,385 non-European pupils. There are 9,527 teachers. Gyvernment

expenditure on education; exclusive of Phiher Education (for which see Union of S.A.); for 1913-14, £633,448; 1914-18, £919,495; 1915-19, £916-19, £976-194, 1917-18, £1,186,099; 1918-19, £1,433,385.

Charitable Institutions, Hospitals, Pauperism.—In the hospitals 18,466 in-patients were treated during 1977, and there were 5,685 aut-patient attendances at Government-Aided Ruspitals and 70,275 out-patient attendances at Government Chronic Sick Hospitals, making the total out-patient attendances for 1977, 185,937. There is no recognised system of poor law relef, but 1,203 persons received indoor relief during the year 1937.

Harbours and Works.—There are magnificent

Harbours and Works.—There are magnificent harbours at Table Bay (Cape Town), Port Elizabeth, East London, and Mossel Bay. There are electric tramways in Cape Town, Port Elizabeth, East London, and Kimberley.

Administration The Depoi

Administration.—The Province is administered by an Administrator, appointed for five years by the Governor-General, aided by a Provincial Council of a members (elected for three years). There is an Executive Commistee of four members in addition to the Administrator, who is Chairman of the Committee.

Local Government.—There are raf municipalities, each governed by a Mayor or Chairman and Councillors, a certain number of whom are elected annually by the ratepayers. There are 78 Village Management, Boards.

Executive Committee, C. R. Arnold; Daniel Retief; Hon. W. Ross; C. J. Langenhoven. Prov. Sec., C. L. W. Mansergh, I.S.O. ......£1,200 CAPITAL, CAPE TOWN. Total population (1911),

white and coloured, 67,170 (with suburbs, 149,461).

Capetown is 5,979 miles from Southampton; transit, 16 days.

### NATAL.

The Province of Natal comprises an area of 35,200 square miles, (including Zululand, 20,424 square miles), with a seaboard of 360 miles.

Population .	Census, 1904.	Census, rorr
Europeans	97,109	98,224
Indians and Asiatics	200,928	<b>233,439</b>
Natives	910,727	962,490
	-	

Total ..... 1,108,754 1,194,043

Census, 1018 (whites only) 121,931 (62,745 males, 59,186 females)

In 2018 the European beins registered numbered 2,024, the deaths 1,277, and the marriages 2,041. The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nineteenth century to supply the deficiency of local labour.

Education.—A University College has been founded at Pietermartizburg, and there are a government high schools, a preparatory schools, 288 primary schools for white children, 5, art school, 2 agricultural and trades school. There are also a Technical Institutes, 46 Asiable schools, 322 native schools, and as coloured schools, which rebelve Government aid, and a large number of grivate schools.

Administration.—The government is adminis-red by an Administrator, added by a Provincial Amentstraton.—In government is annual tered by an Administrator, alsed by a Frovincial Council of as mambers (elected for 3 years). There is an Executive Committee of a members.

Administrator, Hon. G. E. Plewman, C.M.G. Recontive Corresides, F.C. Hollander, J. Dyson, J. McAuslin, J. P. Whyte.

Provincial Secretary, John M. Hershensohnn.

PIRTERMARITZBURG, the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal. Total popu-lation (white and coloured), 34,645 in 1918.

In Durban (population, 2013, 74,160), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time; the average low-water depth at the entrance, the bar being no longer existent, for 1908 being 33 ft. 7 in.

Natal, 6,800 miles; transit, 20 days.

### ZULULAND.

Zululand, annexed in 1897, comprises about twothirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vrijheid districts of the Transvaal) and Swaziland. The Amaputaland Transvaal) and swamenu. The american Protectorate, created by preclamation of Nov. 22, 1897, was annexed to Zahiland on Dec. 27, 1897, was annexed to Tahila and now forms part of the Province. The Northern Districts territory (consisting of the Magisterial Divisions of Vrijheid, Utrecht, Paulpietersburg, and Bahanango) was annexed to Natal on January 27, 1903.

### THE TRANSVAAL

The Province of the Transvaal has a total area of xx0,426 square miles, about 20,000 square miles lying within the tropics. The Census of rgrr showed a population of r,686,ars, of whom 971,853 were males and 714,657 females; the population comprised 420,652 females; the population comprised 420,652 females; the whites, r,ars,845 natives, and 43,805 other coloured races. In 1918 there were 19,797 births (15,977 European), 28,687 deaths (8,122 European), and 6,867 marriages (4,498 European).
